2. Marshal M. E. Patrice Maurice MacMahon, due de Magenta, elected president, 24 May; nominated for seven years, 20 Nov. 1873.

FRANCE, ISLE OF, see *Mauritius.*

FRANCHE COMTÉ, in upper Burgundy, E. France, was conquered by Julius Cæsar, about 45 B.C.; by the Burgundians, early in the fifth century, A.D.; and by the Franks about 534. It was made a county for Hugh the Black in 915, and received its name from having been taken from Renaud III. (1127-48), and restored to him. By marriage with the count's daughter, Beatrice, the emperor Frederick I. acquired the county, 1156. Their descendant, Mary of Burgundy, by marriage with the archduke Maximilian, conveyed it to the house of Austria, 1477. It was conquered by the French, 1668; restored by the treaty of Aix la Chapelle, 2 May, 1668; again conquered; and finally annexed to France by treaty, 1678.

FRANCHISE. A privilege or exemption from ordinary jurisdiction, and anciently an asylum or sanctuary where the person was secure. In Spain, churches and monasteries were, until lately, franchises for criminals, as formerly in England; see *Sanctuaries.* In 1429, the ELECTIVE FRANCHISE for counties was restricted to persons having at least 40*s.* a year in land, and resident; for recent changes, see *Reform.*

FRANCIS' ASSAULT ON THE QUEEN. John Francis, a youth, fired a pistol at queen Victoria as she was riding down Constitution-hill, in an open barouche, accompanied by prince Albert, 30 May, 1842. The queen was uninjured. Previous intimation having reached the palace of the intention of the criminal, her majesty had commanded that none of the ladies of her court should attend her. Francis was condemned to death, 17 June, following, but was transported for life. He was liberated on ticket-of-leave in 1867.

FRANCISCANS. Grey or Minor Friars, an order founded by St. Francis d'Assisi, about 1209. Their rules were chastity, poverty, obedience, and very austere regimen. About 1220 they appeared in England, where, at the time of the dissolution of monasteries by Henry VIII., they had fifty-five abbeys or other houses, 1536-38.

FRANCONIA, or **FRANKENLAND** (on the Maine), formerly a circle of the German empire, part of Thuringia, was conquered by Thierry, king of the Franks, 530, and colonized. Its count or duke, Conrad, was elected king of Germany, 912; and his descendant was the emperor Conrad III., elected 1138, and another duke. Franconia was made a distinct circle from Thuringia in 1512. At its subdivision in 1806 various German princes obtained a part; but in 1814 the largest share was awarded to Bavaria.

FRANCO-PRUSSIAN WAR originated in the emperor of the French's jealousy of the greatly increased power of Prussia, through the successful issue of the war with Denmark in 1864, and with Austria in 1866. The German Confederation was thereby annulled, and the North German Confederation established under the supremacy of the king of Prussia, to whose territories were further annexed Hanover, Hesse-Cassel, Nassau, Frankfort, and other provinces. This great augmentation of the power of Prussia was mainly due to the energetic policy of count Bismarck-Schönhausen, prime minister since Sept. 1862.

In a draft treaty, secretly proposed to the Prussian government by the French emperor in 1866: "1. The emperor recognises the acquisitions which Prussia has made in the last war? 2. The king of Prussia promises to facilitate the acquisition of Luxemburg by France; 3. The emperor will not oppose a federal union of the northern and southern states of Germany, excluding Austria; 4. The king of Prussia, in case the emperor should enter or conquer Belgium, will support him in arms against any opposing power; 5. They enter into an alliance offensive and defensive."

[This draft treaty was published in the *Times*, 25 July, 1870. After some discussion, its authenticity was admitted; count Bismarck asserting that it emanated entirely from the French emperor, and that the scheme had never been seriously entertained by himself.]

In March, 1867, a dispute arose through the French emperor's proposal for purchasing Luxemburg from the king of Holland, which was strongly opposed by Prussia, as that province had formed part of the dissolved Germanic Confederation; and the affair was only settled by a conference of the representatives of the great powers in London, at which the perfect neutrality of Luxemburg was determined, together with the withdrawal of the Prussian garrison and the destruction of the fortifications . . . . . 7-11 May, 1867

Prince Leopold of Hohenzollern-Sigmaringen (connected with the Prussian dynasty, and brother of Charles, prince of Roumania), consented to become a candidate for the throne of Spain, 4 July, 1870
This was denounced by the French government. Threatening speeches were made in the French chamber by the duc de Grammont, the foreign minister, and eventually, after some negotiation and the intervention of Great Britain, prince Leopold, with the consent of his sovereign, declined the proffered crown . . . . . 12 July, "
The submission did not satisfy the French government and nation and the demand for a guarantee against the repetition of such an acceptance irritated the Prussian government, and led to the termination of the negotiations, the king refusing to receive the count Benedetti, the French minister . . . . . 13 July, "
Energetic but fruitless efforts to avert the war were made by earl Granville, the British foreign minister . . . . . about 15 July, "
War was announced by the emperor, with the hearty consent of the great majority of the chambers. The left or republican party opposed the war; M. Thiers and a few others only protested against it as premature . . . . . 15 July, "
[After his surrender on 2 Sept., the emperor told count Bismarck that he did not desire war, but was driven into it by public opinion. He appears to have been greatly deceived as to the numerical strength of his army, and its state of preparation.]
"The greatest national crime that we have had the pain of recording since the days of the first French revolution has been consummated. War is declared—an unjust but premeditated war."—*Times*, 16 July, 1871.

FRENCH ARMY, about 300,000:—
1st corps, under marshal MacMahon.
2nd corps, under general Frossard.
3rd corps, under marshal Bazaine.
4th corps, under general Ladmirault.
5th corps, under general De Failly.
6th corps, under marshal Canrobert.
Imperial guard, under general Bourbaki.
Commander-in-chief, the emperor; general Le Bœuf, second; succeeded by marshal Bazaine.

PRUSSIAN ARMY, about 640,000:—
1. Northern, under general Vögel von Falckenstein, about 220,000, defending the Elbe, Hanover, &c.
2. Right, under prince Frederick Charles, about 180,000.
3. Centre, under generals Von Bittenfeld and Von Steinmetz, about 80,000.
4. The left, under the crown prince of Prussia, about 166,000.
Commander-in-chief, king William; second, general Von Moltke.
The North German army, at the beginning of August, consisted, firstly, of 550,000 line, with 1,200 guns and 53,000 cavalry; secondly, of 187,000 reserve, with 234 guns and 18,000 cavalry; and, thirdly, of 205,000 landwehr or militia, with 10,000 cavalry, making a grand total of 944,000 men, with 1,680 mobilised guns and 193,000 horses.
To these must be added, firstly, the Bavarians, 69,000 line, with 192 guns and 14,800 horses—25,000 reserve with 2,400 horses, and 22,000 landwehr; secondly, the Würtembergers—22,000 line with 54 guns and 6,200 horses, 6,500 reserve, and 6,000 landwehr; and, thirdly, the Badenese—16,000 line with 54 guns, 4,000 reserve, and 9,600 landwehr.
All the German troops taken together as under arms at present, 1,124,000 men. Aug. 1870.
Four weeks previously, on the peace footing, they numbered only 360,000.

The French and Germans in this war were considered to be equally brave and efficient; but the French generals appear to have acted greatly upon impulse. The Germans seem to have been invariably guided by a well matured plan, their tactics mainly consisting in bringing vast masses to bear on the point where they were anxious to prevail. From Saarbrück to Sedan, Moltke appears to have left nothing to chance; and all his arrangements were ably carried out.

The causes of the early ruin of the French army were: "1, the enormous superiority of the Germans in regard to numbers; 2, the absolute unity of their command and concert of operation; 3, their superior mechanism in equipment and supplies; 4, the superior intelligence, steadiness and discipline of the soldiers; 5, superior education of the officers, and the dash and intelligence of the cavalry."—*Quarterly Review.*

FRANKLIN, SEARCH FOR. Sir John Franklin, with captain Crozier and Fitzjames, in H. M. ships *Erebus* and *Terror* (carrying in all 138 persons), sailed on his third arctic expedition of discovery and survey, from Greenhithe, on 24 May, 1845; see *North-west Passage*. Their last despatches were from the Whalefish islands, dated 12 July, 1845. Their protracted absence caused intense anxiety, and several expeditions were sent from England and elsewhere in search of them, and coals, provisions, clothing, and other necessaries, were deposited in various places in the Arctic seas by our own and by the American government, by lady Franklin, and numerous private persons. The *Truelove*, captain Parker, which arrived at Hull, 4 Oct. 1849, from Davis's Straits, brought intelligence (not afterwards confirmed) that the natives had seen sir John Franklin's ships in the previous March, frozen up by the ice in Prince Regent's inlet. Other accounts were equally illusory. Her majesty's government, on 7 March, 1850, offered a reward of 20,000*l.* to any party of any country, that should render efficient assistance to the crews of the missing ships. Sir John's first winter quarters were found at Beechy island by captains Ommanney and Penny.

[The *Enterprise* and *Investigator* (*see* No. 4 *above*) not having been heard of for two years.]

11. Sir Edward Belcher's expedition, consisting of —*Assistance*, sir Edward Belcher, C.B.; *Resolute*, captain Kellett, C.B.; *North Star*, capt. Pullen; *Intrepid*, capt. M'Clintock; and *Pioneer*, capt. Sherard Osborn, sailed from Woolwich 15 April, 1852
[This expedition arrived at Beechy Island 14 Aug. 1852. The *Assistance* and *Pioneer* proceeded through Wellington Channel, and the *Resolute* and *Intrepid* to Melville Island; the *North Star* remaining at Beechy Island.]

LADY FRANKLIN'S EQUIPMENTS.

Lady Franklin, aided by a few friends (and by the "Tasmanian Tribute" of 1500*l.*), equipped four expeditions (Nos. 12, 13, 14, 16).

12. *Prince Albert*, capt. Forsyth, sailed from Aberdeen to Barrow Straits . . . . 5 June, 1850
[Returned 1 Oct. 1850.]

13. The *Prince Albert*, Mr. Kennedy, accompanied by lieut. Bellot, of the French navy, and John Hepburn, sailed from Stromness to Prince Regent's Inlet . . . . . 4 June, 1851
[Returned Oct. 1852.]

14. The *Isabel*, commander Inglefield, sailed for the head of Baffin's Bay, Jones's Sound, and the Wellington Channel, 6 July; and returned Nov. 1852

15. Mr. Kennedy sailed again in the *Isabel*, on a renewed search to Behring's Straits . . 1853

16. H.M.S. *Rattlesnake*, commander Trollope, despatched to assist the *Plover*, capt. Maguire (who succeeded capt. Moore), at Point Barrow in April; met with it . . . . . Aug. ,,

17. The second AMERICAN expedition, the *Advance*, under Dr. Kane . . . . . early in June, ,,

18. The *Phœnix* (with the *Breadalbane* transport), commander Inglefield, accompanied by lieut. Bellot, sailed in May; he returned, bringing despatches from Sir E. Belcher, &c. . Oct. ,,

The *Investigator* and sir E. Belcher's squadron were safe; but no traces of Franklin's party had been met with. Lieut. Bellot was unfortunately drowned in August while voluntarily conveying despatches for sir E. Belcher. Capt. M'Clure had left the *Herald* (10) at Cape Lisburne, 31 July, 1850. On 8 Oct. the ship was frozen in, and so continued for nine months. On 26 Oct. 1850, while on an excursion party, the captain discovered an entrance into Barrow's Straits, and thus established the existence of a N.E.—N.W. *passage*. In Sept. 1851, the ship was again fixed in ice, and so remained till lieut. Pim and a party from capt. Kellett's ship, the *Resolute* (11), fell in with them in April, 1853. The position of the *Enterprise* (4) was still unknown.

A monument to Bellot's memory was erected at Greenwich. His "Journal" was published in 1854

Dr. Rae, in the spring of 1853, again proceeded towards the magnetic pole; and in July, 1854, he reported to the Admiralty that he had purchased from a party of Esquimaux a number of articles which had belonged to sir J. Franklin and his party—namely, sir John's star or order, part of a watch, silver spoons, and forks with crests, &c. He also reported the statement of the natives, that they had met with a party of white men about four winters previous, and had sold them a seal; and that four months later, in the same season, they had found the bodies of thirty men (some buried), who had evidently perished by starvation; the place appears, from the description, to have been in the neighbourhood of the Great Fish river of Back. Dr. Rae arrived in England on 22 Oct. 1854, with the relics which have since been deposited in Greenwich hospital. He and his companions were awarded 10,000*l.* for their discovery.

19. The *Phœnix*, *North Star*, and *Talbot*, under the command of capt. Inglefield, sailed in May, and returned in . . . . . Oct. 1854

Sir E. Belcher (No. 11), after mature deliberation, in April, 1854, determined to abandon his ships, and gave orders to that effect to all the captains under his command; and capt. Kellett gave similar orders to capt. M'Clure, of the *Investigator*. The vessels had been abandoned in June* when the crews of the *Phœnix* and *Talbot* (under capt. Inglefield) arrived (19). On their return to England all the captains were tried by court martial and honourably acquitted 17-19 Oct. 1854

Capt. Collinson's fate was long uncertain, and another expedition was in contemplation, when intelligence came, in Feb. 1855, that he had met the *Rattlesnake* (16) at Fort Clarence on 21 Aug. 1854, and had sailed immediately, in hopes of getting up with capt. Maguire in the *Plover* (1), which had sailed two days previously. Capt. Collinson having failed in getting through the ice in 1850 with capt. M'Clure, returned to Hong-Kong to winter. In 1851 he passed through Prince of Wales's Straits, and remained in the Arctic regions without obtaining any intelligence of Franklin till July, 1854, when, being once more released from the ice, he sailed for Fort Clarence, where he arrived as above mentioned. Captains Collinson and Maguire arrived in England in . . . . . May, 1855

20. The third AMERICAN expedition in search of Dr. Kane, in the *Advance*, consisted of the *Release* and the steamer *Arctic*, the barque *Eringo*, and another vessel under the command of lieut. H. J. Hartstene, accompanied by a brother of Dr. Kane as surgeon, ... 31 May, 1855
[On 17 May, 1855, Dr. Kane and his party quitted the *Advance*, and journeyed over the ice, 1300 miles, to the Danish settlement; on their way home in a Danish vessel, they fell in with lieut. Hartstene, 18 Sept.; and arrived with him at New York, 11 Oct. 1855. Dr. Kane visited England in 1856; he died in 1857.]

The Hudson's Bay Company, under advice of Dr. Rae and sir G. Back, sent out an overland expedition, June 1855, which returned Sept. following. Some more remains of Franklin's party were discovered. 1855

21. The 18th British expedition (equipped by lady Franklin and her friends, the government having declined to fit out another)—the *Fox*, screw steamer, under capt. (since sir F. L. M'Clintock, R.N. (*see* No. 11)—sailed from Aberdeen 1 July, 1857; returned . . . . . 22 Sept. 1859

On 6 May, 1859, lieut. Hobson found at Point Victory, near Cape Victoria, besides a cairn, a tin case, containing a paper, signed 25 April, 1848, by capt. Fitzjames, which certified that the ships *Erebus* and *Terror*, on 12 Sept. 1846, were beset in lat. 70° 05′ N., and long. 98° 23′ W.; that sir John Franklin died 11 June, 1847; and that the ships were deserted 22 April, 1848. Captain M'Clintock continued the search, and discovered skeletons and other relics. His Journal was published in Dec. 1859; and on 28 May, 1860, gold medals were given to him and to lady Franklin by the Royal Geographical Society.

Mr. Hall, the arctic explorer, reported, in Aug. 1865, circumstances that led him to hope that capt. Crozier and others were surviving.

A national monument by Noble, set up in Waterloo-place, was inaugurated, 15 Nov. 1866. It is inscribed to "FRANKLIN the great navigator and his brave companions who sacrificed their lives in completing the discovery of the north west passage, A.D. 1847-8."

Sir John Franklin discovered the *north-west passage* by sailing down Peel and Victoria Straits, now named Franklin Straits.

FRANKS (or freemen), a name given to a combination of the North-western German tribes about 240, which invaded Gaul and other parts of the empire with various success in the 5th century; see *Gaul* and *France*.

* Capt. Kellett's ship, the *Resolute*, was found adrift 1000 miles distant from where she was left, by a Mr. George Henry, commanding an American whaler, who brought her to New York. The British government having abandoned their claim on the vessel, it was bought by order of the American congress, thoroughly repaired and equipped, and entrusted to capt. H. J. Hartstene, to be presented to queen Victoria. It arrived at Southampton, 12 Dec. 1856; was visited by her majesty on the 16th; and formally surrendered on the 30th.

FRATRICELLI (Little Brethren), a sect of the middle ages, originally strict Franciscan monks. Their numbers increased, and they were condemned by a papal bull in 1317; and suffered persecution; but were not extinct till the 16th century. They resembled the "Brethren of the Free Spirit."

FRAUDS, STATUTE OF. 29 Charles II., c. 3, 1677. "An act for prevention of frauds and perjuryes."

FRAUDULENT TRUSTEES ACT, 20 & 21 Vict. c. 54, passed Aug. 1857, in consequence of the delinquencies of sir John D. Paul, the British Bank frauds, &c. It was brought in by sir R. Bethell, then attorney-general (afterwards lord Westbury), and is very stringent.

FRASER'S MAGAZINE, first appeared, Feb. 1830.

FREDERICKSBURG (Virginia, N. America). On 10 Dec. 1862, general Burnside and the federal army of the Potomac crossed the small deep river Rappahannock. On 11 Dec. Fredericksburg was bombarded by the federals and destroyed. On the 13th commenced a series of desperate unsuccessful attacks on the confederate works, defended by generals Lee, Jackson, Longstreet, and others. General Hooker crossed the river with the reserves, and joined in the conflict, in vain. On 15 and 16 Dec. the federal army recrossed the Rappahannock. The battle was one of the most severe in the war.

FREDERICKSHALD (Norway). Charles XII. of Sweden was killed by a cannon-shot before its walls, while examining the works. His hand was on his sword, and a prayer-book in his pocket, 11 Dec. 1718.

FREE CHURCH (of England). The rev. H. Hampton, one of the curates of Islington, having been dismissed, a part of his congregation erected a temporary church. The bishop of London, after inquiry, refused to license it. On this the congregation declared itself to be the *Free Church of England*, March, 1859. Eventually, he left the neighbourhood, and re-entered the establishment. Secessions from the church of England took place in 1872 in consequence of the decision in favour of Mr. Bennett, 8 June, 1872; see *Church of England*. The establishment of a bishopric for a new Free Church at Southampton was proposed Jan. 1873.

A Free church of England founded; only two orders, presbyters or bishops and deacons, are recognized; a primus is elected, Sept. 1874.

FREE CHURCH (of Scotland) was formed by an act of secession of nearly half the body from the national church of Scotland, headed by Dr. Thos. Chalmers and other eminent ministers, 18 May, 1843. The difference arose on the question of the right of patrons to nominate to livings; see *Patronage*. The Free Church claims for the parishioners the right of a veto. Much distress was endured the first year by the ministers of the new church, although 366,719*l.* 14*s.* 3*d.* had been subscribed. In 1853 there were 850 congregations; in 1873 954. A large college was founded in 1846. In 1856 the sustentation fund amounted to 108,638*l.* from which was paid the sum of 138*l.* each to 700 ministers.

The Rev. Mr. Knight, censured for opinions respecting prayer, seceded . . .	22 Oct. 1873
The Reformed Presbyterian Church (see *Cameronians*), joined the Free Church . .	25 May, 1876

FREE CHURCH SOCIETY, or National Association for Freedom of Public Worship, established in 1857, to abolish the pew-rent system and revive the weekly offertory to defray the expenses of public worship.

FREE COMPANIES AND LANCES, see *Condottieri*.

FREEDMEN'S BUREAUS, established in the Southern States of North America in March, 1865, to protect the freed negroes. Having the support of martial law, these bureaus became very oppressive, and the act of congress making them permanent was vetoed by president Johnson in Feb. 1866.

FREEHOLDERS. Those *under* forty shillings per annum were not qualified to vote for members of parliament by 8 Hen. VI. c. 7, 1429. Various acts have been passed for the regulation of the franchise at different periods. The more recent were, the act to regulate polling, 9 Geo. IV., 1828; act for the disqualification of freeholders in Ireland, which deprived those of forty shillings of this privilege, passed 13 April, 1829; Reform acts, 1832, 1867, 1868. County elections act, 7 Will. IV., 1836. See *Chandos Clause*.

FREE LABOUR REGISTRATION SOCIETY, established for the benefit of employers and non-unionist workmen, in opposition to trades' unions, about July, 1867.

FREE TRADE principles, advocated by Adam Smith in his "Wealth of Nations" (1776), triumphed in England when the corn laws were abolished in 1846, and the commercial treaty with France was adopted in 1860. Richard Cobden, who was very instrumental in passing these measures, and termed "Apostle of Free Trade," died 2 April, 1865. Since 1830 the exports have been tripled See *French Treaty*. An agitation for free trade has begun in the United States. A reform league was formed at Boston, 20 April, 1869; and the movement became active in New York in Nov., and has since continued. A free-trade budget was brought in by the ministry in Sydney in 1873; and a new free-trade league was inaugurated in London in Dec. 1873.

FREEMASONRY. Writers on masonry, themselves masons, affirm that it has had a being "ever since symmetry began, and harmony displayed her charms." It is traced by some to the building of Solomon's temple; and it is said the architects from the African coast, Mahometans, brought it into Spain, about the 9th century. Its introduction into Britain has been fixed at 674; and in Scotland 1140. Many of our Gothic cathedrals are attributed to freemasons. The grand lodge at York was founded 926. Freemasonry was interdicted in England, 1424. In 1717, the grand lodge of England was established; that of Ireland in 1730; and that of Scotland in 1736. Freemasons were excommunicated by the pope in 1738; again condemned, 30 Sept. 1865. Freemasons' Hall, Great Queen-street, London, built 1771; rebuilt, and consecrated 14 April, 1869. The charity instituted, 1788. The duke of Sussex and the earl of Zetland were each twenty-five years grand-master of England. Earl de Grey, afterwards marquis of Ripon, was installed grand-master of the English freemasons in room of the earl of Zetland, 14 May, 1870. The marquis (on becoming a Romanist) resigned 1 Sept. 1874. He was succeeded by the prince of Wales; installed in the Royal Albert Hall, 28 April, 1875. The duke of Leinster, grand-

master for Ireland for 60 years, died 10 Oct. 1874; succeeded by the duke of Abercorn. The prince of Wales was installed at Edinburgh as patron of the freemasons of Scotland, 12 Oct. 1870.

FRENCH ASSOCIATION FOR THE ADVANCEMENT OF THE SCIENCES was established by the general assembly, 22 April, 1872, its chief founders being MM. Balard, Claude Bernard, Delaunay, Dumas, Pasteur, Berthelot, Würtz, and others. It held its first meeting at Bordeaux, 5 Sept. 1872, when many foreign scientific men were present, M. De Quatrefages, president; second, Lyons, 21 Aug. 1873; third, Lille, 20 Aug. 1874; fourth, Nantes, 19 Aug. 1875; fifth, Clermont Ferrand, 19 Aug. 1876.

FRENCH CHURCH, see *Church of France*.

FRENCH LANGUAGE is mainly based on the rude Latin of the western nations subjugated by the Romans. German was introduced by the Franks in the 8th century. In the 9th the Gallo-Romanic dialect became divided into the *Langue d'oc* of the south and the *Langue d'oil* of the north. The French language as written by Froissart assimilates more to the modern French, and its development was almost completed when the Académie Française (established by Richelieu in 1634) published a dictionary of the language in 1674. The French language, laws, and customs were introduced into England by William I., 1066. Law pleadings were changed from French to English in the reign of Edward III., 1362. *Stow.*

The calendar existed until the 10th Nivose, year of the republic XIV., 31 Dec. 1805, when the Gregorian mode of calculation was restored by Napoleon I.

FRENCHTOWN (Canada), was taken from the British by the American general Winchester, 22 Jan. 1813, during the second war with the United States of America. It was retaken by the British forces under general Proctor, 24 Jan., and the American commander and his troops were made prisoners.

FRENCH TREATY, the term given to the treaty of commerce between Great Britain and France, signed 23 Jan. 1860, at Paris, by lord Cowley and Richard Cobden and by the ministers MM. Baroche and Rouher. The beneficial results of this treaty compensated for the depression of trade occasioned by the civil war in North America (1861-5). The French assembly determined that on 15 March, 1871, this treaty should cease in 12 months from that date. A fresh treaty was signed at Paris 29 Jan. 1873. Free trade was somewhat restricted, but the new French navigation law was relaxed.

FRESCO PAINTINGS are executed on plaster while fresh. Very ancient ones exist in Egypt, Italy, and England, and modern ones in the British houses of parliament, at Berlin, and other

places. The fresco paintings by Giotto and others at the Campo Santo, a cemetery at Pisa, executed in the 13th century, are justly celebrated. See *Stereochromy*.

FRÈTEVAL (Central France). Here Richard I. of England defeated Philip II. of France, and captured his royal seal, archives, &c., 15 July, 1194. Frèteval was taken by the Germans, 14 Dec., 1870, and soon abandoned.

FRIARS (from the French *frère*, a brother); see *Minorites, Carmelites, Dominicans, Franciscans*, and other orders.

FRIDAY, the sixth day of the week; so called from Friga, or Frea, the Scandinavian Venus, the wife of Thor, and goddess of peace, fertility, and riches, who with Thor and Odin composed the supreme council of the Gods. See *Good Friday*.

FRIEDLAND (Prussia). Here the allied Russians and Prussians were beaten by the French, commanded by Napoleon, on 14 June, 1807. The allies lost eighty pieces of cannon and about 18,000 men; the French about 10,000 men. The peace of Tilsit followed, by which Prussia was obliged to surrender nearly half her dominions.

FRIENDLY ISLES, in the Southern Pacific, consist of a group of more than 150 islands, forming an archipelago of very considerable extent. These islands were discovered by Tasman, in 1643; visited by Wallis, who called them Keppel Isles, 1767; and by captain Cook, who named them on account of the friendly disposition of the natives, 1773. Subsequent voyagers describe them as very ferocious.

FRIENDLY SOCIETIES, which originated in the clubs of the industrious classes, were subjected to slight control in 1793, and have been regulated by various enactments. Other acts were passed in 1855, 1858 and 1860; an important one 11 Aug. 1875.

FRIENDS, see *Quakers*.

FRIENDS OF THE PEOPLE, an association formed in London to obtain parliamentary reform, 1792.

FRIESLAND: EAST (N. Germany), the ancient Frisia, formerly governed by its own counts. On the death of its prince Charles Edward, in 1744, it became subject to the king of Prussia; Hanover disputed its possession, but Prussia prevailed. It was annexed to Holland by Bonaparte, in 1806, to the French empire, 1810; and awarded to Hanover in 1815. The English language is said to be mainly derived from the old Frisian dialect.—FRIESLAND, WEST, in Holland, was part of Charlemagne's empire in 800. It passed under the counts of Holland about 936, and was one of the seven provinces which renounced the Spanish yoke in 1580. The term *Chevaux de Frise* (or *Cheval de Frise*, a *Friesland Horse*) is derived from Friesland, where it was invented.

FRIULI (Venetia), made a duchy by Alboin the Lombard, when he established his kingdom about 570. It was conquered by Charlemagne. Henri, a Frenchman, made duke, was assassinated in 799, which was the fate of duke Berengarius, king of Italy and emperor, in 924. The emperor Conrad gave the duchy to his chancellor Poppo, patriarch of Aquileia, in the 11th century; it was conquered by Venice in 1420; annexed to Austria, 1797; to France, 1805; to Austria, 1814; to Italy, 1866.

FROBISHER'S STRAITS, discovered by sir Martin Frobisher, who tried to find a north-west passage to China, and after exploring the coast of New Greenland, entered this strait, 11 Aug. 1576. He returned to England, bringing with him a quantity of black ore, supposed to contain gold, which induced queen Elizabeth to patronise a second voyage. This led to a third fruitless expedition. He was mortally wounded at Brest, Nov. 1594.

FROGMORE, near Windsor, Berks. A house here, built by Nash, was the residence of queen Charlotte and afterwards of the duchess of Kent. Here is situate the mausoleum of the late prince consort. See *Albert*.

FROHSDORF, a village near Vienna, lately the residence of the comte de Chambord, see *France*, 1873.

FRONDE, CIVIL WARS OF THE, in France, in the minority of Louis XIV. (1648-52), during the government of queen Anne of Austria and cardinal Mazarin, between the followers of the court and the nobility, and the parliament and the citizens. The latter were called *Frondeurs* (*slingers*), it is said, from an incident in a street quarrel. In a riot on 27 Aug. 1648, barricades were erected in Paris.

FUENTES DE ONORO (central Spain). On 2 May, 1811, Massena crossed the Agueda with 40,000 infantry, 5000 horse, and about 30 pieces of artillery, to relieve Almeida. He expected every day to be superseded in his command, and wished to make a last effort for his own military character. Wellington could muster no more than 32,000 men, of which only 1200 were cavalry. He however determined to fight rather than give up the blockade of Almeida. After much fighting, on 3 May, night came on and stopped the conflict. Next day Massena was joined by Bessières with a body of the Imperial guard; and on 5 May, made his grand attack. In all the war there was not a more dangerous hour for England. The fight lasted until evening, when the lower part of the town was abandoned by both parties—the British maintaining the chapel and crags, and the French retiring a cannon-shot from the stream. *Napier*.

This law was declared to be unconstitutional by the judges of the superior court on 3 Feb. 1855, was carried into effect with great difficulty, and was not received by Massachusetts. It was repealed 13 June, 1864; see *Slavery in America*.

The assessments were unequal, being very heavy in some provinces and light in others; owing to exemptions purchased from the sovereigns. The tax produced 38 millions of francs in the reign of Louis XVI. It was a grievous burden, and tended to hasten the revolution, during which it was abolished (1790).

GAELIC, the northern branch of the Celtic languages, Irish, Erse or Highland Scottish, and Manx. The "Dean of Lismore's book" (written 1512-51) contains Gaelic poetry; specimens were published, with translations, in 1862, by rev. T. M'Lachlan.

It was taken by the French, 4 Jan. 1799; by the English, 31 Oct. 1799; by the French, 18 July, 1806; and by the Austrians in 1815 and 1821. Here pope Pius IX. took refuge, 24 Nov. 1848, and resided more than a year. Here also Francis II. of Naples, with his queen and court, fled, when Garibaldi entered Naples, 7 Sept. 1860; and here he remained till the city was taken by the Sardinian general Cialdini, 13 Feb. 1861, after a severe siege, uselessly prolonged by a French fleet remaining in the harbour. Cialdini was created duke of Gaeta.

GAGGING BILL, properly so called, meant to protect the king and government from the harangues of seditious meetings, was enacted 8 Dec. 1795, when the popular mind was much excited. In Dec. 1819, soon after the Manchester affray, an act was passed for restraining public meetings and cheap periodical publications; it was popularly called "a gagging bill." Statutes coercing popular assemblies, particularly in Ireland, have been also so designated.

GALATIA, a province of Asia Minor. In the 3rd century B.C. the Gauls under Brennus invaded Greece, crossed the Hellespont, and conquered the Troas, 278; were checked by Attalus I. in a battle about 241; and then settled in what was called afterwards Gallogræcia and Galatia. The country was ravaged by Cneius Manlius, 189 B.C., and was finally annexed to the Roman empire, 25 B.C., on the death of the king Amyntas. Paul's Epistle to the Galatians was probably written A.D. 58.

GALICIA, a province, N.W. *Spain*, was conquered by D. Junius Brutus, 136 B.C. and by the Vandals A.D. 419; and was subdued by successive invaders. In 1065, on the death of Ferdinand I. king of Castile and Leon, when his dominions were divided, his son Garcia became king of Galicia. Ruling tyrannically, he was expelled by his brother Sancho; returned at his death in 1072; was again expelled by his brother Alfonso, 1073; and died in prison in 1091. Alfonso, son of Urraca, queen of Castile, was made king of Galicia by her in 1109. He defended his mother, a dissolute woman, against her husband, Alfonso VII., and at her death in 1126, acquired Castile, and once more re-united the kingdoms.—GALICIA, *Poland*. East Galicia was acquired by the emperor of Germany at the partition in 1772; and West Galicia at that of 1795. The latter was ceded to the grand duchy of Warsaw in 1809; but recovered by Austria in 1815. The appointment of count Goluchowski, a Pole, as governor, in Oct. 1866, gave much satisfaction to the Poles, about 2,000,000 in this province; see *Poland, note.*

GALLEYS with three rows of rowers, *triremes*, were invented by the Corinthians, 786 B.C. *Blair.* The terms "galley slave," and "condemned to the galleys," arose from these sea vessels having from 25 to 30 benches on each side, manned by four or five slaves to each bench. In France they had a general of galleys, of whom the baron de la Garde was the first, 1544. The punishment of the galleys (*galères*) has been superseded by the "*travaux forcés*," forced labour, regulated by a law of 1854, the men being called "*forçats.*"

GALWAY (W. Ireland). The ancient settlers here were divided into thirteen tribes, a distinction not yet forgotten. It was conquered by Richard de Burgo in 1232. In 1690 Galway city declared for king James, but was taken by general Ginckel soon after the decisive battle of Aughrim, 12 July, 1691. Here is one of the new colleges, endowed by government, pursuant to act 8 & 9 Vict. c. 66 (1845), inaugurated, 30 Oct. 1849; see *Colleges* and *Ireland*, 1872-3.

In 1858 the sailing of mail steam packets from Galway to America began; but the subsidy ceased in May, 1861, through the company's breach of contract, which occasioned much discussion in parliament. In July, 1863, the contract for the conveyance of mails from Galway to America was renewed, and 75,000*l.* voted for the purpose. The scheme was not successful. On 9 Nov. the steamer *Anglia* struck on the Black rock, and the mails were taken to Dublin. The last packet sailed in Feb. 1864.

GAME LAWS are a remnant of the forest laws imposed by William the Conqueror, who, to preserve his game, made it forfeiture of property to disable a wild beast, and loss of eyes, for a stag, buck or boar. The clergy protested against ameliorations of these laws, under Henry III. The first game act passed in 1496. Game certificates were first granted with a duty in 1784. The Game act (1 & 2 Will. IV. c. 32), greatly modifying all previous laws, was passed in 1831. By it the sale of game is legalised at certain seasons. By the Game Poaching Preventive act, passed in 1862, greatly increased powers were given to the county police. Licences to kill game granted for the year 1856-7, 28,950; for 1865-6, 43,231; for 1869, 54,203. Convictions under the game laws in 1869, 10,345.

GARDENERS' CHRONICLE, a weekly paper, long edited by Dr. John Lindley, first appeared, 2 Jan. 1841.

GARDENING. The first garden, Eden, planted by God. *Gen.* ii. The Scriptures abound with allusions to gardens, particularly the Song of Solomon and the prophets; and Christ's agony took place in a garden. Xenophon describes the gardens at Sardis; and Epicurus and Plato taught in gardens. Theophrastus's History of Plants was written about 322 B.C. Horace, Virgil, and Ovid derive many images from the garden (50 B.C. to A.D. 50); and Pliny's Tusculan villa is circumstantially described (about A.D. 100). The Romans introduced gardening into Britain, the religious orders maintained it, and its cultivation increased in the 16th century, when many Flemings came here to escape the persecutions of Philip II. Miller's dictionary was published in 1724; the Horticultural Society (*which see*) was established in 1804; Loudon's Encyclopædia of Gardening was first published in 1822, and his Encyclopædia of Plants in 1829; an act for the protection of gardens and ornamental grounds in cities was passed in 1863. See *Botany*, *Flowers*, *Fruits*.

GARIGLIANO, a river (S. W. Italy). After long waiting and refusing to recede a step, the great captain Gonsalvo de Cordova made a bridge over this river, 27 Dec. 1503, and surprised and totally defeated the French army. Gaëta surrendered a few days after.

GAROTTE, a machine for strangling criminals, used in Spain. Many attempts to strangle made by thieves (termed "garrotters,") in the winter of 1862-3, led to the passing of an act in July, 1863, to punish these acts by flogging.

GARTER, ORDER OF THE. Edward III., when at war with France and eager to draw the best soldiers of Europe into his interest, projected the revival of king Arthur's round table, proclaimed a solemn tilting. On New Year's day 1343-4, he published letters of protection for the safe coming and returning of such foreign knights as would venture their reputation at the jousts and tourna-

ments about to be held. These took place 23rd April, 1344. A table was erected in Windsor castle of 200 feet diameter, and the knights were entertained at the king's expense. In 1346 Edward gave his garter for the signal of a battle that had been crowned with success (supposed to be Cressy), and being victorious on sea and land, and having David, king of Scotland, a prisoner, he, in memory of these exploits, is said to have instituted this order, 23 April, 1349.

Edward III. gave the garter pre-eminence among the ensigns of the order; it is of blue velvet bordered with gold, with the inscription in old French—"*Honi soit qui mal y pense*" (Evil be to him who evil thinks). The knights are installed at Windsor, and styled *Equites aureæ Periscelidis*, knights of the golden garter. *Beatson.*

The order until king Edward VI.'s time was called the order of St. George, the patron saint of England. His figure on horseback, presented as holding a spear, and killing the dragon, was first worn by the knights of the institution. It is suspended by a blue ribbon across the body from the shoulder.

GASTEIN (Salzburg, Austria). The long discussion between Austria and Prussia respecting the

disposal of the duchies conquered from Denmark, was closed by a provisional convention signed here by their ministers (Blum for Austria and Bismarck for Prussia) 14 Aug. 1865. This convention was severely censured by the other powers and abrogated in 1866.

Austria was to have the temporary government of Holstein, and Prussia that of Sleswig; the establishment of a German fleet was proposed, with Kiel as a Federal harbour, held by Prussia; Lauenburg was absolutely ceded to Prussia, and the king was to pay Austria as a compensation 2,500,000 Danish dollars.

GATESHEAD, a borough in Durham, on the Tyne, opposite Newcastle. At Gateshead-fell, William I. defeated Edgar Atheling and his Scotch auxiliaries in 1068. Gateshead was made a parliamentary borough by the reform act in 1832.

Between twelve and one o'clock, 5, 6 Oct. 1854, a fire broke out in a worsted manufactory here, which set fire to a bond warehouse containing a great quantity of nitre, sulphur, &c., causing a terrific explosion, felt at nearly twenty miles' distance, and totally destroying many buildings, and burying many persons in the ruins. At the moment of the explosion, large masses of blazing materials flew over the Tyne and set fire to many warehouses in Newcastle. About fifty lives were lost, and very many persons were seriously wounded. The damage was estimated at about a million pounds.

GATLING GUN OR BATTERY. An American invention exhibited at Paris in 1867. It is intended to discharge at once a number of projectiles smaller than the shells of field guns, and it has as many locks as barrels. It was tried at Shoeburyness and rejected as inferior to a field gun firing shrapnel. A powder to be used in the Gatling, invented by M. Pertuiset, was tried in London, Aug. 1870.

GAUGAMELA, see *Arbela.*

GAUGES (in railways). Much discussion (termed "the battle of the gauges") began among engineers about 1833. Mr. I. M. Brunel approved of the broad gauge, adopted on the Great Western Railway; and Mr. R. Stephenson, Joseph Locke, and others, chose the narrow, now almost universally adopted even by the Great Western. A 2 foot gauge was recommended in Feb. 1870, having been successful on the Festiniog railway, Wales, with Fairlie's engine. About 200 miles of the S.W. lines of the Great Western were altered from the broad to the narrow gauge in a few days, June, 1874.

GAUGING, measuring the contents of any vessel of capacity, with respect to wine and other liquids, was established by a law, 27 Edw. III. 1352.

GAUL AND GAULS. Gallia the ancient name of France and Belgium. The Gauls termed by the Greeks Galatæ, by the Romans, Galli or Celtæ, came originally from Asia, and invading Eastern Europe, were driven westward, and settled in Spain (in Galicia), North Italy (Gallia Cisalpina), France and Belgium (Gallia Transalpina), and the British isles (the lands of the Cymry or Gaels).

GENEVA CONVENTION, for the succour of the wounded in time of active warfare. Having been a witness of the horrors of the battle-field of Solferino, 24 June, 1859, M. Henri Dunant, a Swiss, published his experiences, which induced the *Société Génévoise d'Utilité Publique* in Feb. 1863 to discuss the question whether relief societies might not be formed in time of peace to help the wounded in time of war by means of qualified volunteers. At an international conference held 26 Oct. 1863, fourteen governments, including Great Britain, France, Austria, Prussia, Italy, and Russia, were represented by delegates. The propositions then drawn up were accepted as an international code by a congress which met at Geneva, 8 Aug. 1864, and on 22 Aug. a convention was signed by twelve of the delegates, and it was eventually adopted by all civilised powers except the United States. International conferences were held at Paris in 1867 and at Berlin in 1869 for further developing in a practical manner the objects of the Geneva conference. The International Society (termed "the Red Cross Society"), established in consequence of these proceedings was very energetic in relieving the wounded and sick during the Franco-Prussian war in 1870, its flag being recognised as neutral. See *Aid to Sick and Wounded.* Above 13,000 volunteers said to be employed in attending the sick and wounded, Sept.—Dec., 1870. At a meeting in London, 6 Aug., 1872, M. Dunant proposed a plan for the uniform treatment of prisoners of war.

GENS-D'ARMES were anciently the king's horse-guards only, but afterwards the king's *gardes-du-corps;* the musqueteers and light horse were reckoned among them. There was also a company of gentlemen (whose number was about 250) bearing this name. Scots guards were about the persons of the kings of France from the time of St. Louis, who reigned in 1226. They were organised as a royal corps by Charles VII. about 1441; the younger sons of Scottish nobles being usually the captains. The name gens-d'armes was afterwards given to the police; but becoming obnoxious, was changed to "municipal guard" in 1830.

GENTLEMAN (from *gentilis*, of a *gens*, a race or clan). The Gauls observing that during the empire of the Romans, the *scutarii* and *gentiles* had the best appointments of all the soldiers, applied to them the terms *écuyers* and *gentilshommes*. This distinction of gentlemen was much in use in England, and was given to the well-descended about 1430. *Sidney.* Gentlemen by blood were those who could show four descents from a gentleman who had been created by the king by letters patent.

GENTLEMEN-AT-ARMS (formerly styled the Band of Gentlemen Pensioners) is the oldest corps in England, with the exception of the Yeomen of the Guard. The band was instituted by Henry VIII. in 1509, and was originally composed entirely of gentlemen of noble blood, whom he named his pensioners or spears. William IV. commanded that it should be called his majesty's honourable corps of gentlemen-at-arms, 7 March, 1834. *Curling.*

GENTLEWOMEN'S SELF-HELP INSTITUTION, London, established by the earl of Shaftesbury, duchess of Sutherland, and others, May 1870.

GEOGRAPHY. The first geographical records are in the Pentateuch, and in the book of Joshua. Homer describes the shield of Achilles as representing the earth surrounded by the sea, and also the countries of Greece, islands of the Archipelago, and site of Troy. *Iliad.* The priests taught that the temple of Apollo at Delphos was the centre of the world. Anaximander of Miletus was the inventor of geographical maps, about 568 B.C. Hipparchus attempted to reduce geography to a mathematical basis, about 135 B.C. Strabo, the great Greek geographer, lived 71-14 B.C. Ptolemy flourished about 139 A.D. The science was brought to Europe by the Moors of Barbary and Spain, about 1240. *Lenglet.* Maps and charts were introduced into England by Bartholomew Columbus to illustrate his brother's theory respecting a western continent, 1489. Geography is now divided into mathematical, physical, and political, and its study has been greatly promoted during the present century by expeditions at the expense of various governments and societies. The *Royal Geographical Society* of London was established in 1830; that of Paris in 1821. See *Africa, North West Passage, &c.*

GEOLOGY, the science of the earth, is said to have been cultivated in China before the Christian era, and occupied the attention of Theophrastus, Pliny, Avicenna, and the Arabian writers.

In 1574 Mercati wrote concerning the fossils in the pope's museum: Cesalpino Majoli, and others (1597), Steno (1669), Scilla (1670), Quirini (1676), Plot and Lister (1678), Leibnitz (1680) recorded observations, and put forth theories on the various changes in the crust of the earth.

Hooke (1668), in his work on Earthquakes, said that fossils, "as monuments of nature, were more certain tokens of antiquity than coins or medals, and though difficult, it would not be impossible *to raise a chronology out of them.*"

Burnet's "Theory of the Earth" appeared in 1690, Whiston's in 1696.

Buffon's geological views (1749) were censured by the Sorbonne in 1751, and recanted in consequence. The principle he renounced was that the present condition of the earth is due to secondary causes, and that these same causes will produce further changes. His more eminent fellow-labourers and successors were Gesner (1758), Michell (1760), Raspe (1762-73), Pallas and Saussure (1793-1800).

Werner (1775) ascribed all rocks to an *aqueous* origin, and even denied the existence of volcanoes in primitive geological times, and had many followers, Kirwan, De Luc, &c.—Hutton (1788) supported by Playfair (1801) warmly opposed Werner's views, and asserted that the principal changes in the earth's crust are due to the energy of *fire.* The rival parties were hence termed Neptunists and Vulcanists.

William Smith, the father of British geology (who had walked over a large part of England) drew up a Tabular View of British Strata, in 1799, and published it and his Geological Map of England and Wales, 1812-15; died 28 Aug. 1839. The Rev. Adam Sedgwick, another father, died 27 Jan. 1873, aged 87. Sir Charles Lyell, died 22 Feb. 1875.

In 1803 the Royal Institution possessed the best geological collection in London, collected by H. Davy, C. Hatchett, and others; the proposal of sir John St. Aubyn, sir Abraham Hume, and the right hon. C. F. Greville, to aid the government in establishing a school of mines there in 1804-7, was declined, 13 Nov. 1807.

In 1807 the *Geological Society of London* was established. By collecting a great mass of new facts, it greatly tended to check the disposition to theorise, and led to the introduction of views midway between those of Werner and Hutton.

The Geological Society of Dublin, 1832; of Edinburgh, 1834; of France, 1830.

In 1835 Mr. (afterwards sir Henry) De la Beche suggested the establishment of the present *Museum of Geology*, which began at Craig's-court, and which was removed to its present position in Jermyn-street. To him is also due the valuable geological maps formed on the ordnance survey. The building was erected by Mr. Pennethorne, and formally opened by the prince consort, 14 May, 1851. Attached to the Museum are the Mining Records office, a lecture theatre, laboratories, &c. Sir H. De la Beche, the first director, died 13 April, 1855; succeeded by sir Roderick Murchison, who died 22 Oct. 1871; succeeded by professor A. C. Ramsay, March, 1872.

A similar institution was established at Calcutta by the E. I. Company in 1840.

The English standard works on Geology at the present time are those of Lyell, Murchison, Phillips, De la Beche, Mantell, and Ansted.

The strata composing the earth's crust may be divided into two great classes:

I. Those generally attributed to the agency of water;

II. To the action of fire: which may be subdivided as follows:—

Aqueous formations, stratified, rarely crystalline:—
Sedimentary or fossiliferous rocks.
Metamorphic or unfossiliferous.

Igneous formations, unstratified, crystalline:—
Volcanic, as basalt, &c.
Plutonic, as granite, &c.

Fossiliferous, or Sedimentary, rocks are divided into three great series:—

The Palæozoic (most ancient forms *of life*), or Primary.

The Mesozoic (middle life period), or Secondary.
The Neozoic or Cainozoic (more recent forms of life), or Tertiary.

GEORGE. A gold coin current at 6*s.* 8*d.* in the reign of Henry VIII. *Leake.*

GEORGE, ST., the tutelary saint of England, and adopted as patron of the order of the garter by Edward III. His day is 23 April; see *Garter,* and *Knighthood.*

St. George was a tribune in the reign of Diocletian, and being a man of great courage, was a favourite; but complaining to the emperor of his severities towards the Christians, and arguing in their defence, he was put in prison, and beheaded, 23 April, 290.—On that day, in 1192, Richard I. defeated Saladin.

GEORGES' CONSPIRACY, in France. General Moreau, general Pichegru, Georges Cadoudal, who was commonly known by the name of Georges, and others, were arrested at Paris, charged with a conspiracy against the life of Bonaparte, and for the restoration of Louis XVIII., Feb. 1804. Pichegru was found strangled in prison, 6 April. Twelve of the conspirators, including Georges, were executed 25 June, and others imprisoned. Moreau was exiled, and went to America. In 1813 he was killed before Dresden (*which see*).

GEORGIA, the ancient Iberia, now a province of S. Russia, near the Caucasus, submitted to Alexander about 331 B.C., but threw off the yoke of his successors. It was subjugated to Rome by Pompey, 65 B.C., but retained its own sovereigns. Christianity was introduced into it in the 3rd century. In the 8th century, after a severe struggle, Georgia was subdued by the Arab caliphs; by the Turkish sultan Alp-Arslan, 1068; and by the Tartar hordes, 1235. From the 14th to the 18th centuries, Georgia was successively held by the Persian and Turkish monarchs. In 1740 Nadir Shah established part of Georgia as a principality, of which the last ruler, Heraclius, surrendered his territories to the czar in 1799; and in 1802 Georgia was declared to be a Russian province.—GEORGIA, IN NORTH AMERICA, was settled by gen. Oglethorpe, in 1732. Separating from the congress of America, it surrendered to the British, Dec. 1778; and its possession was of vast importance to the royalists in the war. Count

d'Estaing joined the American general Lincoln, and made a desperate attack on Georgia, which failed, and the French fleet returned home; the colony was given up to the Union by the British in 1783. It seceded from the Union, by ordinance, 18 Jan. 1861, and was conquered by Sherman in 1864-5, and readmitted as a state Jan. 1868. A ridiculous negro insurrection suppressed Aug. 1875. See *United States*.—GEORGIA, in the Pacific, was visited by captain Cook in 1775.

GERMANITES, a name given to a sect, of which members appeared in the British Mediterranean fleet in 1867. They called themselves "non-fighting men," and hold no communion with other religious bodies.

GERMAN LANGUAGE has two great branches: *hoch* and *platt Deutsch*, high and low German. The former became the literary language, principally through its use by Luther in his translation of the Bible and in other works, 1522-34. The latter is that spoken by the lower classes. There are many dialects: the satirical epic in low German, "Reineke Fuchs," appeared in 1498; see *Reynard*.

GERMANS, ST., was made the seat of the bishopric of Cornwall for a short time, about 905.

GERMANY (*Germania, Alemania*), anciently, as now, divided into independent states. The Germans long withstood the attempts of the Romans to subdue them; and although that people conquered some parts of the country, they were expelled before the close of the 3rd century. In the 5th century the Huns and other tribes prevailed over the greater portion of Germany. In the latter part of the 8th century, Charlemagne subdued the Saxons and other tribes, and was crowned emperor at Rome, 25 Dec. 800. At the extinction of his family, the empire became elective, 911, and was generally obtained by a member of the house of Hapsburg from 1437 till 1804. Germany was divided into circles, 1501-12. The confederation of the Rhine

was formed 12 July, 1806; the Germanic confederation, 8 June, 1815; and the North German confederation, 18 Aug. 1866; the treaty ratified, 8 Sept. 1866. See *Franco-Prussian War*, 1870-71.

The re-established empire of Germany (Jan. 1, 1871), founded upon treaties concluded between the North German confederation (*which see*) and, 1. the grand duchies of Baden and Hesse, 15 Nov. 1870; 2. the kingdom of Bavaria, 23 Nov. 1870; 3. the kingdom of Würtemburg, 25 Nov. 1870; ratified, 29 Jan. 1871. William I., king of Prussia, was proclaimed emperor at Versailles, 18 Jan. 1871. The first chancellor of the empire, prince Otho von Bismarck. Population in 1871 (including Alsace-Lorraine, conquered, 1870), 41,069,846. The parliament is elected by manhood suffrage and ballot.

GLASGOW, BISHOPRIC OF. Kennet, in his *Antiquities*, says it was founded by St. Kentigern, *alias* Mungo, in 560; Dr. Heylin, speaking of the see of St. Asaph, in Wales, says that *that* see was founded by St. Kentigern, a Scot, then bishop of Glasgow in 583. This prelacy became archiepiscopal in 1491, ceased at the Revolution, and is now a post-revolution bishopric. The cathedral, commenced in 1121, has a noble crypt; see *Bishops*.

GLASITES (in Scotland) and SANDEMANIANS (in England). In 1727, John Glas, a minister of the church of Scotland, published "The Testimony of the King of Martyrs, concerning his Kingdom (*John* xviii. 36)," in which he opposed national churches, and described the original constitution of the Christian church, its doctrines, ordinances, officers, and discipline, as given in the New Testament. Having been deposed in 1728, he and others established several churches formed upon the primitive models. The publication of a series of letters on Hervey's "Theron and Aspasia," by Robert Sandeman, in 1755, led to the establishment of churches in London and other places in England, and also in North America. The meeting-house at Barnsbury, London, N., was erected in 1862.

GLASS. The Egyptians are said to have been taught the art of making glass by Hermes. The discovery of glass took place in Syria. *Pliny*. Glass-houses were erected in Tyre. It was in use among the Romans in the time of Tiberius; and we know, from the ruins of Pompeii, that windows were formed of glass before 79.

Glass is said to have been brought to England by Benedict Biscop, abbot of Wearmouth, in . . 676
The glass manufacture established in England at Crutched-friars, and in the Savoy (*Stow*) . . 1557
Great improvements have been made in the manufacture, through the immense increase of chemical knowledge in the present century. Professor Faraday published his researches on the manufacture of glass for optical purposes in . . 1830
The duties on glass, first imposed 1695; repealed, 1698; re-enacted, 1745; finally remitted, 24 April, 1845
GLASS-PAINTING was known to the ancient Egyptians. It was revived about the 10th century, and is described in the treatise by the monk Theophilus; was practised at Marseilles in a beautiful style, about 1500, and attained great perfection about 1530. Specimens of the 13th century exist in England; C. Winston's work is the best on the subject, 1846, new edition . . 1868
GLASS-PLATE, for coach-windows, mirrors, &c., made at Lambeth by Venetian artists, under the patronage of Villiers, duke of Buckingham . . 1673
The manufacture was improved by the French, who made very large plates; and further improvements in it were made in Lancashire, when the British Plate Glass *company was established* 1773

Tempered or Toughened glass: M. De la Bastie's process (plunging heated glass into a hot bath of oleaginous or alkaline compounds) announced, April, 1875; largely manufactured in France, and sold cheap in London 1876

GLASTONBURY (Somerset), said to have been the residence of Joseph of Arimathea, and the site of the first Christian church in Britain, about 60. A church was built here by Ina about 708. The town and abbey were burnt, 1184, and an earthquake did great damage in 1275. Richard Whiting, the last abbot, who had 100 monks and 400 domestics, was hanged on Tor-hill in his pontificals for refusing to take the oath of supremacy to Henry VIII., 14 Nov. 1539. The monastery was suppressed 1540.

GLENCOE MASSACRE of the Macdonalds, a Jacobite clan, for not surrendering before 1 Jan. 1692, the time stated in king William's proclamation. Sir John Dalrymple, master (afterwards earl) of Stair, their enemy, obtained a decree "to extirpate that set of thieves," which the king is said to have signed without perusing. Every man under 70 was to be slain. This mandate was treacherously executed by 120 soldiers of a Campbell regiment, hospitably received by the Highlanders, 13 Feb. 1692. About 60 men were slain; and many women and children, turned out naked in a freezing night, perished. This excited great indignation; and an inquiry was set on foot, May, 1695, but no capital punishment followed.

GLENDALOUGH, or "Seven Churches," an ancient Irish bishopric, said to have been founded by St. Keven in 498; united with Dublin, 1214.

GLOBE. The globular form of the earth, the five zones, some of the principal circles of the sphere, the opacity of the moon, and the true causes of lunar eclipses, were taught, and an eclipse predicted, by Thales of Miletus, about 640 B.C. Pythagoras demonstrated, from the varying altitudes of the stars by change of place, that the earth must be round; that there might be antipodes on the

opposite part of the globe; that Venus was the morning and evening star; that the universe consisted of twelve spheres—the sphere of the earth, the sphere of the water, the sphere of the air, the sphere of fire, the spheres of the moon, the sun; Venus, Mercury, Mars, Jupiter, Saturn, and the spheres of the stars; about 506 B.C.—Aristarchus, of Samos, maintained that the earth turned on its own axis, and revolved about the sun, which doctrine was held by his contemporaries as so absurd, that the philosopher nearly lost his life, 280 B.C.; see *Circumnavigators*.

To determine the figure of the earth, a degree of latitude has been measured in different parts of the world; by Bouguer and La Condamine in Peru, and by Maupertuis and others in Lapland, 1735.

Estimated density 5.6 that of water; weight, 6,000,000,000,000,000,000,000 tons.—*Proctor*, 1875.

France and Spain measured by Mechain, Delambre, Biot, and Arago, between 1792 and 1821.

Measurements made in India by col. (afterwards sir George) Everest, published in 1830.

Experiments made by pendulums to demonstrate the rotation of the earth by Foucault in 1851; and to determine its density by Maskelyne, Bailly, and others; and in 1826, 1828, and 1854, by Mr. (now sir) G. B. Airy, the astronomer royal.

ARTIFICIAL GLOBES. It is said that a celestial globe was brought to Greece from Egypt, 368 B.C., and that Archimedes constructed a planetarium about 212 B.C.

The globe of Gottorp, a concave sphere, eleven feet in diameter, containing a table and seats for twelve persons, and the inside representing the visible surface of the heavens, the stars and constellations, all distinguished according to their respective magnitudes, and being turned by means of curious mechanism, their true position, rising and setting, are shown. The outside is a terrestrial globe. The machine, called the globe of Gottorp, from the original one of that name, which, at the expense of Frederick II. duke of Holstein, was erected at Gottorp, under the direction of Adam Olearius, and was planned after a design found among the papers of the celebrated Tycho Brahe. Frederick IV. of Denmark presented it to Peter the Great in 1713. It was nearly destroyed by fire in 1757; but it was afterwards reconstructed. *Coxe.*

The globe at Pembroke-hall, Cambridge, erected by Dr. Long (master, 1733), eighteen feet in diameter.

In 1851 Mr. Abrahams erected in Leicester-square, for Mr. Wyld, a globe 60 feet 4 inches in diameter, lit from the centre by day, and by gas at night. It was closed in July, 1861; the models were sold, and the building eventually taken down.

GLOBE THEATRE, BANKSIDE (London), see *Shakespeare's Theatre*.—The Globe "Theatre," erected on the site of Lyon's-inn, Strand, was opened 28 Nov. 1868, Mr. Sefton Parry, manager. —The *Globe* evening newspaper; formerly whig, now conservative; established 1803.

GLOIRE, French steam frigate, see *Navy, French*.

GLORY, the nimbus drawn by painters round the heads of saints, angels, and holy men, and the circle of rays on images, adopted from the Cæsars and their flatterers, were used in the 1st century. The doxology, "*Gloria Patri*," is very ancient, and originally without the clause "as it was in the beginning," &c. In the Greek it began with "*doxa*," *glory*.

GLOUCESTER (Roman *Glevum*), submitted to the Romans about 45, and to the Saxons 577. The statutes of Gloucester, passed at a parliament held by Edward I. 1278, relate to actions at law. This city was incorporated by Henry III.; and was fortified by a strong wall, which was demolished after the Restoration, in 1660, by order of Charles II., as a punishment for the successful resistance of the city to Charles I., under col. Massey, Aug., Sept. 1643. The Gloucester and Berkeley canal was completed in April, 1827. Gross bribery took place here at the election for the parliament in 1859.—The BISHOPRIC was one of the six erected by Henry VIII. in 1541, and was formerly part of Worcester. It was united to Bristol in 1836. The church, which belonged to the abbey, and its revenues, were appropriated to the maintenance of the see. The abbey, which was founded by king Wulphere about 700, was burnt in 1102, and again in 1122. In it are the tombs of Robert, duke of Normandy, and Edward II. In the king's books, this bishopric is valued at 315*l.* 17*s.* 2*d.* per annum. Present income, 5000*l.*

RECENT BISHOPS OF GLOUCESTER AND BRISTOL.

1802. George Isaac Huntingford, translated to Hereford, June, 1815.
1815. Hon. Hen. Ryder, translated to Lichfield, 1824.
1824. Christopher Bethell, translated to Exeter, 1830.

GLOVES. Woodstock and Worcester leather gloves are of ancient celebrity. In the middle ages, the giving a glove was a ceremony of investiture in bestowing lands and dignities; and two bishops were put in possession of their sees by each receiving a glove, 1002. In England, in the reign of Edward II. the deprivation of gloves was a ceremony of degradation. The Glovers' company of London was incorporated in 1556. Embroidered gloves were introduced into England in 1580, and are still presented to judges at maiden assizes. The importation of foreign gloves was not permitted till 1825.

GLUCINUM (from *glukus*, sweet). In 1798 Vauquelin discovered the earth *glucina* (so termed from the sweet taste of its salts). It is found in the beryl and other crystals. From glucina Wöhler and Bussy obtained the rare metal glucinum in 1828. *Gmelin.*

GLUCOSE, see *Sugar*.

GLUTEN, an ingredient of grain, particularly wheat, termed the vegeto-animal principle (containing nitrogen). Its discovery is attributed to Beccaria in the 18th century.

GLYCERINE, discovered by Scheele, about 1779, and termed by him the "sweet principle of fats," and further studied by Chevreul, termed the "father of the fatty acids." It is obtained pure by saponifying olive oil or animal fat with oxide of lead, or litharge. Glycerine is now much employed in medicine and the arts.

GLYOXYLINE (invented by Mr. F. A. Abel, the chemist of the war department, in 1867), an explosive mixture of gun-cotton, pulp and saltpetre saturated with nitro-glycerine. It was abandoned for compressed gun-cotton.

GNOSTICS (from the Greek *gnosis*, knowledge), a sect who, soon after the preaching of Christianity, endeavoured to combine its principles with the Greek philosophy. Among their teachers were Saturnius, 111; Basilides, 134; and Valentine, 140. Priscillian, a Spaniard, was burnt at Treves as a heretic, in 384, for endeavouring to revive Gnosticism.

GOA (S.W. Hindostan), was taken by the Portuguese under Albuquerque in 1510, and made their Indian capital. It was visited by the prince of Wales, 27 Nov. 1875.

GOBELIN-TAPESTRY, so called from a house at Paris, formerly possessed by wool-dyers, whereof the chief (Jehan Gobelin), in the reign of Francis I., is said to have found the secret of dyeing scarlet. This house was purchased by Louis XIV. for a manufactory of works for adorning palaces (under the direction of Colbert), especially tapestry, designs for which were drawn by Le Brun, about 1666.

"GOD BLESS YOU!" see *Sneezing*.

"GOD SAVE THE KING." This melody is said to have been composed by John Bull, Mus. D., in 1606, for a dinner given to James I. at Merchant Taylors' Hall; others ascribe it to Henry Carey, author of "Sally in our alley," who died, 4 Oct. 1743. It has been claimed by the French. The controversy on the subject is summed up in Chappell's "Popular Music of the Olden Times" (1859).

GODFATHERS AND GODMOTHERS, or *sponsors*. The Jews are said to have had them at circumcision; but there is no mention of them in scripture. Tradition says that sponsors were first appointed by Hyginus, a Roman bishop, about 154, during a time of persecution. In Roman Catholic countries bells have godfathers and godmothers at their baptism.

GODOLPHIN ADMINISTRATIONS (see *Administrations*), 1684 and 1690. Lord Godolphin became prime minister to queen Anne, 8 May, 1702. The cabinet was notified in 1704. The earl resigned 8 Aug. 1710, and died 1712.

GODWIN'S OATH. "Take care you are not swearing Godwin's oath." This caution, to a person taking a voluntary and intemperate oath, or making violent protestations, had its rise in the following circumstance related by the monks: Godwin, earl of Kent, was tried for the murder of prince Alfred, brother of Edward the Confessor, and pardoned, but died at the king's table while protesting with oaths his innocence of the murder; supposed by the historians of those times to have been choked with a piece of bread, as a judgment from Heaven, having prayed it might stick in his throat if he were guilty of the murder; 1053.

GODWIN SANDS, sand-banks off the east coast of Kent, occupy land which belonged to Godwin, earl of Kent, the father of king Harold II. This ground was afterwards given to the monastery of St. Augustin at Canterbury; but the abbot neglecting to keep in repair the wall that defended it from the sea, the tract was submerged about 1100, leaving these sands, upon which many ships have been wrecked. *Salmon.*

GOG AND MAGOG, see *Guildhall*.

GOLD (mentioned *Gen.* ii. 11), the purest, and most ductile of all the metals, for which reason it has been considered by almost all nations as the most valuable. It is too soft to be used pure, and to harden it it is alloyed with copper or silver: our coin consists of twenty-two carats of pure gold, and two of copper. By 17 & 18 Vict. c. 96 (1854), gold wares are allowed to be manufactured at a lower standard than formerly;—wedding rings excepted, by 18 & 19 Vict. c. 60 (1855). The present stated price is 3*l.* 17*s.* 10½*d.* per oz.; see *Coin of England*, and *Guineas*.

Estimated amount of gold in the world; value, 1848, 560,000,000*l.*; 1875, 1,000,000,000*l.*

The value of gold compared with silver is said to have been estimated in the time of Herodotus, B.C. 450, about 10 to 1; of Plato, B.C., 38, 12 to 1; A.D. 1876, more than 15 to 1. See *Silver*.

The Amalgamation of Gold is described by Pliny (about 77) and Vitravius (about 27 B.C.). The alchemist Basil Valentine (in the 15th century) was acquainted with the solution of the chloride of gold and fulminating gold. Andreas Cassius, in 1685, described the preparation of *gold purple*, which was then adapted by Kunkel to make *red glass*, and to other purposes. *Gmelin.* Gold has been subjected to the researches of eminent chemists, such as Berzelius and Faraday.

GOLD MINES. Gold was found most abundantly in Africa, Japan, and South America. In the last it was discovered by the Spaniards in 1492, from which time to 1731 they imported into Europe 6000 millions of pieces of eight, in register gold and silver, exclusively of what were unregistered.

Peter the Great re-opened ancient gold mines in Russia, 1699.

A piece of gold weighing ninety marks, equal to sixty pounds troy (the mark being eight ounces), was found near La Paz, a town of Peru, 1730.

Gold discovered in Malacca in 1731; in New Andalusia in 1785; in Ceylon, 1800; 2887 oz. of gold, value 9991*l.*, obtained from mines in Britain and Ireland in 1864; it has been found in Cornwall, and in the county of Wicklow in Ireland.

The Ural or Oural mountains of Russia long produced gold in large quantity.

Gold discovered in California, Sept. 1847; and in Australia, 1851. On 28 April, 1858, a nugget, said to weigh 146 pounds, was shown to the queen. It is estimated that between 1851 and 1859 gold to the value of 88,889,435*l.* was exported from Victoria alone (see *California* and *Australia* severally).

Gold discovered in what is now termed New Columbia in 1856: much emigration there in 1858.

Gold discovered in New Zealand, and in Nova Scotia in 1861.

Gold discovered in South Africa (Transvaal republic, &c.), and discovered in Sutherlandshire; much excitement, Oct. 1868; in West Australia, reported Sept. 1870; in the Bendigo fields, Victoria, Nov. 1871.

Gold obtained in United Kingdom; value in 1861, 10,816*l.*; in 1862, 20,390*l.*; in 1863, 1747*l.*; in 1864, 9991*l.*; in 1865, 5894*l.*; in 1868, 3522*l.*

GOLD WIRE was first made in Italy about 1350. An ounce of gold is sufficient to gild a silver wire above 1300 miles in length; and such is its tenacity that a wire the one-eighteenth part of an inch will bear the weight of 500 lb. without breaking. *Fourcroy.*

GOLD LEAF. A single grain of gold may be extended

* Born 1782; held various inferior appointments from 1809 to 1818, when he became president of the board of trade; was chancellor of the exchequer from 1818 to April, 1827, when he became colonial secretary, which office he held in the Grey cabinet, Nov. 1830; created earl of Ripon, 1833; died 28 Jan. 1859.

into *a leaf* of fifty-six square inches, and gold leaf can be reduced to the 300,000 part of an inch, and gilding to the ten-millionth part. *Kelly's Cambist.*

GOLD ROBBERY. Three boxes, hooped and sealed, containing gold in bars and coin to the value of between 18,000*l.* and 20,000*l.* were sent from London, 15 May, 1855. On their arrival in Paris, it was found that ingots to the value of 12,000*l.* had been abstracted, and shot substituted, although the boxes bore no marks of violence. Many persons were apprehended on suspicion; but the police obtained no trace till Nov. 1856. Three men named Pierce, Burgess, and Tester, were tried and convicted 13-15 Jan. 1857, on the evidence of Edward Agar, an accomplice. They had been preparing for the robbery for eighteen months previous to its perpetration.

GOLDEN BULLS, ROSE, see *Bulls, Rose*, note.

GOLDEN FLEECE (see *Argonauts*). Philip the Good, duke of Burgundy, in 1429, at his marriage, instituted the military order of "*Toison d'or*" or "golden fleece;" it was said on account of the profit he made by wool. The number of knights was thirty-one. The king of Spain, as duke of Burgundy, afterwards became grand master of the order. The knights wore a scarlet cloak lined with ermine, with a collar opened, and the duke's cipher, in the form of a B, to signify Burgundy, together with flints striking fire, with the motto "*Ante ferit, quam flamma micat.*" At the end of the collar hung a golden fleece, with this device, "*Pretium non vile laborum.*" The order afterwards became common to all the princes of the house of Austria, as descendants of Mary, daughter of Charles the Bold, last duke of Burgundy, who married Maximilian of Austria in 1477, and now belongs to both Austria and Spain, in conformity with a treaty made 30 April, 1725.

GOLDEN HORDE, a name given to the Mongolian Tartars, who established an empire in Kaptchak (or Kibzak), now S.E. Russia, about 1224, their ruler being Batou, grandson of Gengis Khan. They invaded Russia, and made Alexander Newski grand-duke, 1252. At the battle of Bielawisch, in 1481, they were crushed by Ivan III. and the Nogai Tartars.

GOLDEN LEGEND, "Legenda Aurea." The lives of our Lord and the saints, written by Giacomo Varaggio, or Jacobus de Voragine, a Dominican monk about 1260; first printed 1470; a translation printed by Caxton, 1483.

GOLDEN WEDDING, see *Wedding*.

GOLDEN NUMBER, the cycle of nineteen years, or the number that shows the years of the moon's cycle; its invention is ascribed to Meton, of Athens, about 432 B.C. *Pliny.* To find the golden number or year of the lunar cycle, add one to the date, and divide by 19; the quotient is the number of cycles since Christ, and the remainder the golden number. The golden number for 1876, 15; 1877, 16; 1878, 17; 1879, 18; 1880, 19.

GOLDSMITHS' COMPANY (London) began about 1327, and incorporated 16 Rich. II., 1392. The old hall was taken down in 1829, and the present magnificent edifice by Philip Hardwick, was opened 15 July, 1835; see *Assay*, and *Standard*. The first bankers were goldsmiths.

Goldsmiths' hall marks on gold and silver plate are five:—1. The sovereign's head (after 1784); 2, lion passant (the standard mark), probably introduced between 1538 and 1558; 3, the standard mark, fixed 8 & 9 Will. III. 1696-7; 4, leopard's head, the hall mark; 5, the maker's mark (an old custom).

[The *date-letter*, is one of an alphabet of 20 letters; A to U or V, J being omitted. GOOD FRIDAY (probably God's Friday), the Friday before Easter day, on which a solemn fast has long been held, in remembrance of the crucifixion of Christ on Friday, 3 April, 33, or 15 April, 29. Its appellation of *good* appears to be peculiar to the church of England; our Saxon forefathers denominated it *Long Friday*, on account of the length of the offices and fastings enjoined on this day. Good Friday, 1876, 14 April; 1877, 30 March; 1878, 19 April; 1879, 11 April; 1880, 26 March.

GORDIAN KNOT, is said to have been made of the thongs that served as harness to the waggon of Gordius, a husbandman, afterwards king of Phrygia. Whosoever loosed this knot, the ends of which were not discoverable, the oracle declared should be ruler of Persia. Alexander the Great cut away the knot with his sword until he found the ends of it, and thus, in a military sense at least, interpreted the oracle, 330 B.C.

GORDON'S "NO POPERY" RIOTS, occasioned by the zeal of lord George Gordon, June 2-9, 1780.

On 4 Jan. 1780, he tendered the petition of the Protestant Association to lord North.

On Friday, 2 June, he headed the mob of 40,000 persons who assembled in St. George's Fields, under the name of the Protestant Association, to carry up a petition to parliament for the repeal of the act which granted certain indulgences to the Roman Catholics. The mob proceeded to pillage, burn, and pull down the chapels

and houses of the Roman Catholics first, but afterwards of other persons, for nearly six days. The Bank was attempted, the gaols opened (the King's Bench, Newgate, Fleet, and Bridewell prisons). On the 7th, thirty-six fires were seen blazing at one time. At length by the aid of armed associations of the citizens, the horse and foot guards, and the militia of several counties, then embodied and marched to London, the riot was quelled on the 8th.

210 rioters were killed and 248 wounded, of whom 75 died afterwards in the hospitals, and many were tried, convicted and executed.

The loss of property was estimated at 180,000*l.*

It was taken by the English admiral Holmes in 1663; seized by the French, 1677; and ceded to them by the treaty of Nimeguen in 1678; taken by the British in 1758, 1779, 1800, and 1804; ceded to France, 1814. Governor Wall was hanged in London, 28 Jan. 1802, for the murder of sergeant Armstrong, committed while governor at Goree in 1782.

GORHAM CASE, see *Trials*, 1849-50.

GORILLA, a powerful ape of W. Africa, about five feet seven inches high. It is a match for the lion, and attacks the elephant with a club. It is considered to be identical with the hairy people called, *Gorullai* by the navigator Hanno, in his *Periplus*, about 400 B.C. In 1847 a sketch of a gorilla's cranium was sent to professor Owen by Dr. Savage, then at the Gaboon river, and preserved specimens have been brought to Europe, and a living one died on its voyage to France. In 1859 professor Owen gave a summary of our knowledge of this creature at the Royal Institution, London; and in 1861 several skins and skulls were there exhibited by M. Du Chaillu, who stated that he killed 21 of them in his travels in Central Africa. The gorilla was not known to Cuvier. A young gorilla (for Berlin) landed at Liverpool 21 June, 1876.

GOSPELLERS, a name given to the followers of Wickliffe, who attacked the errors of popery, about 1377. Wickliffe opposed the authority of the pope, the temporal jurisdiction of bishops, &c., and is called the father of the Reformation.

GOSPELS (Saxon *god-spell*, good story). Matthew's and Mark's are conjectured to have been written between A.D. 38 and 65; Luke's 55 or 65; John's, about 97. Irenæus in the 2nd century refers to each of the gospels by name. Dr. Robert Bray was one of the authors of the Society for the Propagation of the Gospel in Foreign Countries, incorporated in 1701. A body termed "Bray's Associates," still exists; its object being to assist in forming and supporting clerical parochial libraries.

GOSPORT (Hampshire), contains the Royal Clarence victualling yard. The great Haslar hospital, near Gosport, was built in 1762.

GOTHA, capital of the duchy of Saxe Coburg-Gotha. Here is published the celebrated *Almanach de Gotha*, which first appeared in 1764, in German.

GOTHARD, see *Gotthard*.

GOTHIC ARCHITECTURE began about the 9th century after Christ, and spread over Europe. Its great feature is the pointed arch; hence it has been suggested to call it the *pointed style*. "Gothic" was originally a term of reproach given to this style by the renaissance architects of the 16th century. Its invention has been claimed for several nations, particularly for the Saracens. The following list is from Godwin's Chronological Table of English Architecture:—

ANGLO-ROMAN—B.C. 55 to about A.D. 250—St. Martin's church, Canterbury.

ANGLO-SAXON—A.D. 800 to 1066—Earl's Barton church; St. Peter's, Lincolnshire.

GOTHIC ANGLO-ROMAN—A.D. 1066 to 1135—Rochester cathedral nave; St. Bartholomew's, Smithfield; St. Cross, Hants, &c.

EARLY ENGLISH, OR POINTED—A.D. 1135 to 1272—Temple church, London; parts of Winchester, Wells, Salisbury, and Durham cathedrals, and Westminster Abbey.

POINTED, called Pure Gothic—A.D. 1272 to 1377—Exeter cathedral, Waltham Cross, &c., St. Stephen's, Westminster.

FLORID POINTED—A.D. 1377 to 1509—Westminster Hall; King's College, Cambridge; St. George's Chapel, Windsor; Henry VII.'s Chapel, Westminster.

ELIZABETHAN—A.D. 1509 to 1625—Northumberland House, Strand; part of Windsor Castle; Hatfield House, Schools at Oxford.

Revival of Grecian architecture about 1625. Banqueting House, Whitehall, &c.

The revival of Gothic architecture commenced about 1825, mainly through the exertions of A. W. Pugin. The controversy as to its expediency was rife in 1860-1.

GOTHLAND, an isle in the Baltic sea, was conquered by the Teutonic knights, 1397-8; given up to the Danes, 1524; to Sweden, 1645; conquered by the Danes, 1677, and restored to Sweden, 1679.

GOTHS, a warlike nation that inhabited the country between the Caspian, Pontus, Euxine, and Baltic seas. They entered Mœsia, took Philippopolis, massacring thousands of its inhabitants; defeated and killed the emperor Decius, 251; but were defeated at Naissus by Claudius, hence surnamed Gothicus, 320,000 being slain, 269. Aurelian ceded Dacia to them in 272; but they long troubled the empire. After the destruction of the Roman western empire by the Heruli, the *Ostrogoths*, under Theoderic, became masters of the greater part of Italy, where they retained their dominion till 553, when they were finally conquered by Narses, Justinian's general. The *Visigoths* settled in Spain, and founded a kingdom, which continued until the country was subdued by the Saracens.

GOTTHARD, ST., near the river Raab, Hungary. Here the Turks, under the grand vizier Kupriuli, were totally defeated by the Imperialists and their allies, commanded by Montecuculi, 1 Aug. 1664. Peace followed this great victory.

GÖTTINGEN (Hanover), a member of the Hanseatic league about 1360. The university "Georgia Augusta," founded by George II. of England in 1734, was opened 1737. It was seized by the French, 1760, and held till 1762. In 1837 several of the most able professors were dismissed for their political opinions.

GOVERNESSES' BENEVOLENT INSTITUTION, was established in 1843, and incorporated in 1848. It affords to aged governesses annuities and an asylum; and to governesses in distress a temporary home and assistance.

GOVERNMENT ANNUITIES ACT, see *Annuities*. The building of the new GOVERNMENT OFFICES began in 1861.

GOWRIE CONSPIRACY. John Ruthven, earl of Gowrie, in 1600, reckoning on the support of the burghs and the kirk, conspired to dethrone James VI. of Scotland, and seize the government. For this purpose the king was decoyed into Gowrie's house in Perth, on 5 Aug. 1600. The plot was frustrated, and the earl and his brother, Alexander, were slain on the spot. At the time, many persons believed that the young men were rather the victims than the authors of a plot. Their father, William, was treacherously executed in 1584 for his share in the raid of Ruthven, in 1582; and he and his father, Patrick, were among the assassins of Rizzio, 9 March, 1566.

GRACE, a title assumed by Henry IV. of England, on his accession, in 1399. *Excellent Grace* was assumed by Henry VI. about 1425. Till the time of James I. 1603, the king was addressed by that title, but afterwards by the title of *Majesty* only. "Your Grace" is the manner of addressing an archbishop and a duke in this realm.—The term "*Grace of God*" is said to have been taken by bishops at Ephesus, 431 (probably from 1 *Cor.* xv. 10), by the Carlovingian princes in the 9th century, by popes in the 13th century; and about 1440 it was assumed by kings as signifying their divine right. "*Dei gratia*" was put on his great seal by William II. of England, and on his gold coin by Edward III. The king of Prussia's saying, that he would reign "by the grace of God," gave much offence, 18 Oct. 1861.

GRACE AT MEAT. The ancient Greeks would not partake of any meat until they had first offered part of it, as the first fruits, to their gods. The short prayer said before, and by some persons after meat, in Christian countries, is in conformity with Christ's example, *John* vi. 11, &c.

GRÆCIA MAGNA, colonies planted by the Greeks, 974-748 B.C.; see *Italy*.

GRAAL, Holy (Sangreal). The publication of Tennyson's poem with this title, Dec. 1869, led to much discussion. Tennyson treats it as the cup in which Christ drank at the Last Supper. The mediæval romances treat it as the dish which held the paschal-lamb. The word is probably old French, *gréal*, from the old Latin *gradalis*, a dish.

GRAFFITI, a term given to the scribblings found on the walls of Pompeii and other Roman ruins; selections were published by Wordsworth in 1837, and by Garrucci in 1856.

GRAFTON ADMINISTRATION, succeeded that of lord Chatham, Dec. 1767. The duke resigned, and lord North became prime minister, Jan. 1770; see *North's Administration*.

Augustus Henry, duke of Grafton, *first lord of the treasury* [born, 1735; died 1811].
Frederick, lord North, *chancellor of the exchequer*.
Earl Gower, *lord president*.
Earl of Chatham, *lord privy seal*.
Earl of Shelburne and Viscount Weymouth, *secretaries of state*.
Sir Edward Hawke, *first lord of the admiralty*.
Marquis of Granby, *master-general of the ordnance*.
Lords Sandwich and Le Despencer, *joint postmasters-general*.
Lords Hertford, duke of Ancaster, Thomas Townshend, &c.
Lord Camden, *lord chancellor*, succeeded by Charles Yorke (created lord Morden), died (it is said by his own hand) 20 Jan. 1770.

GRAHAM'S DIKE (Scotland), a wall built in 209 by Severus Septimus, the Roman emperor, or, as others say, by Antoninus Pius. It reached from the Firth of Forth to the Clyde. Buchanan relates that there were considerable remains of this wall in his time, and vestiges of it are still to be seen.

GRAIN. Henry III. is said to have ordered a grain of wheat gathered from the middle of the ear to be the original standard of weight: 12 grains to be a pennyweight; 12 pennyweights one ounce, and 12 ounces a pound Troy. *Lawson.*

GRAMMARIANS. A society of grammarians was formed at Rome so early as 276 B.C. *Blair.* Apollodorus of Athens, Varro, Cicero, Messala, Julius Cæsar, Nicias, Ælius Donatus, Remmius, Palemon, Tyrannion of Pontus, Athenæus, and other distinguished men, were of this class. A Greek grammar was printed at Milan in 1476; Lily's Latin grammar (Brevis Institutio), 1513; Lindley Murray's English grammar, 1795; Cobbett's English grammar, 1818.—Harris's Hermes was published in 1750, Horne Tooke's "Epea Pteroenta," or the "Diversions of Purley," in 1786, treatises on the philosophy of language and grammar. Cobbett declared Mr. Canning to have been the only purely grammatical orator of his time; and Dr. Parr, speaking of a speech of Mr. Pitt's, said, "We threw our whole grammatical mind upon it, and could not discover one error." The science of grammar has been recently much studied with excellent results.

GRAN, (Hungary). Here the Hungarians defeated the Austrians, 27 Feb. 1849.

GRANADA, a city, S. Spain, was founded by the Moors in the 8th century, and formed at first part of the kingdom of Cordova. In 1236, Mohammed-al-Hamar made it the capital of his new kingdom of Granada, which was highly prosperous till its subjugation by the "great captain," Gonsalvo de Cordova, 2 Jan. 1492. In 1609 and 1610 the industrious Moors were expelled from Spain, by the bigoted Philip III., to the lasting injury of his country. Granada was taken by marshal Soult in 1810, and held till 1812. See *New Granada*.

GRANARIES were formed by Joseph in Egypt, 1715 B.C. (*Genesis* xli. 48.) There were three hundred and twenty-seven granaries in Rome. *Univ. Hist.* Twelve new granaries were built at Bridewell to hold 6000 quarters of corn, and two store houses for sea-coal to hold 4000 loads, thereby to prevent the sudden dearness of these articles by great increase of inhabitants, 7 James I. 1610. *Stow.*

GRAND ALLIANCE between the emperor and the Dutch States-General (principally to prevent the union of the French and Spanish monarchies in one person), signed at Vienna, 12 May, 1689, to which England, Spain, and the duke of Savoy afterwards acceded.

GRAND PENSIONARY, a chief state functionary in Holland, in the 16th century. In the Constitution given by France to the Batavian republic, previously to the erection of the kingdom of Holland, the title was revived and given to the head of the government, 29 April, 1805, Rutger Jan Schimmelpenninck being made the grand pensionary; see *Holland*.

GRAND REMONSTRANCE, see *Remonstrance*.

GRANICUS (a river N. W. Asia Minor), near which, on 22 May, 334 B. C., Alexander the Great signally defeated the Persians. The Macedonian troops (30,000 foot and 5000 horse) crossed the Granicus in the face of the Persian army (600,000 foot and 20,000 horse). *Justin*. The victors lost fifty-five foot soldiers and sixty horse. Sardis capitulated, Miletus and Halicarnassus were taken by storm, and other great towns submitted to the conqueror.

GRANSON, near the lake of Neufchatel, Switzerland, where Charles the Bold, duke of Burgundy, was defeated by the Swiss, 3 March, 1476.

GRAPES. Previously to the reign of Edward VI. grapes were brought to England in large quantities from Flanders, where they were first cultivated about 1276. The vine was introduced into England in 1552; being first planted at Bloxhall, in Suffolk. In the gardens of Hampton-court palace is a vine, stated to surpass any in Europe; it is 72 feet by 20, and has in one season produced 2272 bunches of grapes, weighing 18 cwt.; the stem is 13 inches in girth; it was planted in 1769. *Leigh*.

GRAPHIC, illustrated weekly journal, established, 4 Dec. 1869.

GRAPHITE (from the Greek *graphein*, to write), a peculiar form of mineral carbon, with a trace of iron, improperly termed black lead and plumbago. In 1809 sir Humphry Davy investigated into the relations of three forms of carbon, the diamond, graphite, and charcoal. A rude kind of black lead pencil is mentioned by Gesner in 1565. Interesting results of sir B. C. Brodie's researches on graphite appeared in the International Exhibition of 1862. Fresh discoveries were made in the nearly exhausted Borrowdale mines, Cumberland, in 1875.

GRAPHOSCOPE, an optical apparatus for magnifying and giving fine effects to engravings, photographs, &c., invented by C. J. Rowsell; exhibited in 1871.

GRAPHOTYPE, a new process for obtaining blocks for surface-printing, the invention of Mr. De Witt Clinton Hitchcock in 1860. It was described by Mr. Fitz-Cook at the Society of Arts, 6 Dec. 1865. Drawings are made on blocks of chalk with a silicious ink; when dried, the soft parts are brushed away, and the drawing remains in relief; stereotypes are then taken from the block.

GRATES. The Anglo-Saxons had arched hearths, and chafing-dishes were in use until the introduction of chimneys about 1200; see *Chimneys*, and *Stoves*.

GRAVELINES (N. France). Here the Spaniards, aided by an English fleet, defeated the French on 13 July, 1558.

GRAVELOTTE, BATTLE OF, 18 Aug. 1870. See *Metz*.

GRAVITATION, as a supposed innate power, was noticed by the Greeks, and also by Seneca, who speaks of the moon attracting the waters, about 38. Kepler investigated the subject about 1615; and Hooke devised a system of gravitation about 1674. The principles of gravity were demonstrated by Galileo at Florence, about 1633; but the great law on this subject, laid down by Newton in his "Principia," in 1687, is said to have been proved by him in 1670. The fall of an apple from a tree in 1666 is said to have directed his attention to the subject.

Newton says, "I do not anywhere take on me to define the kind or manner of any action, the causes or physical reasons thereof, or attribute forces in a true and physical sense to certain centres, when I speak of them as attracting, or endued with attractive powers."

On 15 July, 1867, M. Chasles laid before the Paris Academy of Sciences some letters alleged to be from Newton to Pascal and others tending to show that to Pascal was due the theory of gravitation. The authenticity of these letters was authoritatively denied, and their forgery and his own delusion were acknowledged by M. Chasles before the academy 13 Sept. 1869.

GREAT SEAL OF ENGLAND. The first seal used by Edward the Confessor was called the broad seal, and affixed to the grants of the crown, 1048. *Baker's Chron*. The most ancient seal with arms on it is that of Richard I. James II., when fleeing from London in 1688, dropped the great seal in the Thames. The great seal of England was stolen from the house of lord chancellor Thurlow, in Great Ormond-street, and carried away, with other property, 24 March, 1784, a day before the dissolution of parliament; it was never recovered, and was replaced the next day. A new seal was brought into use on the union with Ireland, 1 Jan. 1801. A new seal for Ireland was brought into use and the old one defaced, 21 Jan. 1832. The Great Seal Offices Act, passed 7 Aug. 1874, abolished certain offices, transferred duties, &c.

GREECE, anciently termed Hellas. The Greeks are said to have been the progeny of Javan, fourth son of Japheth. Greece was so called from an ancient king, Græcus, and Hellas from another king, Hellen, the son of Deucalion. From Hellen's sons,

Dorus and Æolus, came the Dorians and Æolians; another son Xuthus was father of Achæus and Ion, the progenitors of the Achæans and Ionians. Homer calls the inhabitants indifferently Myrmidons, Hellenes, and Achaians. They were also termed Danaï, from Danaus, king of Argos, 1474 B.C. Greece anciently consisted of the peninsula of the Peloponnesus, Greece outside of the Peloponnesus, Thessaly, and the islands. The principal states of Greece were Athens, Sparta, Corinth, Thebes, Arcadia, and afterwards Macedon (*all which see*). The limits of Modern Greece are much more confined. Greece became subject to the Turkish empire in the 15th century. The population of the kingdom, established in 1829, 96,810: in 1861, 1,096,810, with the Ionian isles (added in 1864), about 1,348,522; in 1870, 1,457,894.

GREENBACKS, a name given, from the colour of some notes, to the paper currency first issued by the United States government, in 1862. Sums as low as 1½*d.*, 2½*d.*, and 5*d.*, &c. were represented—the precious metals being exceedingly scarce.

GREEN-BAG INQUIRY took its name from a *Green Bag*, full of documents of alleged seditions, laid before parliament by lord Sidmouth, 3 Feb. 1817. Secret committees presented their reports, 19 Feb.; and bills were brought in on the 21st to suspend the Habeas Corpus act, and prohibit seditious meetings then frequent.

GREEN CLOTH, BOARD OF, in the department of the lord-steward of the household, included an ancient court (abolished in 1849), which had jurisdiction of all offences committed in the verge of the court.

GREENLAND, an extensive Danish colony in north America, discovered by Icelanders, under Eric Raude, about 980, and named from its verdure. It was visited by Frobisher in 1576. The first ship from England to Greenland was sent for the whalefishery by the Muscovy company, 2 James I. 1604. In a voyage performed in 1630, eight men were left behind by accident, who suffered incredible hardships till the following year, when the company's ships brought them home. *Tindal.* The Greenland Fishing company was incorporated in 1693.—Hans Egede, a Danish missionary, founded a new colony, called *Godhaab*, or Good Hope, in 1720-3; and other missionary stations have been since established. Scoresby surveyed Greenland in 1821; and captain Graah, by order of the king of Denmark, in 1829-30.

GREENOCK (W. Scotland). Charters were granted in 1635 and 1760 to John Shaw, of the barony of Greenock. It was a fishing station till 1697, when the Scottish Indian and African company resolved to erect salt-works in the Frith, and thus drew the attention of sir John Shaw, its superior, to its maritime advantages. It was made a burgh of barony in 1757, and a parliamentary burgh in 1832. The erection of the new quay was entrusted, about 1773, to James Watt, who was born here in 1736. The East India harbour was built 1805-19, and Victoria harbour 1846-50.

GREEN PARK (near Buckingham palace, London) forms a part of the ground enclosed by Henry VIII. in 1530, and is united to St. James's and Hyde-parks by the road named Constitution-hill. Over the arch at the entrance, the Wellington statue was placed in 1846. On the north side was a reservoir of the Chelsea water-works, filled up in 1856.

GREENWICH (Kent), anciently Grenawic, an ancient manor, near which the Danes murdered the archbishop Elphege, 1012. The *Hospital* stands on the site of a royal residence erected in the reign of Edward I. and much enlarged by his successors. Here were born Henry VIII., his daughters Mary and Elizabeth, and here his son Edward VI. died. Charles II. intended to build a new palace here, but erected one wing only.

SECOND GRENVILLE ADMINISTRATION, formed after the death of Mr. Pitt, on 23 Jan. 1806. From the ability of many of its members, their friends said it contained "*all the talents, wisdom, and ability of the country,*" a term applied to it derisively by its opponents. The death of Mr. Fox, 13 Sept. 1806, led to changes, and eventually the cabinet resigned, 25 March, 1807:—

Lord Grenville, *first lord of the treasury.*
Lord Henry Petty (afterwards marquis of Lansdowne), *chancellor of the exchequer.*

GRESHAM COLLEGE (London), established by sir Thomas Gresham in 1575, founder of the Royal Exchange. He left a portion of his property in trust to the city and the Mercers' company to endow this college for lectures in divinity, astronomy, music, geometry, civil law, physic, and rhetoric; he died 21 Nov. 1579. The lectures, commenced in Gresham's house, near Broad-street, June, 1597 (where the founders of the Royal Society first met in 1645). The buildings were pulled down in 1768, and the Excise office erected on its site, the property having been acquired by the crown for an annuity of 500*l.* The lectures were then read in a room over the Royal Exchange for many years. On the rebuilding of the exchange, the Gresham committee erected the present building in Basinghall-street, which was designed by G. Smith, and opened for lectures, 2 Nov. 1843. It cost above 7000*l.* In 1871 the college acquired a valuable collection of books and pictures, bequeathed by Mrs. Hollier. Changes respecting the lectures were advocated in 1875, and some made in 1876.

GRETNA GREEN (Dumfries, S. Scotland, near the border). Here runaway marriages were contracted for many years, as Scotch law ruled that an acknowledgment before witnesses made a legal marriage. John Paisley, a tobacconist, and termed a blacksmith, who officiated from 1760, died in 1814. His first residence was at Megg's Hill, on the common or green betwixt Gretna and Springfield, to the last of which villages he removed in 1782. A man named Elliot was lately the principal officiating person. The General Assembly, in 1826, in vain attempted to suppress this system; but an act of parliament, passed in 1856, made these marriages illegal after that year, unless one of the persons married had lived in Scotland 21 days.

Again taken by the English in 1779, 1794, and 1810. The allies, in order to allure the Swedes into the late coalition against France, gave them this island. It was, however, by the consent of Sweden, restored to France at the peace in 1814. It was again taken by the British, 10 Aug. 1815, and restored to the French, July 1816.

GUANO or HUANO (the Peruvian term for manure), the excrement of sea-birds that swarm on the coasts of Peru and Bolivia, and of Africa and Australia. It is mentioned by Herrera in 1601, and Garcilasso stated that the birds were protected by the incas. Humboldt was one of the first by whom it was brought to Europe, in order to ascertain its value in agriculture. The importation of guano into the United Kingdom appears to have commenced in 1839. 283,000 tons were imported in 1845 (of which 207,679 tons came from the western coast of Africa); 243,016 tons in 1851 (of which 6522 tons came from Western Australia); 131,358 tons in 1864; 237,393 tons in 1865; 135,697 tons in 1866; 280,311 in 1870; 114,454 tons in 1875.

GUARANTEES. The "Guarantee by Companies act," relating to the security by means of sureties required for persons employed in the public service, was passed 20 Aug. 1867 (30 & 31 Vict. c. 108).

GUARDIAN, high-church weekly journal, first published 21 Jan. 1846.

GUARDS. The custom of having guards is said to have been introduced by Saul, 1093 B.C.

Body guards were appointed to attend the kings of England, 1 Henry VII. 1485.

Horse Guards were raised 4 Edw. VI. 1550.

The *royal regiment of guards* was first raised by Charles II. in Flanders in 1656, colonel lord Wentworth; another regiment was raised by colonel John Russell, 1660, under whom they were combined in 1665. The *Coldstream Guards*, raised by general Monk, were constituted the 2nd regiment in 1661; see *Coldstream*. These guards were the beginning of our standing army.

Gen. sir F. Wm. Hamilton's "History of the Grenadier Guards," an elaborate work, appeared 1874.

The Horse Grenadier guards first troop, raised in 1693, was commanded by general Cholmondeley; the second troop was raised in 1702, and was commanded by lord Forbes; this corps was reduced in 1783, the officers retiring on full pay.

GUARDS' INSTITUTE, Francis-street, Vauxhall-bridge road; reading and lecture rooms, &c., for all officers and soldiers in the metropolis; inaugurated by the duke of Cambridge, 11 July, 1867.

GUASTALLA, N. Italy, a city, near which the imperial army, commanded by the king of Sardinia, was defeated by the French, 19 Sept. 1734. The ancient duchy, long held by the dukes of Mantua, was seized by the emperor of Germany, 1746, and ceded to Parma, 1748. After having been comprised in the Italian republic, 1796, and subjected to other changes, it was annexed to Parma, 1815, and to Modena, 1847.

* He did great service in the West Indies, by taking Portobello, Chagre, &c.; but by his disagreement with the commander of the land forces, the expedition against Carthagena, in 1741, is said to have failed. He was dismissed the service for writing two pamphlets attacking the admiralty; he died 30 Oct. 1757.

GUATEMALA. A republic in Central America, revolted from Spain, 1821, and declared independent, 21 March, 1847. Constitution settled, 2 Oct. 1859. President (1862), general Raphael Carrera, elected 1851; appointed for life, 1854; died 14 April, 1865; succeeded by Vincent Cerna, 3 May, 1865-9. Manuel Garcia Granedos, Dec. 1872; R. Barrios, 7 May 1873. A war between Guatemala and San Salvador broke out in Jan. 1863; and on 16 June the troops of the latter were totally defeated. An insurrection became formidable, July, 1871. Alliance with Honduras against San Salvador, March, 1872. Population, about 1,180,000.

Col. Gonzales, commandant of San José de Guatemala, imprisoned, flogged, and nearly killed Mr. John Magee, the British consul, who was rescued by capt. Morse, of the Pacific Mail Company's steamer, *Arizona*, about 24 April, 1874.

Announced, that Gonzales had been sentenced to five years' imprisonment, and that Mr. Magee had received 10,000*l.* as compensation, Oct. 1874.

GUEBRES, see *Parsees.*

GUELPHIC ORDER of knighthood was instituted for Hanover by the prince regent, afterwards George IV., 12 Aug. 1815.

GUELPHS AND GHIBELINES, names given to the papal and imperial factions who destroyed the peace of Italy from the 12th to the end of the 15th century (the invasion of Charles VIII. of France in 1495). The origin of the names is ascribed to the contest for the imperial crown between Conrad of Hohenstaufen, duke of Swabia, lord of Wiblingen (hence *Ghibelin*), and Henry nephew of Welf, or Guelf, duke of Bavaria, in 1138. The former was successful; but the popes and several Italian cities took the side of his rival. *Hie Guelf* and *Hie Gibelin* are said to have been used as war-cries in 1140, at a battle before Weinsberg, in Würtemberg, when Guelf of Bavaria was defeated by the emperor Conrad IV. who came to help the rival duke Leopold.* The Ghibelines were almost totally expelled from Italy in 1267, when Conradin, the last of the Hohenstaufens, was beheaded by Charles of Anjou. Guelph is the name of the present royal family of England; see *Brunswick,* and *Hanover.*

GUERNSEY, see *Jersey.*

GUERRILLA, Spanish, "a little war"; a term applied to the armed peasants who worried the French armies during the Peninsular war, 1808-14.

GUEUX (beggars), a name given by the comte de Barlaimont to the 300 Protestant deputies from the Low Countries, headed by Henri of Brederode and Louis of Nassau, who petitioned Margaret, governess of the Low Countries, to abolish the inquisition, 5 April, 1566. The deputies at once assumed the name as honourable, and immediately organised armed resistance to the government; see *Holland.*

* It is stated, traditionally, that the emperor condemned all the men to death, but permitted the women to bring out whatever they most valued; on which they carried out their husbands on their shoulders.

GUIANA (N.E. coast of South America), discovered by Columbus in 1498, visited by the Spaniards in the 16th century; and explored by sir Walter Raleigh in 1596 and 1617. The French settlements here were formed in 1626-43; and the Dutch, 1627-67. Demerara and Essequibo were ceded to Great Britain in 1814; see *Demerara*. Governor of British Guiana, John Scott, 1868; James Robert Longden, 1874.

GUIDE-BOOKS for travellers are an English invention. Paterson's "British Itinerary," appeared in 1776; the last edition in 1840; when it was superseded by railways. Galignani's "Picture of Paris," 1814. Murray's "Handbook for Travellers on the Continent," the parent of the series, appeared in 1836.

GUIDES, a corps in the French army, especially charged with the protection of the person of the general, was formed by Bessières, under the direction of Bonaparte, who had been nearly carried off by the enemy, 30 May, 1796. Several squadrons of "guides" were formed in 1848, to guard the ministers. They formed a portion of the imperial guard till Sept. 1870.

GUIENNE, a French province, was part of the dominions of Henry II. in right of his wife Eleanor, 1152. Philip of France seized it in 1293, which led to war. It was alternately held by England and France till 1453, when John Talbot, earl of Shrewsbury, in vain attempted to retake it from the latter.

GUILDHALL (London) was built in 1411. When it was rebuilt (in 1669), after the great fire of 1666, no part of the ancient building remained, except the interior of the porch and the walls of the hall. The front was erected in 1789; and a new roof built, 1864-5. Beneath the west window are the colossal figures of Gog and Magog, said to represent a Saxon and an ancient Briton; replaced older ones, 1708; renewed, 1837. The hall can contain 7000 persons. Here were entertained the allied sovereigns in 1814, and Napoleon III., 19 April, 1855; and here the city industrial exhibition was held, 6 March, 1866, and the International Botanical banquet, 22 May, 1866. A memorial window, the gift of the cotton workers of Lancashire, to commemorate the munificence of the metropolis towards them in the famine of 1862-4, was uncovered, 15 July, 1868. The prince consort memorial window was unveiled in the presence of prince Arthur, 3 Nov. 1870. A library existed in the Guildhall in 1426, from which books were taken by the protector Somerset in the reign of Edward VI. The library was again set up; and re-opened, Jan. 1828. The new handsome building by Horace Jones was opened by the lord chancellor Selborne, 5 Nov. 1872; see *London*.

GUILDS (of Saxon origin, about the 8th century), associations of inhabitants of towns for mutual benefit, resembling our religious and friendly societies, chartered by the sovereign since the time of Henry II.

The London guilds became livery companies in the 14th century.

The guild of Corpus Christi, York, had 14,800 members when a return respecting these guilds was ordered to be made, 1388.

The Early English Text Society published the "Ordinances" of more than 100 guilds, 1870.

The "Guild of Literature and Art" (including sir E. B. Lytton, C. Dickens, and others) founded an institution (on ground given by sir E. B. Lytton, at Stevenage) consisting of thirteen dwellings, retreats for artists, scholars, and men of letters, which were completed and inaugurated, 29 July, 1865.

The revival of religious guilds began in 1851, with that of St. Alban, which held its 21st anniversary 20 June, 1872.

GUILLOTINE, an instrument for causing immediate and painless death, named after its supposed inventor, a physician named Joseph Ignatius Guillotin. In 1866 M. Dubois, of Amiens, stated that the idea only was due to Guillotin, who at a meeting of the legislative assembly in 1789 expressed an opinion that capital punishment should be the same for all classes. Accordingly, at the request of the assembly, M. Louis, secretary of the "Académie de Chirurgie," submitted to it on 20 March, 1792, a mode of capital punishment, "sure, quick, and uniform," which he had invented. The first person executed by it was a highway robber named Pelletier, on 25 April; and Dangremont was its first political victim, 21 Aug. following. Guillotin died in 1814. The guillotine at Paris was burnt by the communist insurgents, 7 April, 1871. A similar instrument (called the *Mannaia*) is said to have been used in Italy, at Halifax in England (see *Halifax*), and in Scotland, there called the Maiden and the Widow.

GUINEA (W. coast of Africa) was discovered by the Portuguese about 1446. From their trade with the Moors originated the slave trade, sir John Hawkins being the first Englishman who engaged in this traffic. *Assisted* by English gentlemen with money for the purpose, he sailed from England in Oct. 1562, with three ships, proceeded to the coast of Guinea, purchased or forcibly seized 300 negroes, sold them profitably at Hispaniola, and returned home richly laden with hides, sugar, ginger, and other merchandise, in Sept. 1563. This voyage led to similar enterprises. *Hakluyt*. See *Slave Trade*. An African company to trade with Guinea was chartered 1588. The Dutch settlements here were transferred to Great Britain, 6 April, 1872. See *Elmina*, and *Ashantees*.

GUINEAS, English gold coin, so named from having been first coined of gold brought by the African company from the coast of Guinea in 1663, valued then at 20*s*.; but worth 30*s*. in 1695. Reduced at various times; in 1717 to 21*s*. In 1810 guineas were sold for 22*s*. 6*d*.; in 1816, for 27*s*. In 1811 an act was passed forbidding their exportation, and their sale at a price above the current value, 21*s*. The first guineas bore the impression of an elephant, having been coined of this African gold. Since the issue of sovereigns, 1 July, 1817, guineas have not been coined.

GUN, see *Artillery*, *Fire-arms*.—**GUN-CLUB**, for pigeon-shooting, founded by sir Gilbert East, in 1862, had 200 members, noblemen and gentlemen, in July, 1867. The new gun-licences produced in the financial year 1871-2, 62,437*l*.

GUN-COTTON, a highly explosive substance, invented by professor Schönbein, of Basel, and made known in 1846. It is purified cotton, steeped in a mixture of equal parts of nitric acid and sul-

phuric acid, and afterwards dried, retaining the appearance of cotton wool. See *Collodion*. Its nature was known to Bracconot and Pelouze.

The diet of Frankfort voted, 3 Oct. 1846, a recompense of 100,000 florins to professor Schönbein and Dr. Boettger, as the inventors of the cotton powder, provided the authorities of Mayence, after seeing it tried, pronounced it superior to gunpowder as an explosive.

Improvements were made in the manufacture of gun-cotton by an Austrian officer, Baron von Lenk, about 1852, and it was tried by a part of the Austrian army in 1855, but did not obtain favour.

In 1862 details of the manufacture were communicated by the Austrian government to our own government, and Mr. Abel, our war-office chemist, was directed to experiment on the constitution and desirability of gun-cotton. The British Association also appointed a scientific committee to consider its merits. A complete decision was not arrived at.

The first trial of English-made gun-cotton was made in the spring of 1864, at the manufactory at Stowmarket, Suffolk, by Messrs. Prentice.

There was manufactured, by a company, the "patent safety gun-cotton," according to Mr. Abel's patent (including the pulping, compressing, and wet processes), based on researches commenced in 1866. The cotton was said to be explosive by detonation, and not by ignition. A great explosion took place at Stowmarket; 24 persons were killed (including A. E. H. and W. R. Prentice, managers); about 60 were dreadfully wounded, and nearly the whole town was destroyed as if by a bombardment, 11 Aug. 1871.

The verdict at the inquest attributed the explosion to the culpable "addition of sulphuric acid to the gun-cotton subsequent to its passing the tests required by government," 6 Sept. 1871.

A government commission, appointed in Sept. to consider the manufacture and use of gun-cotton, reported in favour of both, with special regard to compressed gun-cotton, 13 Dec. 1871.

Another report recommended this gun-cotton to be stored wet, with drying apparatus near; and to be kept in slighter boxes, 25 July, 1872.

Mr. E. O. Brown, of the war department, Woolwich, discovers that wet gun-cotton can be exploded by concussion by a detonating fuse, about Nov. 1872.

It is used as an explosive agent in mining, &c.

GUN-CLOTH, made on a similar principle, was patented by Mr. W. A. Dixon, about 1866.

COTTON-GUNPOWDER, patented by Mr. R. Punshon, 1871. A modified form was tried and reported successful, near Faversham, 3 Feb. 1875.

GUN LICENCE ACT, passed 9 Aug. 1870; annual licence, 10*s*.

GUNPOWDER. The invention of gunpowder is generally ascribed to Bertholdus or Michael Schwartz, a Cordelier monk of Goslar, south of Brunswick, in Germany, about 1320. But many writers maintain that it was known much earlier in various parts of the world. Some say that the Chinese and Hindoos possessed it centuries before. Its composition, moreover, is expressly mentioned by Roger Bacon, in his treatise *De Nullitate Magiæ*. He died in 1292 or 1294. Various substitutes for gunpowder have been recently invented, such as the white gunpowder of Mr. Horsley and Dr. Ehrhardt, and gun-paper by Mr. Hochstödten. A new gunpowder by M. Newmayer, of Toya, near Leipsic, was discussed in Nov. 1866. "Pellet gunpowder" was ordered to be used in gun-charges in the army, March, 1868. An act to amend the law concerning the making, keeping, and carriage of gunpowder, &c. was passed 28 Aug. 1860, and other acts since. See *Birmingham*, 1870. In May, 1872, a company was formed to manufacture Mr. R. Punshon's patent cotton-gunpowder, asserted to be very safe and controllable. See *Chronoscope*.

ENGLISH WAR GUNPOWDER: 75 parts nitrate of potash (saltpetre); 10 sulphur; 15 carbon. These proportions may be slightly varied.

W. Hunter, after a careful examination of the question, in 1847, thus states the result:—"July and August, 1346, may be safely assumed to be the time when the explosive force of gunpowder was first brought to bear on the military operations of the English nation."

Above 11 tons of gunpowder on board the Lottie Sleigh, in the Mersey, exploded; much damage done in Liverpool and Birkenhead, but no lives lost, 16 Jan. 1864.

About 104,000 lbs. of gunpowder exploded at the Belvedere powder magazines of Messrs. Hall & Co., at Plumstead, near Woolwich; 13 persons perished, and the shock was felt at 50 miles' distance, 1 Oct. 1864. Searching inquiries were made into the circumstances, and new regulations for the keeping and transmission of powder issued in November; see *Dartford*.

Mr. Gale, a blind gentleman of Plymouth, on 22 June, 1865, patented his method of rendering *gunpowder uninflammable* by combining with it finely powdered glass, which can be readily separated by a sieve when the powder is required for use. Successful public experiments were made.

Mr. Gale exhibited his process before the queen at Windsor, 10 Nov. 1865, and it was severely tested at a martello tower, near Hastings, 20 June, 1866. The attainment of perfect security was still doubtful. Gale's Protected Gunpowder Company was formed, Oct. 1865, and wound up, March, 1867.

Great explosion at Messrs. Hall's powder-mills, near Faversham; 11 men killed, much damage done; shock felt at Canterbury, 10 miles off, 28 Dec. 1867. Another explosion about 21 Dec. 1868.

Dixon & Beck's works blown up; 9 lives lost, 25 July, 1868.

Explosion at Hounslow mills, 3 lives lost, 6 Sept. 1872.

Milner's powder-magazines placed in fire at Woolwich arsenal and found secure, 8-9 Oct. 1872.

About 5 tons of gunpowder in barrels exploded in the barge *Tilbury*, on the Regent's Canal, near the North Bridge-gate, Regent's-park, nearly 5 A.M. 2 Oct. 1874.

Three men on the barge killed; shock felt about 30 miles off; destruction extended over about a square mile; some houses thrown down; the house of Mr. Alma Tadema, the artist, much injured; very many windows blown in.

The powder was sent by Pigou and Wilks to Derbyshire for blasting purposes;—order of the barges: *Ready*, tug steamer; *Jane*, *Dee*, *Tilbury*, *Limehouse*, and *Hawkesbury*.

6333*l*. had been subscribed for the sufferers up to 1 May 1875.

Verdict of Inquest—Explosion caused by ignition of vapour from benzoline by a fire or light in the cabin of the *Tilbury*. The Junction Canal Company guilty of gross negligence, and the present laws inadequate for public safety, 19 Oct. 1874.

The company declared responsible on trial (by Capt. Jackson), 14 May 1875.

One thousand and fifty-four claims had been settled for 63,660*l*., June 1876.

GUNPOWDER PLOT, for springing a mine under the houses of parliament, and destroying the three estates of the realm—king, lords, and commons—there assembled, was discovered on 4 Nov. 1605. It was projected by Robert Catesby early in 1604, and several Roman Catholics of rank were in the plot. Guy Faux was detected in the vaults under the house of lords, hired for the purpose, preparing the train for being fired on the next day. Catesby and Percy (of the family of Northumberland) were killed at Holbeach house, whither they had fled, 8 Nov.; and Guy Faux, sir Everard Digby, Rookwood, Winter, and others, were executed, 30, 31 Jan. 1606. Henry Garnet, a Jesuit, suffered as an accomplice, 3 May following. An anonymous letter sent to lord Monteagle led to the discovery. It contained the following words, "Though there be no appearance of any stir, yet I say they shall receive a terrible blow this parliament, and yet they shall not see who hurts them." The vault called Guy Faux cellar, in which the conspirators lodged the barrels of gunpowder, remained till 1825, when it was converted into offices.

GUNTER'S CHAIN, used in measuring land, invented by Edmund Gunter, in 1606.

GURNEY'S ACT, 31 & 32 Vict., c. 116 (1868), amends the law relating to larceny and embezzlement.

GUTTA PERCHA is procured from the sap of the Isonandra Gutta, a large forest tree, growing in the Malayan peninsula and on the islands near it. It was made known in England by Drs. De Almeida and Montgomery, at the Society of Arts, in 1843. As a non-conductor of electricity it is invaluable in constructing submarine telegraphs, an application suggested by Faraday and Werner Siemens independently, 1847.

GUY'S HOSPITAL (London). Thomas Guy, a wealthy bookseller, after bestowing large sums on St. Thomas's, determined to found a new hospital. At the age of seventy-six, in 1721, he commenced the present building, and lived to see it nearly completed. It cost him 18,793*l.*, and, in addition, he endowed it with 219,499*l.* In 1829, 196,115*l.* were bequeathed to this hospital by Mr. Hunt, to provide accommodation for 100 additional patients.

GUZERAT, a state in India, founded by Mahmoud the Gaznevide, about 1020, was conquered by Akbar in 1572; and became subject to the Mahrattas 1732 or 1752. At the battle of Guzerat, near the Chenab, in the Punjab, 21 Feb. 1849, lord Gough totally defeated the Sikhs and captured the town of Guzerat.

GWALIOR, an ancient state in Central India; since 1803, under British protection. Scindiah, the maharajah, remained faithful during the revolt of 1857; visit of the prince of Wales, 31 Jan. 1876.

GYMNASIUM, a place where the Greeks performed public exercises, and where philosophers, poets, and rhetoricians repeated their compositions. In wrestling and boxing the athletes were often naked (*gymnos*), whence the name. A London gymnastic society, formed in 1826, did not flourish. In 1862, M. Ravenstein set up another gymnastic association. The German Gymnastic Institution, in St. Pancras-road, London, was opened on 29 Jan. 1865, and a large and perfect gymnasium at Liverpool was inaugurated by lord Stanley, 6 Nov. 1865. A London athletic club existed in Nov. 1866.

GYMNOSOPHISTÆ, a set of naked philosophers in India. Alexander (about 324 B.C.) was astonished at the sight of men who seemed to despise bodily pain, and endured tortures without a groan. *Pliny.*

GYPSIES, GIPSIES, or EGYPTIANS (French, *Bohémiens;* Italian, *Zingari;* Spanish, *Gitanos;* German, *Zigeuner*); vagrants, supposed to be descendants of low-caste Hindoos expelled by Timour, about 1399. They appeared in Germany and Italy early in the 15th century, and at Paris in 1427. In England an act was made against their itinerancy, in 1530; and in the reign of Charles I. thirteen persons were executed at one assizes for having associated with gypsies for about a month. The gypsy settlement at Norwood was broken up, and they were treated as vagrants, May, 1797. There were in Spain alone, previously to 1800, more than 120,000 gypsies, and many communities of them yet exist in England. Notwithstanding their intercourse with other nations, their manners, customs, visage, and appearance are almost wholly unchanged, and their pretended knowledge of futurity gives them power over the superstitious. Esther Faa was crowned queen of the gypsies at Blyth, on 18 Nov. 1860. The Bible has been translated into gypsy dialects. Gypsy parliaments are occasionally held.

GYROSCOPE (from *gyrere*, to revolve), the name of a rotatory apparatus invented by Fessel of Cologne (1852), and improved by professor Wheatstone and M. Foucault of Paris. It is similar in principle to the rotatory apparatus of Bohnenberger of Tübingen (born 1765, died 1831).—The gyroscope by exhibiting the combined effects of the centrifugal and centripetal forces, and of the cessation of either, illustrates the great law of gravitation.

H.

HAARLEM, an ancient town in Holland, once the residence of the counts, was taken by the duke of Alva, in July, 1573, after a siege of seven months. He violated the capitulation by butchering half the inhabitants. The lake was drained, 1849–51.

HABEAS CORPUS. The subjects' *Writ of Right*, passed "for the better securing the liberty of the subject," 31 Charles II. c. 2, 27 May, 1679. If any person be imprisoned by the order of any court, or of the queen herself, he may have a writ of habeas corpus, to bring him before the court of queen's bench or common pleas, which shall determine whether his committal be just. This act (founded on the old common law) is next in importance to *Magna Charta*. The *Habeas Corpus* act can be suspended by parliament for a specified time when the emergency is extreme. In such a case the nation parts with a portion of its liberty to secure its own permanent welfare, and suspected persons may then be arrested without cause or purpose being assigned. *Blackstone.*

The constitution of the United States provides that "the privilege of habeas corpus shall not be suspended, unless when, in cases of rebellion or invasion, the public safety may require it;" but does not specify the department of the government having the power of suspension. A series of contests on this subject between the legal and military authorities began in Maryland, May, 1861

In consequence of the affair of John Anderson (see *Slavery in England*, note), an act was passed in 1862, enacting that no writ of *Habeas Corpus* should issue out of England into any colony, &c., having a court with authority to grant such writ.

HAIR. In Gaul, hair was much esteemed, hence the appellation *Gallia comata;* cutting off the hair was a punishment. The royal family of France held it as a privilege to wear long hair artfully dressed and curled. "The clerical tonsure is of apostolic institution!" *Isidorus Hispalensis.* Pope Anicetus forbade the clergy to wear long hair, 155. Long hair was out of fashion during the protectorate of Cromwell, and hence the term *Roundheads;* in 1795; and also 1801.—*Hair-powder* came into use in 1590; and in 1795 a tax of a guinea was laid upon persons using it, which yielded at one time 20,000*l.* per annum. The tax was repealed 24 June, 1869, when it yielded about 1000*l.* a year. See *Beard.*

Edward Balliol thus became king of Scotland for a short time.

HALIFAX (Yorkshire). The woollen manufactory was successfully established here in the 15th century. The power of the town to punish capitally (by a peculiar engine resembling the guillotine) any criminal convicted of stealing to the value of upwards of thirteen pence halfpenny, was used as late as 1650. In 1857, Mr. J. Crossley announced his intention of founding a college here, and Mr. F. Crossley presented the town with a beautiful park.

Further inquiry ensued respecting the disappearance of a child, Elizabeth Bellue. The medical officers were exonerated from blame, Dec.

HAMPTON COURT PALACE (Middlesex), built by cardinal Wolsey on the site of the manor-house of the knights-hospitallers, and in 1525 presented to Henry VIII.; perhaps the most splendid offering ever made by a subject to a sovereign. Here Edward VI. was born, 12 Oct. 1537; here his mother, Jane Seymour, died, 24 Oct. following; and here Mary, Elizabeth, Charles, and others of our sovereigns resided. Much was pulled down, and the grand inner court built by William III. in 1694, when the gardens, occupying 40 acres, were laid out. The vine was planted 1769. Here was held, 14-16 Jan. 1604, the CONFERENCE between the Puritans and the Established church clergy, which led to a new translation of the Bible; see *Conference*.

HANAPER OFFICE (of the court of chancery), where writs relating to the business of the subject, and their returns, were anciently kept *in hanaperio* (in a wicker hamper); and those relating to the crown, *in parva baga* (a little bag). Hence the names *Hanaper* and *Petty Bag Office*. The office was abolished in 1842.

HANAU (Hesse-Cassel), incorporated 1303. Here a division of the combined armies of Austria and Bavaria, of 30,000 men, under general Wrede, encountered the French, 70,000 strong, under Napoleon I., on their retreat from Leipsic, 30 Oct. 1813. The French suffered very severely, though the allies were compelled to retire. The county of Hanau was made a principality in 1803; seized by the French in 1806; incorporated with the duchy of Frankfort in 1809; restored to Hesse in 1813; which was annexed to Prussia in 1866.

HANDEL'S COMMEMORATIONS. The *first* was held in Westminster abbey, 26 May, 1784; king George III. and queen Charlotte, and above 3000 persons being present. The band contained 268 vocal and 245 instrumental performers, and the receipts of three successive days were 12,746*l.* These concerts were repeated in 1785, 1786, 1790, and 1791.

There were 2765 vocal and 393 instrumental performers, and the performance was highly successful. The receipts amounted to about 33,000*l.*, from which there were deducted 18,000*l.* for expenses; of the residue (15,000*l.*), two parts accrued to the Crystal Palace Company, and one part to the Sacred Harmonic Society. Handel's harpsichord, original scores of his oratorios, and other interesting relics, were exhibited.

Handel festivals (at the Crystal Palace): 4000 performers; highly successful; 23, 25, 27 June, 1862; again, 26, 28, 30 June, 1865; again, 15, 17, 19 June, 1868 (about 25,000 present); also, 19, 21, 23 June, 1871 (about 84,000 persons subscribed); also, 22, 24, 26 June 1874.

Five gentlemen attached to the duke of Gloucester were arraigned and condemned for treason, and at the place of execution were hanged, cut down alive instantly, stripped naked, and their bodies marked for quartering, and then pardoned, 25 Hen. IV. 1447. *Stow.* The Cato-street conspirators (*which see*) were beheaded after death by hanging, 1 May, 1820. Hanging in chains was abolished in 1834; see *Death*.

HANGO BAY (Finland). On 5 June, 1855, a boat commanded by lieut. Geneste left the British steamer *Cossack*, with a flag of truce to land some Russian prisoners. They were fired on by a body of riflemen, and five were killed, several wounded, and the rest made prisoners. The Russian account, asserting the irregularity to have been on the side of the English, was not substantiated.

He became bishop of Osnaburg in 1662, and in 1679 inherited the possessions of his uncle John, duke of Calenberg; created ELECTOR of Hanover in 1692.

[He married, in 1659, the princess Sophia, daughter of Frederick, elector palatine, and of Elizabeth, the daughter of James I. of England. In 1701, Sophia was declared next *heir to the British crown*, after William III., Anne, and their descendants.]

HANOVER SQUARE, built about 1718; the concert rooms opened by John Gallini soon after 1760; closed; the house taken for a club; Dec. 1874; rebuilt, 1875.

HANSE TOWNS. The Hanseatic league (from *hansa*, association), formed by port towns in Germany against the piracies of the Swedes and Danes: began about 1140; the league signed 1241. At first it consisted only of towns situate on the coasts of the Baltic sea, but in 1370 it was composed of sixty-six cities and forty-four confederates. The league proclaimed war against Waldemar, king of Denmark, about the year 1348, and against Eric in 1428, with forty ships and 12,000 regular troops, besides seamen. On this several princes ordered the merchants of their respective kingdoms to withdraw their effects. The Thirty years' war in Germany (1618-48) broke up the strength of the association, and in 1630 the only towns retaining the name were Lübeck, Hamburg, and Bremen. The league suffered also by the rise of the commerce of the Low Countries in the 15th century. Their privileges by treaty in England were abolished by Elizabeth in 1578.

HAPSBURG (HABSBURG or HABICHTSBURG), HOUSE OF, the family from which the imperial house of Austria sprang in the 11th century, Werner being the first named count of Habsburg, 1096. Hapsburg was an ancient castle of Switzerland, on a lofty eminence near Schintznach. Rodolph, count of Hapsburg, became archduke of Austria, and emperor of Germany, 1273; see *Austria*, and *Germany*.

HARBOURS. England has many fine natural harbours; the Thames (harbour, dock, and depôt), Portsmouth, Plymouth, &c. Acts for the improvement of harbours, &c., were passed in 1847, 1861, and 1862.

HARFLEUR, seaport, N.W. France, taken by Henry V., 22 Sept. 1415.

HARLAW (Aberdeenshire), the site of a desperate indecisive battle between the earl of Mar, with the royal army, and Donald, the lord of the Isles, who aimed at independence, 24 July, 1411. This conflict was very disastrous to the nobility, some houses losing all their males.

HARLEIAN LIBRARY, containing 7000 manuscripts, besides rare printed books, bought by secretary Harley, afterwards earl of Oxford and Mortimer, 1705, *et seq.*, is now in the British Museum. A large portion of his life and wealth was spent on the collection. He died 21 May, 1724. The Harleian Miscellany, a selection from the MSS. and Tracts of his library, was published in 1744 and 1808.

HARLEY ADMINISTRATION, see *Oxford*.

HARMONIC STRINGS, said to have been invented by Pythagoras about 540 B.C., through hearing four blacksmiths working with hammers, in harmony, whose weights he found to be six, eight, nine, and twelve. The HARMONICA, or musical glasses, were first "arranged" by an Irish gentleman named Puckeridge, and improved by Dr. Franklin in 1760; see *Copophone*.

HARMONISTS, a sect, founded in Würtemburg by George and Frederick Rapp, about 1780. Not much is known of their tenets, but they held their property in common, and considered marriage a civil contract. They emigrated to America, and built New Harmony in Indiana in 1815. Robert Owen purchased this town about 1823; but failed in his scheme at establishing a "social" community and returned to England: see *Socialists*. The Harmonists removed to Pittsburg in Pennsylvania in 1822.

HARMONIUM, a keyed instrument, resembling the accordion, the tones being generated by the action of wind upon metallic reeds. The Chinese were well acquainted with the effects produced by vibrating tongues of metal. M. Biot stated, in 1810, that they were used musically by M. Grenié; and in 1827-29, free reed stops were employed in organs at Beauvais and Paris. The best known harmoniums in England are those of Alexandre and Debain, the latter claiming to be the original maker of the French instrument. In 1841, Mr. W. E. Evans, of Cheltenham, produced his English harmonium, then termed the Organ-Harmonica, and by successive improvements he produced a fine instrument, with diapason quality, and great rapidity of speech, without loss of power.

HARNESS, chariots and the leathern dressings used for horses to draw them, are said to have been the invention of Erichthonius of Athens, who was made a constellation after his death, under the name of *Boötes* (Greek for ploughman), about 1487 B.C.

HARO, CRY OF (*Clameur de Haro*), traditionally derived from Raoul, or Rollo, of Normandy, ancestor of our Norman princes of England. Rollo administered justice so well, that injured persons cried "*à Raoul!*" The cry was raised in a church in Jersey in 1859.

HARP. Invented by Jubal, 3875 B.C. (*Gen.* iv. 21). David played the harp before Saul, 1063 B.C. 1 *Sam.* xvi. 23. The Cimbri, or English Saxons, had this instrument. The celebrated Welsh harp was strung with gut; and the Irish harp, like the more ancient harps, with wire. Erard's improved harps were first patented in 1795.

One of the most ancient harps existing is that of Brian Boroimhe, monarch of Ireland: it was given by his

son Donagh to pope John XVIII., together with the crown and other regalia of his father, in order to obtain absolution for the murder of his brother Teig. Adrian IV. alleged this as being one of his principal titles to the kingdom of Ireland in his bull transferring it to Henry II. This harp was given by Leo X. to Henry VIII., who presented it to the first earl of Clanricarde: it then came into possession of the family of De Burgh; next into that of MacMahon of Clenagh, county of Clare; afterwards into that of MacNamara of Limerick; and was at length deposited by the right hon. William Conyngham in the College Museum, Dublin, in 1782.

HARPER'S FERRY (Virginia), see *United States*, 1859-62.

HARRISON'S TIME-PIECE, made by John Harrison, of Foulby, near Pontefract. In 1714, the government offered rewards for methods of determining the longitude at sea; Harrison came to London, and produced his first time-piece in 1735; his second in 1739; his third in 1749; and his fourth, which procured him the reward of 20,000*l.* offered by the Board of longitude, a few years after. He obtained 10,000*l.* of his reward in 1764, and other sums, more than 24,000*l.* in all, for further improvements in following years.

In the patent museum at South Kensington is an eight-day clock made by Harrison in 1715. It strikes the hour, indicates the day of the month, and with one exception (the escapement) its wheels are entirely made of wood. The clock was going in 1871.

HARROGATE (Yorkshire). The first or old spa in Knaresborough forest was discovered by capt. Slingsby in 1571: a dome was erected over the well by lord Rosslyn in 1786. Two other chalybeate springs are the Alum well and the Towit spa. The sulphureous well was discovered in 1783. The theatre was erected in 1788. The Bath hospital was erected by subscription in 1825.

HARROW-ON-THE-HILL SCHOOL (Middlesex), founded and endowed by John Lyon in 1571. To encourage archery, the founder instituted a prize of a silver arrow to be shot for annually on the 4th of August; but the custom has been abolished. Lord Palmerston, sir R. Peel, the statesman, and lord Byron, the poet, were educated here. The school building suffered by fire, 22 Oct. 1838. The school arrangements were modified by the public schools act, 1868. Charles II. called Harrow church "the visible church."

HARTLEY COAL MINE (Northumberland). On 16 Jan. 1862, one of the iron beams, about 12 tons weight, at the mouth of the ventilating shaft, broke and fell, destroyed the brattice, divided the shaft, and carried down sufficient timber to kill two men who were ascending the shaft, and buried alive 202 persons, men and boys. Several days elapsed before the bodies could be removed. Much sympathy was shown by the queen and the public, and about 50,000*l.* were collected for the bereaved families. The coroner's verdict asserted the necessity of two shafts to coal mines, and recommended that the beams of colliery engines should be of malleable instead of cast iron.

HARTWELL (Buckinghamshire), the retreat of Louis XVIII., king of France, 1807-14. He landed in England at Yarmouth, 6 Oct. 1807, took up his residence at Gosfield-hall, in Essex, and afterwards came to Hartwell, as the count de Lille. His consort died here in 1810. On his restoration, he embarked at Dover for France, 24 April, 1814; see *France*.

HARUSPICES, priests or soothsayers, of Etruscan origin, who foretold events from observing entrails of animals. They were introduced to Rome by Romulus (about 750 B.C.), and abolished by Constantine, A.D. 337, at which time they were seventy in number.

HARVARD COLLEGE (Massachusetts, North America) was founded by the general court at Boston, on 28 Oct. 1636. It derived its name from John Harvard, who bequeathed to it his library and a sum of money in 1638.

HASTINGS, a cinque-port, Sussex; said to owe its name to the Danish pirate Hastinge, who built forts here, about 893; but Mr. Kemble thinks it was the seat of a Saxon tribe named Hastingas. At Senlac, now Battle, near Hastings, more than 30,000 were slain in the conflict between Harold II. of England and William duke of Normandy, the former losing his life and kingdom, 14 Oct. 1066, his birthday. He and his two brothers were interred at Waltham abbey, Essex. The new town, St. Leonard's-on-sea, was begun in 1828. A new pier here was inaugurated by earl Granville, 5 Aug. 1872.

HASTINGS' TRIAL. Warren Hastings, governor-general of India, was tried by the peers of Great Britain for high crimes and misdemeanours. Among other charges was his acceptance of a present of 100,000*l.* from the nabob of Oude; see *Chunar, Treaty of*. The trial occupied 145 days, and lasted seven years and three months; commencing 13 Feb. 1788, terminating in his acquittal, 23 April, 1795. Mr. Sheridan's speech on the impeachment excited great admiration.

Hastings was born in 1732; went to India as a writer in 1750; became governor-general of Bengal in 1772; of India, 1773; governed ably, but, it is said, unscrupulously and tyrannically, till he resigned in 1785. The expenses of his trial (70,000*l.*) were paid by the East India Company; and a pension was granted to him. He died a privy-councillor in 1818.

HATELY FIELD, see *Shrewsbury*.

HATFIELD'S ATTEMPT. On 11 May, 1800, during a review in Hyde-park, a shot from an undiscovered hand was fired, which wounded a young gentleman who stood near king Geo. III. In the evening, when his majesty was at Drury-lane theatre, Hatfield fired a pistol at him. Hatfield was confined as a lunatic till his death, 23 Jan. 1841, aged 69 years.

HATS, first made by a Swiss at Paris, 1404. When Charles VII. made his triumphal entry into Rouen, in 1449, he wore a hat lined with red velvet, and surmounted with a rich plume of feathers. Henceforward, hats and caps, at least in France, began to take place of chaperons and hoods. *Hénault.* Hats were first manufactured in England by Spaniards in 1510. *Stow.* Very high-crowned hats were worn by queen Elizabeth's courtiers; and high crowns were again introduced in 1783. A stamp-duty laid upon hats in 1784, and in 1796, was repealed in 1811. Silk hats began to supersede beaver about 1820.

None allowed to sell any hat for above 20*d.* nor cap for above 2*s.* 8*d.*, 5 Henry VII. 1489. Every person above seven years of age to wear on Sundays and holidays, a cap of wool, knit, made, thickened, and dressed in England by some of the trade of cappers, under the forfeiture of three farthings for every day's neglect, 1571. HAYTI or **HAITI**, Indian name of a West Indian island, discovered by Columbus in Dec. 1492, and named Hispaniola, and afterwards St. Domingo. Before the Spaniards fully conquered it, they are said to have destroyed, in battle or cold blood, three million of its inhabitants, including women and children, 1495. It now comprises the republics of St. Domingo in the east, and Hayti in the west. Population (1872) of Hayti, about 572,000; of St. Domingo, about 136,500.

HEAD ACT, see *note* to *Ireland*, 1465.

HEALTH, GENERAL BOARD OF, was appointed by the act for the promotion of the public health, passed in 1848; see *Sanitary Legislation*. This board was reconstructed in Aug. 1854, and sir Benjamin Hall was placed at its head, with a salary of 2000*l*.; succeeded by W. F. Cowper, Aug. 1855, and by Ch. B. Adderley in 1858. The expenses for the year 1856-7 were 12,325*l*. In 1858 this board was incorporated into the privy council establishment; Dr. Simon being retained as medical officer.

HEARTH, or CHIMNEY, TAX, on every fire-place or hearth in England, was imposed by Charles II. in 1662, when it produced about 200,000*l*. a year. It was abolished by William and Mary at the Revolution in 1689; imposed again, and again abolished.

HEAT (called by French chemists Caloric). Little progress had been made in the study of the phenomena of heat till about 1757, when Joseph Black put forward his theory of latent heat (heat, he said, being absorbed by melting ice), and of specific heat. Cavendish, Lavoisier, and others, continued Black's researches. Sir John Leslie put forth his views on radiant heat in 1804. Count Rumford put forth the theory that heat consists in motion among the particles of matter, which view he supported by experiments on friction (recorded in 1802). This theory (now called the dynamical or mechanical theory of heat, and used to explain all the phenomena of physics and chemistry) has been further substantiated by the independent researches of Dr. J. Meyer of Heilbronn and of Mr. Joule of Manchester (about 1840), who assert that heat is the equivalent of work done. In 1854, Professor William Thomson, of Glasgow, published his researches on the dynamical power of the sun's rays. Thermo-electricity, produced by heating pieces of copper and bismuth soldered together, was discovered by Seebeck in 1823. A powerful thermo-electric battery was constructed by Marcus of Vienna, in 1865. Professor Tyndall's "Heat, a Mode of Motion," first published Feb. 1863, third edition, 1868. The researches of philosophers are still devoted to this subject; see *Calorescence*. Greatest heat in the hot summer of 1868: at Nottingham, in sun, 122·4; in shade, 92·2, 22 July, 1 p.m. At the same place: 14 Aug. 1876, 95·7 in the shade; 147 in sun,

Sir George Cayley invented a heated-air engine in 1807, and Mr. Stirling applied it to raising water in Ayrshire in 1818. One invented by Mr. Wenham was described in 1873. Improvements have been made by Mr. C. Wm. Siemens.

Captain Ericsson constructed a ship, in which caloric, or heat, was the motive power. On 4 Jan. 1853, it sailed down the bay of New York, at the rate of 14 miles an hour, it is said at a cost of 80 per cent. less than steam. Although caloric engines were not successful, capt. Ericsson continued his experiments, and patented an improved engine in 1856.

HEBREWS, see *Jews*.

HEBRIDES (the *Ebudæ* of Ptolemy and the *Hebudes* of Pliny), western isles of Scotland, long subject to Norway; ceded to Scotland in 1264; and annexed to the Scottish crown in 1540 by James V. The heritable jurisdictions were abolished in 1747.

HEBRON (in Palestine). Here Abraham resided, 1860 B.C.; and here David was made king of Judah, 1048 B.C. On 7 April, 1862, the prince of Wales visited the reputed cave of Machpelah, near Hebron, said to contain the remains of Abraham and his descendants.

HECATOMB, an ancient sacrifice of a hundred oxen, particularly observed by the Lacedemonians when they possessed a hundred cities. The sacrifice was subsequently reduced to twenty-three oxen, and goats and lambs were substituted.

HECLA, MOUNT (Iceland). Its first recorded eruption is 1004. About twenty-two eruptions have taken place, according to Olasson and Paulson. Great convulsions of this mountain occurred in 1766, since when a visit to the top in summer is not attended with great difficulty. Perhaps the most awful volcanic eruption on record took place in 1784-5, when rivers were dried up, and many villages overwhelmed or destroyed. The mount was in a state of violent eruption from 2 Sept. 1845, to April, 1846. Three new craters were formed, from which pillars of fire rose to the height of 14,000 English feet. The lava formed several hills, and pieces of pumice stone and scoriæ of 2 cwt. were thrown to a distance of a league and a half; the ice and snow which had covered the mountain for centuries melted into prodigious floods.

HEGIRA, ERA OF THE, dates from the flight (Arabic *hejra*) of Mahomet, from Mecca to Medina, on the night of Thursday, 15 July, 622. The era commences on the 16th. Some compute this era from the 15th, but Cantemir proves that the 16th was the first day. 33 of its lunar years are equal to 32 of those of the vulgar era.

HEIDELBERG (Germany) was the capital of the Palatinate, 1362-1719. The protestant electoral house becoming extinct in 1693, a war ensued, in which the castle was ruined, and the elector removed his residence to Mannheim. It was annexed to Baden in 1802. Here was the celebrated tun, constructed in 1343, when it contained twenty-one pipes of wine. Another was made in 1664, which held 600 hogsheads. It was destroyed by the French in 1688; but a larger one, fabricated in 1751, which held 800 hogsheads, and was formerly kept full of the best Rhenish wine, is said to be mouldering in a damp vault, empty, since 1769.

HELDER POINT (Holland). The fort and the Dutch fleet lying in the Texel surrendered to the British under the duke of York and sir Ralph Abercromby, for the prince of Orange, after a conflict. 540 British were killed, 30 Aug. 1799. The place was left in Oct.; see *Bergen*.

HELENA, ST., an island in the South Atlantic Ocean, discovered by the Portuguese under Juan de Nova Castilla, on St. Helena's day, 21 May, 1502. The Dutch afterwards held it until 1600, when they were expelled by the English. The British East India Company settled here in 1651; and the island was alternately possessed by the English and Dutch until 1673, when Charles II., on 12 Dec., assigned it to the company once more. St. Helena was the place of Napoleon's captivity, 16 Oct. 1815; and here he died 5 May, 1821. His

remains were removed in 1840, and interred at the Hôtel des Invalides, Paris; see *France*, 1840. The house and tomb have been purchased by the French government. The bishopric was founded in 1859. Governor, adm. sir Chas. Elliot, 1863-9; adm. Charles George Edward Patey, 1869; Hudson Ralph Janisch, 1873.

HELIGOLAND, an island in the North Sea, taken from the Danes by the British, 5 Sept. 1807; made a depôt for British merchandise; confirmed to England by the treaty of Kiel, 14 Jan. 1814. In a naval engagement off Heligoland, between the Danes and the Austrians and Prussians, the allies were compelled to retire, 9 May, 1864. Governor, col. Henry F. B. Maxse, 1863.

HELIOGRAPHY (from *helios*, the sun), see *Photography*.

HELIOMETER, an instrument for measuring the diameters of the sun, moon, planets, and stars, invented by Savary, in 1743; applied by M. Bouguer, in 1744. A fine heliometer, by Repsold of Hamburg, was set up at the Radcliffe observatory, Oct. 1849.

HELIOSCOPE (a peculiar sort of telescope, prepared for observing the sun so as not to affect the eye), was invented by Christopher Scheiner in 1625.

HELIOSTAT, an instrument invented to make a sunbeam stationary, or apparently stationary, invented by s'Gravesande about 1719, and greatly improved by Malus and others. One constructed by MM. Foucault and Duboscq was exhibited at Paris in Oct. 1862.

HELLAS, in Thessaly, the home of the Hellenes and the Greek race, which supplanted the Pelasgians from the 15th to the 11th century B.C., derived its name from Hellen, king of Phthiotis, about 1600 B.C. The Hellenes separated into the Dorians, Æolians, Ionians, and Achaians. The present king of Greece is called "king of the Hellenes;" see *Greece*.

HELLESPONT (now the Strait of the Dardanelles) was named after Helle, daughter of Athamas, king of Thebes, who was drowned here. It is celebrated for the story of the loves of Hero of Sestus, and Leander of Abydos: Leander was drowned in a tempestuous night as he was swimming across the Hellespont (about one mile), and Hero, in despair, threw herself into the sea, about 627 B.C. Lord Byron and lieut. Ekenhead also swam across, 3 May, 1810. See *Xerxes*.

HELL-FIRE CLUBS. Three of these associations were suppressed, 1721. They met at Somerset-house, and at houses in Westminster, and in Conduit-street.

HELMETS, among the Romans, were provided with a vizor of grated bars, to raise above the eyes, and beaver to lower for eating; the Greek helmet was round, the Roman square. Richard I. of England wore a plain round helmet; but most of the English kings had crowns above their helmets. Alexander III. of Scotland, 1249, had a flat helmet, with a square grated vizor, and the helmet of Robert I. was surmounted by a crown, 1306. *Gwillim*.

HELOTS, *captives*, derived by some from the Greek *helein*, to take; by others from Helos, a city which the Spartans hated for refusing to pay tribute, 883 B.C. The Spartans, it is said, ruined the city, reduced the Helots to slavery, and called all their slaves and prisoners of war *Helotæ*. The number of the Helots was much enlarged by the conquest of Messenia, 668 B.C.; and is considered to have formed four-fifths of the inhabitants of Sparta. In the Peloponnesian war the Helots behaved with uncommon bravery, and were rewarded with liberty, 431 B.C.; but the sudden disappearance of 2000 manumitted slaves was attributed to Lacedemonian treachery. *Herodotus*.

HELVETIAN REPUBLIC. Switzerland having been conquered by the French in 1797, a republic was established April, 1798, with this title; see *Switzerland*.

HELVETII, a Celto-Germanic people, who inhabited what is now called Switzerland. Invading Gaul, 61 B.C., they were defeated and massacred by Julius Cæsar, 58 B.C., near Geneva.

HEMP AND FLAX. Flax was first planted in England, when it was directed to be sown for fishing-nets, 1532-3. "Bounties were paid to encourage its cultivation in 1783; and every exertion should be made by the government and legislature to accomplish such a national good. In 1785 there were imported from Russia, in British ships, 17,695 tons of hemp and flax." *Sir John Sinclair*. The importation of hemp and flax in 1870, 5,149,135 cwts. The cultivation of flax was revived at the dearth of cotton during the American civil war, 1861-4.

HENGESTDOWN (Cornwall). Here Egbert is said to have defeated the Danes and West Britons, 835.

HENOTICON (from the Greek *henotes*, unity), an edict of union for reconciling the Eutychians with the church, issued by the emperor Zeno at the instance of Acacius, patriarch of Constantinople, 482. It was zealously opposed by the popes of Rome, and was annulled by Justin I. in 518. The orthodox party triumphed, and many heretic bishops were expelled from their sees.

HEPTARCHY (or government of seven rulers) in England was gradually formed from 455, when Hengist became king of Kent. It terminated in 828, when Egbert became sole monarch of England. There were at first nine or ten Saxon kingdoms, but Middlesex soon ceased to exist, and Bernicia and Deira were generally governed by one ruler, as Northumbria; see *Britain*, and *Octarchy*.

HERACLIDÆ, descendants of Hercules, who were expelled from the Peloponnesus about 1200 B.C., but reconquered it in 1048, 1103-4 or 1109 B.C., a noted epoch in chronology, all the history preceding being accounted fabulous.

HERALDRY. Marks of honour were used in the first ages. *Nisbet*. The Phrygians had a sow; the Thracians, Mars; the Romans, an eagle; the Goths, a bear; the Flemings, a bull; the Saxons, a horse; and the ancient French, a lion, and afterwards the fleur-de-lis (*which see*). Heraldry, as an art, is ascribed first to Charlemagne, about 800; and next to Frederick Barbarossa, about 1152; it began and grew with the feudal law. *Mackenzie*. The great English works on Heraldry are those of Barcham or Barkham, published by Gwillim (1610), and Edmondson (1780).

Edward III. appointed two heraldic kings-at-arms for the south and north (Surroy, Norroy)	1340
Richard III. incorporated and endowed the HERALDS' COLLEGE	1483-4

Philip and *Mary* enlarged *its* privileges, and confirmed them by letters patent . . 15 July, 1554
Formerly, in many ceremonies, the herald represented the king's person, and therefore wore a crown, and was always a knight.
The college has an earl marshal, 3 kings of arms (Garter, Clarencieux, and Norroy), 6 heralds (Richmond, Lancaster, Chester, Windsor, Somerset, and York), 4 pursuivants, and 2 extra heralds; see *Earl Marshal*, and *Kings-of-Arms*.
The building in Doctors' Commons, London, was erected by sir Christopher Wren (after the great fire in 1666) 1683

HERAT, on the confines of Khorasân, a strong city called the key of Afghanistan, capital of a state formed by Shah Mahmoud, in 1818. Population in 1830, 100,000. The Persians, baffled in an attempt in 1838; took it 25 Oct. 1856, in violation of the treaty of 1853; and war ensued between Great Britain and Persia. Peace was made in April, 1857; and Herat was restored 27 July following. It was seized again by Dost Mahommed, 26 May, 1863; taken by Yakoob Khan, rebelling against his father, 6 May, 1871. Yakoob, reconciled to his father, was made governor, 16 Sept. 1871. See *Afghanistan*.

HERCULANEUM, an ancient city of Campania, overwhelmed, together with Pompeii, by an eruption of lava from Vesuvius, 23 or 24 Aug. 79. Successive eruptions laid them still deeper under the surface, and all traces of them were lost until excavations began in 1711; and in 1713 many antiquities were found. In 1738 excavations were resumed, and works of art, monuments, and memorials of civilized life were discovered. 150 rolls of MSS. papyri were found in a chest, in 1754; and many antiquities were purchased by sir William Hamilton, and sold to the British Museum, where they are deposited; but the principal relics are preserved in the museum of Portici. The "Antichità di Ercolano," 8 vols. folio, were published by the Neapolitan government, 1757-92.

HEREFORD was made the seat of a bishopric about 676, Putta being first bishop. The cathedral was founded by a nobleman named Milfride, in honour of Ethelbert, king of the East Saxons, who was treacherously slain by his intended mother-in-law, the queen of Mercia. The tower fell in 1786, and was rebuilt by Mr. Wyatt. The cathedral was re-opened after very extensive repairs, on 30 June, 1863. The see is valued in the king's books at 76*l.* per annum. Present income, 4200*l.*

HERETICS (from the Greek *hairēsis*, choice). Paul says, "After the way they call *heresy*, so worship I the God of my fathers," 60 (*Acts* xxiv. 14). Heresy was unknown to the Greek and Roman religions. Simon Magus is said to have broached the Gnostic heresy about 41. This was followed by the Manichees, Nestorians, Arians, &c.; see *Inquisition*. It is stated that the promulgation of laws for prosecuting heretics was begun by the emperor Frederick II. in 1220; and immediately adopted by pope Honorius III.

Thirty heretics came from Germany to England to propagate their opinions, and were branded in the forehead, whipped, and thrust naked into the streets in the depth of winter, where none daring to relieve them, they died of hunger and cold (*Speed*) 1160
Certain laws against heretics repealed, 25 Henry VIII. 1534-5
The last person executed for heresy in Britain was Thomas Aikenhead, at Edinburgh 1696
[The orthodox Mahommedans are Sonnites; the *heretics*—Shiites, Druses, &c.]

HERITABLE JURISDICTIONS (*i. e.*, feudal rights) in Scotland, valued at 164,232*l.*, were abolished by the act 20 Geo. II. c. 43 (1747), and restored to the crown for money compensation after 25 March, 1748. *Heritable and Movable Rights*, in the Scottish law, denote what in England is meant by real and personal property: *real* property in England answering nearly to the heritable rights in Scotland, and *personal* property to the movable rights.

HERMANDAD, SANTA (Spanish for holy brotherhood), associations of cities of Castile and Arragon to defend their liberties, began about the middle of the 13th century. The brotherhood was disorganised in 1498, order having been firmly established. It is said to have been continued as a species of voluntary police.

HERMAS, author of "the Shepherd," a Christian apocryphal book, supposed to have been written about 131. Some believe Hermas to be mentioned in *Romans* xvi. 14.

HERMITS, see *Monachism*.

HERNE BAY, Kent, a watering-place, begun 1830; the pier, five-eighths of a mile long, having decayed, a new one was opened, 27 Aug. 1873, by lord mayor Waterlow.

HERO, BRITISH MAN-OF-WAR, see *Wrecks*, 1811.

HERRERA (Arragon). Here don Carlos, of Spain, in his struggle for his hereditary right to the throne, at the head of 12,000 men, encountered and defeated general Buerens, who had not much above half that number of the queen of Spain's troops. Buerens lost about 1000 in killed and wounded, 24 Aug. 1837.

HERRING-FISHERY was largely encouraged by the English and Scotch so early as the 8th century. The "statute of herrings," passed in 1357, placed the trade under government control. The mode of preserving herrings by pickling was discovered about 1397. *Anderson*. The British Herring-Fishery company was instituted 2 Sept. 1750. A scientific commission in relation to the fishery was appointed in 1862.

HERRINGS, BATTLE OF THE, fought 12 Feb. 1429, obtained its name from the duc de Bourbon being defeated while attempting to intercept a convoy of salt fish, on the road to the English besieging Orleans.

HERRNHUTERS, see *Moravians*.

HERSCHEL TELESCOPE, see *Telescopes*.

HERULI, a German tribe, which ravaged Greece and Asia Minor in the 3rd century after Christ. Odoacer, their leader, overwhelmed the western empire and became king of Italy, 476. He was defeated and put to death by Theodoric the Ostrogoth, 491-3.

HERZEGOVINA or **HERTSEK** (European Turkey), originally a part of Croatia, was united with Bosnia in 1326, and made the duchy of St. Saba by the emperor Frederic III. in the following century. It was ceded to Turkey in 1699 at the peace of Carlowitz. In Dec. 1861 an insurrection against the Turks broke out, fostered by the prince of Montenegro. It was subdued; and on 23 Sept. 1862, Vucatovitch, chief of the insurgents, surrendered on behalf of his countrymen to Kurschid Pasha, and an amnesty was granted.

HESSE (W. Germany), the seat of the Catti, formed part of the empire of Charlemagne; from the rulers of it in his time, the present are descended. It was joined to Thuringia till about 1263, when Henry I. (son of a duke of Brabant and Sophia, daughter of the landgrave of Thuringia) became landgrave of Hesse. The most remarkable of his successors was Philip the Magnanimous (1509), an eminent warrior and energetic supporter of the Reformation, who signed the Augsburg Confession in 1530 and the League of Smalcald in 1531. At his death, in 1567, Hesse was divided into **HESSE-CASSEL** and **HESSE-DARMSTADT**, under his sons William and George, and their descendants played an eminent part in the convulsions of Germany during the 17th and 18th century.* In 1803 Hesse-Cassel became an electorate, and in 1806 Hesse-Darmstadt a grand duchy; which titles were retained in 1814. In 1807 Hesse-Cassel was incorporated with the kingdom of Westphalia, but in 1813 the electorate was re-established. Population (1871), grand duchy, 852,894.

HESSE-CASSEL (made an electorate, 1803; incorporated with Westphalia, 1807; restored, 1813).

ELECTORS.

1803. William I.; born 3 June, 1743; succeeded as landgrave, 1785; made elector, 1803; deprived of his states, 1806; restored, 1813; died 27 Feb. 1821.
1821. William II.; born 28 July, 1777; died 29 Nov. 1847.
1847. Frederic William; born 20 Aug. 1802.
The elector, in 1850, remodelled the constitution given in 1831 (by which the chamber had the exclusive right of voting the taxes), and did not convene the chamber until the usual time for closing the session had arrived, when his demand for money for 1851 was laid before it. The chamber called for a regular budget, that it might discuss its items. The elector dissolved the chamber, and declared his dominions in a state of siege, 7 Sept. 1850.
He fled to Hanover, and subsequently to Frankfort; and on 14 Oct. he formally applied to the Frankfort diet for assistance to re-establish his authority in Hesse. On 6 Nov. an Austro-Bavarian force of 10,000 men entered Hesse-Cassel, under the command of Prince Thurn-und-Taxis, who fixed his head-quarters in Hanau; and on the next day a Prussian force entered Cassel. The elector returned to his capital, the taxes having been collected under threats of imprisonment, 27 Dec. 1850.
The constitution of 1831 was abolished, and a new one established, 1852.
The conflict was soon resumed, and continued till, by law of 20 Sept. 1866, Hesse-Cassel was annexed to Prussia, 8 Oct. 1866.
The ex-elector's property sequestrated for intriguing against Prussia, 2 Nov. 1868 & Feb. 1869. He died 6 Jan. 1875.

HESSE-DARMSTADT. (Population, Dec. 1867, 823,138.)

GRAND-DUKES.

1806. Louis I.; born 14 June, 1753; died 6 April, 1830.
1830. Louis II.; born 26 Dec. 1777; died 16 June, 1848.
1848. Louis III.; born 9 June, 1806. By treaty with Prussia, 15 Sept. 1866, he ceded the northern part of Hesse-Darmstadt, and paid a war contribution.
Heir: his brother Charles; born 23 April, 1809; whose son Louis (born 12 Sept. 1837) married princess Alice of Great Britain, 1 July, 1862. *Issue:* Ernest Louis, born 25 Nov. 1868, and other children. Frederick-William, 2nd son, killed by a fall, 29 May, 1873.
Hesse-Darmstadt supported Prussia in the Franco-Prussian war, Aug. 1870.

HESSE-HOMBURG, a landgraviate, established by Frederic, son of George of Hesse-Darmstadt, in 1596. His descendant, Augustus-Frederic, married 7 May, 1818, Elizabeth, daughter of George III. of England, who had no issue.
The landgraviate was absorbed into the grand duchy of Hesse in 1806, but re-established in 1815 with additional territories. The landgrave Ferdinand succeeded his brother, 8 Sept. 1848, and died 24 March, 1866.
Hesse-Homburg annexed to Prussia, 8 Oct. 1866.

HIGH TREASON. To regulate the trials for this crime the statute, so favourable to liberty, the 25th of Edward III., 1352, was enacted, by which two living witnesses are required; parliament having refused to sanction the sentence of death against the duke of Somerset. By the 40 Geo. III., 1800, it was enacted that where there was a trial for high treason in which the overt act was a direct attempt upon the life of the sovereign, such trial should be conducted in the same manner as in the case of an indictment for murder; see *Treason.*

The last two cases of execution for high treason:—

I. William Cundell *alias* Connell, and John Smith; tried on a special commission, 6 Feb. 1812, being two of fourteen British subjects taken in the enemy's service in the isles of France and Bourbon. Mr. Abbot, afterwards lord Tenterden and chief justice, and sir Vicary Gibbs, attorney-general, conducted the prosecution, and Mr. Brougham, aft. lord Brougham, defended the prisoners. The defence was, that they had assumed the French uniform to aid their escape to England. They were hanged and beheaded on the lodge of Horsemonger-lane gaol on 16 March, 1812.

All the other convicts were pardoned, upon condition of serving in colonies beyond the seas.

The asylum was erected at St. Anne's Hill, near Virginia Water, 1873 *et seq.*

HOLMFIRTH FLOOD. On 5 Feb. 1852, the Bilberry reservoir above Holmfirth, near Huddersfield, Yorkshire, burst its banks, and levelled four mills and many ranges of other buildings, killing more than 90 persons, and devastating property estimated at above half a million.

HOLSTEIN AND SCHLESWIG (N.W. Germany), duchies once belonging to Denmark. The country, inhabited by Saxons, was subdued by Charlemagne in the beginning of the 9th century, and afterwards formed part of the duchy of Saxony. In 1106 or 1110, Adolphus of Schauenberg became count of Holstein: his descendants ruled till 1459, when Adolphus VII. died without issue, and the states of Holstein and Schleswig elected Christian, king of Denmark, his nephew, as their duke, through fear of his arms. In 1544, his grandson, Christian II., divided his states amongst his brothers, with the condition that the duchies should remain subject to Denmark. The eldest branch of the family reigned in Denmark till the decease of Frederick VII., 15 Nov., 1863. From a younger branch (the dukes of Holstein-Gottorp) descended through marriage, the kings of Sweden from 1751-1818, and the reigning family in Russia since 1762, when the duke, as the husband of Anne, became czar. In 1773, Catherine II. of Russia ceded Holstein-Gottorp to Denmark in exchange for Oldenburg, &c. The duchies were occupied by the Swedes in 1813, but restored to Denmark in 1814, and on 28 May, 1831, constituent assemblies were granted to them. Since 1844 disputes have been rife between the duchies and Denmark, and in 1848 the states-general of the duchies voted their annexation to the German confederacy, in which they were supported by Prussia; war ensued, which lasted till 1850, when they submitted to Denmark. The agitation in the duchies, encouraged by Prussia, revived in 1857. The Germans in Schleswig desired it to be made a member of the German confederation, like Holstein; but both duchies demanded a local government more independent of Denmark, which changes were resisted by that power. For the events of the war of 1864, see *Denmark*. By the convention signed at Gastein (*which see*), 14 Aug. 1865, the government of Holstein was left with Austria, and that of Schleswig with Prussia. The whole of Holstein and part of Schleswig were ceded to Prussia by the treaty of Prague, signed 23 Aug. 1866. Population in 1860, 1,004,473. The clause directing North Schleswig to be given to Denmark if the people voted for it, has not yet been acted on, although claimed.

HOLY ALLIANCE was ratified at Paris, 26 Sept. 1815, between the emperors of Russia (its originator) and Austria, and the king of Prussia, by which they ostensibly bound themselves, among other things, to be governed by Christian principles in all their political transactions, with a view to perpetuating the peace they had achieved. The compact was severely censured in this country as opposed to rational liberty.

HOLY MAID OF KENT. Elizabeth Barton was incited by the Roman Catholic party to oppose the Reformation by pretending to inspirations from heaven. She foretold the speedy and violent death of Henry VIII. if he divorced Catherine of Spain, and married Anne Boleyn, and direful calamities to the nation. She and her confederates were hanged at Tyburn, 21 April, 1534. *Rapin.*

HOLYOKE, Massachusetts, U.S. A Roman Catholic church here took fire; a panic ensued; and about 80 were burnt or trampled to death, 26, 27 May, 1875.

HOLY PLACES IN PALESTINE. These places have been a source of contention between the Greek and Latin churches for several centuries. In the reign of Francis I. they were placed under Latin monks, protected by the French government; but the Greeks from time to time obtained firmans from the Porte invalidating the rights of the Latins, who were at last (in 1757) expelled from the sacred buildings, which were committed to the care of the Greeks by a hatti-scheriff, or imperial ordinance.

The holy sepulchre partially destroyed by fire and rebuilt by the Greeks, who claim additional privileges, and cause fresh dissensions 1808
The Russian and French governments sent envoys (M. Dashkoff and M. Marcellus) to adjust the dispute; an arrangement prevented by the Greek revolution 1821
The subject again agitated, and the Porte proposed that a mixed commission should adjudicate on the rival claims. M. Titoff, the Russian envoy, acting on behalf of the Greeks, and M. Lavalette, the French envoy, on that of the Latins, took up the question very warmly 1850
A firman issued by the Porte, confirming and consolidating the rights previously granted to the Greek Christians, and declaring that the Latins had no right to claim exclusive possession of certain holy places specified, but permitting them to possess a key of the church at Bethlehem, &c., as in former times . . . . . 9 March, 1852
The French government acquiesced with much dissatisfaction; but the Russian envoy still desired the key to be withheld from the Latin monks. M. D'Ozeroff made a formal declaration of the right of Russia to protect the orthodox in virtue of the treaty of Kainardji in 1774, and demanded that the firman of 9 March, 1852, should be read at Jerusalem, although it militated against his pretensions, which was accordingly done. The dispute still continued, the Porte being exposed to the attacks of both the Russian and French governments . . . . . 5 March, 1853
Prince Menschikoff arrives at Constantinople as envoy extraordinary, and in addition to the claims respecting the holy places, made demands respecting the protection of the Greek Christians in Turkey which led to the war of 1854-6. (See *Russo-Turkish War*) . . . . . 28 Feb. ,,

HOLY ROMAN EMPIRE. The German empire received this title under the emperor Otho I. the great, crowned at Rome by pope John XII., 2 Feb. 962. See *Rome*, and *Germany*.

HOLY ROOD or **CROSS.** A festival instituted on account of the recovery of a large piece of the cross by the emperor Heraclius, after it had been taken away, on the plundering of Jerusalem, about 615. The feast of the invention (or finding) of the Cross is on 3 May; that of the exaltation of the Cross, 14 Sept. At Boxley abbey, in Kent, was a crucifix, called the *Rood of Grace;* at the dissolution it was broken in pieces as an imposture by Hilsey, bishop of Rochester, at St. Paul's cross, London, 1536.

HOLYROOD PALACE (Edinburgh), formerly an abbey, was for several centuries the residence of the monarchs of Scotland. The abbey, of which some vestiges remain, was founded by David I. in 1128, and in the burial-place within its walls are interred several of his successors. The palace is a large quadrangular edifice of hewn stone, with a court within surrounded by piazzas. In the north-west tower is the bed-chamber which was occupied by queen Mary; and from an adjoining cabinet to it David Rizzio, her favourite, was dragged forth and murdered, 9 March, 1566. The north-west towers were built by James V., and the remaining part of the palace was added during the reign of Charles II. Mr. Pinkerton states that the palace was burnt in 1650, and rebuilt in 1659. Great improvements were made in 1857. The queen held her court here, 30 Aug. 1850.

HOLY SEPULCHRE, a Byzantine church in modern Jerusalem. Fergusson, Robinson, and others, consider the true site of the holy sepulchre to be the mosque of Omar, the "dome of the Rock." The question is still undecided. The order of the Holy Sepulchre was founded by Godfrey of Bouillon, 1099; revived by pope Alexander VI. 1496; re-organised, 1847 and 1868.

HOMER'S ILIAD AND ODYSSEY, the earliest and most perfect epic poems in the world. The first begins with the wrath of Achilles, and ends with the funeral of Hector; the second recounts the voyages and adventures of Ulysses, after the destruction of Troy. Various dates are assigned to these works, from 962 to 915 B.C. Among the thousands of volumes burnt at Constantinople, A.D. 477, are said to have been the works of Homer, written in golden letters on the great gut of a dragon, 120 feet long.

F. A. Wolf, in his Prolegomena, in 1795, argued that the Homeric poems were composed of independent epic songs, collected and arranged by Peisistratus about 550 B.C. This theory occasioned much controversy.
The first English version of the *Iliad*, by Arthur Hall, appeared in 1581. The most celebrated versions of Homer's works are Chapman's, 1616; Hobbes', 1675; Pope's, 1715-25; Cowper's, 1791. The translation of the Iliad by the earl of Derby (1864) is much commended.

HOMICIDE was tried at Athens by the Areopagites, 1507 B.C. He that killed another at any public exercise of skill, or who killed another that lay hid to do a person mischief of a grievous nature, was not deemed guilty. He who killed a man taken with another's wife, sister, daughter, or concubine, or killed a man who, without just grounds, assaulted another violently, was not deemed a homicide. Among the Jews, wilful murder was capital; but for chance-medley the offender was to flee to one of the cities of refuge, and there continue till the death of the high-priest, 1451 B.C. (*Num.* xxxv.) 9 Geo. IV. c. 31 (1828), distinguishes between justifiable homicide and homicide in its various degrees of guilt, and circumstances of provocation and wilfulness; see *Murder.*

Animals have been tried and punished for killing human beings. A bull was hanged for homicide near the abbey of Beauprès . . . May, 1499

HOMILDON HILL (Northumberland), where the Scots, headed by the earl of Douglas, were defeated by the Percies (among them Hotspur), 14 Sept. 1402. Douglas and the earls of Angus, Murray, Orkney, and the earl of Fife, son of the duke of Albany, and nephew of the Scottish king, with many of the nobility and gentry, were taken prisoners.

HOMILIES in early Christian times were discourses delivered by the bishop or presbyter, in a homely manner, for the common people. Charlemagne's "Homilarium" was issued 809. The Book of Homilies drawn up by abp. Cranmer, and published 1547, and another prepared by an order of convocation, 1563, were ordered to be read in those churches that had not a minister able to compose proper discourses.

HOMŒOPATHY, a hypothesis promulgated in his "Organon of Medicine," 1810, and in other works, by Dr. Samuel Hahnemann, of Leipsic (died 2 July, 1843), according to which every medicine has a specific power of inducing a certain diseased state of the system (*similia similibus curantur*, likes are cured by likes); and if such medicine be given to a person suffering under the disease which it has a tendency to induce, such disease disappears, because two similar diseased actions cannot simultaneously subsist in the same organ. *Brande.* Infinitesimal doses of medicine, such as the millionth of a grain of aloes, have been employed, it is said, with efficacy. The system requires the patient to regulate his diet and habits carefully.—The Hahnemann hospital was opened in Bloomsbury-square, 16 Sept. 1850. Homœopathy has led to a more accurate study of the materia medica. "The World's Convention of Homœopathic Physicians" opened at Philadelphia, 26 June, 1876.

HOMOUSION AND HOMOIOUSION (*Greek,* same essence, and similar essence or being),

terms employed with respect to the nature of the Father and the Son in the Trinity. The orthodox party adopted the former term as a party cry at the council of Nice, 325; the Arians adopted the latter at Seleucia, 359.

HONDURAS, discovered by Columbus in 1502, and conquered by the Spaniards 1523, is one of the republics of Central America; see *America*. Great Britain ceded the Bay Islands to Honduras, 28 Nov. 1859. President, general J. M. Medina, elected 1 Feb. 1864, and in 1869. Provisional president, C. Arias (Dec. 1872). P. Leiva, 1875. War with San Salvador, May, 1871, and May, 1872. The town of Omoa, Spanish Honduras, was bombarded by H.M.S. *Niobe*, to obtain redress for injuries to British subjects. 19 Aug. 1873. Population, about 350,000 (1860).

British Honduras, Central America, was settled by English from Jamaica soon after a treaty with Spain in 1667. They were often disturbed by the Spaniards, and sometimes expelled, till 1783. Balize or Belize, the capital, is a great seat of the mahogany trade. In 1861, the population was 25,635, and the revenue, 35,757*l*. Governor, James R. Longden, 1867; Wm. W. Cairns, 1870; major Robert Miller Mundy, 1874.

HONEY-MOON. It was a custom to drink of diluted honey for thirty days, or a moon's age, after a wedding feast, and hence arose the term *honey-moon*, of Teutonic origin. Attila the Hun drank, it is said, so freely of *hydromel* on his marriage-day, that he died of suffocation, 453.

HONG-KONG, an island off the coast of China, was taken by capt. Elliott, 23 Aug. 1839, and ceded to Great Britain, 20 Jan. 1841. Its chief town is Victoria, built in 1842, and erected into a bishopric in 1849. Sir John Bowring, governor from 1854 to 1859, was succeeded by sir Hercules Robinson: Governors, sir Rich. G. Mac-Donnell, 1865; sir Arthur Edward Kennedy, 1872.

HONI SOIT QUI MAL Y PENSE, "Evil be to him who evil thinks." It is mythically said that the countess of Salisbury, at a ball at court, happening to drop her garter, the king, Edward III., took it up, and presented it to her, with these words, which afterwards became the motto of the order of the garter; see *Garter*.

HONOUR. Temples were erected to Honour by Scipio Africanus, about 197 B.C.; and by C. Marius, about 102 B.C.—The *Legion of Honour* was created by Bonaparte in 1802.

HONVEDS, the militia of Hungary. They supported the rebellion against the emperor in 1849, but on the completion of the changes whereby the independence of Hungary was secured, in 1868, they offered a loyal address to the emperor-king.

HOPS, in use in England in 1425. *Harleian MS.* Introduced from the Netherlands into England about 1524, and used in brewing; but the physicians having represented that they were unwholesome, their use was prohibited in 1528. *Anderson.* In the year ending 5 Jan. 1853, there were 46,157⅝ acres under hops in England and Wales, chiefly in Herefordshire, Kent, and Worcestershire, which paid 477,144*l*. duty; the quantity yielded was 51,102,494 lbs., whereof 955,855 lbs. were exported. The duty on hops was repealed in 1862, after many applications. An act for preventing fraud in the trade was passed in June, 1866.—The hop and malt exchange, Southwark, was opened in Oct. 1867.

HORATII AND CURIATII, see *Rome*, 669 B.C.

HORN; HORNPIPE. The horn is thought to be, next to the reed, the earliest wind instrument, and has been found among most savage nations. It was first made of horn, hence the name; afterwards of brass, with keys, for the semi-tones, in the last century.—The dance called the Hornpipe is supposed to be so named from its having been performed to the Welsh *pib-corn*, that is hornpipe, about 1300. *Spencer.*

HORNE TOOKE, &c. The trial of Messrs. Hardy, Tooke, Joyce, Thelwall, and others, on a charge of high treason, caused a great sensation. They were taken into custody on 20 May, 1794. Mr. Hardy was tried 29 Oct., and, after a trial of eight days, was honourably acquitted. John Horne Tooke was tried and acquitted, 20 Nov.; and Mr. Thelwall was acquitted, 5 Dec.; the others were discharged. Acts were passed to prohibit Mr. Thelwall's political lectures in 1795.

HOROLOGY, see *Clocks*. The British Horological institute, Clerkenwell, London, established in 1858, for the benefit of watchmakers, publishes a monthly journal.

HORSE. The people of Thessaly were excellent equestrians, and probably first among the Greeks who broke them in for service in war; whence probably arose the fable that Thessaly was originally inhabited by centaurs. "Solomon had 40,000 stalls of horses for his chariots, and 12,000 horsemen," 1014 B.C. 1 *Kings* iv. 26. The Greeks and Romans had some covering to secure their horses' hoofs from injury. In the 9th century horses were only shod in time of frost. Shoeing was introduced into England by William I., 1066. See *Races*.

The horse-tax was imposed in 1784. Its operation was extended, and its amount increased, in 1796; and again in 1808. The existing duty upon "horses for riding" only, in England, amounts to about 350,000*l*. per year 1869

Mr. J. S. Rarey, an American, made a great sensation in London by taming vicious and wild horses, and even a zebra from the Zoological Gardens. His system is founded on a profound study of the disposition of the animal, and on kindness. He initiated many illustrious persons in his method (on 20 March, lord Palmerston and twenty others) binding them to secrecy; from which they were released in June, when his book was reprinted in England without his consent . . 1858, 1859
He was engaged to instruct cavalry officers and riding masters of the army . . . . July, 1859

HORSE GUARDS. The regiment is said to have been instituted in the reign of Edward VI. 1550, and revived by Charles II. 1661. The first troop of Horse Grenadier Guards was raised in 1693, and was commanded by general Cholmondeley; and the second troop, commanded by lord Forbes, was raised in 1702. There was a reduction of the Horse and Grenadier Guards, and Life Guards, as now established, were raised in their room, 26 May, 1788. *Philips.* The present edifice called the Horse Guards was erected about 1758. In the front are two small arches, where horse-soldiers, in full uniform, daily mount guard. In the building was formerly the office of the commander-in-chief, now in Pall Mall.

HOSPITAL SUNDAY. The first is said to have been at Birmingham, 13 Nov. 1859. Glasgow began hospital Sundays about 1844. Near the end of *1872*, it was proposed that collections for the benefit of hospitals and dispensaries in London should be annually made on one Sunday in the year at all places of worship. A committee for effecting this met at the Mansion-house, 31 Jan. 1873; and soon after, 15 June was appointed as the day for the collection.

HÔTEL DE VILLE, Paris, the residence of the chief magistrate, the prefect of the Seine, was begun in 1533, and completed, after his own design, by Dominico da Cortona, 1628. Here La Fayette introduced Louis-Philippe, the citizen-king, to the people, Aug. 1830; and here the republic was proclaimed, 26 Feb. 1848. The communists, who had established themselves here, set fire to the building, 24 May, 1871, after their total defeat. The Hôtel was ordered to be rebuilt, April, 1873.

HOUR. The early Egyptians divided the day and night each into twelve hours, a custom adopted by Jews or Greeks probably from the Babylonians. The day is said to have been first divided into hours from 293 B.C., when L. Papirius Cursor erected a sun-dial in the temple of Quirinus at Rome. Previously to the invention of water-clocks (*which see*) 158 B.C., the time was called at Rome by public criers. In England, the measurement of time was, in early days, uncertain: one expedient was by wax candles, three inches burning an hour, and six wax candles burning twenty-four hours, said to have been invented by Alfred, A.D. 886; see *Day.* For *Hours of Prayer,* see *Breviary.* The *Hour,* daily conservative newspaper, first appeared, 24 March, 1873; last time, 11 Aug. 1876.

HOUSE DUTY was imposed in 1695. Its rate was frequently changed till its repeal. It was re-imposed as a substitute for the window-tax, in 1851. In the year 1872-3 it produced 1,243,818*l.*; in 1875-6, 1,421,052*l.*

HOUSEHOLD SUFFRAGE, after one year's residence, was introduced into parliamentary elections for boroughs, by the reform act passed 15 Aug. 1867. Attempts have been frequently made to extend household suffrage to counties, and have failed; proposal lost in the Commons (287 to 173), 13 May, 1874.

HOUSELESS POOR ACT (Metropolitan) passed, 1864; made perpetual, 1865. See *Poor.*

HOWARD ASSOCIATION, instituted in 1866, under the patronage of the late lord Brougham, for the improvement of prison discipline and prevention of crime. See *Prisons.* The annual award of a Howard medal was determined on by the Statistical Society of London, Dec. 1873.

HOWARD FAMILY. John Howard, son of Margaret, the heiress of the Mowbrays, was created earl marshal and the 7th duke of Norfolk in 1483. He was slain with his master, Richard III., at Bosworth, 22 Aug. 1485. His son was restored to the earldom of Surrey in 1489; in reward for having gained the victory of Flodden, 9 Sept. 1513, he was created the 8th duke of Norfolk, in 1514. Thomas, the 10th duke, was beheaded for conspiracy against queen Elizabeth on behalf of Mary, queen of Scots, in 1572. Henry Fitzalan Howard, now the 21st duke of Norfolk, and the 18th of the Howard family, premier duke and earl of England and hereditary earl marshal, was born in 1847.

HOWITZER, a German piece of ordnance, ranking between a cannon and a mortar, came into use early in the 18th century.

HUBERTSBURG (Saxony). The treaty between the empress, the king of Prussia, and the elector of Bavaria, signed here, 15 Feb. 1763, ended the Seven years' war, whereby Prussia gained Silesia.

HUDIBRAS. The first three cantos of this political satire, by Samuel Butler, appeared in 1663; the other parts in 1664 and 1678.

HUDSON'S BAY, discovered by Sebastian Cabot, 1512, and re-discovered by captain Henry Hudson, when in search of a north-west passage to the Pacific Ocean, 1610, had been visited by Frobisher. The "governor and company of adventurers of England trading to Hudson's Bay," obtained a charter from Charles II. in 1670. The "fertile belt" was settled by lord Selkirk in 1812. For these territories the bishopric of Rupert's Land was founded, 1849. The charter having expired, the chief part of the company's territories, on the proposition of earl Granville, the colonial secretary (9 March, 1869), were transferred to the dominion of Canada for 300,000*l.*, and a right to claim a certain portion of land within fifty years, and other privileges; the company having consented to this, 9 April, 1869. A portion of the people resisted the annexation, and gen. Louis Riel proclaimed independence and seized the company's treasury, Jan. 1870. On 3 or 4 March he tried and shot Thomas Scott, a Canadian, who had escaped from his custody. Col. Wolseley conducted a Canadian expedition to the territories (now named Manitoba), and issued a proclamation to the loyal inhabitants, 23 July, saying "our mission is one of peace." Riel was unsupported and offered no resistance. The lieut.-governor, Adams George Archibald, arrived 3 Sept. See *Manitoba.*

HUE AND CRY, the old common-law process of pursuing "with horn and with voice," from hundred to hundred, and county to county, all robbers and felons. Formerly, the *hundred* was bound to make good all loss occasioned by the robberies therein committed, unless the felon were taken; but by subsequent laws it is made answerable only for damage committed by riotous assemblies. The pursuit of a felon was aided by a description of him in the *Hue and Cry,* a gazette established for advertising felons in 1710. *Ashe.*

HUGUENOTS, a term (derived by some from the German *Eidgenossen,* confederates; by others from Hugues, a Genevese Calvinist) applied to the Reformed party in France, followers of Calvin. They took up arms against their persecutors in 1561. After a delusive edict of toleration, a great number were massacred at Vassy, 1 March, 1562, when the civil wars began, which lasted with some intermission till the edict of Nantes in 1598 (revoked in 1685. The massacre of St. Bartholomew's day, 24 Aug. 1572, occurred during a truce; see *Calvinists, Protestants, Bartholomew, Edict,* and *Camisard.* S. Smiles's "History of the Huguenots," appeared in 1867. The crypt in Canterbury cathedral, assigned to French protestants in 1550, is still used by them for divine worship (1876).

HULL (E. Yorkshire), a rising commercial place in 1200, was named Kingston-upon-Hull in 1296 by Edward I., who purchased the town, formed the port, and granted a charter. Great fire; damage about 100,000*l.*, 15 Aug. 1864. Royal Albert dock opened by the prince of Wales, 21 July, 1869.

HULSE'S FOUNDATIONS. The rev. John Hulse, who died in 1790, bequeathed his estates in Cheshire to the university of Cambridge for the advancement of religious learning, by the maintenance of two scholars; the payment of a prize of 40*l.* annually for a theological dissertation; the establishment of the office of Christian advocate (made a professorship of divinity, 1 Aug. 1860); and the payment of a lecturer, to be chosen annually. The first Hulsean lectures were given by the rev. Christopher Benson, in 1820.

HUMAITÁ, a strong post on the river Paraguay, fortified at a great cost with a battery of 300 cannon, by Lopez, the president of Paraguay, and believed to be impregnable, was passed by the Brazilian ironclads, 17 Feb. 1868. On the 19th, Caxias, the Brazilian general, stormed a work to the north of Humaitá, and captured many stores. Humaitá itself, after a severe siege, was abandoned, 24 July, 1868.

HUMANE SOCIETY, ROYAL (London), for the recovery of persons apparently drowned, was founded in 1774, by Drs. Goldsmith, Heberden, Towers, Lettsom, Hawes, and Cogan, but principally by the last three. The society has above 280 depôts supplied with apparatus. The principal one was erected in 1794, on a spot of ground given by George III. on the north side of the Serpentine river, Hyde-park. The motto of this society is appropriate—"*Lateat scintillula forsan*"—"a small spark may perhaps lie hid;" see *Drowning*.

HUMANITARIANS, a small sect in London, founded by Mr. Kaspary, a German Jew. Their moral principles are set forth in "The Fifteen Doctrines of the Religion of God," written in 1866. These include pantheism and the transmigration of souls.

HUMANITY, RELIGION OF, see *Positive Philosophy*, and *Secularism*.

HUMILIATI, a congregation of monks, said to have been formed by some Milanese nobles, who had been imprisoned by Frederick I. 1162. The order had more than ninety monasteries; but was abolished for luxury and cruelty by pope Pius V., and the houses were given to the Dominicans, Cordeliers, and other communities in 1570.

HUMMING-BIRDS. Mr. Gould's beautiful collection of the skins of these birds was exhibited at the Zoological Gardens, London, in 1851. His elaborate work on them in five folio volumes, with richly coloured plates, was completed in 1862.

HUNDRED, a Danish institution, was a part of a shire, so called, as is supposed, from its having been composed of a hundred families, at the time the counties were originally divided, about 897. The hundred-court is a court-baron held for all the inhabitants of a hundred instead of a manor.

HUNGARY, part of the ancient Pannonia and Dacia, was subjected to the Romans about 106, and retained by them till the 3rd century, when it was seized by the Goths, who were expelled about 376 by the Huns. See *Huns*, and *Attila*. After Attila's death, in 453, the Gepidæ, and in 500 the Lombards held the country. It was acquired by the Avars about 568, and retained by them till their destruction by Charlemagne in 799. About 890 the country was settled by a Scythian tribe, named Vingours or Ungri (whence the German name *Ungarn*) and the Magyars of Finnish origin. The chief of the latter, Arpad (889), was the ancestor of a line of kings (*see below*). The progress of the Magyars westward was checked by their defeat by the emperor Henry the Fowler, 934. Population, 31 Dec. 1869, 11,188,502. See *Austria*.

HUSSARS, Hungarian militia, provided by the landholders; instituted by Matthias Corvinus, about 1359. (Hussar is derived from *huss*, 20; and *ar*, price). The British Hussars were enrolled in 1759.

HUSSITES. After the death of Huss,† many of his followers took up arms, in 1419, and formed a political party under John Ziska, and built the city of Tabor. He defeated the emperor Sigismond, 11 July, 1420, and a short truce followed. Ziska, blinded at the siege of Rabi, beat all the armies sent against him. He died of the plague, 18 Oct. 1424, and is said to have ordered a drum to be made of his skin to terrify his enemies even after death. Two Hussite generals, named Procopius, defeated the imperialists in 1431; and a temporary peace ensued. Divisions took place among the Hussites, and on 30 May, 1434, they were defeated, and Procopius the elder slain at Bömischbrod or Lippau. Toleration was granted by the treaty of Iglau, and Sigismond entered Prague 23 Aug. 1436. The Hussites opposed his successor, Albert of Austria, and called Casimir of Poland to the throne; but were defeated in 1438. A portion of the Hussites existed in the time of Luther, and were called "Bohemian brethren."

HUSTINGS (said to be derived from *house court*, an assembly among the Anglo-Saxons), an ancient court of London, being its supreme court of judicature, as the court of common council is of legislature. The court of *hustyngs* was granted to the city of London, to be holden and kept weekly, by Edward the Confessor, 1052. One was held to outlaw defaulters, 6 Dec. 1870. Winchester, Lincoln, York, &c., were also granted hustings courts.

† The clergy having instigated the pope to issue a bull against heretics, John Huss (born in Bohemia in 1373), a zealous preacher of the Reformation, was cited to appear before a council of divines at Constance, the emperor Sigismond sending him a safe-conduct. He presented himself accordingly, but was thrown into prison, and after some months' confinement was adjudged to be burned alive, which he endured with resignation, 6 or 7 July, 1415. Jerome of Prague, his intimate friend, who came to this council to support and second him, also suffered death by fire, 30 May, 1416, although he also had a safe-conduct.

HUTCHINSONIANS included many eminent clergy, who did not form any sect, but held the opinions of John Hutchinson, of Yorkshire (1674-1737); they rejected the Newtonian system, and contended that the scriptures contain a complete system of natural philosophy. His work, "*Moses' Principia*," was published in 1724. He derived all things from the air, whence, he said, proceeded fire, light, and spirit, types of the Trinity. In 1712 he invented a time-piece for finding the longitude, and died in 1737.

HYDRAULIC PRESS, see under *Hydrostatics*.

HYDROCHLORIC ACID or **CHLORHYDRIC ACID**, the only known compound of chlorine and hydrogen, was discovered by Dr. Priestley, 1772; its constitution determined by Davy, 1810. It is also called muriatic acid and spirits of salts; see under *Alkalies*.

HYDROGEN (from *hydōr*, water). Paracelsus observed a gas rise from a solution of iron in oil of vitriol, about 1500; Turquet de Mayerne discovered its inflammability, 1656; as did Boyle, 1672; Lemery noticed its detonating power, 1700. In 1766 Cavendish proved it to be an elementary body; and in 1781, he and Watt first showed that in the combination of this gas with oxygen, which takes place when it is burnt, water is produced; subsequently Lavoisier decomposed water into its elements, and gave hydrogen its present name instead of "inflammable air." One volume of oxygen combines with two volumes of hydrogen to form water. Hydrogen is never found in the free state. *Gmelin.*

HYDROGENIUM, a hypothetical metal. In a paper read before the Royal Society, 7 Jan. 1869, Mr. Thomas Graham, master of the Mint, suggested that a piece of the metal palladium, into which hydrogen had been pressed, became an "alloy of the volatile metal hydrogenium."

HYDROGRAPHY is the description of the surface waters of the earth. The first sea-chart is attributed to Henry the Navigator, in the 16th century. There is a hydrographic department in the British admiralty, by which a series of charts has been issued.

HYDROMETER, the instrument by which is measured the gravity, density, and other properties of liquids. The oldest mention of the hydrometer occurs in the 5th century, and may be found in the letters of Synesius to Hypatia; but it is not improbable that Archimedes was the inventor of it, though no proofs of it are to be found. *Beckmann.* Archimedes was killed in 212 B.C., and Hypatia was torn to pieces at Alexandria, A.D. 415. Robert Boyle described a hydrometer in 1675: Baumé's (1762) and Sykes', about 1818, have been much employed.

HYDROPATHY, a term applied to the treatment of diseases by cold water, practised by Hippocrates in the 4th century B.C., by the Arabs in the 10th century A.D., and revived by Dr. Currie in 1797. A system was suggested in 1825 by Vincenz Priessnitz, of Grafenberg, in Austrian Silesia. The rational part of the doctrine was understood and maintained by Dr. Sydenham, before 1689. Priessnitz died 26 Nov. 1851. *Brande.*

HYGIENE, see *Sanitary Legislation*.

HYGROMETER, an instrument for measuring the moisture in the atmosphere. That by Saussure (who died in 1799) is most employed. It consists of a human hair boiled in caustic lye, and acts on the principle of absorption. *Brande.* Daniell's hygrometer (1820) is much esteemed.

HYMNS. The song of Moses is the most ancient, 1491 B.C. (*Exod.* xv.) The Psalms date from about 1060 B.C. to about 444 B.C. (from David to Ezra). The hymns of the Jews were frequently accompanied by instrumental music. Paul (A.D. 64) speaks of Christians admonishing one another "in psalms and hymns and spiritual songs" (*Col.* iii. 16.) Hilary, the bishop of Arles, in France, is said to have been the first who composed hymns to be sung in Christian churches, about 431. The hymns of Dr. Watts (died 1784), of John Wesley (died 1791), and of his brother Charles (died 1788), are used by English churchmen and dissenters. "Hymns, Ancient and Modern," first appeared in 1861.

HYPNOTISM (Greek *hypnos, sleep*) or nervous sleep, terms given by Mr. Braid (in 1843) to a sleep-like condition, produced in a person by steadily fixing his mind on one particular object. Minor surgical operations have, it is said, been performed without pain on persons in this state.

HYPSOMETER, a thermometrical barometer for measuring altitudes, invented by F. J. Wollaston in 1817, much improved by Regnault, about 1847.

HYTHE, Kent, a cinque-port. A school of musketry was established here in 1854, under the charge of major-gen. Charles Crawford Hay. He resigned in 1867. Railway to Sandgate opened, 9 Oct. 1874.

IAMBIC VERSE. Iambe, an attendant of Metanira, wife of Celeus, king of Sparta, when trying to exhilarate Ceres, while the latter was travelling over Attica in quest of her daughter Proserpine, entertained her with jokes, stories, and poetical effusions; and from her, free and satirical verses have been called *Iambics*. *Apollodorus*. Iambic verses were first written about 700 B.C., by Archilochus, who had courted Neobule, the daughter of Lycambes; but, after a promise of marriage, the father preferred another suitor, richer than the poet; whereupon Archilochus wrote so bitter a satire on the old man's avarice, that he hanged himself. *Herodotus*.

ICE. Galileo observed ice to be lighter than water, about 1597. See *Congelation*, where is a notice of the ice-making machines of Harrison and of Siebe. In 1841 there were sixteen companies in Boston, U.S., engaged in exporting ice, brought from Wenham lake and Fresh and Spy Ponds, about 18 miles from that city. The trade was begun by Mr. Tudor in 1806. 156,540 tons were sent from Boston alone in 1854. In New York, in 1855, 305,000 tons were stored up, of which 20,000 were for exportation. The Wenham lake company import ice largely from their ponds near Christiania, Norway, from whence 43,359 tons were shipped to Great Britain in 1865.

Regelation and other properties, exhibited by professor Faraday, in 1850, became the subject of investigation by eminent physicists of the day, especially J. D. Forbes, Dr. Tyndall, and sir William Thomson. "Icy night" or "silver thaw" in London, 22 Jan. 1867. After a severe frost came rain freezing as it fell. ICENI, a British tribe which inhabited chiefly Suffolk and Norfolk. In 61, while Suetonius Paulinus was reducing Mona (Anglesey) they marched southwards and destroyed Verulam, London, and other places, with great slaughter of the Romans; but were defeated by Suetonius near London, and their heroic queen Boadicea or Boudicea died or committed suicide.

"ICH DIEN," *I serve*, the motto under the plume of ostrich feathers found in the helmet of the king of Bohemia after he was slain at the battle of Cressy, at which he served as a volunteer in the French army, 26 Aug. 1346. Edward the Black Prince, in respect to his father, Edward III., who commanded that day, though the prince won the battle, adopted the motto, which has since been borne with the feathers, by the heirs to the crown of England.

ICHNOLOGY, the science of footprints, treats of the impression made in mud or sand by the animals of former ages. Dr. Duncan discovered the footprints of a tortoise in the sandstone of Annandale, in 1828; since then numerous discoveries have been made by Owen, Lyell, Huxley, and others.

ICHTHYOLOGY, the science of fish. Eminent writers are Willoughby, Ray, Valenciennes, Cuvier, Owen, Agassiz, &c. Yarrell's "British Fishes" (1836-59) is a classical work; see *Fish*.

ICONIUM (Syria). Here Paul and Barnabas preached, 38. Soliman the Seljuk founded a kingdom here in 1074, which lasted till 1307, when it was conquered by the Turks. It had been subdued by the Crusaders in 1097 and 1190; see *Konieh*.

ICONOCLASTS (image-breakers). The controversy respecting images (which had been introduced into churches for popular instruction about 300) was begun about 726, and occasioned much disturbance and loss of life in the Eastern Empire. Leo Isauricus published two edicts for demolishing images in churches in that year, and enforced them with great rigour in 736. The defenders of images were again persecuted in 752 and 761, when Constantine forbade his subjects becoming monks. The worship of images was restored by Irene in 780. This schism was the occasion of the second council of Nice, 787. Theophilus banished all the painters and statuaries from the Eastern Empire, 832. The Iconoclasts were finally excommunicated at the 8th general council at Constantinople, 869-870. This controversy led to the separation of the Greek and Latin churches. Many images in churches were destroyed in England and Scotland during the Reformation and the civil war, 1641-8.

IDAHO, a northern "territory" of the United States of North America, was organised as such on 3 March 1868.

In March, May, July, and October, the 8th Idus was on the 8th of the month, the 7th on the 9th, &c., the first, or Ide, being the 15th. In the other months the 8th Ide fell on the 6th, and the first on the 13th. On the Idus of March (the 15th) 44 B.C. Julius Cæsar was assassinated.

IDIOTS. About 1855 there were in England, exclusive of lunatics, pauper idiots, or idiots protected in national institutions, males, 3372; females, 3893; total, 7265; see *Lunacy*. The Idiot Asylum at Earlswood, near Reigate, Surrey, began in 1847; was chartered, 1862; additional buildings were founded by the prince of Wales, 28 June, 1869. The foundation of the Imbecile Asylum, Caterham, was laid by Dr. Brewer, M.P., 17 April, 1869.

IDOLS. The public worship of idols was introduced by Ninus, king of Assyria, 2059 B.C. *Vossius*. Images are mentioned in *Gen.* xxxi. 19, 30, 1739 B.C. The Jews frequently deserted the worship of God for idols till their captivity, 588 B.C. Constantine, emperor of Rome, ordered all the heathen temples to be destroyed, and all sacrifices to cease, A.D. 330. *Dufresnoy*. Idolatry was revived in Britain by the Saxons about 473, but it gave way in Britain, after the coming of Augustin, about 597. See *Iconoclasts, Week*.

ILLUMINATED BOOKS. The practice of adopting ornaments, drawings, and emblematical figures, and even portraits, to enrich MSS., is of great antiquity. Varro wrote the lives of 700 illustrious Romans, which he embellished with their portraits, about 70 B.C. *Plin. Nat. Hist.* Some beautiful missals and other works were printed in the 15th and 16th centuries, *et seq.*; and fine imitations have lately appeared.

They professed to obtain grace and perfection by their sublime manner of prayer. A secret society bearing this name, opposed to tyranny and priestcraft, was founded at Ingoldstadt, Bavaria, by Dr. Adam Weishaupt, in May, 1776, and was suppressed in 1784-5.

IMPOSTORS. The following are among the *most* extraordinary:—

Mahomet promulgated his creed, 604: see *Mahometanism*.

Aldebert, a Gaul, in 743, pretended he had a letter from the Redeemer, which fell from heaven at Jerusalem; he seduced multitudes to follow him into woods and forests, and to live in imitation of John the Baptist. He was condemned by a council at Rome in 745.

George David, son of a waterman at Ghent, styled himself the son of God, sent into the world to adopt children worthy of heaven: he denied the resurrection, preached in favour of a community of women, and taught that the body only could be defiled by sin; he had many followers; died at Basle, 1556, promising to rise again in three years.

Otrefief, a monk, pretended to be Demetrius the son of Ivan, czar of Muscovy, whom the usurper Boris had put to death; he maintained that another child had been substituted in his place: he was supported by Poland; his success led the Russians to invite him to the throne, and deliver into his hands, Feodor, the reigning czar, and all his family: his imposition discovered, he was assassinated in his palace, 1606.

Sabbata Levi, a Jew of Smyrna, amused the Jews and Turks a long time at Constantinople and other places, by personating our Saviour, 1666.

IN BRITISH HISTORY.

A man pretending to be the Messiah, and a woman assuming to be the Virgin Mary, were burnt, 1222.

Jack Cade assumed the name of Mortimer; see *Cade*, 1450.

In 1487, Lambert Simnel, tutored by Richard Simon, a priest, supported by the duke of Burgundy, personated the earl of Warwick. Simnel's army was defeated by Henry VII., and he was made a scullion in the king's kitchen.

For Warbeck's imposture in 1492, see *Warbeck*.

Elizabeth Barton, styled the Holy Maid of Kent, spirited up to hinder the Reformation by pretending to inspirations from heaven, foretelling that the king would have an early and violent death if he divorced Catherine of Spain and married Anne Boleyn. She and her confederates were executed at Tyburn, 21 April, 1534.

In 1553 (first year of Mary's reign, after her marriage with Philip of Spain), Elizabeth Croft, a girl 18 years of age, was secreted in a wall, and with a whistle made for the purpose, uttered many seditious speeches against the queen and the prince, and also against the mass and confession, for which she did penance.

William Hacket, a fanatic, personated our Saviour, and was executed for blasphemy, 1591.

Valentine Greatrix, an Irish impostor, who pretended to cure all diseases by stroking the patient: his imposture deceived the credulous, and occasioned very warm disputes in Ireland and England about 1666. Boyle and Flamsteed believed in him.

Dr. Titus Oates, see *Oates*.

Robert Young, a prisoner in Newgate, forged the hands of the earls of Marlborough, Salisbury, and other nobility, to a pretended association for restoring king James: the lords were imprisoned, but the imposture being detected, Young was fined 1000*l*., and put in the pillory, 1692. He was afterwards hanged for coining.

Three French refugees pretend to be prophets, and raise tumults; convicted as impostors, Nov. 1707.

Mary Tofts of Godalming, by pretending she bred rabbits within her, so imposed upon many persons (among others, Mr. St. André, surgeon to the king), that they espoused her cause, 1726.

The Cock-lane ghost impostures by William Parsons, his wife, and daughter, 1762; see *Cock-lane Ghost*.

W. Thom, see *Thomites*.

[See *Abstinence*.]

IMPRESSMENT OF SEAMEN, affirmed by sir M. Foster to be of ancient practice. The stat. 2 Rich. II. speaks of impressment as a matter well known, 1378. The first commission for it was issued 29 Edw. III. 1355. Pressing, either for the sea or land service, declared to be illegal by the British parliament, Dec. 1641, but practised till present times. Impressment was not resorted to in the Russian war, 1854-5.

IMPRISONMENT FOR DEBT, see *Arrests, Debtors*, and *Ferrars' Arrest*.

INCAS, see *Peru*.

INCENDIARIES. The punishment for arson was death by the Saxon laws and Gothic constitutions. In the reign of Edward I. incendiaries were burnt to death. This crime was made high treason by stat. 8 Hen. VI. 1429; and was denied benefit of clergy, 21 Hen. VIII. 1528. Great incendiary fires commenced in and about Kent, in Aug. 1830; and in Suffolk and other counties since. The punishment of death was remitted, except in special cases, in 1827. The acts relating to arson were amended in 1837 and 1844.

INCEST. Marriage with very near relations, almost universally forbidden, took place in Egypt, Persia, and Greece. For recent cases see *Portugal*, 1760, 1777, and 1826. The table of kindred in the book of common prayer was set forth in 1563. For the Hebrew law see Leviticus, chap. xviii. 1490 B.C.

INCLOSURE ACT, to facilitate the inclosure and improvement of commons, appointing commissioners, etc., 8 & 9 Vict. c. 118, passed 8 Aug. 1845; another act passed in 1876; see *Commons*.

INCOME TAX. In 1512, parliament granted a subsidy of two-fifteenths from the commons, and two-tenths from the clergy, to enable the king to enter on a war with France. In Dec. 1798, Mr. Pitt proposed and carried, amid great opposition, resolutions for increased taxes "as an aid for the prosecution of the war" with France.

Graduated duties on income imposed, beginning with 60*l.* per annum, by the act passed 9 Jan. 1799.
The "property tax" passed which levied a rate of 5 per cent. on all incomes above 150*l.* and lower rates on smaller incomes, 11 Aug. 1803.
Increased to 6½ per cent. 1805; 10 per cent., embracing the dividends at the bank, 1806.
In 1800 the tax produced 5,716,572*l.*; in 1804, 4,650,000*l.*; in 1806, 11,500,000*l.*; in 1808, 16,548,985*l.*; in 1815, 14,978,557*l.*
The tax produced from lands, houses, rentages, &c., 8,657,937*l.*; from funded and stock properties, 2,885,505*l.*; the profits and gains of trade, 3,831,088*l.*; and salaries and pensions, 1,174,456*l.* Repealed March, 1816.
Sir Robert Peel's bill imposing the present tax at a rate of 7*d.* in the pound (2*l.* 18*s.* 4*d. per cent.*) *per ann.* (for three years) passed 22 June, 1842.
It produced about 5,350,000*l.* a-year; and led to repeal of about 12,000,000*l.* indirect taxes.
Renewed for three years, 1845; and 1848.
Large meetings assembled in Trafalgar-square, London (for the ostensible purpose of opposing the income tax); rioting ensued, which was soon quelled, 6, 7 March, 1848.
Tax continued for one year in 1851 and 1852.
The tax of 7*d.* limited to seven years (till 1860); to be gradually reduced in amount; but all incomes from 100*l.* to 150*l.* made liable to 5*d.* in the pound for all that period: the tax also extended to Ireland, June, 1853.
In consequence of the Crimean war, the rate was doubled, 14th, 1854.
2*d.* (making 15*d.*) added to the tax on incomes above 150*l.*, and 1½*d.* on those between 100*l.* and 150*l.*; the former being 1*s.* 4*d.*, the latter 11½*d.* in the pound. 1855.
The former assessment reduced to 7*d.*, the latter to 5*d.*, 1857. Both became 5*d.*, 1858.
The former raised to 9*d.*, the latter to 6½*d.*; and the tax on incomes, derived from lands, tenements, &c., raised from 3½*d.* to 5½*d.* for England, and from 2½*d.* to 4*d.* for Scotland and Ireland, July, 1859.
The assessment on incomes raised—on those above 100*l.* to 7*d.*; on those above 150*l.* to 10*d.*

[The object of the increase was to provide for a deficiency occasioned by extra expenditure for defending the country, April, 1860.]
A committee to inquire into the working of the income tax appointed, 14 Feb. 1861.
Reduction of the last assessment from 7*d.* to 6*d.*, and from 10*d.* to 9*d.* for three-quarters of the financial year 1861-62.
The rates of 6*d.* and 9*d.* to continue, April, 1862.
The rate of 7*d.* on all chargeable incomes; 3½*d.* on farms, &c., in England; and 2½*d.* in Scotland and Ireland. Incomes under 100*l.* a-year exempted; those above 100*l.* and under 200*l.* allowed an abatement on 60*l.*, 8 June, 1863.
The rate of 6*d.* on chargeable incomes, with some exemptions and abatement, 13 May, 1864.
The rate of 4*d.* on chargeable incomes, with same exemptions and abatement, May, 1865; continued, 1866, and 1867.
Raised to 5*d.* (for year ending 1 April, 1868), to provide for Abyssinian war, Nov. 1867.
Raised to 6*d.* (for 1868-9), May, 1868.
Reduced to 5*d.* in the pound, April, 1869; to 4*d.*, April, 1870. Raised to 6*d.* on account of re-organisation of army, abolishing purchase, 1871. Reduced to 4*d.*, April, 1872.
Renewed agitation against the tax; conference at Birmingham, 22 May; at the Mansion-house, London, proposed formation of a National Anti-Income Tax League, 13 Dec. 1872.
Reduced to 3*d.* from 6 April, 1873; to 2*d.*, 23 April, 1874.
Mr. C. Lewis's motion for reducing or abolishing the tax defeated (139-38), 3 July, 1874.
Raised to 3*d.*; incomes under 150*l.* to be exempt; 120*l.* of incomes under 400*l.* exempt, April, 1876.

INCURABLES. The royal hospital for incurables, founded by Dr. Andrew Reed, at Carshalton in Surrey, in 1850, has since been removed to Putney.

INDEMNITY BILL, by which the minister of the crown or the government, is relieved from the responsibility of measures adopted in extreme and urgent cases, without the previous sanction of parliament. One was passed 19 April, 1801; another to indemnify ministers against their acts during the suspension of the *Habeas Corpus* act, was carried in the commons (principal divisions, 190 to 64); and in the lords (93 to 27), 10 March, 1818. In 1848 and 1857, bills of indemnity were passed for the suspension of the Bank Charter act by the ministry; see *Oblivion.* An *indemnity bill* is passed at the end of every session of parliament for persons who transgress through ignorance of the law. The practice began in 1715.

INDEPENDENTS or **CONGREGATIONALISTS**, hold that each church or congregation is independent of all others in religious matters; that there is no absolute occasion for synods or councils, whose resolutions may be taken for advice, but not as decisions to be peremptorily obeyed; and that one church may advise or reprove another, but has no authority to excommunicate. Robert Brown preached these doctrines about 1585, but, after 32 imprisonments, he eventually conformed to the established church. A church was formed in London in 1593, when there were 20,000 independents. They were driven by persecution to Holland, where they formed several churches; that at Leyden was under Mr. Robinson, often regarded as the author of Independency. In 1616 Henry Jacobs returned to England and founded a meeting-house. Cromwell, himself an independent, obtained them toleration, in opposition to the Presbyterians. The independents published an epitome of their faith, drawn up at a conference at the Savoy, in 1658; and the congregational union of England and Wales formed in 1831, published their "declaration of faith, order, and discipline," in 1833. In 1851, they had 3244 chapels for 1,067,760 persons in England and Wales; see *Worship*. The first independents in Scotland were the Glasites (*which see*). The first independent church in America was founded by the followers of John Robinson, at Plymouth, New England, in 1620.

The Congregationalist Memorial Hall, Farringdon-street, London, erected in memory of the ministers ejected in 1662, as a home for religious societies, was subscribed for and opened . . . 19 Jan. 1875

INDEX EXPURGATORIUS, a catalogue of the books, the reading of which is prohibited by the church of Rome, first made by the inquisitors, and approved by the council of Trent, 1559. The Index by which the reading of the Scriptures was forbidden (with certain exceptions) to the laity, was confirmed by a bull of pope Clement VIII. in 1595. Many of the works of the great authors of France, Spain, Germany, and England, are thus prohibited. On 25 June, 1864, Hugo's "Les Misérables" and other books were added to the number; and many others since.

INDIA or **HINDOSTAN**. The Hindoo histories ascribe their origin to a period ages before the ordinary chronologies. A race of kings is mentioned as reigning 2300 B.C., and Buddhism is said to have been introduced 956 B.C. Several ancient nations, particularly the Tyrians and Egyptians, carried on commerce with India. It was partially conquered by Darius Hystaspes, who formed an Indian satrapy, in 512 B.C., and by Alexander, 327 B.C., and subsequently the intercourse between India and the Roman empire was much increased. The authentic history of Hindostan commences with the conquest of Mahmud Ghuzni, 1004. *Rennell.* See *Secretaries, Bengal, Bombay, Calcutta, Madras*, and *Oude*, for further details.* For the new route to India, see *Waghorn*. Railways (6273 miles in 1875) and the electric telegraph are being rapidly constructed, and canals for irrigation; see *Ganges Canal*. The Indian revenue in 1854-5 was 20,371,450*l*. [The Mogul empire now became merely nominal, independent sovereignties being formed by petty princes. In 1761, Shah Alum II. attacking the English was defeated at Patna, 15 Jan. In 1764, after the battle of Buxar, he was thrown upon the protection of the English, who established him at Allahabad. After the victory at Delhi in 1803, gen. Lake restored the aged monarch to a nominal sovereignty, which descended at his death to his son, Akbar Shah. Akbar died in 1837, and was succeeded by the last king of Delhi (his son), who received a pension of about 125,000*l*. per annum. He joined the mutiny in 1857; was tried in 1858, and transported to Rangoon; died there, 11 Nov. 1862.]

* On the introduction of the improved (Enfield) musket in the Indian army, greased cartridges had been brought from England. These were objected to by the native soldiers, and the issue of them was immediately discontinued by orders in Jan. 1857. A mutinous spirit however gradually arose in the Bengal native army. In March several regiments were disbanded, followed by others, till in June the army had lost by disbandment and desertion, about 30,000 men. On 5 April, a sepoy, and on 20 April, a jemadar, or native lieutenant, were executed. At the end of May 34 regiments were lost. In April, 85 of the 3rd Bengal native cavalry at Meerut refused to use their cartridges. On 9 May they were committed to gaol. On Sunday, the 10th, a mutiny in the native troops broke out ; they fired on their officers, killing col. Finnis and others. They then released their comrades, massacred many Europeans, and fired the public buildings. The European troops rallied and drove them from their cantonments. The mutineers then fled to Delhi (*which see*).

† At the end of June the native troops at the following places were in open mutiny : *Meerut, Delhi*, Ferozepore, Allyghur, Roorkee, Murdaun, Lucknow, *Cawnpore, Nusseerabad, Neemuch, Hansi, Hissar, Jhansi*, Mehidpore, Jullundur, Azimghur, Futtehghur, Jaunpore, *Bareilly*, Shahjehanpore, *Allahabad*. At the stations printed in italics, European women and children were massacred. —The *Relief Fund* for the sufferers in India was commenced 25 Aug. 1857. INDIA COMPANY, EAST. The first commercial intercourse of the English with the East Indies was a private adventure of three ships fitted out in 1591. Only one of them reached India; and, after a voyage of three years, the commander, captain Lancaster, was brought home in another ship, the sailors having seized his own; but his information gave rise to a mercantile voyage, and the establishment of a company, whose first charter, in Dec. 1600, was renewed in 1609, 1657, 1661, 1693, and 1744. Its stock in 1600 consisted of 72,000*l.*, when it fitted out four ships. Meeting with success, it continued to trade, and India stock sold at 500*l.* for a share of 100*l.* in 1683.

A new company (the "English") was chartered in 1698, and the old (the "London") suspended from trading for three years; the two were united 1702
New East India company established 1708
Privileges of the company continued till 1783 . . 1744
Affairs of the company were brought before parliament, and a committee exposed a series of intrigues and crimes . . . . . Aug. 1772
As remedial measures, two acts passed (one authorised a loan of 1,000,000*l.* to the company; the other celebrated as the *India bill*) effected most important changes in the constitution of the company and its relations to India. A governor-general was appointed to reside in Bengal, to which the other presidencies were then made subordinate; a supreme court of judicature was instituted at Calcutta: the salary of the governor was fixed at 25,000*l.* per year; that of the council at 10,000*l.* each; and of the chief judge at 8000*l.*; the affairs of the company were controlled; all the departments were re-organised, and all the territorial correspondence was henceforth to be laid before the British ministry . . . . June, 1773
Mr. Pitt's bill appointing the Board of Control (*which see*), passed . . . . . 18 May, 1784
The company's charter was renewed for 20 years . 1793
The trade with India thrown open 1813
The trade to China opened and the Charter renewed till 1854 1833
The government of India was continued in the hands of the company till parliament should otherwise provide 1853
In consequence of the mutiny of 1857, and the disappearance of the company's army, the government of India was transferred to the crown, the Board of Control was abolished, and a Council of State for India instituted by the act 21 & 22 Vict. c. 106, which received the royal assent, 2 Aug. * 1858

* Lord Palmerston brought in a bill for the purpose on 12 Feb., which was accepted by the house on 18 Feb. He resigned on the following day, and the bill dropped. A similar bill was introduced by Mr. Disraeli on 12 March; but many of its details being objected to, it was withdrawn. On lord John Russell's proposition, the house proceeded to consider the matter by way of resolutions; on 17 June, lord Stanley brought in the above mentioned bill, being the third on the subject introduced during the session.

The company's political power ceased on 1 Sept., and the queen was proclaimed as Queen of Great Britain and the Colonies, &c., in the principal places in India, amid much enthusiasm 1 Nov. 1858
The company to be dissolved, 1 June, 1874, and dividends redeemed, by the "East India Stock Dividend Redemption Act," passed . 15 May, 1873
The EAST INDIA-HOUSE built 1726; enlarged and a new front erected, 1799; sold with the furniture, 1861; pulled down in Sept. and Oct. . . . 1862

INDIA, COUNCIL OF, established by act of parliament, 2 Aug. 1858, in the place of the board of control (*which see*). It consists of 15 members, (salary 1200*l.* a year), eight of whom were appointed by the queen, and seven elected by the directors of the East India company. The members may not sit in parliament. The council met first on 3 Sept. 1858, when lord Stanley, secretary of state for India, presided. The members of the *first* council are here recorded:—

INDIANA, a western state of North America. It was included in Ohio till 1801; was constituted a territory in 1809, and admitted into the Union 11 Dec. 1816; capital, Indianopolis.

INDIAN CIVIL SERVICE COLLEGE, established at Cooper's hill, Surrey, 1870.

INDIANS occupying the south-western parts of the United States, in direct connexion with the government, were numbered at 239,506 in 1861; and about 300,000 in 1872. The larger tribes are the Cherokees (22,000), the Chocktaws (18,000), the Creeks (13,550), and the Chickasaws (5000). A large proportion are in comfortable circumstances, and have schools and churches; other tribes are the Delawares, Sacs, Foxes, Shawnees, Sioux, and Ioways. During the American civil war in 1861, the Choctaws joined the confederates, who permitted two Choctaw delegates to sit in congress; the first being Sampson Folsom and Eastman Loman; but the principal chief of the Cherokees, on 4 May, 1861, issued a proclamation of neutrality, which was maintained with great difficulty. In a war provoked by outrages general Sheridan defeated the Indians, and they surrendered unconditionally Dec. 1868. Negotiations undertaken by the Quakers had no effect, and the war was renewed June, 1869. As a chastisement for murders and other outrages major Baker killed 173 Indians, including women and children, Jan. 1870. In June following, a deputation of eminent chiefs was received by the president at Washington, and promises and presents were made to them. On 1 Oct. 1869 prince Arthur visited the villages of the Canadian Indians, and

was made a chief of the "Six Nations." A deputation of Indian chiefs were well received by the president at Washington, Jan. 1870. A meeting of delegates from various tribes met at Ocmulgee, 5-17 June, 1871, and agreed to a constitution for the common government by means of a senate and parliament representing 17 tribes of 60,000 people; see *Modoc.*

INDICTION, a cycle of tributes of corn demanded every fifteen years, not known before the time of Constantine. The first examples in the Theodosian code are of the reign of Constantius, who died 361.—In memory of the great victory obtained by Constantine over Mezentius, 8 Cal. Oct. 312, the council of Nice ordained that the accounts of years should be no longer kept by the Olympiads, but by the Indiction, which has its epocha 1 Jan. 313. It was first used by the Latin church in 342.

INDIGO. Its real nature was so little known in Europe, that it was classed among minerals, as appears by letters-patent for erecting works to obtain it from mines in the principality of Halberstadt, dated 23 Dec. 1705; yet what Vitruvius and Pliny called *indicum* is supposed to have been our indigo. *Beckmann.* The first mention of indigo occurs in English statutes in 1581. Its cultivation was begun in Carolina in 1747. The quantity imported into Great Britain in 1840 was 5,831,269 lbs.; in 1845, 10,127,488 lbs.; in 1850, 70,482 cwt.; in 1859, 63,237 cwt.; in 1861, 83,109 cwt.; in 1866, 74,256 cwt.; in 1869, 86,721 cwt.; in 1870, 79,255 cwt.; in 1871, 106,307 cwt.; in 1874, 85,707 cwt.; see *Aniline.*

INDIUM, a metal discovered in the arsenical pyrites of Freiberg by F. Reich and T. Richter in 1863. Its name is due to its giving an indigo blue ray in its spectrum.

INDUCTION of electric currents, discovered by Faraday, and announced in his "Experimental Researches," published in 1831-2. Ruhmkorff's magneto-electric induction coil was constructed in 1850.

INDULGENCES in the early church were the moderation of ecclesiastical punishment. The papal system for the absolute pardon of sin, commenced by Leo. III. about 800, were granted in the 11th century by Gregory VII., and by Urban II., and by others, in the 12th century as rewards to the crusaders. Clement V. was the first pope who made public sale of indulgences, 1313. In 1517, Leo. X. published general indulgences throughout Europe, and the resistance to them led to the Reformation.

INDUSTRIAL EXHIBITIONS, in Great Britain, are now frequent. One for South London was opened at Lambeth, 1 March, 1864; for North London, by earl Russell, at the Agricultural hall, Islington, 17 Oct. 1864; for West London, at the Floral hall, Covent-garden, 1 May, 1865; for the city of London, at Guildhall, 6 March, 1866; one was opened at York, 24 July, 1866; and several since. The Workmen's International Exhibition, Agricultural Hall, London, was opened 16 July; closed, 31 Oct. 1870.

INDUSTRIAL AND PROVIDENT SOCIETIES' ACTS, 1852 and 1862, were amended by acts passed 1867 and 1871.

INDUSTRIAL SCHOOLS ACT, 21 & 22 Vict. c. 48 (1857) was enacted to make better provision for the care and education of vagrant, destitute, and disorderly children. Another act was passed, 1861. These acts were consolidated by an act passed in Aug. 1866. Forty-seven of these schools had been certified under these acts up to 29 Sept. 1864. The act was extended to Ireland, 1868. England and Wales, 1872, 71 schools (4870 boys, 1516 girls).

INFALLIBILITY OF THE POPE, in regard to faith and morals, was decreed by the Vatican Council, and promulgated, 18 July, 1870. The doctrine was much opposed in Germany, and led to the constitution of the church named "Old Catholics," *which see.* Mr. Gladstone's pamphlets, "The Vatican Decrees in their bearing on Civil Allegiance," published Nov. 1874, and "Vaticanism," in Feb. 1875.

INFANTICIDE, especially female, was very prevalent in barbarous countries. Lord Macartney stated that 20,000 infants were killed annually; it is now gradually decreasing in India. On 12 Nov. 1851, Mr. Raikes induced the Chohan chiefs to agree to resolutions against it, and a great meeting in the Punjab was held for the same purpose, 14 Nov. 1853. Much suspicion was caused in London in 1867 through the deaths of children farmed out, or given up to persons advertising for children to adopt, with a premium. The agitation revived, June, 1870. Margaret Waters was convicted of the murder of John Cowen, an illegitimate infant, by poison and neglect, 23 Sept. 1870. She had adopted about 40 children, receiving a few pounds as premium, in four years; many had died. The Infant Life Protection act passed 25 July, 1872. Female infanticide prohibited in China about June, 1873.

INFANTRY, foot soldiers; their organisation much improved during the wars of Charles V. and Francis I., in the 16th century. The British army comprised 99 regiments of regular infantry in 1858, when the Canadians raised a regiment which is termed the 100th. The number, now 109, includes the nine regiments formerly in the pay of the East India company, and several colonial corps. Marshal Bugeaud said, "The British infantry is the finest in the world: happily there is not much of it." In 1875, 125,305.

INFANT SCHOOLS began in New Lanark, Scotland, in 1815; in London in 1818.

INFIRMARIES. Ancient Rome had no houses for the cure of the sick; diseased persons were carried to the temple of Æsculapius for cure. Institutions for the accommodation of travellers, the indigent, and sick were founded by the emperor Julian about 362; and infirmaries or hospitals were frequently built to cathedrals and monasteries. The emperor Louis II. caused infirmaries situated on mountains to be visited, 855. In Jerusalem the knights and brothers attended on the sick. There were hospitals for the sick at Constantinople, in the 11th century. The oldest mention of physicians and surgeons established in infirmaries occurs in 1437. *Beckmann;* see *Hospitals.*

INFLUENZA, an epidemic which prevailed in England in 1831, 1833, 1836, and 1847; appears to have been known in the 16th century.

INFORMERS, upon penal statutes, compounding with defendants without leave of the court, were punishable with fine and pillory, by 18 Eliz. *c.* 5 (1576). Their share of a penalty was regulated by 2 & 3 Vict. c. 71 (1839).

INGOUR, a river rising in the Caucasus and falling into the Black Sea. Omar Pasha, marching to the relief of Kars, crossed this river on 6 Nov. 1855, with 10,000 men, and attacked the Russians, 12,000 strong, who, after a struggle, retreated with the loss of 400 men. The Turks had 68 killed and 242 wounded. Kars, however, was not saved.

INK. The ancient black inks were composed of soot and ivory black, and Vitruvius and Pliny mention lamp-black; but they had ink of various colours, as red, gold, silver, and purple. Red ink was made of vermilion and gum. INDIAN INK was brought from China, and must have been in use by the people of the east from the earliest ages. INVISIBLE, or SYMPATHETIC INKS, were known at early periods. Ovid (A.D. 2) teaches young women to write with new milk. Receipts for preparing invisible ink were given by Peter Borel, in 1653, and by Le Mort, in 1669. *Beckmann.*

INKERMANN (Crimea). The Russian army (about 40,000) having received reinforcements, and being encouraged by the presence of the granddukes Michael and Nicholas, attacked the British (8000) near the old fort of Inkermann, before daybreak, 5 Nov. 1854. They were kept at bay for six hours till the arrival of 6000 French. The Russians were then repulsed, leaving 9000 killed and wounded. The loss of the allies was 462 killed, 1952 wounded, and 191 missing. Sir George Cathcart, and generals Strangways, Goldie, and Torrens, were among the slain. On 15 Nov. 1855, an explosion of about 100,000 lbs. of gunpowder occurred near Inkermann, and caused great loss of life.

INNSPRUCK, capital of the Tyrol, captured by Maurice of Saxony in 1552; by the Bavarians in 1703; by the French and Bavarians, 1805. Much fighting took place between these people and the Austrians in 1809, and Innsprück changed masters several times, being finally taken by the Austrians, 12 Aug.

INOCULATION, see *Small Pox.* Lady Mary Wortley Montagu introduced inoculation from small pox to England from Turkey. In 1718 she had her son inoculated at Adrianople with success. She was allowed to have it first tried in England on seven condemned criminals, 1721; and in 1722 two of the royal family were inoculated. The practice was preached against by many of the bishops and clergy until 1760. Dr. Mead practised inoculation very successfully up to 1754, and Dr. Dimsdale of London, inoculated Catherine II., empress of Russia, in 1768. Of 5964 who were inoculated in 1797-99, only three died. An inoculation hospital was established in 1746. *Vaccine* inoculation was introduced by Dr. Jenner, 21 Jan. 1799; he had discovered its virtue in 1796, and had been making experiments during the intermediate three years. Inoculation was forbidden by law in 1840. See *Vaccination,* and *Sheep.*

INQUISITION or **HOLY OFFICE.** Previous to Constantine (306), heresy and spiritual offences were punished by excommunication only; but shortly after his death capital punishments were added, and inquisitors were appointed by Theodosius, 382. Priscillian was put to death in 384. Justinian decreed the doctrine of the four holy synods as to the holy scriptures and their canons to be observed as laws, 529; hence the penal code against heretics. About 800 the power of the western bishops was enlarged, and courts were established for trying and punishing spiritual offenders, even with death; the punishment being termed in Spain *auto-da-fé,* "an act of faith." In the 12th century many heresies arose, and during the crusades against the Albigenses, Gregory IX., in 1233, established by rules the inquisitorial missions sent out by Innocent III., 1210-15, and committed them to the Dominicans. Pietro da Verona (styled Peter Martyr), the first inquisitor who burnt heretics, assassinated by an accused gonfalonier, 6 April, 1252, was canonized.

INSOLVENCY. The first insolvent act was passed in 1649, but it was of limited operation; a number of acts of more extensive operation were passed at various periods, and particularly in the reign of George III. The benefit of the act known as the Great Insolvent Act, was taken in England by 50,733 insolvents from the time of its passing in 1814, to March, 1827, a period of thirteen years. Since then the acts relating to insolvency have been several times amended. Persons not traders, or being traders whose debts are less than 300*l*., might petition the court of bankruptcy, and propose compositions, and have *pro tem.* protection from all process against their persons and property, by 6 Vict. c. 116 (1842). In 1861, by a new bankruptcy act, the business of the insolvent debtors' court was transferred to the court of bankruptcy; and a number of imprisoned debtors were released in Nov. 1861. INSURRECTIONS, see *Conspiracies, Massacres, Rebellions, Riots*, &c.

INTENDMENT OF CRIMES. In cases of treason, wounding, burglary, &c., intention proved was made as punishable as crime completed, by 7 Geo. II., 1734. The rigour was modified by sir Robert Peel's revision of the statutes, 4-10 Geo. IV. 1823-29.

INTERDICT or ECCLESIASTICAL CENSURE, seldom decreed in Europe till the time of Gregory VII., 1073, but often afterwards. When a prince was excommunicated, all his subjects retaining their allegiance were excommunicated also, and the clergy were forbidden to perform any part of divine service, or any clerical duties, save the baptism of infants, and taking the confessions of dying penitents. In 1170, pope Alexander put all England under an interdict; and when king John was excommunicated in 1208, the kingdom lay under a papal interdict for six years. England was put under an interdict, on Henry VIII. shaking off the pope's supremacy, 1535; and pope Sixtus V. published a crusade against queen Elizabeth of England in 1588; see *Excommunication*.

INTEREST, see *Usury*. The word interest was first used in an act of parliament of the 21st James I. 1623, wherein it was made to signify a lawful increase by way of compensation for the use of money lent. The rate fixed by the act was 8*l.* for the use of 100*l.* for a year, in place of usury at 10*l.* before taken. The Commonwealth lowered the rate to 6*l.* in 1651; confirmed in 1660; and by an act of the 13th of queen Anne, 1713, it was reduced to 5*l.* The restraint being found prejudicial to

commerce, it was totally removed by 17 & 18 Vict. c. 90 (1854).

INTERIM OF AUGSBURG, a decree issued by the emperor Charles V. in 1548, with the view of attempting to reconcile the Catholics and Protestants, in which it entirely failed. It was revoked in 1552. The term *Interim* has been applied to other decrees and treaties.

INTERMITTENT FILTRATION of Sewage, a process much advocated by Professor E. Frankland and others, in 1875, and stated to have been successful at Merthyr Tydvil since 1872.

INTERNATIONAL, see under *Chess*, *Cholera*, *Copyright*, *Education*, *Electricity*, p. 248, *Exhibitions*, *Geneva*, *Havre*, *Horticulture*, *Law*, *Neutral Powers*, *Statistics*, *Working-men*, and *Wounded*.

INTERREGNUM, see *Commonwealth*.

INTRANSIGENTES, or Irreconcileables, a party of extreme republicans in Spain, who withdrew from the Cortes and become very troublesome, 1 July, 1873; joined by communists they held Carthagena from August to 12 Jan. 1874.

INVESTIGATION. See *Delicate*.

INVESTITURE OF ECCLESIASTICS, was a cause of discord between the pope and temporal sovereigns in the middle ages; and led to actual war between Gregory VII. and the emperor Henry IV. 1075-1085. The pope endeavoured to deprive the sovereign of the right of nominating bishops and abbots, and of investing them with the cross and ring. Henry V. gave up the right, by treaty, Feb. 1111; but other sovereigns resolutely refused to concede it.

INVINCIBLE ARMADA or **SPANISH ARMADA,** see *Armada*.

INVOCATION OF THE VIRGIN AND SAINTS to intercede with God. This practice of the Romish church has been traced to the time of Gregory the Great, 593. The Eastern church began (in the 5th century) by calling upon the dead, and demanding their suffrage as present in the divine offices.

IODINE (from the Greek *iōdēs*, violet-like), was discovered by M. De Courtois, a manufacturer of saltpetre at Paris in 1812, and investigated by M. Clement, 1813. On the application of heat it rises in the form of a dense violet-coloured vapour, easily evaporates, and melts at 220 degrees: it changes vegetable blues to yellow, and a seven-thousandth part converts water to a deep yellow colour, and starch into a purple.

IONA, ICOLMKILL, or **HII,** one of the Hebrides. About 565 St. Columba founded a monastery here, which flourished till the 8th and 9th centuries, when it was frequently ravaged by the Norsemen. Other religious bodies afterwards were formed here, and the isle was long esteemed sacred.

IONIA (Asia Minor). About 1040 B.C. the Iones, a Pelasgic race, emigrated from Greece, and settled here and on the adjoining islands. They built Ephesus, Smyrna, and other noble cities. They were conquered by the great Cyrus about 548 B.C.; revolted 504, but were again subdued. After the victories of Cimon, Ionia became independent and remained so till 387, when it was once more subjected to Persia. It formed part of the dominions of Alexander and his successors; was annexed to the Roman empire, 133, and conquered by the Turks.—Ionia was renowned for poets, historians, and philosophers.

IONIAN ISLANDS (on W. coast of Greece). Corfu, the capital, Cephalonia, Zante, Ithaca, Santa Maura, Cerigo, and Paxo. They were colonised by the Iones, and partook of the fortunes of the Greek people; were subject to Naples in the 13th century, and in the 14th to Venice. Population in 1862, 234,123.

IONIC ORDER OF ARCHITECTURE, an improvement on the Doric, was invented by the Ionians about 1350 B.C. *Vitruvius*. Its distinguishing characters are the slenderness and flutings of

its columns, and the volutes of rams' horns that adorn the capital.

IONIC SECT OF PHILOSOPHERS, founded by Thales of Miletus about 600 B.C. distinguished for its abstruse speculations under his successors and pupils, Anaximander, Anaximenes, Anaxagoras, and Archelaus, the master of Socrates. They held that the world is a living being, and that water is the origin of all things.

IOWA, a western state of North America, was organised as a territory 12 June, 1838; and admitted into the Union, 28 Dec. 1846. Capital, Des Moines.

IPSUS (Phrygia), BATTLE OF, Aug. 301 B.C., when Seleucus was confirmed in his kingdom of Syria by the defeat and death of Antigonus, king of Asia. The latter led into the field an army of about 70,000 foot, and 10,000 horse, with 75 elephants. The former had 64,000 infantry, besides 10,500 horse, 400 elephants, and 120 armed chariots. *Plutarch.*

IPSWICH (Suffolk), the Saxon Gippeswic, was ravaged by the Danes, 991 and 1000. Wolsey was born here, 1471; and founded a school in 1525. The port was greatly improved by the erection of wet docks, 1837-42. The railway to London was opened 25 June, 1846; and the new town-hall, 29 Jan. 1868.

IRELAND, anciently named Eri or Erin, Ierne and Hibernia, is said to have been first colonised by Phœnicians. Some assert that Partholani landed in Ireland about 2048 B.C.; that the descent of the Damnonii was made about 1463 B.C.; and that this was followed by the descent of Heber and Heremon, Milesian princes, from Galicia, in Spain, who conquered Ireland, and gave to its throne a race of 171 kings. See *Church of Ireland*, and *Population*.

* The list of Irish sovereigns, printed in previous editions, has been omitted. The Irish writers carry their succession of kings very high. The learned antiquary, Thomas Innes, of the Scots' College of Paris, expressed his wonder that "the learned men of the Irish nation have not, like those of other nations, yet published the valuable remains of their ancient history whole and entire, with just translations, in order to separate what is fabulous, and only grounded on the traditions of their poets and bards, from what is *certain* history." O'Flaherty, Keating, Toland, Kennedy, and other modern Irish historians, have rendered all uncertain, by deducing their history from the Deluge with as much assurance as they deliver the transactions of Ireland from St. Patrick's time."—*Anderson.* The "Annals of the Four Masters," edited by Dr. Donovan, were published in Irish and English in 1848.

One of the finest, thickest, and heaviest armour-plates ever rolled in the world was pressed into the very perfection of a manufactured armour-plate at the great Atlas Ironworks of sir John Brown and Co., Sheffield. The size of it when in the furnace was a little over 20 feet long by about 4 feet broad and 21 inches thick. Its rough weight was over 21 tons. It was built up in the furnace before being rolled by five mould plates, each 3 inches thick, and one solid plate of 6 inches. This mass when reduced by intense heat to the consistency of dough, was withdrawn from the furnace, and in the course of less than a quarter of an hour was passed between the enormous rollers many times, was reduced to a compact slab of iron of an uniform thickness of 15 inches, and then passed on to its bed to cool till fit for having its rough edges planed down to the proper dimensions, 6 Sept. 1867.

IRON CROWN (of Italy), of gold and precious stones, set in a thin ring of iron, said to have been forged from a nail of Christ's cross, was made by order of Theudelinde for her husband, Agilulf, king of the Longobards, 591. She presented it (to be kept) to the church at Monza. Charlemagne was crowned with this crown, and after him all the emperors who were kings of Lombardy; Napoleon I. at Milan, on 26 May, 1805, put it on his head, saying, "*Dieu me l'a donnée; gare à qui y touchera.*" (God has given it to me; woe to him who touches it.) The crown was removed from Monza to Mantua by the Austrians, on 23 April, 1859. After the peace of Vienna in 1866, the crown was given up to general Menabrea on

11 Oct., and presented to king Victor Emmanuel, at Turin, on 4 Nov. The order of the "Iron Crown of Italy," instituted by Napoleon 26 May, 1805, was abolished in 1814, but revived by the emperor of Austria 12 Feb. 1816; see *Gotha*. The order of the Crown of Italy was instituted by king Victor Emmanuel 20 Feb. 1868.

IRON-MASK, THE MAN WITH THE.* A mysterious prisoner in France, wearing a mask and closely confined under M. de St. Mars, at Pignerol (1679), Exilles (1681), Sainte Marguerite (1687), and at the Bastille (1698), where he died 19 Nov. 1703. He was of noble mien, and was treated with profound respect; but his keepers had orders to despatch him if he uncovered. M. de St. Mars himself always placed the dishes on his table, and stood in his presence.

IRON-PLATED SHIPS, see *Ironclad*.

IRRIGATION, practised in the east and in Egypt from the most remote ages. It was strenuously advocated for India by sir A. Cotton and others at the Social Science Congress at Manchester, Oct. 1866. In 1865 acts were passed for utilising London sewage in the irrigation of grass land, and the results are said to be generally favourable. The subject was much discussed, Aug. 1873. A method of producing artificial rain from ponds by means of steam-power, patented by Isaac Brown, of Edinburgh, was tried by Mr. Coleman, at Stoke Park, and reported successful; see *Sewage*, and *Intermittent Filtration*.

IRUN (a frontier village of Spain). On 16 May, 1837, the British auxiliary legion under general Evans, marched from St. Sebastian to attack Irun (held by the Carlists), which after a desperate resistance was carried by assault, 17 May.

IRVINGITES, followers of Edward Irving,† now called the "Holy Catholic Apostolic Church." They use a liturgy (framed in 1842, and enlarged 1853), and have church officers named apostles, angels, prophets, &c. In 1852 lighted candles were placed on the magnificent altar, and burning of incense during prayers was prescribed. The Gothic church in Gordon-square was solemnly opened 1 Jan. 1854. It is said that all who join the church offer it a tenth of their income. They had 30 chapels in England in 1854.

ISAURIA (a province in Asia Minor), conquered by the Romans B.C. 78, by the Saracens A.D. 650; was retaken by the emperor Leo. III., who founded the Isaurian dynasty, 739, which ended with Constantine VI. in 797. Isauria was incorporated with Turkey 1387.

ISERNIA (S. Italy). Here the Sardinian general Cialdini defeated the Neapolitans, 17 Oct. 1860.

ISLAM, or **ESLÂM**, submission to God, the name given to *Mahometanism* (*which see*).

ISLE OF FRANCE, MAN, &c., see *Mauritius, Man*, &c.

ISLES, BISHOPRIC OF. This see contained not only the Hebrides, or Western Isles, but the Isle of Man, which for nearly 400 years had been a separate bishopric. The first bishop of the Isles was Amphibalus, 360; see *Iona*. Since the revolution (when this bishopric was discontinued) the Isles have been joined to Moray and Ross, or to Ross alone. In 1847, however, Argyll and the Isles were made a seventh post-revolution and distinct bishopric; see *Bishops*.

ISLY (N.W. Africa). Here Abd-el-Kader, the Arab chief, was totally defeated by the French, under Bugeaud, 14 Aug. 1844.

ISMAIL (Bessarabia). After a long siege by the Russians, who lost 20,000 men before the place, the town was taken by storm, 22 Dec. 1790; when Suwarrow, the most merciless warrior of modern times, put the brave Turkish garrison (30,000 men) to the sword and delivered up Ismail to pillage, and ordered the massacre of 6000 women. It was again captured by the Russians 26 Sept. 1809, and retained till the treaty of Paris in 1856, when it was ceded to Moldavia.

ISPAHAN was made the capital of Persia by Abbas the Great, in 1590. It lost its supremacy in 1796, when Teheran became the capital.

ISRAEL, KINGDOM OF, see *Jews*.

ISSUS (Asia Minor), the site of Alexander's second great battle with Darius, whose queen and family were captured, Oct. 333 B.C. The Persian army, according to Justin, consisted of 400,000 foot and 100,000 horse; 61,000 of the former and 10,000 of the latter were left dead on the spot, and 40,000 were taken prisoners. Here the emperor Septimius defeated his rival Niger, A.D. 194.

ISTAMBOUL, see *Constantinople*.

ISTER, see *Danube*.

ISTHMIAN GAMES received their name from the isthmus of Corinth, where they were observed: instituted by Sisyphus, about 1406 B.C., in honour of Melicertes, a sea-god. *Lenglet*. Reinstituted in honour of Neptune by Theseus about 1239 B.C.; and their celebration was held so sacred, that even a public calamity did not prevent it. The games were revived by Julius Cæsar, 60; and by the emperor Julian, A.D. 362.

ISTRIA was finally subdued by the Romans, 177 B.C. After various changes it came under the rule of Venice in 1378, and was annexed 1420. It was obtained by Austria 1796; by France 1806; by Austria 1814.

* The following conjectures have been made as to his identity:—An Armenian patriarch forcibly carried from Constantinople (who died ten years before the mask); the duc de Vermandois, son of Louis XIV., reported to have perished in the camp before Dixmude; the duc de Beaufort, whose head is reported to have been taken off before Candia; James, duke of Monmouth, executed on Tower-hill; a son of Anne of Austria, queen of Louis XIII., either by cardinal Mazarine, or by the duke of Buckingham; the twin brother of Louis XIV. (a conjecture received by Voltaire and others); Foucquet, an eminent statesman in the time of Louis XIV.; and a count Matthioli, secretary of state to Charles III., duke of Mantua. M. Delort and the right hon. Agar Ellis (afterwards lord Dover) endeavoured to prove Matthioli to have been the person. The mask, it seems, was not made of iron; but of black velvet, strengthened with whalebone, and fastened behind the head with a padlock.

† Edward Irving was born 15 Aug. 1792, and was engaged as assistant to Dr. Chalmers, at Glasgow, in 1819. In 1823 he attracted immense crowds of most distinguished persons to his sermons at the Scotch church, Hatton-garden. A new church was built for him in Regent-square in 1827. Soon after, he propounded new doctrines on the human nature of Christ: and the "Utterances of Unknown Tongues" which began in his congregation with a Miss Hall and Mr. Taplin, 16 Oct. 1831, were countenanced by him, as of divine inspiration. He was expelled from the Scotch church, 15 March, 1833. His church, "reconstituted with the threefold cord of a sevenfold ministry," was removed to Newman-street. He died 8 Dec. 1834.

ITALIAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE, first met at Pisa, under the patronage of the grand duke of Tuscany, in 1837. It met in Rome, 20 Oct. 1873.

ITALIAN CATHOLIC CHURCH (between two and three thousand persons); first bishop, Domenico Panelli; a synod met at Naples in 1875.

Its statute (of 62 articles) asserts that the Catholic church is nothing but the society of all believers in Jesus Christ, and that he only is its supreme head and pastor; rejects all miracles since the death of the Apostles; declares that the Catholic faith is only that revealed in the Holy Scriptures, &c.

ITALIAN LANGUAGE, based on Latin, is said by Dante to be formed of a selection of the best portions of the different dialects. Pure elegant poetry was written by Guido Cavalcanti, who died 1301; and good prose by Malespini, about 1250.

The following terms are often used with reference to certain periods in the history of Italian literature and art.

1. *Trecento* (three hundred), from the birth of Dante (1265) to the death of Boccaccio (1375), which two, with Petrarca, are styled "the triumvirate of the Trecento."
2. *Quattrocento* (four hundred), from 1375 to the revival of Italian literature by Lorenzo de' Medici in the 15th century. During this period Latin was revived, to the prejudice of Italian.
3. *Cinquecento* (five hundred), from about 1480 to 1590. A sensuous style of art, founded on the heathen mythology, began to prevail.
4. *Seicento* (six hundred), from 1590 to 1700. The bad taste which prevailed during this period is ascribed to the influence of the Spaniards and the Jesuits throughout Italy. *Seicentisti* is a term of reproach.

The *Trecento* and *Cinquecento* were the most flourishing periods.

ITALIAN REPUBLIC was the name given to the remodelled Cisalpine republic. Napoleon Bonaparte, president, Jan. 1802.

ITALY (either from Italus, an early king, or *italus*, a bull calf) was called the garden of Europe. The invading Pelasgians from Greece, and the Aborigines (Umbrians, Oscans, and Etruscans), combined, form the Latin race, still possessing the southern part of Europe. The history of Italy is soon absorbed into that of Rome; founded 753 B.C. Previous to the 15th century it was desolated by intestine wars and the interference of the German emperors; since then, Spain, France, and Germany struggled for the possession of the country, which has been divided among them several times. Spain predominated in Italy during the 16th and 17th centuries; yielded to the house of Austria at the beginning of the 18th. The victories of Bonaparte in 1797-8 changed the government of Italy; but the Austrian rule was re-established at the peace in 1814. In 1848 the Milanese and Venetians revolted and joined Piedmont, but were subdued by Radetzky; see *below*. The hostile feeling between Austria and Piedmont gradually increased till war broke out in April, 1859. The Austrians were defeated, and the kingdom of Italy, comprising Piedmont, Sardinia, Lombardy, Tuscany, Modena, Parma, the Romagna, Naples, and Sicily was re-established, 17 March, 1861, by the Italian parliament (consisting of 443 deputies from 59 provinces). On 29 Oct., 1861, the internal government was re-organized; the 59 provinces were placed under prefects, subject to four directors-general. In 1861, the population was 21,728,529. War with Austria was declared 18 June, 1866; and on 3 Oct., peace was signed at Vienna, and Venetia was ceded to Italy; see *below* for the events. The kingdom of Italy was consummated by the occupation of Rome as the capital, 1870. Estimated population of the kingdom, 1862, 25,003,635; Rome was added in 1870. 1875, 27,165,553. For other details see *Rome* and the various Italian cities throughout the volume.

JANINA, see *Albania.*

JANISSARIES (Turkish *ièni tchéri*, new soldiers), an order of infantry in the Turkish army; originally, young prisoners trained to arms; were first organised by Orcan, about 1330, and remodelled by his son Amurath I. 1360; their numbers being increased by following sultans. In later days they degenerated from their strict discipline, and several times deposed and killed the sultans. During an insurrection, 14-15 June, 1826, when nearly 3000 of them were killed, the Ottoman army was re-organised by Mahmud II. and a firman was issued on 17 June, abolishing the Janissaries.

JANSENISTS, persons who embraced the doctrines of Cornelius Jansen, bishop of Ypres, who died in 1638. The publication of his "*Augustinus*," 1640, in which he maintained the doctrine of free grace, kindled a fierce controversy, and was condemned by a bull of pope Urban VIII. in 1642. Through the Jesuits Jansenism was condemned by Innocent X. in 1653, and by Clement XI., in 1713, by the bull Unigenitus. This bull the French church rejected. Jansenism still exists at Utrecht and Haarlem; see *Port Royalists.* Loos, abp. of Utrecht, died, June, 1873.

JANUARY derives its name from Janus, an early Roman divinity. January was added to the Roman calendar by Numa, 713 B.C. He placed it about the winter solstice, and made it the first month, because Janus was supposed to preside over the beginning of all business. In 1751 the legal year in England was ordered to begin on 1 Jan. instead of 25 March.

JANUS, TEMPLE OF, at Rome, was erected by Romulus, and kept open in time of war, and closed in time of peace. During above 700 years it was shut only—under Numa, 714 B.C.; at the close of the first Punic war, 235 B.C.; and under Augustus, 29, 25, and 5 B.C.

JAPAN, an Asiatic empire, composed of Japan or Niphon, and about 3850 isles, with between 35,000,000 and 40,000,000 inhabitants. It was visited by Marco Polo, the Venetian traveller, in the 13th century; and by Mendez Pinto, a Portuguese, about 1535 or 1542; whose countrymen shortly after obtained permission to found a settlement. The Jesuit missionaries followed, and made a number of converts, who sent a deputation to pope Gregory XIII. in 1582; but a fierce persecution of the Christians began in 1590, aggravated it is said by the indiscreet zeal and arrogance of the Jesuits: thousands of the converts suffered death; and the Portuguese were utterly expelled, 1637-42. The Dutch trade with Japan commenced about 1600 under severe restrictions, and has since been frequently suspended; other nations, except Chinese, being excluded. The learned Engelbert Kæmpfer visited Japan in 1690, and published an account of it with plates.

REIGNING EMPEROR OR MIKADO.

Moutz Hito, born 1852; succeeded his father, Komei Tenno, 1867.

JARGONIUM, a new metal discovered by professor A. Church in combination with the zircon of Ceylon. The spectrum was shown by Mr. H. Sorby, 6 March, 1869.

JARNAC (W. France). On 13 March, 1569, the duke of Anjou, afterwards Henry III. of France, here defeated the Huguenots under Louis, prince of Condé, who was killed in cold blood by Montesquieu. The victor (seventeen years of age), on account of his success here and at Moncontour, was chosen king of Poland.

A Jarnac Stroke; a term of opprobrium, is derived from the Seigneur de Jarnac, who, in a duel with La Chataigneraye, for a great insult, disabled his antagonist by an unexpected wound in the ham 1547

JASMINE or **JESSAMINE** (*Jasminum officinale*), native of Persia, &c., was brought hither from Circassia, before 1548. The Catalonian jasmine came from the East Indies, in 1629, and the yellow Indian jasmine in 1656.

JASSY, the capital of Moldavia, frequently occupied by the Russians; taken by them in 1739, 1769, and 1828. A treaty between them and the Turks was signed here, 9 Jan. 1792.

JAVA, a large island in the Eastern Archipelago, is said to have been reached by the Portuguese in 1511, and by the Dutch in 1595. The latter, who now possess it, built Batavia, the capital, about 1619; see *Batavia*. The atrocious massacre of 20,000 of the unarmed natives by the Dutch, sparing neither women nor children, to possess their effects, took place in 1740. The island capitulated to the British, 18 Sept. 1811. The sultan was dethroned by the English, and the hereditary prince raised to the throne, in June, 1813. Java was restored to Holland in 1814. The English promoted free labour instead of forced; but the Dutch reverted to the old system, and in 1830 abolished free labour, introducing the "culture system," by which the government controls the cultivation of the land and buys the produce at its own price. In Aug. 1860, the Swiss soldiers here, aided by the natives, mutinied, but were soon reduced, and many suffered death. The diminished prosperity of Java led to warm discussions in the Dutch chamber in 1866.

JEAN DE LUZ, ST. (S. France, near the Pyrenees). Soult's strong position here was taken by general Hill and marshal Beresford, 10 Nov. 1813.

JEDDA, the port of Mecca, Arabia. On 15 June, 1858, the fanatic Mahometans massacred twenty-six of the Christian inhabitants, among them the English and French consuls and part of their families; but many fled to the shipping. On the delay of justice, commodore Pullen, with the *Cyclops*, bombarded the town, 25, 26 July. On 6 Aug. eleven of the assassins were executed; the ringleaders afterwards.

JEDDO or **YEDDO**, the capital of Japan, on the island of Niphon, contains about 2,000,000 inhabitants. The emperor's palace is said to have a hall of audience supported by pillars of massive gold, and three towers, each nine stories high, covered with gold plates. On 23 Dec. 1854, and 11 Nov. 1855, severe earthquakes occurred: during the latter 57 temples, 106,000 houses, and about 30,000 persons were destroyed. Here was signed the treaty of 26 Aug. 1858; see *Japan*. 5000 houses destroyed by fire, 8 Dec. 1873.

JEHAD, see *Jihad*.

JELLALABAD, Afghanistan, defended by sir Robert Sale from 8 Jan. to 5 April, 1842, when the siege was raised by general G. Pollock, who destroyed the fortifications.

JE MAINTIENDRAI, "I will maintain," the motto of the house of Nassau. When William III. came to the throne of England, he continued

this, but added "the liberties of England and the Protestant religion," at the same time ordering that the old motto of the royal arms, "*Dieu et mon droit*," should be retained on the great seal, 1689.

JEMAPPES (N.W. Belgium), the site of the first pitched battle gained by the French republicans (under Dumouriez), in which 40,000 French troops drove out 19,000 Austrians, who were entrenched in woods and mountains, defended by redoubts and many cannon, 6 Nov. 1792. The number killed on each side was reckoned at 5000.

JENA and **AUERSTADT** (Central Germany), where two battles were fought, 14 Oct. 1806, between the French and Prussians. The French were commanded at Jena by Napoleon, and at Auerstadt by Davoust: the Prussians by prince Hohenlohe at the former place, and the king of Prussia at the latter. The Prussians were defeated, losing nearly 20,000 killed and wounded, and nearly as many prisoners, and 200 field pieces; the French lost 14,000 men. Napoleon advanced to Berlin, and issued the Berlin decree (*which see*).

JENNERIAN INSTITUTION, founded 1803; see *Vaccination*.

JERSEY. The chief island of the channel archipelago (which includes Guernsey, Sark, Alderney, &c.), formerly held by the Romans in the 3rd and 4th centuries after Christ—Jersey being termed Cæsarea. The isles were captured by Rollo, and thus became an appanage of the duchy of Normandy, and were united to the crown of England by his descendant, William the Conqueror. The inhabitants of the Channel Islands preferred to remain subjects of king John, at the period of the conquest of Normandy by Philip Augustus, and while retaining the laws, customs, and (until lately) the language of their continental ancestors, have always remained firm in their allegiance to England. Almost every war with France has been characterised by an attack on Jersey, the most formidable of which, under the baron de Rullecour, was defeated by the English garrison and Jersey militia, commanded by major Pierson, 6 Jan. 1781. Mr. J. Bertrand Payne, in his "Armorial of Jersey," and his "Gossiping Guide," has exhaustively treated the general and family history of the island. Jersey became a place of refuge for MM. Rouher, Baroche, Drouyn de Lhuys, and other distinguished French imperialists, Sept. 1870. The population of the channel isles in 1861 was 90,978; in 1871, 90,563.

"JERUSALEM DELIVERED," the great Italian epic, by Tasso, was published in 1580.

JERVIS'S ACTS, 11 & 12 Vict., cc. 42, 43 (1848), relate to legal proceedings against criminals.

JESTER is described as "a witty and jocose person, kept by princes to inform them of their faults, and of those of others, under the disguise of a waggish story." Several of our kings, particularly the Tudors, kept jesters. Rahere, the founder of St. Bartholomew's priory, West Smithfield, London, 1133, is said to have been a court jester and minstrel. There was a jester at court in the reigns of James I. and Charles I., but we hear of no licensed jester afterwards.

JESUITS, the society or company of Jesus, was founded by Ignatius Loyola, a page to Ferdinand V. of Spain, subsequently an officer in his army, and afterwards canonised. Having been wounded in both legs at the siege of Pampeluna, in 1521, he devoted himself to theology, and renounced the military for the ecclesiastical profession. He dedicated his life to the Blessed Virgin as her knight; made a pilgrimage to the Holy Land, and on his return laid the foundation of his society at Paris, 16 Aug. 1534. He presented his institutes, in 1539, to pope Paul III., who made many objections; but Ignatius adding to the vows of chastity, poverty, and obedience, a fourth of implicit submission to the holy see, the institution was confirmed by a bull, 27 Sept. 1540. The number of members was not to exceed sixty, but that restriction was taken off by another bull, 14 March, 1543; and popes Julius III., Pius V., and Gregory XIII. granted many privileges. Loyola died 31 July, 1556. Francis Xavier, and other missionaries, the first brethren, carried the order to the extremities of the habitable globe, but it met with great opposition in Europe, particularly in Paris; see *Paraguay* and *Jansenists*. The order still exists in many European states contrary to the laws.

The society condemned by the Sorbonne, Paris, 1554; expelled from France, 1594; re-admitted, 1604; but after several decrees is totally suppressed in France and its property confiscated .	1764

Expulsion of the Jesuits from Italy, decreed by law passed 25 June; carried into execution, 20 Oct.—2 Nov.		,,

JESUIT'S BARK, called by the Spaniards fever-wood, from the cinchona or chinchona tree, discovered, it is said, by a Jesuit, about 1535 (and used by the order). Its virtues were not generally known till 1633, when it cured of fever the lady of the viceroy (Chinchona) at Peru. It was sold at one period for its weight in silver, and was introduced into France in 1649; and is said to have cured Louis XIV. of fever when he was dauphin. It came into general use in 1680, and sir Hans Sloane introduced it here about 1700. The cinchona plant, largely planted in the Neilgherry hills, India, in 1861, is said to be thriving greatly, and also in Ceylon; see *Quinine*.

JESUS CHRIST, the SAVIOUR OF THE WORLD, stated to have been born on Monday, 25 Dec. A.M. 4004, in the year of Rome, 752; but this event should be dated four years before the commencement of the common era; see *Nativity*. The following dates are given by ecclesiastical writers:—

JEWELLERY was received by Rebekah as a marriage gift, 1857 B.C. (*Gen.* xxv. 53). Pliny the elder, says he saw Lollia Paulina (wife of Caius Cæsar, and afterwards Caligula) wearing ornaments valued at a sum equal to 322,916*l.* sterling. Jewels were worn in France by Agnes Sorel in 1434, and encouraged in England about 1685. The standard of gold for jewellery, except wedding rings, was lowered by parliament in 1854.

JEWISH ERA AND CALENDAR. The Jews usually employed the era of the Seleucidæ until the 15th century, when a new mode of computing was adopted. They date from the creation, which they consider to have been 3760 years and 3 months before the commencement of our era. To reduce Jewish time to ours, subtract 3761 years. The Jewish year consists of either twelve or thirteen months, of 29 or 30 days. The civil year commences with the month Tisri, immediately after the new moon following the autumnal equinox; the ecclesiastical year begins with Nisan.

JEYNES or JAINS, a sect of Buddhists, in India. They do not recognise a creator, but believe matter to be eternal, and refrain from destroying life, considering animals to be sacred.

JIHAD, or religious warfare against unbelievers, although inculcated in the Mohammedan law, was

prohibited by the Sheeahs, and only permitted by the Sonnites in some cases; certainly not with any nation with whom they had made a treaty of peace. The Jihad was preached by fanatics in India in 1871, and prohibited by government.

JOAN OF ARC, the maid of Orleans, born at Domremy, imagined that she had a divine commission to expel the English, who under the earl of Salisbury were besieging Orleans. Charles VII. entrusted her with the command of the French troops, and she raised the siege, and entered Orleans with supplies, 29 April, 1429; and the English, who were before the place from 12 Oct. preceding, abandoned the enterprise 8 May following. She captured several towns in the possession of the English, whom she defeated in a battle near Patay, 18 June, 1429. She was wounded several times herself, but never shed any blood with her own hand. She was taken at the siege of Compiègne, 23 May, 1430; and, after a trial, burnt for a witch at Rouen, 31 May, 1431. A statue of Joan of Arc, the work of the late princess Marie of France, was inaugurated at Orleans, 13 Sept. 1851, and the 435th anniversary of the deliverance of the city was celebrated there on 14 May, 1865. These knights co-operated with the knights of St. John of Malta and various other bodies in rendering energetic assistance to the wounded during the Franco-Prussian war, in 1870-1, and had an office in London; the duke of Manchester being a prior of the order.

JOHN'S GATE, ST. (St. John's Square, Clerkenwell, London), a fine vestige of monastic building, was the gate of the priory of St. John of Jerusalem (suppressed in 1540), and was the place where the *Gentleman's Magazine* was first published, 6 March, 1731. The house was often visited by Dr. Johnson, Garrick, and their friends. The gate was purchased for the Order of the Knights of St. John, by Sir Edmund A. H. Lechmere, Bt., secretary of the English league. The first meeting held here 24 June, 1874.

JOHN DOE AND RICHARD ROE, names well known, as standing pledges for the prosecution of suits. In early times real and substantial persons were required to pledge themselves to answer to the crown for an amercement or fine set upon the plaintiff, for raising a false accusation, if he brought an action without cause, or failed in it; and in 1285, 13 Edw. I. sheriffs and bailiffs were, before they made deliverance of the distress, to receive pledges for pursuing the suit, and for the return of the property, if return were awarded. But this becoming a matter of form, the fictitious names of Doe and Roe were used until the form was declared to be no longer necessary by the Common Law Procedure Act, 1852.

JOHN O'GROAT'S HOUSE, an ancient house formerly situated on Duncan's Bay Head, the most northerly point of Great Britain, deriving its name from John of Groat, or Groot, and his brothers, originally from Holland, said to have settled here about 1489.

The house was of an octagon shape, being one room, with eight windows and eight doors, to admit eight members of the family, the heads of different branches of it, to prevent their quarrels for precedence at table. Each came in by this contrivance at his own door, and sat at an octagon table, at which, of course, there was no chief place or head.

JOINT STOCK COMPANIES (good and bad) have been very numerous during the present century (especially in 1825, 1846, 1866, and 1872). JUAN FERNANDEZ, an island in the Pacific, named from its discoverer in 1567. Alexander Selkirk, a native of Scotland, left on shore here by his captain in Nov. 1704, and lived alone till he was discovered by captain Rogers in 1709. He died lieutenant of H.M.S. *Weymouth*, 1723. A monument to his memory was erected on the island in 1868, then colonised by Germans. From his narrative De Foe is said to have derived his *Adventures of Robinson Crusoe*, first published in 1719.

JUAN, SAN, a small island, near Vancouver's island. The possession of this island, on account of its commanding the straits between British Columbia and the United States territories, led to disputes between the two countries, owing to the doubtful interpretation of the treaty of Washington respecting the boundaries, 12 June, 1846. See *United States*, 1859 and 1860. The matter (by the treaty of Washington, 8 May, 1871) was referred for arbitration to the emperor of Germany, who decided in favour of the United States, Oct. 1872. The isle was evacuated by the British 22 Nov. following.

JUGGERNAUT, or "Lord of the World," one of the incarnations of Krishna, is an idol formed of an irregular pyramidal black stone, with two rich diamonds to represent eyes; the nose and mouth are painted vermilion. The number of pilgrims that visit the god is stated at 1,200,000 annually. Formerly some were crushed by the wheels of the car (so lately as Aug. 1864); a great many never returned, and, to the distance of fifty miles, the way was strewed with human bones. The temple of Juggernaut has existed about 800 years. The state allowance to the temple was suspended by the Indian government in June, 1851. The festival was kept, June, 1872. Twelve persons were said to be killed by accident, Aug. 1873.

JUGURTHINE WAR. Jugurtha murdered his cousin, Hiempsal, king of Numidia, and usurped his throne, 118 B.C. He gave him a share in the government, but killed him in 112. He then provoked the Romans to war. Cæcilius Metellus was first sent against him, and defeated him in two battles; and Marius brought him in chains to Rome to adorn his triumph, 106 B.C., where he was put to death in 104. This war has been immortalised by the pen of Sallust.

JULIAN PERIOD (by Joseph Scaliger, about 1583), a term of years produced by the multiplication of the lunar cycle 19, solar cycle 28, and Roman indiction 15. It consists of 7980 years, and began 4713 years before our era. It has been employed in computing time to avoid the ambiguity attendant on reckoning any period antecedent to our era, an advantage in common with the mundane eras used at different times. By subtracting 4713 *from* the Julian period, our era is found; if before Christ, subtract the Julian period from 4714. For *Julian era*, see *Calendar*, and *Year*.

JULIERS, a Prussian province; made a duchy in 1356; became the subject of contention on the extinction of the ruling family in 1609; was allotted to Neuburg in 1659; seized by the French in 1794; and ceded to Prussia in 1815.

JULY, the seventh, originally fifth, Roman month, named by Marc Antony from *Julius* Cæsar, the dictator of Rome, who was born in it.

JUNE, the sixth month, owes its name to *Junius*, which some derive from *Juno*, and others from *Juniores*, this being the month for the young, as May was for aged persons. Ovid, in his *Fasti*, introduces Juno as claiming this month.

JUNIUS'S LETTERS began in the *Public Advertiser*, 21 Jan. 1796.

They have been ascribed to Mr. Burke, Mr. William Gerard Hamilton, commonly called Single-speech Hamilton, John Wilkes, Mr. Dunning (afterwards lord Ashburton), serjeant Adair, the rev. J. Rosenhagen, John Roberts, Charles Lloyd, Samuel Dyer, general Dec, the duke of Portland, Hugh Boyd, lord George Sackville, and sir Philip Francis. The last-named is generally considered to have been the author. Junius said, "I am the depository of my own secret, and it shall perish with me." The work of Mr. Chabot and hon. E. T. B. Twisleton was considered decisive of sir Philip Francis being Junius, May, 1871.

JUNKER PARTY (*Junker*, German for *young noble*), a term applied to the aristocratic party in Prussia, which came into power under Otho von Bismarck-Schönhausen, appointed prime-minister, 9 Oct. 1862. Their political organ is the *Kreuz-Zeitung*.

JUNO, the planet discovered by M. Harding, of Lilienthal near Bremen, 1 Sept. 1804. Its distance from the sun is 254 millions of miles, and it accomplishes its revolution in four years and 128 days, at the rate of nearly 42,000 miles an hour. Its diameter is estimated by German astronomers at 1424 English miles.

JUNONIA, festivals in honour of Juno, celebrated at Rome, and instituted 431 B.C.

JUNTA. The Spanish provincial juntas or councils declared against the French in 1808, and incited the people to insurrection.

JUPITER, known as a planet to the Chaldeans, it is said, 3000 B.C. The discovery of the satellites, incorrectly attributed to Simon Mayr (Marius) in 1609, was made by Galileo on 8 Jan. 1610; see *Planets*. JUPITER'S moons were all invisible on 21 Aug. 1867; a very rare occurrence.—JUPITER AMMON'S celebrated temple in Libya was visited by Alexander, 332 B.C. Cambyses' army sent against this temple perished miserably, 525 B.C.

JURIDICAL SOCIETY was established in Feb. 1855, and opened with an address by sir R. Bethell on 12 May following.

JURIES. Trial by jury was introduced into England during the Saxon heptarchy, mention being made of six Welsh and six Anglo-Saxon freemen appointed to try causes between the English and Welsh men of property, and made responsible, with their whole estates real and personal, for false verdicts. *Lambard.* By most authorities their institution is ascribed to Alfred about 886. In *Magna Charta*, juries are insisted on as the great bulwark of the people's liberty. When either party is an alien born, the jury shall be one half denizens, and the other half aliens, stat. 28 Edw. III. 1353. By the common law a prisoner upon indictment or appeal might challenge peremptorily thirty-five, being under three juries; but a lord of parliament, and a peer of the realm, who is to be tried by his peers, cannot challenge any of his peers. An act for the trial by jury in civil cases in Scotland was passed in 1815. An act to consolidate and amend the laws relating to juries in Ireland was passed 4 Will. IV. 1833. A new act respecting juries, regulating their payment, &c., was passed 9 Aug. 1870. The clause respecting their payment was rescinded by act passed 28 Feb. 1871. Laws respecting juries in Ireland amended, 14 Aug, 1871. New Juries bill brought in by the attorney-general, sir John Coleridge, Feb. 1873. Juries are summoned to assist the coroner in investigating the causes of sudden or violent death.—GRAND JURIES (of not less than 12 or more than 23 persons), decide whether sufficient evidence is adduced to put the accused on trial.—The constitution of 1791 established the trial by jury in France.—An imperial decree abolished trial by jury throughout the Austrian empire, 15 Jan. 1852.—Trial by jury began in Russia, 8 Aug. 1866.

COERCION OF JURIES.—About the year 927, the plaintiff and defendant used to feed the jury empanelled in their action, and hence arose the common law of denying sustenance to a jury after the hearing of the evidence. A jury may be detained during the pleasure of the judge if they cannot agree upon a verdict; and may be confined without meat, drink, or fire, candle light excepted, till they are unanimous.—Some jurors have been fined for having fruit in their pockets, when they were withdrawn to consider of their verdict, though they did not eat it. *Leon. Dyer*, 137. A jury at Sudbury not being able to agree, and having been some time under duress, forcibly broke from the court where they were locked up, and went home, 9 Oct. 1791. *Phillips.* In Scotland, Guernsey, Jersey, and France, juries decide by a majority; in France, since 1831, a majority of two-thirds is required.

"**JUSTE MILIEU**," according to Louis-Philippe (in 1830), is the only principle of government which can secure the welfare of France.

JUSTICES OF THE PEACE are unpaid local magistrates, invested with extensive powers in minor cases, but subject to supersession and punishment by the King's Bench for an abuse of their authority. They were first nominated by William I. in 1076. *Stow.* Persons termed conservators of the peace in each county were appointed by 1 Edw. III. c. 2, 1327; and their duties were defined in 1360. The form of a commission of the peace settled by the judges, 23 Eliz. 1580. *Hawkins*; see *Eyre.*

JUSTICES, LORDS, were appointed by English sovereigns to govern during their absence; especially by William III., and George I. and II. (1695-1760). George III. never left England. In Sept. 1824, when George IV. went to Hanover, lords justices were appointed, the duke of York being the first. No such appointment has been made during the present reign, it having been decided by the law authorities in 1843 to be unnecessary when the queen went to France. Ireland was sometimes temporarily ruled by *lords justices.* —Two *lords justices of the court of appeal in chancery*, having rank next after the chief baron of the exchequer, were appointed from 1 Oct. 1851, salary 6000*l.*; see *Court of Justiciary.*

JUSTICIARS. In ancient times the kings of England used to hear and determine causes; but it is declared by law that if the king cannot determine every controversy, he, to ease himself, may divide the labour among persons, men of wisdom and fearing God, and out of such to appoint judges. The Saxon kings of England appointed a judge after this manner, who was, in fact, the king's deputy. After the Norman conquest, the person invested with that power had the style of *Capitalis Justiciæ*, or *Justiciarius Angliæ.* These judges continued until the erection of the courts of king's bench and the common pleas. The first justiciars of England were Odo, bishop of Bayeux, and William Fitz-Osborne, in 1067; and the last was Philip Basset, in 1261, or Hugh le Despencer, 1263 (Henry III). Authorities vary.

In December, prince Gortschakoff, with the Russian army, determined to storm their intrenchments. The conflict lasted from 31 Dec. to 9 Jan. 1854, when the Russians were compelled to retire. KARS, a town in Asiatic Turkey, captured by the Russians under Paskiewich, 15 July, 1828. It was defended by general Fenwick Williams, with 15,000 men, and with three months' provisions and three days' ammunition, against the Russian general Mouravieff, with an army of 40,000 infantry and 10,000 cavalry. The siege lasted from 18 June to 28 Nov. 1855. The sufferings of the garrison were very great from cholera and want of food. The Russians made a grand assault on 29 Sept. but were repulsed with the loss of above 6000 men, and the garrison were overcome by famine alone. *Sandwith.* Kars was restored to Turkey, Aug. 1856.

On accepting general Williams' proposal for surrendering, general Mouravieff said:— "General Williams, you have made yourself a name in history; and posterity will stand amazed at the endurance, the courage, and the discipline which this siege has called forth in the remains of an army. Let us arrange a capitulation that will satisfy the demands of war, without disgracing humanity." In 1856 the general was made a baronet, with the title of sir William Fenwick Williams of Kars, and granted a pension.

KEEPER OF THE KING'S CONSCIENCE. The early chancellors were priests, and out of their supposed moral control of the king's mind grew the idea of an equity court in contradistinction to the law courts. A bill in chancery is a petition through the lord chancellor to the king's conscience for remedy in matters for which the king's common law courts afford no redress. The keeper of the king's conscience is therefore now the officer who presides in the court of chancery; see *Chancellor* and *Lord Keeper*.

KEEPER (LORD) OF THE GREAT SEAL OF ENGLAND differed only from the lord chancellor in that the latter had letters patent, whereas the lord keeper had none. Richard, a chaplain, was the first keeper under Ranulph, in 1116. The two offices were made one by 5 Eliz. 1562. *Cowell;* see *Chancellor*. The office of lord keeper of the great seal of SCOTLAND was established in 1708, after the union.

KENILWORTH CASTLE (Warwickshire), was built about 1120, by Geoffrey de Clinton, whose grandson sold it to Henry III. After the battle of Evesham and defeat and death of Simon de Montfort, by Prince Edward (afterwards Edward I.) 1265, Montfort's younger son, Simon, shut himself up in Kenilworth castle, which sustained a siege for six months against the royal forces of Henry III., to whom it at length surrendered. It continued important, and its possession was long disputed by the Russians and Greeks. Justinian II. cruelly treated it. It was taken by Vladimir, grand-duke of Russia in 988, when he and his army received Christian baptism, and he married the emperor's sister Anne, who obtained Kherson as her dowry. The city was destroyed by the Lithuanians; and the Turks found it deserted when they took possession of the Crimea in 1475. What ancient remains the Turks and Tartars had spared, the Russians conveyed away for the construction of Sebastopol.

Potemkin, the favourite of Catherine, who died at Jassy in 1791, is buried here, and John Howard, the English philanthropist, who died here, 20 Jan. 1790, is buried about three miles from the town, where an obelisk has been erected to his memory, by the czar Alexander I.

An extraordinary assembly of the revolted provinces, Schleswig and Holstein, met here 9 Sept. 1850. By the convention of Gastein between Austria and Prussia, 14 Aug. 1865, the former was to govern Holstein, but Kiel to be held by Prussia as a German federal port. This was annulled in 1866 by the issue of the war.

KILDARE (E. Ireland). The Curragh or race-course here was once a forest of oaks. Here was the nunnery of St. Bridget, founded by her in the 5th century, and here was a building called the fire-house, where, it is supposed, the nuns kept the inextinguishable fire which existed till the reformation. The see was one of the earliest episcopal foundations in Ireland; St. Conlæth, who died 519, the first prelate. The first Protestant bishop was Thomas Lancaster, in 1550. The see is valued, by an extent returned 39 Hen. VIII., at 69*l.* 11*s.* 4*d.* Irish per year. Kildare was united to Dublin in 1846; see *Dublin*. The insurrection in Kildare, which swelled into the rebellion, commenced, 23 May, 1798. On that night, lieut. Gifford of Dublin and a number of other gentlemen were murdered by insurgents. This rebellion was quelled in 1799.

The see of Achonry was united to Killala in the 17th century; and both were united to Tuam in 1839; see *Tuam* and *Bishops*.

KILMALLOCK (Limerick). An abbey was founded here by St. Mochoallog or Molach about 645, and an abbey of Dominicans was built in the 13th century. *Ware.* A charter was granted to Kilmallock by Edward VI., and another by Elizabeth in 1584. The town was invested by the Irish forces in 1598, but the siege was raised by the earl of Ormond. There was much fighting here in 1641 and 1642; see *Fenians*, March 1867.

KILMORE (Armagh), an ancient town, whose bishops were sometimes called Brefinienses, from Brefney, and sometimes Triburnenses, from Triburna, a village; but in 1454, the bishop of Triburna, by assent of pope Nicholas V., erected the parish church of St. Fedlemid into a cathedral.

KINDER-GARTEN (children's garden), a system of education devised by Froebel, but practically carried out by Mr. and Mrs. Ronge, in Germany, in 1849, and in England in 1851. The system, founded mainly on self-tuition, and enlivened by toys, games, and singing, is set forth in Ronge's "Kinder-garten," published in 1858; and has been partially adopted in English schools.

KINEMATICS (Greek *kineo*, I move), the science of motion. Reuleaux's "Kinematics of Machinery," translated by A. B. W. Kennedy; published, June, 1876. "Kinematism" is a method of treating certain diseases by movement. Prof. Rankine's "Machinery and Millwork" first appeared, 1809; new ed. 1876; see *Motion*.

KING: German *König*. The Latin *Rex*, Scythian *Réis*, Spanish *Rey*, Italian *Rè*, French *Roy*: Hebrew *Rosch*, chief or head. Nimrod was the first founder of a kingdom, 2245 B.C. *Dufresnoy*. Misraim built cities in Egypt, and was the first who assumed the title of king in that division of the earth, 2188 B.C. The "manner of the king" is set forth in 1 *Samuel* viii., 1112 B.C. Saul was the first king of Israel, 1095 B.C. Most of the Grecian states were originally governed by kings; and kings were the first rulers in Rome.

King of England.—The style was used by Egbert, 828; but the title *Rex gentis Anglorum*, king of the English nation, existed during the Heptarchy; see *Britain*.

The plural phraseology, *we, us, our*, was first adopted among English kings by John 1199

The emperors of Germany, in order that their eldest sons might be chosen their successors, in their own life-time politically obtained them the title of "*king of the Romans.*" The first emperor so elected was Henry IV. 1055

Richard, brother of Henry III. of England, was induced to go to Germany, where he disbursed vast sums under the promise of being elected next emperor; he was elected "king of the Romans" (but failed in succeeding to the imperial crown) 1256

The style "king of Rome" was revived by Napoleon I. who conferred it on his son, upon his birth . . . . . 20 March, 1811

The title "king of Italy" was conferred on Victor Emmanuel II. of Sardinia by the Italian parliament . . . . . 17 March, 1861

KING-OF-ARMS: three for England,—Garter, Clarencieux, and Norroy; Lyon king-at-arms for Scotland, and Ulster for Ireland. These offices are very ancient: Clarencieux is so named from Lionel, third son of Edward III., the sovereign who founded the order of the Garter; see *Garter*. Lionel having by his wife the honour of Clare, was made duke of Clarence; which dukedom afterwards escheating to Edward IV., he revived the office of Clarence king-at-arms. The office of Bath king of arms, created in 1725, was changed to Gloucester king-of-arms, 14 June, 1726. Ulster was substituted, it is said, in lieu of Ireland king-of-arms, by Edward VI., 1553; but the monarch himself named it as a new institution.

KING'S ADVOCATE, see *Queen's*.

KING'S BENCH, or **QUEEN'S BENCH, COURT OF**, obtained its name from the king sometimes sitting here on a high bench, and the judges, to whom the judicature belongs in his absence, on a low bench at his feet. This court in ancient times was called *Curia Domini Regis*. The court of queen's bench sat for the last time, July, 1875, see *Supreme Court*. Chief justice Cockburn received the freedom of London, 9 March, 1876; said to be the first case of the kind.

KING'S BENCH PRISON (Southwark), near the site of one of the oldest prisons of London, long used for the confinement of debtors. Here, it is said, prince Henry (afterwards Henry V.) was committed by Justice Gascoigne. The prison was burnt down by the London rioters, 7 June, 1780; see *Gordon's No-Popery Mob*. It was rebuilt in 1781, and contained about 230 rooms. Formerly, the debtors were allowed to purchase the liberties, to enable them to have houses or lodgings without the walls, or to purchase day-rules, to go out of the prison under certain regulations. The rules included St. George's Fields, &c. A consequence of the bankruptcy act, 1861, was the release of many insolvent debtors; and an act was passed in 1862 "for discontinuing the queen's prison and removal of the prisoners to Whitecross-street prison." The buildings now are used as a military prison.

KING'S BOOK, or "Valor Ecclesiasticus temp. Henrici VIII." the return of the commissioners appointed in 1534 to value the first fruits and tenths granted to the king. An edition by John Bacon ("Liber Regis") was published in 1780, and it was printed for the Record Commission, 1810-25.

KING'S BOUNTY, an annual grant of 1000*l*., began early in the reign of George III. and continued till 10 George IV. 1829.

KING'S COLLEGES, see *Aberdeen* and *Cambridge*. King's College, London, incorporated 14 Aug. 1829, and opened 8 Oct. 1831. It was incorporated with the university of London in 1837. The hospital was founded in 1839. The dining-hall and kitchen fell in, through drainage, 8 a.m., 6 Dec. 1869; no lives were lost.

KING'S COUNSEL, the first under the degree of serjeant was sir Francis Bacon, made so, *honoris causâ*, without patent or fee, in 1604,

by James I. The first modern king's counsel was sir Francis North, afterwards lord keeper, in 1663.

KING'S COUNTY (Ireland), formed out of confiscated property, and so named from Philip, king of Spain, the husband of queen Mary of England, in 1556.

KING'S CROSS MARKET, N. London, opened 7 Aug. 1868; did not succeed.

KINGSDOWN'S ACT, 24 & 25 Vict. c. 114 (1861) relates to wills.

KING'S EVIL (scrofula), formerly supposed to be cured by the king's touch; the first being Edward the Confessor, in 1058. In the reign of Charles II. 92,107 persons were touched; and, according to Wiseman, the king's physician, they were nearly all cured! Queen Anne officially announced in the *London Gazette*, 12 March, 1712, her intention to touch publicly. The custom was dropped by George I., 1714.

KING'S SPEECH. The first from the throne is said to have been by Henry I., 1107.

KINGSTON, see *Hull.*—KINGSTON, Jamaica, was founded in 1693, after the great earthquake in 1692 which destroyed Port Royal; it was constituted a city, 1802. An awful fire here ravaged a vast portion of the town, and consumed 500,000*l.* of property, 8 Feb. 1782; another fire in 1843. The bishopric was established in 1856; see *Jamaica.*

KINGSTON TRIAL. The duchess of Kingston was arraigned before the lords in Westminster-hall, on a charge of bigamy, having married first, captain Hervey, afterwards earl of Bristol, and next, during his lifetime, Evelyn Pierrepont, duke of Kingston, 15-22 April, 1776. She was found guilty, but, on pleading the privilege of peerage, the punishment of burning in the hand was remitted, and she was discharged on paying the fees.

KINGSTOWN (Dublin). The harbour here was commenced in June, 1817. The name was changed from Dunleary in compliment to George IV., who here embarked for England at the close of his visit to Ireland, 3 Sept. 1821. The Kingstown railway from Dublin was opened 17 Dec. 1834.

KISSING the hands of great men was a Grecian custom. Kissing was a mode of salutation among the Jews, 1 *Samuel* x. 1, &c. The "kiss of charity," or "holy kiss," commanded in the Scriptures (*Romans* xvi. 16, &c.), was observed by the early Christians, and is still recognised by the Greek church and some others. Kissing the pope's foot began with Adrian I. or Leo III. at the close of the 8th century.

KIT-KAT CLUB, of above thirty noblemen and gentlemen, instituted in 1703, to promote the Protestant succession. The duke of Marlborough, sir R. Walpole, Addison, Steele, and Dr. Garth were members. It took its name from its dining at the house of Christopher Kat, a pastry-cook in King-street, Westminster.

KITT'S, see *Christopher's, St.*

KNEELING. The knee was ordered to be bent at the name of Jesus (see *Philippians* ii. 10), about the year 1275, by the order of the pope. The ceremony of a vassal kneeling to his lord is said to have begun in the 8th century.

KNIGHTS. The word knight is derived from the Saxon *Cniht*, a servant (*i.e.*, servant to the king, &c.). The institution of the Roman knights (*Equites* or horsemen, from *equus*, a horse), is ascribed to Romulus, about 750 B.C., when the curiæ elected 300. Knighthood was conferred in England by the priest at the altar, after confession and consecration of the sword, during the Saxon heptarchy. The first knight made by the sovereign with the sword of state was Athelstane, by Alfred, A.D. 900. *Spelman.* The custom of ecclesiastics conferring the honour of knighthood was suppressed in a synod held at Westminster in 1100. *Ashmole's Institutes.* All persons having ten pounds yearly income were obliged to be knighted, or pay a fine, 38 Hen. III. 1254. *Salmon.* On the decline of the empire of Charlemagne, all Europe being reduced to a state of anarchy, the proprietor of every manor became a petty sovereign; his mansion was fortified by a moat, and defended by a guard, and called a castle. Excursions were made by one petty lord against another, and the women and treasure were carried off by the conqueror. At length the owners of rich fiefs associated to repress these marauders, to make property secure, and to protect the ladies; binding themselves to these duties by a solemn vow, and the sanction of a religious ceremony. Cervantes' "Don Quixote," a satire on knight-errantry, was published in 1605; see *Bannaret, Chivalry, Tournaments, Holy Sepulchre, John,* and *Michael.*

FEMALE KNIGHTS. It is said that the first were the women who preserved Tortosa from the Moors in 1149, by their stout resistance. Large immunities were granted to the women and their descendants. Several female orders appear in the previous list. Ladies have been admitted to several male orders.

KNIGHTS OF GLYN AND KERRY IN IRELAND. The heads of two branches of the family of Fitzgerald, who still enjoy the distinctions bestowed on their ancestors by sovereigns in the 13th century.

KNIGHTS OF THE SHIRE, OR OF PARLIAMENT; summoned by the king's writ and chosen by the freeholders, first summoned by Simon de Montfort, in 1254, and in a more formal manner, 20 Jan. 1265. There are writs extant as far back as 11 Edward I., 1283. The knights are still girded with a sword when elected, as the writ prescribes.

KNIVES. In England, Hallamshire (the country round Sheffield) has been renowned for its cutlery for five centuries; Chaucer speaks of the "Sheffield thwytel." Stow says that Richard Mathews on the Fleet-bridge was the first Englishman who made *fine* knives, &c.; and that he obtained a prohibition of foreign ones, 1563. Clasp or spring knives became common about 1650; coming originally from Flanders.—*Knife-cleaning machines* were patented by Mr. George Kent in 1844 and 1852; others have been invented, by Masters, Price, &c.; see *Forks*.

KNOW-NOTHINGS, a society which arose in 1853, in the United States of N. America. Their principles were embodied in the following propositions (at New York, 1855). They possessed several newspapers and had much political influence:—

1. The Americans shall rule America.
2. The Union of these States.
3. No North, no South, no East, no West.
4. The United States of America—as they are—one and inseparable.

KÖNIGGRÄTZ (Bohemia). Near here was fought the decisive battle between the Austrians commanded by marshal Benedek, and the Prussians commanded by their king William I., 3 July, 1866. Prince Frederick Charles halted at Kammeniz on Monday, 2 July, his troops commenced their march at midnight, and the first shot was fired about 7·30 a.m. 3 July. The attack began at Sadowa (after which the battle is also named) about 10 o'clock, and a desperate struggle ensued, the result appearing uncertain, till the army of the crown prince of Prussia arrived about 12·30. When Chlum, which had been taken and lost seven times by the Prussians, was taken for the eighth time, the fate of the day was decided; and the retreat of the Austrians, at first orderly, became a hasty disastrous flight. About 400,000 men were engaged in this battle, one of the greatest in modern times. The Austrians are said to have lost 174 guns, about 40,000 killed and wounded, and 20,000 prisoners. The Prussians lost about 10,000 men. The victory gave the supremacy in Germany to Prussia, unity to North Germany, and Venetia to Italy; and led to the legislative independence of Hungary.

KÖNIGSBERG, the capital of east Prussia, was founded by the Teutonic knights in 1255, and became the residence of the grand master in 1457. It joined the Hanseatic league in 1365. It was ceded to the elector of Brandenburg in 1657, and here Frederick III. was crowned the first king of Prussia in 1701. It was held by the Russians 1758-64, and by the French in 1807. Here the present king and queen were crowned, 18 Oct., 1861.

It was made to hold 233,667 gallons of wine; and on the top, which was railed in, was accommodation for twenty persons to regale themselves. The famous tun of St. Bernard's was said to hold 800 tons; see *Heidelberg Tun*.

KOOKAS, a warlike reforming sect in N. W India, founded by Baluk Ram about 1845, and after his death, about 1855, headed by Ram Singh, who preached the restoration of the old Sikh religion, which venerated cattle and punished their slaughterer. After several outrages against the Mahome-

tans, an outbreak of the Kookas took place near Loodiana, which was vigorously suppressed, 15 Jan. 1872, by commissioner Cowan, who ordered 49 prisoners to be blown from cannon, 17 Jan. Several others were tried and executed by commissioner Forsyth soon after. For this severity Mr. Cowan was ordered to be dismissed, and Mr. Forsyth removed to another station, April, 1872. The Kooka leaders claim 800,000 followers; but the probable number is about one-tenth.

KORAN or **ALCORAN** (AL KURAN), the sacred book of the Mahometans, was written about 610, by Mahomet (who asserted that it had been revealed to him by the angel Gabriel in twenty-three years), and published by Abu-bekr about 635. Its general aim was to unite the professors of idolatry and the Jews and Christians in the worship of one God (whose unity was the chief point inculcated), under certain laws and ceremonies, exacting obedience to Mahomet as the prophet. The leading article of faith preached is compounded of an eternal truth and a necessary fiction, namely, that there is only one God, and that Mahomet is the apostle of God. *Gibbon.* The Koran was translated into Latin in 1143; into French, 1647; into English by Sale, 1734; and into other European languages, 1763 *et seq.* It is a rhapsody of 6000 verses, divided into 114 sections; see *Mahometanism*, &c.

KOSSOVA, see *Cossova*.

KOSZTA AFFAIR. Martin Koszta, a Hungarian refuger, when in the United States in 1850, declared his intention of becoming an American citizen, and went through the preliminary forms. In 1853 he visited Smyrna, and on 21 June was seized by a boat's crew of the Austrian brig *Huzzar*. By direction of the American minister at Constantinople, captain Ingraham of the American sloop *St. Louis*, demanded his release; but having heard that the prisoner was to be clandestinely transported to Trieste, he demanded his surrender by a certain time, and prepared to attack the Austrian vessel on 2 July; Koszta was then given up. On 1 Aug., the Austrian government protested against these proceedings in a circular addressed to the European courts, but eventually a compromise was effected, and Koszta returned to the United States.

KRYPTOGRAPH, see *Cryptograph*.

KU KUX KLAN, the name of a secret society in the southern states of the Union, principally in Tennessee in North America, bitterly opposed to the ruling men. Early in 1868, this society issued lists of proscribed persons, who, if they did not quit the country after warning, became liable to assassination. General Grant endeavoured to suppress this society in April. Its repression by the militia in Arkansas was ordered, Nov. 1868, and it became the subject of legislation at Washington, June, 1871.

LABURNUM, *Cytisus Laburnum*, called also the golden chain, was brought to these countries from Hungary, Austria, &c., about 1576. *Ashe*.

LABYRINTHS. Four are mentioned: the first, said to have been built by Dædalus, in the island of Crete, to secure the Minotaur, about 1210 B.C.; the second, of Arsinoe, in Egypt, in the isle of Mœris, by Psammeticus, king of that place, about 683 B.C.; the third, at Lemnos, remarkable for its sumptuous pillars, which seems to have been a stalactite grotto; and the fourth, at Clusium, in Italy, erected by Porsenna, king of Etruria, about 520 B.C. *Pliny*. The labyrinth of Woodstock is connected with the story of Fair Rosamond; see *Rosamond*. The Maze at Hampton Court, was formed in the 16th century.

LACE of very delicate texture was made in France and Flanders in 1320. Its importation into England was prohibited in 1483; but it was used in the court costume of Elizabeth's reign. Dresden, Valenciennes, Mechlin, and Brussels, have long been famous for their fine lace. An ounce weight of Flanders thread has been frequently sold for four pounds in London; and its value, when manufactured, has been increased to forty pounds, ten times the price of standard gold. A framework knitter of Nottingham, named Hammond, is said to have invented a mode of applying his stocking-frame to the manufacture of lace from studying the lace on his wife's cap, about 1768. *Macculloch*. So many improvements have been made in this manufacture, particularly by Heathcote (1809, 1817, &c.), Morley and Leaver (1811, &c.), that a piece of lace which about 1809 cost 17*l*. may now be had for 7*s*. (1853). *Ure*. The process of "gassing" by which cotton lace is said to be made equal to fine linen lace, was invented by Samuel Hall of Basford, near Nottingham. He died in Nov. 1862. Seguin's "La Dentelle; Histoire," &c., published, 1874.

LADRONE ISLES (N. Pacific), belonging to Spain, discovered by Magellan, in 1520. He first touched at the island of Guam. The natives having stolen some of his goods, he named the islands the *Ladrones*, or Thieves. In the 17th century they obtained the name of Marianna islands from the queen of Spain.

LADY. The masters and mistresses of manor-houses, in former times, served out bread to the poor weekly; and were therefore called *Lafords* and *Lef-days*—signifying *bread givers* (from *hlaf*, a loaf): hence Lords and Ladies. Wedgewood considers this fanciful, and derives the words from the Anglo-Saxon, *laford*, lord, and *hlæfdig*, lady.—LADY DAY (March 25), a festival instituted about 350, according to some authorities, and not before the 7th century according to others; see *Annunciation*. The year, which previously began on this day, was ordered to begin on Jan. 1, in France in 1564; and in Scotland, by proclamation, on 17 Dec. 1599; but not in England till 3 Sept. 1752, when the style was altered.

LAGOS, in the *Bight* of Benin (Africa), was assaulted and taken by the boats of a British squadron, under commodore Bruce, 26, 27 Dec. 1851. This affair arose out of breaches of a treaty for the suppression of the slave-trade. In 1861, the place was ceded to the British government, and created a settlement: Henry Stanhope Freeman, first governor, see *Gold Coast Colony*.

LAGOS BAY (Portugal). Here was fought a battle between admiral Boscawen and the French admiral De la Clue, who lost both his legs in the engagement, and died next day, 17, 18 Aug. 1759. The *Centaur* and *Modeste* were taken, and the *Redoubtable* and *Ocean* run on shore and burnt: the scattered remains of the French fleet got into Cadiz.

LA HOGUE (N. W. France), BATTLE OF, 19 May, 1692, when the English and Dutch fleets under admirals Russell and Rooke, defeated the French fleet commanded by admiral Tourville. The English burnt thirteen of the enemy's ships, and destroyed eight more, thus preventing a descent upon England.

LAKE DWELLINGS contain relics of the stone, iron, and brass ages. Herodotus (about 450 B.C.) described the Pæonians as living on platforms in Lake Prasias. In 1855, Dr. Keller discovered the remains of lake habitations which had been supported on piles in several Swiss lakes ages ago. His book was published in England in 1866. The artificial fortified islands termed "Crannoges" discovered in some Irish lakes are attributed to the 9th and 10th centuries. They have been frequently used as places of refuge.

LAMAISM, the religion of Mongolia and Thibet (dating about 1357), is a corrupt form of Buddhism (*which see*).

LAMBETH PALACE. A considerable portion was built early in the 13th century, by Hubert Walter, archbishop of Canterbury. The tower of the church was erected about 1375; and other parts of the edifice in the 15th century. Simon of Sudbury, archbishop of Canterbury, was killed here by the followers of Wat Tyler, who attacked the palace, burnt the furniture and books, and destroyed the registers and public papers, 14 June, 1381. The domestic portion of the palace was greatly enlarged for archbishop Howley (who died 1848), by Mr. Blore, at an expense of 52,000*l*. The palace was reopened after restoration, Oct. 1873; see *Canterbury, Articles*, and *Pan-Anglican Synod*.

LAMMAS-DAY, the 1st of August, one of our four cross quarter-days of the year. Whitsuntide was the first, Lammas the second, Martinmas the third, and Candlemas the last; and such partition of the year was once equally common with the present divisions of Ladyday, Midsummer, Michaelmas, and Christmas. Some rents are yet payable at each of these quarterly days in England, and very generally in Scotland. *Lammas* probably comes from the Saxon *hlammæsse*, loaf mass, because formerly upon that day our ancestors offered bread made of new wheat. Anciently, those tenants that held lands of the cathedral church of York were by tenure to bring a lamb alive into church at high mass.

LAMPETER COLLEGE (Cardiganshire), was founded by bishop Burgess in 1822, and incorporated 1828. Henry James Prince, founder of the Agapemone (*which see*), was one of the revivalist Lampeter brotherhood, instituted among the students here about 1836.

LAMPS. The earthen lamp of Epictetus the philosopher sold after his death for 3000 drachms. Lamps with horn sides said to be the invention of Alfred. London streets were first lighted with oil-lamps in 1681, and with gas-lamps in 1814. A lamp "constructed to produce neither smoke nor smell, and to give considerably more light than any lamp hitherto known," was patented by M. Aimé Argand in 1784, and was brought into general use in England early in the present century. On his principle are founded the lamps invented by Carcel about 1803, and since 1825, the moderator lamps of Levavasseur, Hadrot, and Neuburger. See *Safety Lamp*. Paraffin oil and naphtha spirit are now much used in lamps, 1873.

LANARK (W. Scotland), was a Roman station, and made a royal burgh 1103.

LANCASHIRE was created a county palatine by Edward III. for his son John of Gaunt, who had married the daughter of Henry first duke of Lancaster, in 1359, and succeeded him in 1361. Net revenue to the queen in 1866, 29,000*l*.; total receipts, 42,545*l*. See *Cotton*.

LANCASTERIAN SCHOOLS, based on a system of education by means of mutual instruction, devised by Joseph Lancaster about 1796, were not much patronised till about 1808. The system led to the formation of the British and Foreign School society, in 1805, whose schools are unsectarian, and use the Bible as the only means of religious instruction. Lancaster was accidentally killed at New York in 1838.

LANCASTRIANS, see *Roses*.

LANCERS, see *Regiments*.

LANCET, a weekly medical journal, established and edited by Thomas Wakley, surgeon (afterwards coroner for Middlesex and M.P. for Finsbury), first published 3 Oct. 1823. An injunction obtained by Mr. Abernethy against the publication of his lectures in the "*Lancet*," was dissolved by the lord chancellor in 1825. Mr. Wakley died 16 May, 1862. The proprietors of the "Lancet" have at various times employed medical men as commissioners of enquiry. The reports of the Analytical Sanitary Commission of the "Lancet" in 1851-54, were published by Dr. A. H. Hassall, as "Food and its Adulterations," in 1855. The "Lancet" commissioners (three physicians) enquired into the state of workhouse infirmaries in London, 1865, and in the country, 1867.

LAND was let generally in England for 1*s*. per acre, 36 Hen. VIII. 1544. The whole rental of the kingdom was about 6,000,000*l*. in 1600; about 14,000,000*l*. in 1688. In 1798 Mr. Pitt proposed his income tax of 10 per cent. on an estimate of 100 millions, taking the rent of land at 50 millions, that of houses at 10 millions, and the profits of trade at 40 millions; but in his estimate were

exempted much land, and the inferior class of houses. The rental of the United Kingdom was estimated at 59,500,000*l.* in 1851. An act for rendering the transfer of land more easy was passed in 1862; see *Agriculture*, *Domesday*, old and new.

Ministers were left in a minority in the House of Commons on the *land-tax bill* in 1767; it being the first instance of the kind on a money bill since the Revolution. Its rate varied in different years from 1*s.* to 4*s.* in the pound.
Mr. Pitt made the tax perpetual at 4*s.* in the pound, but introduced his plan for its redemption, 2 April, 1798
The tax in 1810 produced 1,418,337*l.*; in 1820, 1,338,420*l.*; in 1830, 1,423,618*l.*; in 1840, 1,298,62*l.*; in 1852, 1,151,613*l.*; in year 1872-3, 1,108,225*l.* in 1875-6, 1,090,177*l.* From the Revolution to the year 1800, the land-tax had yielded 227,000,000*l.*

Here the Hanoverian army on its way to join the Bavarians was attacked by the Prussians, who were defeated with the loss of about a thousand killed and wounded, and 912 prisoners, 27 June, 1866. LANGUAGE must either have been revealed originally from heaven, or the fruit of human invention. The latter opinion is embraced by Horace, Lucretius, Cicero, and most of the Greek and Roman writers; the former by the Jews and Christians, and many modern philosophers. Some suppose Hebrew to have been the language spoken by Adam; others say that the Hebrew, Chaldee, and Arabic are only dialects of the original tongue. "And the whole earth was of one language and of one speech," *Genesis* xi. 1.* George I. in 1724, and George II. in 1736, appointed regius professors of modern languages and of history to each of the universities of England.

The original European languages were thirteen, viz.: Greek, Latin, German, Sclavonian, spoken in the east; Welsh; Biscayan, spoken in Spain; Irish; Albanian, in the mountains of Epirus; Tartarian; the old Illyrian; the Jazygian, remaining yet in Liburnia; the Chaucin, in the north of Hungary; and the Finnic, in east Friesland.
From the Latin sprang the Italian, French, Spanish, and Portuguese.
The Turkish is a mixed dialect of the Tartarian.
From the Teutonic sprang the present German, Danish, Swedish, Norwegian, English, Scotch, &c.
There are 3424 known languages, or rather dialects, in the world. Of these, 937 are Asiatic; 587 European; 276 African; and 1624 American languages and dialects. *Adelung.*
In 1861 and 1862 professor Max Müller lectured on the "Science of Language" at the Royal Institution, London. He divides languages into three families:—

I. ARYAN (in Sanskrit, *noble*).
Southern Division. India (Prakrit, and Pali; Sanskrit; dialects of India; Gipsy).
Iranic (Parsi; Armenian, &c.).

Northern Division. Celtic (Cymric: Cornish, Welsh, Manx, Gaelic, Breton, &c.).
Italic (Oscan; Latin; Umbrian;—Italian, Spanish, Portuguese, French, &c.).
Illyric (Albanian).
Hellenic (Greek, and its dialects).

France), formed part of the Roman Gallia Narbonensis; was named Gothia, as having been held by the Visigoths 409, who were expelled by the Saracens, in turn driven out by Charles Martel in the 8th century. In the dark ages the country was named Septimania (probably from its containing seven important towns): afterwards Languedoc (from its dialect, see *Troubadours*), about 1270, when annexed to the monarchy. It suffered during the persecutions of the Albigenses and Huguenots.

It was discovered in 1506 in the Sette Salle near Rome, and purchased by pope Julius II. It is now in the Vatican.

LAON (N. France). A succession of actions between the allies (chiefly the Prussians) and the French, was fought under the walls of the town, which ended in the defeat of the latter with great loss, 9-10 March, 1814. Laon surrendered to the Germans 9 Sept. 1870. As the last man of the garde mobile left the citadel, a French soldier, in contravention of the capitulation, blew up the powder magazine, causing great destruction to the town and fortress. The grand-duke William of Mecklenburg-Schwerin was bruised, and 95 German riflemen and 300 French gardes mobiles were killed or wounded; general Theremin Du Hame, the commander, was wounded. The French attributed the explosion to accident.

LA PEROUSE'S VOYAGE. In 1785 La Perouse sailed from France for the Pacific, with the *Boussole* and *Astrolabe* under his command, and was last heard of from Botany Bay, in March, 1788. Several expeditions were subsequently despatched in search of Perouse; but no certain information was obtained until captain Dillon, of the East India ship *Research*, ascertained that the French ships had been cast away on the New Hebrides, authenticated by articles which he brought to Calcutta, 9 April, 1828.

LARYNGOSCOPE, an instrument consisting of a concave mirror, by which light is thrown upon a small plane mirror placed in the posterior part of the cavity of the mouth. By its means the vocal chords of the interior of the larynx, &c., are exhibited, and have been photographed. One constructed by Dr. Türck was modified, in 1857, by Dr. Czermak, who exhibited its action in London in 1862. A similar apparatus is said to have been constructed by Mr. John Avery, a surgeon in London, in 1846, and used by M. Garcia.

LATERAN, a church at Rome, dedicated to St. John, "the mother of *all* the churches," was originally a palace of the Laterani, a Roman family, and was given to the bishops of Rome by Constantine, and inhabited by them till their removal to the Vatican in 1377. Eleven councils have been held there.

LATIN LANGUAGE (founded on the Oscan, Etruscan, and Greek), one of the original languages of Europe, and from which sprang the Italian, French, and Spanish; see *Latium.* A large portion of our language is derived from the Latin. It ceased to be spoken in Italy about 581; and was first taught in England by Adelmus, brother of Ina, in the 7th century. The use of Latin in law deeds in England gave way to the common tongue about 1000; was revived in the reign of Henry II.; and again was replaced by English in the reign of Henry III. It was finally discontinued in religious worship in 1558, and in conveyancing and in courts of law in 1731 (by 4 Geo. II. c. 25). A corrupt Latin is still spoken in Roumelia.

LATIN UNION, that of France, Italy, Belgium, and Switzerland, to maintain the use of the same coinage from 1865 to 1880.

LATITAT, an ancient writ, directing the sheriff to apprehend persons to be brought before the king's bench court, had its name from its being supposed that the person was lying hid, and could not be found in the county to be taken by bill. The writ was abolished by the Uniformity of Process act, 23 May, 1832.

LATITUDE. First determined by Hipparchus of Nice, about 162 B.C. It is the extent of the earth or the heavens, reckoned from the equator to either pole. Maupertuis, in 1737, in latitude 66·20 measured a degree of latitude, and made it 69·493 miles. Swanberg, in 1803, made it 69·292. At the equator, in 1744, four astronomers made it 68·732; and Lambton, in latitude 12, made it 61·743. Mudge, in England, made it 69·148. Cassini, in France, in 1718 and 1740, made it 69·12; and Biot, 68·769; while a recent measurement in Spain makes it but 68·63—less than at the equator, and contradicts all others, proving the earth to be a prolate spheroid (which was the opinion of Cassini, Bernoulli, Euler, and others), instead of an oblate spheroid; see *Longitude*.

LATITUDINARIANS, a name given to certain theologians who endeavoured to reconcile the church and nonconformists in the 17th century, such as Hales, Chillingworth, Tillotson, and Burnet.

LATIUM, now CAMPANIA (Italy), the country of Latinus, king of Janiculum, 1240 B.C. Laurentum was the capital of the country in the reign of Latinus, Lavinium in that of Æneas, and Alba in that of Ascanius; see *Italy*, and *Rome*.

Population in 1855, 50,147.

LAUFACH, Bavaria (S. W. Germany), was taken by the Prussians under Wrangel, on 13 July, 1866, after a sharp action, in which the Hessians were defeated, the Prussian needle gun being very efficacious.

LAUREATE, see *Poet Laureate*.

LAUREL was sacred to *Apollo, god of poetry*; and from the earliest times the poets and generals of armies, when victors, were crowned with laurel. Petrarch was crowned with laurel, 8 April, 1341.—The *Prunus laurocerasus* was brought to Britain from the Levant, before 1629; the Portugal laurel, *Prunus lusitanica*, before 1648; the royal bay, *Laurus indica*, from Madeira, 1665; the Alexandrian laurel, *Ruscus racemosus*, from Spain, before 1713; the glaucous laurel, *Laurus aggregata*, from China, 1806 or 1821.

LAURENTALIA were festivals celebrated at Rome in honour of Acca Laurentia, or Larentia, said to have been either the nurse of Romulus and Remus, or a rich dissolute woman, who bequeathed her property to the Roman people. The festival commenced about 621 B.C., and was held on the last day of April and the 23rd of December.

Sir Robert Wilson, Mr. Michael Bruce, and captain J. H. Hutchinson, aiding the escape, were sentenced to three months' imprisonment in the French capital, 24 April, 1816. Lavalette was permitted to return to France in 1820, and died in retirement in 1830.

The French royalists of La Vendée took arms in March, 1793, and were successful in a number of hard-fought battles with the republicans, between 12 July, 1793, and 1 Jan. 1794, when they experienced a severe reverse. Their leader, Henri comte de Larochejaquelin, was killed, 4 March, 1794. A short peace was made at La Jaunay, 17 Feb. 1795. The war was terminated by gen. Hoche in 1796, and a treaty of peace was signed at Luçon, 17 Jan. 1800; see *Chouans*.

The Spartan laws of Lycurgus were made about 844 B.C.; they remained in full force for about 700 years, and formed a race totally different from all others living in civilised society.

LAW REFORM.

LAW AMENDMENT SOCIETY, founded in 1843. It holds meetings during the session of parliament, and publishes a journal and reports. Its first chairman was lord Brougham, who introduced the subject of Law Reform by a most eloquent speech in the house of commons, on 7 Feb. 1828. Many acts for Law Reform have been passed since, and vigorous measures proposed.

Royal commission to inquire into the operation and constitution of the English courts of law, &c. issued 18 Sept. 1867.

The Judicature Commission (appointed 1867) recommended the consolidation of all the superior courts into one supreme court divided into chambers, April, 1869. It issued its fifth and last report, Sept. 1874.

The High Court of Justice Bill introduced into the house of lords, 18 March, 1870, was dropped near the end of the session.

Royal Commission on the administrative departments of Courts of Justice (Lord Lisgar and others) appointed, 4 Oct., 1873.

Supreme Court of Judicature Bill introduced by lord chancellor Selborne for establishing a High Court of Justice, and a High Court of Appeal 13 Feb., passed 5 Aug. 1873.

Its operation deferred from 2 Nov., 1874 to 1 Nov., 1875.

The abolition of the House of Lords as an Appeal Court rescinded . . . . . 1875.

See *Supreme Court* for details.

LAW-COURTS.—Commissioners appointed in 1859 reported in favour of the concentration of the law-courts in London, on a site near Carey-street, Chancery-lane, about 7 acres, on which stood about 400 houses. The estimated expense was about 1,500,000*l.*, which it was recommended to take from the accumulated Chancery fund, termed "Suitors' fund." Acts of parliament to carry out the plan were passed in 1865 and 1866.

Competitive designs were invited, and after much discussion (public and professional), Mr. Street's design was selected, 30 May, 1868; much attacked, but approved by the commission, Aug. 1870; contracts signed 17 Feb. 1874, and the works were begun immediately by Bull and Son, to be finished in 1881.

There are to be 18 courts, varying in size; a central hall, 231 feet long, 48 feet wide, 30 feet high; principal entrance in the Strand.

LAW REPORTS: A new and more economical plan of preparing and publishing law reports was finally adopted by a committee of barristers on 11 March, 1865 (see *Year-books*).

LAW'S BUBBLE. John Law, of Edinburgh (born 1681), was made comptroller-general of the finances of France, upon the strength of a scheme for establishing a bank, and an East India and a Mississippi company, by the profits of which the national debt of France was to be paid off. See *Mississippi*. He first offered his plan to Victor Amadeus, king of Sardinia, who told him he was not powerful enough to ruin himself. The French ministry accepted it; and in 1716, he opened a bank in his own name, under the protection of the duke of Orleans, regent of France; and the deluded rich subscribed for shares both in the bank and the companies. In 1718 Law's was declared a royal bank, and the shares rose to upwards of twenty-fold the original value; so that, in 1719, they were worth more than eighty times the amount of all the current specie in France. In 1720 this fabric of false credit fell to the ground, spreading ruin throughout the country. Law died in poverty at Venice in 1729.—The South Sea Bubble in England occurred in 1720; see *South Sea*.

LAYAMON'S BRUT, or Chronicle of Britain, a poetical semi-Saxon paraphrase of the Brut of Wace, made between 1100 and 1230, was published with a literal translation by sir Frederick Madden, in 1847.

LAYBACH (near Trieste, in Illyria). A congress met here in Jan. 1821, and was attended by the sovereigns of Austria, Russia, Prussia, and Naples. It broke up in May, after having issued two circulars, stating it to be their resolution to occupy Naples with Austrian troops, and put down popular insurrections.

LAYER'S CONSPIRACY. Christopher Layer, a barrister, conspired with other persons to seize George I., the prince of Wales, lord Cadogan, and the principal officers of state, to seize the tower,

to plunder the bank, and bring in the Pretender. Layer was hanged, 17 May, 1723. Bishop Atterbury was accused of complicity and attainted, but permitted to quit the country. He was hanged for enlisting soldiers for the Pretender.

LAZARISTS (the Priests of the Mission), a congregation devoted to education, founded by St. Vincent de Paul, 1625, were so named from their first establishment in a house which once belonged to the military order of St. Lazarus. They are also called *Vincentines*.

LAZARO, ST. (N. Italy). Here the king of Sardinia and the Imperialists defeated the French and Spaniards after a long and severe conflict, 4 June, 1746.

LAZZARONI (from *lazzáro*, Spanish for a pauper or leper), a term applied by the Spanish viceroys to the degraded beings in Naples, half-clothed and houseless. No man was born a lazzáro; and he who turned to a trade ceased to be one. The viceroy permitted the lazzaroni to elect a chief with whom he conferred respecting the imposts on the goods brought to the markets. In 1647, Masaniello held the office, and made an insurrection; see *Naples*. In 1793, Ferdinand IV. enrolled several thousands of lazzaroni as spikemen (spontoneers), who generally favoured the court party; on 15 May, 1848, they were permitted, on the king's behalf, to commit fearful ravages on the ill-fated city.—*Colletta*.

LEAD is found in various countries, and is abundant in various parts of Britain, and in some places richly mixed with silver ore. The famous Clydesdale mines were discovered in 1513. Pattinson's valuable method for extracting the silver was made known in 1829. The lead-mines of Cumberland and Derbyshire yield about 15,000 tons per annum. British mines produced 65,529 tons of lead in 1855; 69,266 tons in 1857; 67,181 tons in 1865; 73,420 tons in 1870; 58,777 in 1875.

Leaden pipes for the conveyance of water were brought into use in 1236
In 1859, 23,690 tons of pig and sheet lead were imported, and 18,414 tons exported; in 1866, 36,946 tons imported; 27,383 tons exported; in 1875, 79,825 tons imported; 35,398 tons exported.

LEAGUES. Four kings combined to make war against five, about 1913 B.C. (*Gen.* xiv.) The kings of Canaan combined against the invasion of the Israelites, 1451 B.C. The more eminent Greek leagues were the Ætolian, powerful about 320 B.C., which lasted till 189 B.C., and the Achæan, revived 280 B.C., which was broken up by the conquest of Greece by the Romans, 146 B.C. The fall of these leagues was hastened by dissension.

LEAP-YEAR or **BISSEXTILE**, originated with the astronomers of Julius Cæsar, 45 B.C. They fixed the solar year at 365 days, 6 hours, comprising, as they thought, the period from one vernal equinox to another; the six hours were set aside, and at the end of four years, forming a day, the fourth year was made to consist of 366 days. The day thus added was called intercalary, and was placed a day before the 24th of February, the sixth of the calends, which was reckoned *twice*, hence called *bissextile* or *twice sixth*. This added day with us is Feb. 29th; see *Calendar*. This arrangement makes the year nearly three minutes longer than the astronomical year: to obviate this, 1700 and 1800 were not, and 1900 will not be leap-years, but 2000 will be one; see *Julian Year*, *Gregorian Calendar*, &c.

LEARNING AND THE ARTS flourished among the Greeks, especially under Pisistratus, 537 B.C., and under Pericles, 444 B.C.; and with the Romans at the commencement of the Christian era, under Augustus. The Greek refugees caused their revival in Italy, particularly after the taking of Constantinople by the Turks in 1453, and the invention of printing shortly before,—the period of the *Renaissance*. Leo X. and his family (the *Medici*) greatly promoted learning in Italy, in the 16th century; when literature revived in France, Germany, and England; see *Literature*, and authors under *Greek*, *Latin*, *English*, and other *languages*.

LEASE (from the French *laisser*, to let), a kind of conveyance invented by serjeant Moore, soon after the statute of uses, 27 Henry VIII. 1535. Acts relating to leases were passed in 1856 and 1858.

LEATHER was very early known in Egypt and Greece, and the thongs of manufactured hides were used for ropes, harness, &c., by all ancient nations. The Gordian knot was made of leather thongs, 330 B.C. A leather cannon was proved at Edinburgh, fired three times, and found to answer, 23 Oct. 1778. *Phillips*. The duty on leather imposed 1697, produced annually in England, 450,000*l*. and in Ireland about 50,000*l*. It was abolished, 29 May, 1830. Many bankruptcies were declared in the leather trade, in the autumn of 1860 in England. In the case of Lawrence, Mortimore, and Co., enormous fraudulent dealings in bills were disclosed. A plan for making artificial leather out of cuttings, &c., was made known in 1860.—*Leather cloth* (invented by Messrs. Crockell, of Newark, U.S., and patented in 1849) is unbleached

cotton coated with a mixture of boiled linseed oil and turpentine, and coloured. An exhibition of leather manufactures at Northampton in the autumn, announced, (May, 1873).

LECH, a river, S. Germany, near which at a village named Rain the cruel imperialist general Tilly was defeated by the Swedes, under Gustavus Adolphus, 5 April, 1632, and died of his wounds.

LECTIONARY, the Romish service-book containing lessons from the Bible: see *Common Prayer*.

LECTURES. Those on Physic were instituted by Dr. Thomas Linacre, of the College of Physicians (founded by Henry VIII.) about 1502. *Clinical* lectures, at the bed-side of the patients in hospitals are said to have been given (by Dr. John Rutherford) in Edinburgh, about 1748; in Dublin, about 1785; in London, by sir B. C. Brodie (1813-17). Mr. G. Macilwain, about 1824, gave surgical clinical lectures in connection with a dispensary. See *Gresham College*, *Boyle's Lectures*, *Royal* and *London Institutions*, &c. The political lectures of Thelwall, commenced in Jan. 1795, were interdicted by an act of parliament. In the autumn of 1857 and since, many distinguished noblemen and gentlemen lectured at mechanics' institutes. An act passed in 1835 prohibited the publication of lectures without the consent of the lecturers.

The impost was increased several times subsequently, particularly in 1805, 1808, and 1845. In 1853 the legacy duty was extended to landed or real property; see *Succession Duty Act*, and Wills. LEGHORN, *Livorno*, Tuscany, a mere village in the 15th century, owes its prosperity to the Medici family. It suffered dreadfully by an earthquake in 1741; and was entered by the French army, 27 July, 1796, but the British property had been removed. It was held by the French 1796-9 and retaken, 1800. It was unsuccessfully attacked by the British and Italian forces in Dec. 1813. The Austrians took this city from the insurgents, 12, 13 May, 1849, and quelled a slight insurrection, July, 1857. In June, 1857, above 60 persons were killed at the theatre, through an alarm of fire; see *Tuscany*.

LEGION, *Legio*, a corps of soldiers in the Roman armies, first formed by Romulus, when it consisted of 3000 foot and 300 horse, about 720 B.C. When Hannibal was in Italy, 216 B.C., the legion consisted of 5200 soldiers; and under Marius, in 88 B.C., it was 6200 soldiers besides 700 horse. There were ten, and sometimes as many as eighteen, legions kept at Rome. Augustus had a standing army of 45 legions, together with 25,000 horse and 37,000 light-armed troops, about 5 B.C.; and the peace establishment of Adrian was thirty of these formidable brigades. A legion was divided into ten cohorts, and every cohort into six centuries, with a vexillum, or standard, guarded by ten men. The peace of Britain was protected by three legions. The French army has been divided into legions since Francis I. See *Thundering Legion*.

LEGION OF HONOUR, a French order embracing the army, civil officers, and other individuals distinguished for services to the state; instituted by Napoleon Bonaparte, when first consul, 19 May, 1802. The order was confirmed by Louis XVIII. in 1815, and its constitution modified in 1816 and 1851. The honour was conferred on many British subjects who distinguished themselves in the Russian war, 1854-6, and in the Paris exhibitions of 1855 and 1867. The palace and offices were burnt by the communalists, 23 May, 1871.

LEGITIMISTS, a term (since 1814) applied to those who support the claims of the elder branch of the Bourbon family to the throne of France: whose present representative is Henry, duc de Bordeaux, called comte de Chambord, born 29 Sept. 1820. They held a congress at Lucerne on 24-29 June, 1862, and agreed to continue a pacific policy. The party was active in Feb. 1871-5. Their efforts to recover power have proved ineffectual; see *France*.

Here Richard III. was buried, 25 Aug. 1485; and here cardinal Wolsey died, 29 Nov. 1530. During the civil war, Leicester was taken by Charles I. 31 May, and by Fairfax, 17 June, 1645. The stocking manufacture was introduced in 1680. New town-hall opened, 8 Aug. 1876.

The abduction of Devorgilla, wife of O'Ruare, a lord of Connaught, by Dermot king of Leinster in 1152, is asserted to have led to the landing of the English and the subsequent conquest. The province of Leinster gave the title of duke to Schomberg's son in 1690. The title became extinct in 1719, and was conferred on the family of Fitzgerald in 1766.

LEIPSIC (Saxony), an ancient city, famous for its university (founded 1409) and its fair (1458). At Breitenfeld, near here, Gustavus Adolphus, king of Sweden, defeated the Imperialists, under Tilly, 7 Sept. 1631; and the Imperialists were again defeated here by the Swedes, under Torstensen, 23 Oct. 1642. Here took place, on 16, 18, 19 Oct. 1813, "*the battle of the nations*," between the French army and its allies, commanded by Napoleon (160,000), and the Austrian, Russian, and Prussian armies (240,000 strong). The French were beaten chiefly owing to 17 Saxon battalions, their allies, turning upon them in the heat of the engagement. 80,000 men perished on the field, of whom more than 40,000 were French, who also lost 65 pieces of artillery, and many standards. The victory was followed by the capture of Leipsic, of the rear guard of the French army, and of the king of Saxony and his family. The 50th anniversary was celebrated 18 Oct. 1863. The *Leipsic book fair* began 1545.

The happy spirits were called *Lares familiares*, and the unhappy, *Lemures*. The Roman festival, *Lemuralia*, kept on 9, 11, 13 May, is said to have been instituted by Romulus about 747 B.C., to propitiate the spirit of the slaughtered Remus.

LENT (from the Saxon, *lencten*, spring). The forty days' fast observed in the Roman catholic church from Ash-Wednesday to Easter-day, said to have been instituted by pope Telesphorus, 130. In early times Lent commenced on the Sunday, now called the first Sunday in Lent; and the four days beginning with Ash-Wednesday were added by pope Felix III., in 487, in order that the fasting days should amount to forty. Lent was first observed in England by command of Erecombert, king of Kent, in 640 or 641. *Baker's Chron.* Flesh was prohibited during Lent; but Henry VIII. permitted the use of *white meats* by a proclamation in 1543, which continued in force until, by proclamation of James I., in 1619 and 1625, and by Charles I., in 1627 and 1631, flesh was again wholly forbidden; see *Ash-Wednesday, Quadragesima*.

About 1500 inhabitants of the Leonine city voted for union with the kingdom of Italy, 2 Oct. 1870.

It chiefly affected the lower classes, yet occasionally proved fatal to the very highest personages. Robert Bruce of Scotland died of leprosy in 1329. A hospital for lepers was founded at Granada, by queen Isabella of Castile, about 1504, and a large number of leper houses were founded in Britain. Dr. Edmondson met with a case in Edinburgh in 1809.

LEVELLERS, a fanatical party in Germany, headed by Muncer and Storck in the 16th century, who taught that all distinctions of rank were usurpations on the rights of mankind. At the head of 40,000 men, Muncer commanded the sovereign princes of Germany and the magistrates of cities to resign their authority; and on his march his followers ravaged the country. The landgrave of Hesse at length defeated him at Frankenhausen, 15 May, 1525; 7000 of the enthusiasts fell in the battle, and the rest fled; their leader was taken and beheaded at Mulhausen. The English "Levellers," powerful in parliament in 1647, were put down by Cromwell in 1649, and their leader Lilburn imprisoned. At the period of the French revolution some Levellers appeared in England. A "Loyal Association" was formed against them by Mr. John Reeves, Nov. 1792.

LEVELS. The great Level of the Fens is a low-lying district of about 2000 square miles, in Lincolnshire, Huntingdonshire, Cambridgeshire, and Norfolk, said to have been overflown by the sea during an earthquake, 368. It was long afterwards an inland sea in winter, and a noxious swamp in summer, and was gradually drained—by the Romans, the Saxons, and especially by the monks during the reigns of the Plantagenet kings. One of the first works on a large scale was carried out by Morton, bishop of Ely, in the reign of Henry VII. A general drainage act was passed by the advice of lord Burghley, in 1601, but little work was done till the reign of James I., who, in 1621, invited over the great Dutch engineer, Cornelius Vermuyden, to assist in the general drainage of the country. After completing several great works, Vermuyden agreed (in 1629) to drain the "Great Level." He was at first prevented from proceeding with his undertaking through a popular outcry against foreigners; but eventually, aided by Francis, earl of Bedford, in spite of the great opposition of the people, for whose benefit he was labouring, he declared his great work complete in 1652. He also reclaimed much valuable land at Axholme, in Lincolnshire, 1626-30, and many Dutch and French protestants settled here about 1634; and a few of their descendants still remain.—There are the Middle, Bedford, South, and North Levels.

The drainage of the Great Level employed the talents of Rennie (about 1807), and of Telford (1822), and of other eminent engineers.
The Middle Level commission cut through certain barrier banks, and replaced them by other works 1844

In commemoration the university was founded, 1575. In 1699 two-thirds of the population perished by a fever, which, it was said, was aggravated by its improper treatment by professor De la Boe. LIBEL. By the Roman laws of the Twelve Tables, libels which affected the reputation of another were made capital offences. In the British law, whatever renders a man ridiculous, or lowers a man in the opinion and esteem of the world, is deemed a libel. "The greater the truth the greater the libel," the well known law maxim of a high authority, is now disputed; see *Trials*, 1788, 1790, 1792, 1803, 1808 *et seq.*, 1863; and (note) *Patents* and *Times*.

Lord Denman, in giving judgment, said he was not aware that the authority of the house of commons could justify the publication of a libel—an opinion which led to some proceedings on the part of the house, and to other actions by Stockdale . 1837-39
Verdicts were given in his favour, and in Nov. 1839, the sheriffs took possession of Hansard's premises. This caused much excitement in parliament, and they were ordered to appear at the bar of the house of commons, and were formally committed to the custody of the serjeant-at-arms, 21 Jan., but immediately discharged: the conflict was maintained by the law officers and the commons till . . . . . LICHFIELD (Staffordshire). The see of Mercia (at Lichfield) was founded about 656; removed to Chester, 1075; to Coventry, 1102. In 1121 Robert Peche was consecrated bishop of Lichfield and Coventry. By an order in council, Jan. 1837, the archdeaconry of Coventry was added to the see of Worcester, and Dr. Samuel Butler became bishop of Lichfield. This see has given three saints to the Romish church; and to the British nation one lord chancellor and three lord treasurers. It is valued in the king's books at 559*l.* 18*s.* 2*d.* Present income, 4500*l.*

Lichfield cathedral was first built about 656; the present structure was founded by Roger de Clinton, the 37th bishop, in 1148. Walter de Langton (bishop in 1296), built the chapel of St. Mary, now taken into the choir, and under bishop Heyworth (1420) the cathedral was perfected. The building was despoiled at the Reformation, and was scandalously injured in the parliamentary war (when its monuments, its fine sculptures, and beautifully painted windows, were demolished). It was repaired at the restoration, 1660; in 1788; and by Gilbert G. Scott, 1860-63.
In Lichfield castle, king Richard II. kept his Christmas festival, 1397, when 200 tuns of wine and 2000 oxen were consumed. A charter was granted to Lichfield, constituting it a city, by Edward VI., 1549.

LICHFIELD HOUSE COMPACT, said to have been made between the Whig government and Daniel O'Connell in 1835 at Lichfield-house, 13, St. James's-square.

LICINIAN LAWS. In 375 B.C., C. Licinius Stolo and L. Sextius, tribunes of the people, promulgated various rogationes or laws to weaken the power of the patricians and benefit the plebs: one was to relieve the plebeians from their debts; another enacted that no person should possess more than 500 jugera of the public land, or more than 100 head of large cattle, or 500 of small, in the Roman states; and the third, that one of the consuls should be a plebeian. After much opposition these were carried, and L. Sextius became the first plebeian consul, 365. Another law, 56 B.C., of this name, imposed a severe penalty on party clubs, or societies assembled for election purposes; and another, about 103 B.C. (brought forward by P. Licinius Crassus), limited the expenses of the table.

LIEBENAU (Bohemia). Here was fought the first action of the seven weeks' war, 26 June, 1866; when the Austrians were compelled to retreat by the Prussians under general Von Horn.

LIEGE (Belgium), a bishopric, under the German empire, from the 8th century till 1795. Liege frequently revolted against its prince-bishops. After a severe contest, the citizens were beaten at Brusthem, 28 Oct. 1467, and Liege taken by Charles the Bold, duke of Burgundy, who treated them with great severity. In 1482 Liege fell into the power of De la Marck, the Boar of Ardennes, who killed the bishop, Louis of Bourbon, and was himself defeated and killed. Liege was taken by the duke of Marlborough, 23 Oct. 1702; and by the French and others, at various times, up to 1796, when it was annexed to France. It was incorporated with the Netherlands in 1814, and with Belgium in 1830. Iron-works were established at Liege in the 16th century, and have been greatly enlarged by the Cockerills in the 19th, see *Seraing*. An international volunteer shooting contest held here, Sept. 1869. The Iron and Steel Institute met here 18 Aug. 1873.

LIFE-PRESERVER, the apparatus of capt. Manby (brought into use in Feb. 1808), effects a communication with the distressed vessel by a rope, thrown by a shot from a mortar, with a line attached to it. For the night, a night-ball is provided with a hollow case of thick pasteboard, and a fuse and quick match, and charged with fifty balls, and a sufficiency of powder to inflame them. The fuze is so graduated that the shell shall explode at the height of 300 yards. The balls spread a brilliant light for nearly a minute, and give a clear view of every surrounding object. In 20 years, 58 vessels and 410 of their crews and passengers had been saved. Capt. Manby died, 18 Nov. 1854, aged 89.
The BOAT-LOWERING APPARATUS, in consequence of many being lost when boats were lowered from the *Amazon* in 1852, invented by Mr. Charles Clifford, of London, in 1856, has been much approved of, and has been generally adopted in the royal navy.
Capt. Kynaston's hooks were approved by admiral sir Baldwin Walker in 1862, and by a committee on the subject in 1872.

LIGHT. The law of refraction discovered by Snellius, about 1624. The motion and velocity of light discovered by Reaumur, and after him by Cassini, and calculated by Rœmer (1676) and Bradley (1720). Its velocity ascertained to be about 190,000,000 of miles in sixteen minutes, or nearly 200,000 miles in a second, which is a million of times swifter than the velocity of a cannon ball, about 1667. The light of the sun takes eight minutes and eight seconds for its transmission through the space to the earth. The undulatory theory of light, its polarisation, and its chemical action, have all been made known in the present century by Dr. Thos. Young, Fresnel, Malus, Arago, Biot, Brewster, Wheatstone, Ritter, Niepce, Daguerre, Talbot, Tyndall, &c.; see *Optics*, *Photography*, *Calorescence*, *Fluorescence*.

Velocity of Light. Direct determination by the toothed-wheel method by Fizeau agreed with the astronomical result 1849
Foucault, with the revolving mirror, gave 298,000 kilometres in a second of mean time . . . 1865
Cornu's improved tooth-wheel apparatus gave 300,400 kilometres in a second of mean time . . 1874
Mr. Wm. Crookes, F.R.S., demonstrated the mechanical action of light by experiments with delicate balances in the highest procurable vacuum, and calculated the force of the sun's rays upon the earth to be 2.3 tons to the square mile, 1873-6. His apparatus termed *Radiometer* (*which see*)

LIGHTHOUSE, called Pharos (now *phare*, French; *faro*, Italian), from one erected at Pharos, near Alexandria, Egypt, 550 feet high, said to have been visible forty-two miles, about 285 B.C. There was one at Messina, at Rhodes, &c. The light was obtained by fires. A coal-fire light was exhibited

at Tynemouth castle, Northumberland, about 1638. The first true lighthouse erected in England was the Eddystone lighthouse (*which see*) in 1758-60. Lights were exhibited in various places by the corporation of the Trinity-house early in the 16th century. 2814 lighthouses in the world (1867).

BRITISH LIGHTHOUSES.

The Commissioners on Lights, &c. (1861), report 171 shorelights in England, 113 in Scotland, and 73 in Ireland (total, 357); and 47 floating-lights.

6 lighthouses building, April, 1867.

The French have 224 lighthouses on shore.

The source of light in our lighthouses is principally oil; but in harbour lights gas has been successfully used. Glass reflectors were used in 1780, and copper ones in 1807. A common coal-fire light was discontinued at St. Bees so recently as 1822. Fresnel's Dioptric system (*which see*), devised about 1819, was adopted for the first time in England by Messrs. Wilkins, at the direction of the corporation of the Trinity-house, 1 July, 1836.

The most brilliant artificial light ever produced—derived from magneto-electricity by a machine devised by professor Holmes—was first employed at the South Foreland lighthouse, near Dover, on 8 Dec. 1858; and at Dengeness (or Dungeness) in 1862. Mr. Holmes' arrangement, and a similar one constructed by M. Serin, were shown at the International exhibition, London, in 1862.

Lime-light (*which see*) employed at the S. Foreland lighthouse in 1861.

Gas light tried successfully at Howth Bailey lighthouse, Dublin Bay, July, 1869.

Mr. Wigham's triform light: glass belt round the gas-light, prisms below the belt, and prisms forming a cupola: tried near Dublin; approved by Dr. Tyndall, July, 1873.

LIGHTNING-CONDUCTORS were first set up for the protection of buildings by Franklin shortly after 1752, when he brought down electricity from a thunder-cloud. Richmann, of St. Petersburg, was killed while repeating these experiments, Aug. 1752. The first conductor in England was set up at Payne's Hill, by Dr. Watson. In 1766 one was placed on the tower of St. Mark, at Venice, which has since escaped injury, although frequently injured by lightning previously. A powder magazine at Glogau, in Silesia, was saved by a conductor in 1782; and, from the want of one, a quantity of gunpowder was ignited at Brescia in 1767, and above 3000 persons perished. In 1762, Dr. Watson recommended conductors to be used in the navy; and they were employed for a short time, but soon fell into disuse from want of skill and attention. Mr. (afterwards sir William) Snow Harris devoted his attention to the subject from 1820 and 1854, and published a work, in 1843, detailing his experiments. In 1830, above thirty ships were fitted up with his conductors, and in 1842 his plans were adopted, and his conductors are now manufactured in the royal dockyards. In 1854 parliament granted him 5000*l.*

LIGNY (near Fleurus, Belgium), where Napoleon defeated the Prussian army under Blucher, 16 June, 1815; see *Waterloo*.

LIGUORIANS or **REDEMPTORISTS**, a Roman catholic order, established in 1732 by Alfonso de Liguori, and approved by pope Benedict XIV. in 1749.

LIGURIANS, a Celtic tribe, N. Italy, invaded the Roman territory, and were defeated 238 B.C. They were not subjugated till 172 B.C.—The **LIGURIAN REPUBLIC**, founded in May, 1797, upon the ruins of the republic at Genoa, was incorporated with France in 1805, and then merged into the kingdom of Italy.

LILAC TREE, *Syringa*. The Persian lilac from Persia was cultivated in England about 1638; the common lilac by Mr. John Gerard about 1597.

LILLE, see *Lisle*.

LILY, a native of Persia, Syria, and Italy, was brought to England before 1460; the martagon from Germany, 1596.

LILYBÆUM, a strong maritime fortress of Sicily, besieged by Pyrrhus, king of Epirus, 276 B.C., and relieved by the Carthaginians 275 B.C. It was taken by the Romans, 241 B.C., after a siege of nine years, which led to the end of the second Punic war.

LIMA (Peru). In 1534, Pizarro, marching through Peru, was struck with the beauty of the valley of Rimac, and there he founded this city, and gave it the name of *Ciudad de los Reyes*, or city of the kings, 1535. Here he was assassinated, 26 June, 1541. Awful earthquakes occurred here, 1586, 1630, 1687, and 28 Oct. 1746. In 1854-5, thousands perished by yellow fever. Mr. Sullivan, the British consul, was assassinated at Lima, 11 Aug. 1857; see *Peru*, 1872.

LIMBURG (Netherlands), a duchy in the 10th century; acquired by the dukes of Brabant about 1288; added to Burgundy about 1429; passed to the house of Austria in 1477; became one of the United Provinces, 1609; conquered and annexed to the French republic, 1795; restored to the Netherlands, 1814; divided between Holland and Belgium, 1830; completely separated from the German confederation by treaty, 11 May, 1867.

LIME or **LINDEN TREE**, probably introduced in the 16th century. The limes in St. James's park are said to have been planted at the suggestion of Evelyn, who recommended multiplying odoriferous trees, in his "Fumifugium" (1661). A lime-tree planted in Switzerland in 1410, existed in 1720, the trunk being thirty-six feet in circumference.

LIME-LIGHT, produced by the combustion of oxygen and hydrogen or carburetted hydrogen on a surface of lime. This light evolves little heat and does not vitiate the air. It is also called Drummond Light, after its inventor, lieut. Thomas Drummond, who successfully produced it as a first-class light in 1826, and employed it on the ordnance survey. It is said to have been seen at a distance of 112 miles. It was tried at the South Foreland lighthouse in 1861. Lieut. Drummond was born, 1797, died 15 April, 1840. To him is attributed the maxim that "property has its duties as well as its rights."

LIMERICK, anciently Lumneach (S. W. Ireland). About 550, St. Munchin is said to have founded a bishopric and built a church here, which latter was destroyed by the Danes in 853. Donald O'Brien, king of Limerick, founded the cathedral about 1200. Limerick obtained its charter in 1195, when John Stafford was made first provost; and its first mayor was Adam Servant, in 1198. It was taken by Ireton after six months' siege in 1651. In Aug. 1690 it was invested by the English and Dutch, and surrendered on most honourable terms,

Awful and destructive tempest, 6-7 Jan. 1839. A new graving-dock was opened by the lord-lieutenant earl Spencer, 13 May, 1873.

LIMITATIONS, STATUTE OF, 21 James I. c. 16, 1623. By it actions for trespass or debt, or simple contract, must be commenced within six years after the cause of action, and actions for assault, menace, or imprisonment within four years.

LIMITED LIABILITY. An act for limiting the liability of joint stock companies, 18 & 19 Vict. c. 133 (passed 1855), was several times amended 1856-7-8. On 31 May, 1864, "3830 joint stock companies had been formed and registered on the limited liability principle, and 938 had ceased to exist." Much calamity in 1866 was occasioned by the abuse of the system. The Companies act of 1862 was amended in 1867. 1241 registered in 1874; about 12,500, 1856-76.

LIMOURS MURDERS, N.-central France. Several barbarous murders, especially of aged people, took place here, Jan., Sept., Nov., 1873, and Jan. 1874; several persons denounced, proved innocence. In June, 1874, one Poirier confessed to similar murders at Nogent and other places, in Nov. 1873 and Jan. 1874. Executed at Chartres, 29 Sept. 1874.

LINCELLES (N. France), where the allied English and Dutch armies defeated the French, 18 Aug. 1793. General Lake commanded three battalions of foot guards.

LINCOLN, the Roman *Lindum Colonia*, and at the period of the conquest rich and populous. It was taken several times by Saxons and Danes. The castle was built by William I. in 1086. Without Newport-gate upon Lincoln plain was fought the battle between the partisans of the empress Maud, commanded by the earl of Gloucester, and the army of Stephen, in which the king was defeated and taken prisoner, 2 Feb. 1141. Louis, dauphin of France, invited over by the discontented barons in the last year of king John's reign, was acknowledged by them as king of England here; but the nobility, summoned by the earl of Pembroke to Gloucester to crown Henry III., marched against Louis and the barons, and defeated them in a most sanguinary fight (called the Fair of Lincoln), 20 May, 1217; and Louis withdrew.

LINCOLN, BISHOPRIC OF. Sidnacester or Lindisse and Dorchester, two distinct sees in Mercia, were united about 1078, and the see was removed to Lincoln by bishop Remigius de Feschamp, who built a cathedral (1086), afterwards destroyed by fire, but rebuilt by bishop Alexander (1127) and bishop Hugh of Burgundy. The diocese is very large, although the dioceses of Ely (1109), Oxford, and Peterborough (1541) were formed from it, and were further enlarged in 1837. The see was valued at the dissolution of monasteries at 2065*l.* per annum; and after many of its manors had been seized upon, it was rated in the king's books at 894*l.* 10*s.* 1*d.* Present income, 5000*l.* It has given three saints to the church of Rome, and to the civil state of England six lord chancellors. The great bell of the cathedral, called *Great Tom of Lincoln*, weighs four tons eight pounds.

LINCOLN'S-INN (London), derives its name from Henry de Lacy, earl of Lincoln, who erected a mansion on this spot in the reign of Edward I., which had been the bishop of Chichester's palace. It became an inn of court, 1310. The gardens of Lincoln's-inn-fields were laid out by Inigo Jones, about 1620, and erroneously said to occupy the same space as the largest pyramid of Egypt, which is 764 feet square; Lincoln's-inn square being 821 feet by 625 feet 6 inches. William lord Russell was beheaded in Lincoln's-inn-fields, 21 July, 1683. The square (formed in 1618) was enclosed with iron railings about 1737. The new hall and other buildings were opened, 30 Oct. 1845, and the square planted. The *theatre* in Lincoln's-inn-fields was built in 1695; rebuilt in 1714; made a barrack in 1756, and pulled down in 1848.

LINCOLN TOWER, Westminster Bridge Road, was erected by the united subscriptions of Britons and Americans, as a memorial of the abolition of slavery, and of Abraham Lincoln, president. The foundation was laid by general Schenk, then American minister here, 9 July, 1874; and the head stone was placed by the Rev. Newman Hall, minister of Surrey chapel, 28 Sept. 1875. The tower, which is 220 feet high, cost about 7000*l.* The church, named Christ church (to replace Surrey chapel), and schools adjoining (cost about 60,000*l.*), were dedicated, 4 July, *et seq.* 1876.

LINDISFARNE or **HOLY ISLAND,** on the coast of Northumberland, became a bishop's see, 635. It was ravaged by the Danes under Regnar Lodbrok in 793, and the monastery destroyed by them in 875. The see was then removed to Chester-le-street, and to Durham in 995 (or 990).

LINNÆAN SYSTEM of botany, arranged by Linné or Linnæus, a Swede, 1725-30. He classed the plants according to the number and situation of the sexual parts, and made the flower and fruit the test of his various genera. Linnæus lived from 1707 to 1778. His library and herbarium were purchased by sir James E. (then Dr.) Smith, and given to the *Linnæan Society* in London, which was instituted in 1788, and incorporated 26 March, 1802.

LION. True lions belong to the old world exclusively. They existed in Europe, Egypt, and Palestine, but have long disappeared from those countries; their present country being Africa. A lion named Pompey died in the Tower of London in 1760, after 70 years' confinement.

LISBON (Olisippo, and Felicitas Julia, of the ancients) was taken by the Arabs about 716, and became important under the Moorish kings, from whom it was captured by Alfonso I. of Portugal in 1147. It was made the capital of Portugal by Emanuel, 1506. Lisbon has suffered much by earthquakes, and was almost destroyed by one, 1 Nov. 1755; see *Earthquakes*. The court fled to the Brazils, 10 Nov. 1807, and on 30 Nov. the French, under Junot, entered Lisbon, and held it until the battle of Vimeira, in which they were defeated by the British, under sir Arthur Wellesley, 21 Aug. 1808. LISLE (now Lille), N. France, has a strong citadel by Vauban. It was besieged by the duke of Marlborough and the allies; and, though deemed impregnable, was taken after a three months' siege in 1708. It was restored by the treaty of Utrecht, in 1713, in consideration of the demolition of the fortifications of Dunkirk. Lisle sustained a severe bombardment from the Austrians, who were obliged to raise the siege, 7 Oct. 1792.

The French Association for the Advancement of Science met here . . . . . 20 Aug. 1874

LISMORE (S. Ireland). St. Carthage, first bishop, 636, says: "Lismore is a famous and holy city, of which nearly one-half is an asylum where no woman dare enter." The castle (built by king John when earl of Moreton, 1185), burnt in 1645, was rebuilt with great magnificence by the duke of Devonshire. The cathedral, built 636, was repaired by Cormac, son of Muretus, king of Munster, about 1130. The bishopric was united to that of Waterford, about 1363; and both to Cashel in 1839.

LISSA (or Leuthen, Silesia). Here the king of Prussia vanquished Charles of Lorraine; 6000 Austrians were slain, 5 Dec. 1757. — LISSA, in Poland, was laid in ruins by the Russian army in the campaign of 1707.—LISSA, an island in the Adriatic. Near here the Italian fleet, commanded by Persano, was defeated with severe loss by the Austrian fleet, commanded by Tegethoff, 20 July, 1866.

The Italians had 23 vessels, 11 of which were ironclads, and the Austrians had 23 vessels, 7 only being ironclads.
Persano, when in sight of the enemy, quitted his ship, the *Rè d'Italia*, and hoisted his flag on the *Affondatore*. His ironclads did not keep well together.
During the action, the ironclad *Palestro* took fire and exploded, and all on board perished (except 19 out of 200 men), exclaiming, *Viva il Rè! Viva Italia!* The *Rè d'Italia* was surrounded and sunk by the Austrians. The *Rè di Portobello* disabled the Austrian line-of-battle ship *Kaiser*, and compelled her to run ashore. Both parties soon after retired from the conflict, which had lasted four hours.
Admiral Persano was tried for misconduct and dismissed the service (see *Italy*) . 15 April, 1867

LITANIES (Greek *litaneia*, supplication), were first used in processions, it is said, about 469; others say about 400. Litanies to the Virgin Mary were first introduced by pope Gregory I. about 595. The first English litany was commanded to be used in the Reformed churches by Henry VIII. in 1544.

LITERARY CLUB (at first called "The Club" and "Johnson's Club"), founded by Dr. Johnson and sir Joshua Reynolds, in 1764. Hawkins, Topham Beauclerk, Goldsmith, Burke, and Bennet Langton, were among the first members. The opinion formed of a new work by the club was speedily known all over London, and had great influence. The club still exists. Hallam, Macaulay, the marquis of Lansdowne, and bishop Blomfield were members; Dr. Milman, dean of St. Paul's, was in the chair at the centenary dinner, on 7 June, 1864.

LITERARY FUND, ROYAL, was founded in 1790, to relieve literary men of all nations, by David Williams,* the friend of Benjamin Franklin,

* Floyer Sydenham, an eminent Greek scholar, of Wadham college, Oxford, and translator of some of the works of Plato, was arrested and thrown into prison for a trifling debt due for his frugal meals, and there, in 1788, died of a broken heart in want and misery, when nearly eighty years of age. The sympathy excited gave rise to this institution, since well supported. Williams was in early life a dissenting minister, and wrote on education. He was consulted by the early revolutionary party in France as to the form of a constitution for that

and incorporated in 1818. The king of the Belgians presided at the annual dinner, 8 May, 1872.

LITHIUM, a metal, the lightest substance in nature except the gases (its specific gravity being 0·59), is obtained from an alkaline substance termed *lithia;* discovered by M. Arfwedson, a Swede, in 1817.

LITHOFRACTEUR, or "STONE-BREAKER," an explosive material, a modification of dynamite (composed of gun-cotton, nitro-glycerine, with the constituents of gunpowder, and other substances), invented by professor Engels of Cologne, and made by Krebs, in 1869. It was occasionally used by the Germans in the war 1870-1, and was tried and well reported of for power and safety at Nant Mawr quarries, near Shrewsbury, 9, 10 May, 1871, and 20 Feb. 1872. It was again tried at Nant Mawr, 20 Feb. 1870, before the government explosive committee, with similar results.

LITHOGRAPHY (engraving on stone). The invention is ascribed to Alois Sennefelder, about 1796; and shortly afterwards the art was announced in Germany, and was known as polyautography. It became partially known in England in 1801, *et seq.*, but its general introduction is referred to Mr. Ackermann, of London, about 1817. Sennefelder died in 1841. Improvements have been made by Engelmann and many others; see *Printing in Colours.*

LITHOTOMY. The surgical operation of cutting for the stone, it is said, was performed by Ammonius, about 240 B.C. The "small apparatus," so called from the few instruments used in the operation, was practised by Celsus, about A.D. 17. The "high apparatus" was practised (on a criminal at Paris) by Colot, 1475; by Franco, on a child, about 1566; and in England, by Dr. Douglass, about 1519. The "lateral operation," invented by Franco, much performed in Paris by Frère Jacques, in 1697, has been greatly improved. The "great apparatus" was invented by John de Romanis, and described by his pupil Marianus Sanctus, 1524.

LITHOTRITY (or bruising the stone). The apparatus produced by M. Leroy d'Etiolles in 1822 has since been improved.

Prizes of 6000 and 10,000 francs were awarded M. Jean Civiale for his method of operation, 1827 & 1829.

LITHUANIA, formerly a grand-duchy, N. E. of Prussia. The natives (belonging to the Slavonic race) long maintained their independence against the Russians and Poles. In 1386, their grand-duke Jagellon became king of Poland and was baptized: Lithuania was not incorporated with Poland till 1501, when another duke Casimir, became king of that country. The countries were formally united in 1569. The larger part of Lithuania now belongs to Russia, the remainder to Prussia.

LITURGIES (from the Greek *litai,* prayers, and *ergon,* work). The Greek and Roman liturgies are very ancient, having been committed to writing about the 4th and 5th centuries. The Romish church recognises four: the Roman or Georgian, the Ambrosian, the Gallican, and the Spanish or Mosarabic. The Greek church has two principal liturgies: St. Chrysostom's and St. Basil's, and several smaller ones. Parts of these liturgies are attributed to the Apostles, to St. Ignatius, 250, to St. Ambrose (died 397), and to St. Jerome (died 420).

The present English Liturgy was first composed, and was approved and confirmed by parliament, in 1547-8. The offices for morning and evening prayer were then put into nearly the same form in which we now have them.
At the solicitation of Calvin and others, the liturgy was reviewed and altered 1551
It was first read in Ireland, in the English language, in 1550, and in Scotland, where it occasioned a tumult, in 1637, and was withdrawn . 1638
The liturgy was revised by Whitehead, formerly chaplain to Anna Boleyn, and by bishops Parker, Grindall, Cox, and Pilkington, dean May, and secretary Smith.
John Knox is said to have used a liturgy for several years. The rev. Robert Lee, of Edinburgh, introduced a form of prayer in public worship, but gave it up when ordered to discontinue it in May, 1859; he soon after resumed it, and the discussion on the subject ceased only at his death, 14 March, 1868

LIVERIES OF THE CITY OF LONDON. The term is derived from the custom of the retainers of the lord mayor and sheriffs wearing clothes of the form and colour displayed by those functionaries. It was usual for the wardens of companies to deliver a purse containing 20*s.* to the lord mayor on 1 Dec. to obtain for individuals, so desiring, sufficient cloth to make a suit, and the privilege of wearing the livery. This added to the splendour of the lord mayor's train when the civic court went forth. *Ashe.* Liveries were regulated by statute in 1392, and frequently since. The nobility gave liveries to their retainers.

LIVERPOOL (W. Lancashire), is supposed to be noticed in Domesday-book under the name *Esmedune,* or *Smedune.** Soon after the conquest, William granted that part of the country situated between the rivers Mersey and Ribble to Roger of Poitiers, who, according to Camden, built a castle here, about the year 1089. It afterwards was held by the earls of Chester and dukes of Lancaster. Population of the parliamentary borough in 1851, 375,995; in 1861, 443,938; in 1871, 493,346.

* In other ancient records its appellations are *Litherpu,* and *Lyrpul,* signifying probably, in the ancient dialect, the lower pool; though some have deduced its etymology from a pool frequented by an aquatic fowl, called the "Liver," or from a sea-weed of that name; and others, from its having belonged to a family of the name of Lever, whose antiquity is not sufficiently established to justify their conclusion.

LLOYD'S (London), at the Royal Exchange. About 1710, a coffee-house, kept by Edwd. Lloyd, Abchurch-lane, became a place of meeting of merchants. After several removals it was established finally at the Royal Exchange in 1774, and remained there till the fire in 1838, when it was removed till the present building was completed in 1844. Here resort eminent merchants, &c.; and here are effected many insurances on ships and merchandise. LOCHLEVEN CASTLE (Kinross), built on an isle in Loch Leven, it is said by the Picts, was the royal residence of Alexander III. and his queen when taken from it to Stirling. It was besieged by the English in 1301, and in 1334. Patrick Graham, first archbishop of St. Andrew's, imprisoned for attempting to reform the church, died here about 1478. The earl of Northumberland was confined in it, 1569. It was the place of queen Mary's imprisonment in 1567, and of her escape on Sunday, 2 May, 1568.

LOCUSTS, one of the plagues of Egypt, 1491 B.C. (*Exod.* x.) Owing to the putrefaction of vast swarms in Egypt and Libya, upwards of 800,000 persons are said to have perished, 128 B.C. Palestine was infested with such swarms that they darkened the air; and after devouring the fruits of the earth, they died, and their intolerable stench caused a pestilential fever, A.D. 406. A similar catastrophe occurred in France in 837. A swarm of locusts settled upon the ground about London, and consumed the vegetables; great numbers fell in the streets; they resembled grasshoppers, but were three times the size, and their colours more variegated, 4 Aug. 1748. They infested Germany in 1749, Poland in 1750, and Warsaw in June, 1816. They are said to have been seen in London in 1857. Russia was infested by them in July, 1860; Algeria, severely, in 1866 and 1874; Minnesota, U.S., 1873-74; and Sardinia in 1868.

LODGERS paying 10*l.* a year for a whole year for apartments without furniture, acquired the suffrage, by Reform act passed 15 Aug. 1867. Act to protect their goods from distraint, passed 16 Aug. 1871.

LODGING-HOUSES. An act placing common lodging-houses under the watch of the police was passed in 1851. In that year a model lodging-house erected by prince Albert appeared at the Great Exhibition. Since then, blocks of lodging-houses for the poor have been erected by Baroness Burdett Coutts and others. Mr. Peabody's donation of 12 March, 1862, has been appropriated for a similar purpose; see *Peabody*. On 19 Nov. 1863, the city of London voted 20,000*l.* and a piece of land in Victoria-street for the purpose. See *London*, 1845.

LODI (N. Italy). Napoleon Bonaparte, commanding the French army, totally defeated the Austrians, under Beaulieu, after a bloody engagement at the bridge of Lodi, 10 May, 1796. The republican flag floated in Milan a few days after.

LOGARITHMS, the indexes of the ratio of numbers one to another, were invented by baron Napier of Merchiston, who published his work in 1614. The invention was completed by Mr. Henry Briggs, at Oxford, who published tables, 1616-18. The method of computing by means of marked pieces of ivory was discovered about the same time, and hence called *Napier's bones*.

LOGIC, "the science of reasoning." Eminent works on it are by Aristotle; Bacon, Novum Organon; Locke on the Understanding; and the modern treatises on Logic, by archbishop Whately, sir William Hamilton, and Mr. John Stuart Mill.

In his "Principles of Science," 1874, Mr. Wm. Stanley Jevons describes his "Logical Abecedarium" and "Logical Slate."

LOGIERIAN SYSTEM of musical education, commenced by J. B. Logier, in Jan. 1815, and introduced into the chief towns of the United Kingdom, Prussia, &c. He died 1846.

LOG-LINE, used in navigation, about 1570; first mentioned by Bourne in 1577. It is divided into spaces of 50 feet, and the way which the ship makes is measured by a half-minute sand-glass, which bears nearly the same proportion to an hour that 50 feet bear to a mile: the line used in the royal navy is 48 feet.

LOGOGRAPHIC PRINTING, in which the commoner words were cast in one mass, was patented by Henry Johnson and Mr. Walter of the *Times* in 1783. Anderson's "History of Commerce," vol. iv. was printed by these types in 1789.

LOGRONO, see *Najara*.

LOI DES SUSPECTS, enacted by the French convention, 17 Sept. 1793, during the reign of terror, filled the prisons of Paris. The Public Safety bill, of a similar character, was passed, 18 Feb. 1858, shortly after Orsini's attempt on the life of the emperor.

LOLLARDS (by some derived from the German *lollen*, to sing in a low tone), the name given to the first reformers of the Roman catholic religion in England, the followers of Wykliffe. The sect is also said to have been founded in 1315 by Walter Lollard, who was burnt for heresy at Cologne in 1322. The Lollards are said to have devoted themselves to acts of mercy. The first Lollard martyr in England was William Sawtree, parish priest of St. Osith, London, 12 Feb. 1401, when the Lollards were proscribed by parliament, and numbers of them were burnt alive. Sir John Cobham, lord Oldcastle, a follower of Wykliffe, was accused of treason and condemned, Sept. 1413. He escaped to Wales, where he was captured, and brought to London and burnt, 25 Dec. 1418.

LOMBARDISTS, disciples of Peter Lombard, the schoolman, bishop of Paris, author of the "Book of Sentences," who died in 1164.

LOMBARD MERCHANTS, in England, were understood to be composed of natives of some one of the four republics of Genoa, Lucca, Florence, or Venice. *Anderson.* Lombard usurers were sent to England by pope Gregory IX. to lend money to convents, communities, and private persons who were not able to pay down the tenths which were collected throughout the kingdom with great rigour that year, 13 Hen. III. 1299. They had offices in the street named after them to this day. Their usurious transactions caused their expulsion from the kingdom in the reign of Elizabeth.

LOMBARDY (N. Italy) derived its name from the Langobardi, a German tribe from Brandenburg, said (doubtfully) to have been invited into Italy by Justinian to serve against the Goths. Their chief, Alboin, established a kingdom which lasted from 568 to 774. The last king, Desiderius, was dethroned by Charlemagne. (For a list of the Lombard kings; see *Italy*.) About the end of the 9th century the chief towns of Lombardy fortified themselves, and became republics. The first *Lombard league*, consisting of Milan, Venice, Pavia, Modena, &c., was formed to restrain the power of the German emperors, in 1167. On 29 May, 1176, they defeated the emperor Frederick Barbarossa at Legnano, and eventually compelled him to sign the peace of Constance in 1183. In 1226 another *league* was formed against Frede-

rick II., which was also successful. After this, petty tyrants rose in most of the cities, and foreign influence quickly followed. The Guelf and Ghibelline factions greatly distracted Lombardy; and from the 15th century to the present time, it has been contended for by the German and French sovereigns. The house of Austria obtained it in 1748, and held it till 1797, when it was conquered by the French, who incorporated it with the Cisalpine republic, and in 1805 with the kingdom of *Italy*. On the breaking up of the French empire in 1815, the LOMBARDO-VENETIAN KINGDOM was established by the allied sovereigns and given to Austria, who had lost her Flemish possessions. Lombardy and Venice revolted, and joined the king of Sardinia in March, 1848; but they did not support him well, and were again subjected to Austria after his defeat at Novara, 23 March, 1849. An amnesty for political offences was granted in 1856. Great jealousy of Sardinia was felt by Austria after 1849. In 1857 diplomatic relations were suspended; and in April, 1859, war broke out; the Austrians crossing the Ticino and entering Piedmont. The French emperor declared war against Austria, and immediately sent troops into Italy. The Austrians were defeated at Montebello, 20 May; Palestro, 30, 31 May; Magenta, 4 June; and Solferino, 24 June. By the peace of Villafranca (11 July), the largest part of Lombardy was ceded to Louis Napoleon, who transferred it to the king of Sardinia. It now forms part of the new kingdom of Italy, to which Venetia was also surrendered by the treaty of Vienna, 3 Oct. 1867.

LONATO (Brescia, N. Italy). Here Napoleon Bonaparte defeated Wurmser and the Austrians, 3 Aug. 1796.

LONDON. Some assert that a city existed on the spot 1107 years before the birth of Christ, and 354 years before the foundation of Rome,* that it was the capital of the Trinobantes, 54 B.C., and long previously the seat of their kings. In A.D. 61 it was known to the Romans as Lundinium, or Colonia Augusta, and the chief residence of the merchants. It is said, but not truly, to have derived its name from Lud, an old British king, who was buried near where Ludgate formerly stood; but its name is from *Llyn-Din*, the "town on the lake."† It became the capital of the Saxon kingdom of Essex, and was called *Lundenceaster*. In 1860, London and the suburbs were estimated to cover 121 square miles, 11 miles each way, being three times as large as in 1800. The population of the metropolitan districts in 1851, was 2,362,236; in 1861, it was 2,808,862; in 1871, 3,264,530. The population of "the city" in 1851, was 127,869; in 1861, it was 112,063; in 1871, 74,732. Revenue of the corporation in 1862, 437,341*l.*; in 1875, 655,391*l.*: expenditure, 592,244*l.* The "port" of London extends from London Bridge to the North Foreland. See *Docks*, *Mayors*, and *Treaties*.

* The fables of Geoffrey of Monmouth state that London was founded by Brute, a descendant of the Trojan Æneas, and called New Troy, or Troy-novant, until the time of Lud, who surrounded it with walls, and gave it the name of Caer Lud, or Lud's town, &c. *Leigh.*

† The original walls of London, said to have been the work of Theodosius, Roman governor of Britain, 379; but they are supposed to have been built about 306. There were originally four principal *gates*, but the number increased; and among others were the Prætorian way, Newgate, Dowgate, Cripplegate, Aldgate, Aldersgate, Ludgate, Bridegate, Moorgate, Bishopsgate, and the Postern on Tower-hill. Eight gates were removed in 1760-1, and the only one of the city boundaries now remaining is Temple-bar, rebuilt 1670-2, and its removal is expected.

* It is still preserved in the city archives. This charter is written in beautiful Saxon characters, on a slip of parchment six inches long, and one broad, and is in English as follows:—"William the king greeteth William the bishop, and Godfrey the portreve, and all the burgesses within London friendly. And I acquaint you, that I will that ye be all there law-worthy as ye were in king Edward's days. And I will that every child be his father's heir, after his father's days. And I will not suffer that any man do you any wrong. God preserve you."

† Stow incorrectly states this charter to have been given in 1209, but it bears date May 19th in the 16th year of king John's reign, which began in 1199. This charter was acted on at that period in various instances, as many of the mayors were afterwards continued in their offices for several years together; and the same right was exerted in the case of Mr. Alderman Wood, who filled the office of lord mayor during two succeeding years, those of 1816 and 1817. *Leigh.*

‡ This terrible pestilence broke out in India, and spreading itself westward through every country on the globe, reached England. Its ravages in London were so great, that the common cemeteries were not sufficient for the interment of the dead; and various pieces of ground without the walls were assigned for burial-places. Amongst these was the waste land now forming the precincts of the Charter-house, where upwards of 50,000 bodies were then deposited. This disorder did not subside till 1357. *Leigh.*

* This proclamation or decree was dated from Nonesuch, 7 July, 1580, and it was forbidden to erect new buildings where none had before existed in the memory of man. The extension of the metropolis was deemed calculated to encourage the increase of the plague; create a trouble in governing such multitudes; a dearth of victuals; multiplying of beggars, and inability to relieve them; an increase of artisans more than could live together; impoverishing other cities for lack of inhabitants. The decree stated that lack of air, lack of room to walk and shoot, &c., arose out of too crowded a city. A proclamation to the same effect was also issued by James I.

Present income, 10,000*l.* In 1845 Hertford and part of Essex were taken from the see of London and added to that of Rochester.

LONDON BRIDGE. One is said to have existed, 978. A bridge built of wood, 1014, was partly burned in 1136. The late old bridge was commenced about 1176, by Peter of Colechurch, and completed in 1209, with houses on each side, connected together by large arches of timber which crossed the street.

A fire at the Southwark end brought crowds on the bridge; the houses at the north end caught fire likewise, and prevented their escape: and upwards of 3000 persons lost their lives, being either killed, burned, or drowned . . July, 1212
The bridge restored in 1300, again destroyed by fire in 1471; 13 Feb. 1632, and . . . Sept. 1725
All the houses pulled down 1756
Waterworks begun, 1582; destroyed by fire . . 1774
The toll discontinued . . . . . 27 March, 1782
In 1822 the corporation advertised for designs for a new bridge: that by John Rennie was approved, and the works were executed by his sons John and George. The first pile was driven 200 feet to the west of the old bridge, 15 March, 1824; the first stone was laid by the lord mayor, alderman Garratt . . . . . 15 June, 1825
The bridge opened by William IV. and his queen, 1 Aug. 1831
The cost was 506,000*l.*
Plans for widening the bridge rejected 1875
It was computed that on 17 March, 1859, there passed over London-bridge 20,498 vehicles (of which 4483 were cabs and 4286 omnibuses), and 167,910 persons (107,074 on foot, and 60,836 in vehicles).

Prof. Porson, the first librarian, died 25 Sept. 1808. The present building in Finsbury-circus was opened on 21 April, 1819; the first lecture was delivered by Mr. W. T. Brande, on 5 May following. Mr. W. R. Grove, Q.C. (afterwards justice) (the inventor of the Voltaic battery which bears his name), was the first professor of experimental philosophy, 1840-6. The institution possesses an excellent library, lecture-room, and laboratory. Thomas Baring, M.P., long president, died 18 Nov. 1873; succeeded by Dr. Warren De la Rue.

LONDON STONE. A stone said to have been placed by the Romans in Cannon-street, then the centre of the city, 15 B.C. London stone was known before the time of William I. It was removed from the opposite side of the way in 1742; and again moved to its present position in the wall of St. Swithin's church, 1798. It was against this stone that Jack Cade struck his sword, exclaiming "Now is Mortimer lord of this city!" 1450.

LONDON, UNIVERSITY OF. The "London university" was founded by the exertions of lord Brougham, Thomas Campbell, and others; the deed of settlement dated 11 Feb. 1826. The building was commenced 30 April, 1827 (when the first stone was laid by the duke of Sussex); and was opened by an inaugural lecture from professor Bell, 1 Oct. 1828. On 28 Nov. 1836, two charters were granted: by one the "London university" was changed to "University college," and by the other the University of London was established, with a chancellor and other officers. New charters were granted to the latter on 5 Dec. 1837 and 21 April, 1858. It has power to grant degrees to students of the universities of the united kingdom, and of many collegiate establishments. Its offices were long in Burlington-house, Piccadilly, London. The university was enfranchised by the Reform act of 1867, and Robert Lowe was elected the first M.P. 17 Nov. 1868. The new buildings in Burlington-gardens, erected by Mr. Pennethorne, were inaugurated by the queen 11 May, 1870. *University Hall,* Gordon-square, was founded in 1847.

LONDONDERRY or **DERRY** (N. Ireland), mentioned 546. An abbey here was burned by the Danes in 783. A charter was granted to the London companies in 1615. The town was surprised, and sir George Powlett, the governor, and the entire garrison were put to the sword by rebels, in 1606. It was besieged by O'Neill in 1641. A grant was made of Derry, with 210,000 acres of land, to various companies in London, in 1619, when it took its present name. The siege of Derry by James II.'s army commenced 20 April, 1689. The garrison and inhabitants were driven to the extremity of famine; but under the rev. George Walker, they defended it until the siege was raised by gen. Kirke, on 30 July. James's army, under the French general Rosen, retired with the loss of about 9000 men. Foyle college act passed, 1874.

LONE STAR, a secret society formed in 1848, in Alabama and other southern states of the North American Union, for the "extension of the institutions, power, influence, and commerce of the United States over the whole of the western hemisphere, and the islands of the Atlantic and Pacific oceans." The first acquisition to be made by the order were Cuba and the Sandwich Islands. The knowledge of the existence of this society reached England in Aug. 1852.

LONG ISLAND or **FLATBUSH** (N. America), Battle of, 27 Aug. 1776, between the British troops under sir William Howe, and the revolted Americans, who suffered a severe defeat, after a well-fought action, losing 2000 men killed and wounded and 1000 prisoners.

LONGEVITY. Methuselah died, aged 969, 2349 B.C. (*Gen.* v. 27). Golour M'Crain of the Isle of Jura, one of the Hebrides, is said to have kept 180 Christmases in his own house, and died in the reign of Charles I., being the oldest man on anything approaching to authentic records for upwards of 3000 years. *Greig.* "In 1014 died Johannes de Temporibus, who lived 361 years (!)" *Stow.* Thomas Parr, a labouring man of Shropshire, was brought to London by the earl of Arundel, in 1635,

and said to be in his 153rd year, and in perfect health; he died 15 Nov. in the same year. Henry Jenkins, of Yorkshire, died in 1670, and was buried in Bolton churchyard, 6 Dec. aged 169 years (?) The researches of sir G. Cornewall Lewis, professor Owen, Mr. Wm. J. Thoms (in his "Human Longevity," May, 1873) and others, have disproved many alleged cases of longevity; and few statements of lives extending much beyond a century can be relied on. There were no records of baptism till the 16th century.

LONGITUDE, determined by Hipparchus, at Nice, who fixed the first degree in the Canaries, 162 B.C. Harrison made a time-keeper, in A.D. 1759, which in two voyages was found to correct the longitude within the limits required by the act of parliament 12 Anne, 1714; and obtained the reward; see *Harrison's Timepiece*. The chronometers of Arnold, Earnshaw, and Bréguet, are highly esteemed. Chronometers are now received on trial at Greenwich Observatory. The act relating to the discovery of the longitude at sea was repealed in 1828. The Bureau des Longitudes at Paris was established in 1795.

LOOM: was used by the Egyptians. The weaver's otherwise called the Dutch loom, was brought into use in London from Holland, about 1676. There were, in 1825, about 250,000 hand-looms in Great Britain, and 75,000 power-looms, each being equal to three hand-looms, making twenty-two yards each per day. The steam-loom was introduced in 1807; see *Cotton*, *Electric-loom*, *Jacquard*, *Pneumatic-loom*.

LORDS.* The nobility of England date their creation from 1066, when William Fitz-Osborn is said to have been made earl of Hereford by William I.; and afterwards Walter d'Evreux, earl of Salisbury; Copsi, earl of Northumberland; Henry de Ferrers, earl of Derby; and Gerodus (a Fleming) earl of Chester. Twenty-two other peers were made in this sovereign's reign. The first peer created by patent was lord Beauchamp of Holt Castle, by Richard II. in 1387. In Scotland, Gilchrist was created earl of Angus by Malcolm III. 1037. In Ireland, sir John de Courcy was created baron of Kinsale, &c., in 1181; the first peer after the obtaining of that kingdom by Henry II.

LORDS, HOUSE OF. The peers of England were summoned *ad consulendum*, to consult, in early reigns, and by writ, 6 & 7 John, 1205; but the earliest writ extant is 49 Hen. III. 1265. The commons did not form a part of the great council of the nation until some ages after the conquest; see *Parliament*. The house of lords includes the spiritual as well as temporal peers of Great Britain. The bishops are supposed to hold certain ancient baronies under the king, in right whereof they have seats in this house. Some of the temporal lords sit by de-

* Peers of England are free from all arrests of debts, as being the king's hereditary counsellors; therefore a peer cannot be outlawed in any civil action, and no attachment lies against his person; but execution may be taken upon his lands and goods. For the same reason, they are free from all attendance at courts leet or sheriffs' turns; or, in case of a riot, from attending the *posse comitatus*. scent, and some by creation: others by election, since the union with Scotland in 1707, and with Ireland, 1801.—Scotland elects 16 representative peers, and Ireland, 28 temporal peers for life. The house of lords in Jan. 1876 consisted of 5 princes of the blood, 2 archbishops, 21 dukes, 20 marquises, 128 earls, 32 viscounts, 261 barons, and 25 bishops; in all, 494 (13 peers minors).

LORETTO, near Ancona, Italy. Here is the *Casa Santa*, or Holy House, in which it is pretended the Virgin Mary lived at Nazareth, and said to have been carried by angels into Dalmatia from Galilee in 1291, and brought here a few years after. The lady of Loretto, gaudily dressed, stands upon an altar holding the infant Jesus in her arms, surrounded with gold lamps. Loretto was taken by the French in 1797; the holy image, which had been carried to France, was brought back with pomp, 5 Jan. 1803.

L'ORIENT (W. France). Lord Bridport off this port defeated the French fleet, 23 June, 1795. The loss of the French was severe: that of the British inconsiderable. — The French flag-ship, L'ORIENT, blew up during the battle of the Nile, 1 Aug. 1798. Admiral Brueys and about 900 men perished.

* *Peerage for life* only, with the title of lord Wensleydale of Wensleydale, was granted to baron sir James Parke, 10 Jan. 1856; the house of lords opposed his sitting and voting as a peer for life, and on 25 July, 1856, he was created a peer in the usual way, with the title of lord Wensleydale of Walton. He died in 1868. A bill for creating life peerages was read a second time in the lords, 27 April, 1869; but afterwards rejected.

LORRAINE (Lotharingia), formerly a French now a German province, became a kingdom under Lothaire (son of the emperor Lothaire I.) about 855; and was divided at his death, in 869, part of it being made a duchy. From the first hereditary duke, Gerard, nominated by the emperor Henry III. in 1048, descended the house of Lorraine, represented now by the emperor of Austria, whose ancestor, the empress Maria Theresa, married in 1736 Francis formerly duke of Lorraine, then of Tuscany. Lorraine, given to the dethroned king of Poland, Stanislaus I., for life, was, at his death in 1766, united to France; see *Nancy*. Lorraine was the seat of war in Aug. 1870, and about the fifth part, including Metz and Thionville, was annexed to Germany at the peace, 26 Feb. 1871.

LOTS. Casting lots, as an appeal to God, was sacred among the Jews, *Proverbs* xvi. 33. It was employed in the division of the land of Canaan, about 1444 B.C., by Joshua (xiv.); and in the election of Matthias the apostle, A.D. 33, *Acts* i. Lots for life or death have been frequently cast. For an instance, see *Wales*, 1649, note.

LOTTERIES are said to have originated in Florence about 1530, and to have been legalised in France in 1539, and soon became common. They were prohibited by pope Benedict XIII. (1724-30), and sanctioned by Clement XII. (1730-40). See *Art Union*.

The first mentioned in English history took place, day and night, at the western door of St. Paul's cathedral. It contained 40,000 "*lots*" at 10s. each lot, the profits were for repairing the harbours, and the prizes were pieces of plate, 11 Jan.-6 May, 1569

LOUVRE, in Paris, is said to have been a royal residence in the reign of Dagobert, 628. It was a prison-tower constructed by Philippe Augustus in 1204. It afterwards became a library, and Charles VI. made it his palace (about 1364). The new buildings, begun by Francis I. in 1528, were enlarged and adorned by successive kings, particularly Louis XIV.—Napoleon I. turned it into a museum, and deposited in it the finest collection of paintings, statues, and treasures of art known in the world. The chief of those brought from Italy have since been restored to the rightful possessors. The magnificent buildings of the new Louvre, begun by Napoleon I. and completed by Napoleon III., were inaugurated by the latter in great state, 14 Aug. 1857. The library was destroyed and other buildings much injured by the communists, May, 1871.

LÜBECK, a city in N. Germany, one of the four republics of the German confederation, was built in the 12th century, and was chief founder of the Hanseatic league about 1240, which lasted till 1630. Lübeck was declared a free imperial city about 1226; but was frequently attacked by the Danes. The French took it by assault, 6 Nov. 1806, and Napoleon incorporated it with his empire in 1810. On his fall in 1814 it became once more a free imperial city. It joined the North German confederation 18 Aug. 1866. Population in 1871, 52,158.

LUCANIANS, a warlike people of S. Italy, defeated Alexander of Epirus at Pandosia, 332 B.C.; were subdued by the Romans, 227; revolted after the battle of Cannæ, 216; were reduced by Scipio, 201; again revolted, 90; admitted as Roman citizens, 88.

LUCCA (central Italy), a Roman colony, 177 B.C.; a Lombard duchy, A.D. 1327; a free city about 1370; took an active part in the civil wars of the Italian republics. It was united with Tuscany, and given as a principality to Eliza Bonaparte by her brother Napoleon I., 1805. Lucca, as a duchy, was given to Maria Louisa, widow of Louis, king of Etruria, in 1814. It was exchanged by her son Charles-Louis for Parma and Placentia in 1847; was annexed to Tuscany, and with it became part of the kingdom of Italy, in 1860.

LUCERNE (Switzerland) became independent in 1332, and joined the confederation. The city Lucerne is said to derive its name from a light (*lucerna*) set up to guide travellers. It dates from the 8th century, and was subject to the abbots of Murbach, who surrendered it to the house of Hapsburg. It was taken by the French in March, 1798, and was for a short time capital of the Helvetic republic; which, as the focus of insurrection against the French, was suppressed Oct. 1802. As a catholic canton, Lucerne was very active on behalf of education by the Jesuits, 1844; see *Switzerland*.

LUCIA, ST. (West Indies), first settled by the English, 1639; expelled by the natives; settled by French in 1650; taken by the British several times in the subsequent wars. Insurrection of the French negroes, April, 1795. St. Lucia was restored to France at the peace of 1802; but was seized by England, 1803, and confirmed to her in 1814. Population in 1871, 31,811,710, whites.

LUCIFER MATCHES came into use about 1834. Friction matches were invented by Walker of Stockton-on-Tees, 1829. In March, 1842, Mr. Reuben Partridge patented machinery for manufacturing the splints. In 1845, Schrötter of Vienna produced his amorphous phosphorus (by heating ordinary phosphorus in a gas which it cannot absorb), by the use of which lucifers are rendered less dangerous, and the manufacture less unhealthy. *Phosphoros* (Greek) and *lucifer* (Latin), both signify *light-bearer*.

Mr. Lowe's proposed tax on lucifers (with "*e luce lucellum*" on the box) was much opposed and withdrawn, April, 1871. For their exertions, a drinking fountain at Bow was inaugurated as a memorial to Bryant and May, 5 Oct. 1872. The match manufacture was made a monopoly in France in Oct. 1872, for 750,000*l*.

LUTHERANISM,* the form of Christianity professed by the majority of the people of the north of Germany, Prussia, Denmark, and Sweden. The doctrines are mainly embodied in Luther's catechisms, in the Augsburg Confession, and in the *Formula Concordiæ* of the Lutherans, published in 1580. Their first university was founded at Marburg, in 1527, by Philip, landgrave of Hesse. The battles of Bautzen and Wurschen immediately followed (19-21 May), both in favour of Napoleon. The allies were compelled to pass the Oder, and an armistice was agreed to, afterwards prolonged; but, unfortunately for the French emperor, this did not produce peace.

The marbles brought from Lycia by sir Charles Fellows were deposited in the British Museum, 1840-46.

LYDIA, or Mæonia, an ancient kingdom in Asia Minor, under a long dynasty of kings, the last being Crœsus, "the richest of mankind." LYING-IN HOSPITALS. The first, established in Dublin by Dr. Bartholomew Mosse, a physician, amid strong opposition, was opened March, 1745; see *Hospitals*.

LYMPHATICS (absorbent vessels connected with digestion), discovered about 1650 by Rudbek in Sweden, Bartholin in Denmark, and Jolyffe in England. Asellius discovered the lacteals in 1622. In 1654, Glisson ascribed to these vessels the function of absorption; and their properties were studied by Wm. and John Hunter, Monro, Hewson, and other great anatomists.

LYNCH LAW, punishment inflicted by private individuals, independently of the legal authorities, said to derive its name from John Lynch, a farmer, who exercised it upon the fugitive slaves and criminals dwelling in the "dismal swamp," North Carolina, when they committed outrages upon persons and property which the colonial law could not promptly repress. This mode of administering justice began about the end of the 17th century, and still exists in the outlying districts of the United States. Four robbers were taken from prison and hanged by a vigilance committee at New Albany, on the Ohio, 11 Dec. 1868.

LYRE. Its invention is ascribed to the Grecian Hermes (in Latin Mercury), who, according to Homer, gave it to Apollo, the first that played upon it with method, and accompanied it with poetry. The invention of the primitive lyre, with three strings, is ascribed to the first Egyptian Hermes. Terpander added several strings to the lyre, making the number seven, 673 B.C. Phrynis, a musician of Mitylene, added two more, making nine, 438 B.C.

M.

MACADAMISING, a system of road-making invented by Mr. John Macadam, and published by him in an essay, in 1819, having practised it in Ayrshire. He prescribed stones to be broken to six ounces weight, and the use of clean flints and granite clippings. He received 10,000*l.* from parliament; was appointed surveyor-general of the metropolitan roads in 1827, and died in 1836; see *Roads*.

MACAO (in Quang-tong, S. China) was given to the Portuguese as a commercial station in 1586 (in return for their assistance against pirates), subject to an annual tribute, which was remitted in 1863. Here Camoens composed part of the "Lusiad."

MACARONI. This name, given to a poem by Theophilus Folengo, 1509, continues to designate trifling performances, as buffoonery, puns, anagrams, "wit without wisdom, and humour without sense." His poem was so called from an Italian cake of the same name, pleasant to the taste, with little alimentary virtue. These poems, in Italy and France, gave rise to *Macaroni academies*, and in England to *Macaroni clubs* (about 1772), when everything ridiculous in dress and manners was called "Macaroni."

MACCABEES, a name of the Asmoneans, who commenced their career during the persecution of Antiochus Epiphanes, 167 B.C. Mattathias, a priest, resisted the tyranny; and his son, Judas Maccabæus, defeated the Syrians in three battles, 166, 165 B.C.; but fell in an ambush, 161 B.C. His brother Jonathan made a league with the Romans and Lacedæmonians, and after an able administration was treacherously killed at Ptolemais by Tryphon, 143 B.C. His brother and successor, Simon, was also murdered, 135 B.C. John Hyrcanus, son of Simon, succeeded. His son Judas, called also Aristobulus, took the title of king, 107 B.C. The history of the Maccabees is contained in five books of that name, two of which are included in our Apocrypha. Four are accounted canonical by the Roman Catholic church; none by Protestant communions.

MACDONALD AFFAIR, see *Prussia*, 1861.

MACE, a weapon anciently used by the cavalry of most nations, was originally a spiked club, hung at the saddle-bow, and usually of metal. Maces were also early ensigns of authority borne before officers of state, the top being made in the form of an open crown, and commonly of silver gilt. The lord chancellor and speaker of the house of commons have maces borne before them. Edward III. granted to London the privilege of having gold or silver maces carried before the lord mayor, sheriffs, aldermen, and corporation, 1354. It was with the mace usually carried before the lord mayor on state occasions, that Walworth, lord mayor of London, is said to have knocked the rebel Wat Tyler off his horse, for rudely approaching Richard II., a courtier afterwards despatching him with his dagger, 15 June, 1381. Cromwell, entering the house of commons to disperse its members and dissolve the parliament, ordered one of his soldiers to "take away that bauble," the mace, which was done, and the doors of the house locked, 20 April, 1653.

MACEDON (N. Greece). The first kingdom was founded by Caranus, about 814 B.C. It was successively under the protection of Athens, of Thebes, and Sparta, until the reign of Philip, the father of Alexander the Great, who by his political wisdom and warlike exploits made it a powerful kingdom, and paved the way for his son's greatness.

MACHIAVELLIAN PRINCIPLES, those of Nicolo Machiavelli of Florence (born 1469, died 1527), in his "Practice of Politics" and "The Prince." By some they are styled "the most pernicious maxims of government, founded on the vilest policy;" by others as "sound doctrines, notwithstanding the prejudice erroneously raised against them." The author said that if he taught princes to be tyrants, he also taught the people to destroy tyrants. "The Prince" appeared at Rome in 1532, and was translated into English in 1761.

MACIEJOVICE (near Warsaw, Poland). Here the Poles were totally defeated by the Russians, and their general, Kosciusko, taken prisoner, 10 Oct. 1794, after a murderous action. MADEIRA, an island, N. W. coast of Africa, discovered, it is said, in 1344, by Mr. Macham, an English gentleman, or mariner, who fled from France for an illicit amour. He was driven here by a storm, and his mistress, a French lady, dying, he made a canoe, and carried the news of his discovery to Pedro, king of Aragon, which occasioned the report that the island was discovered by a Portuguese, 1345. It is asserted that the Portuguese did not visit this island until 1419 or 1420, or colonise it until 1431. It was taken by the British in July, 1801; and again by admiral Hood and general Beresford, 24 Dec. 1807, and retained in trust for the royal family of Portugal, who had emigrated to the Brazils. It was restored to the Portuguese in 1814. Since 1852 the renowned vintages here have been totally ruined by the vine disease (oïdium).

Madrigals were published by Morley, 1594; Weelkes, 1597; Wilbye, 1598; and Bennet, 1599. The Madrigal Society in London began in 1741. English Glee and Madrigal Union founded in 1851. MAESTRICHT (Holland), the ancient *Trajectum ad Mosam*, the capital of Limburg. It revolted from Spain, and was taken by the prince of Parma in 1579, when a dreadful massacre took place. In 1632, the prince of Orange reduced it after a memorable siege, and it was confirmed to the Dutch in 1648; Louis XIV. took it in 1673; William, prince of Orange, invested it in vain in 1676; but in 1678 it was restored to the Dutch. In 1748 it was besieged by the French, who were permitted to take possession of the city on condition of its being restored at the peace then negotiating. In Feb. 1793, Maestricht was unsuccessfully attacked by the French, but they became masters of it, Nov. 1794. In 1814 it was made part of the kingdom of the Netherlands, and now belongs to Holland.

MAGDALA, a very strong place in Abyssinia (*which see*). On Good Friday, 10 April, 1868, the troops of the emperor Theodore attacked the first brigade of the British army under sir Robert Napier, and were repulsed with great slaughter. On the next day all the European prisoners were given up, but Theodore himself refused to surrender; and on Easter Monday, 13 April, Magdala was stormed, and Theodore himself killed—it is said by his own hand.—British loss, 2 killed; 20 wounded: Abyssinian loss, about 500 killed and wounded out of about 5000. Magdala was burnt to the ground by the British, 17 April, 1868.

MAGDALENS AND MAGDALENETTES, communities of nuns, consisting chiefly of penitent courtesans. The order of penitents of St. Magdalen was founded 1272, at Marseilles. The convent of Naples was endowed by queen Sancha, 1324. That at Metz was instituted in 1452. At Paris, 1492. The Magdalen at Rome was endowed by pope Leo X., in 1515, and favoured by Clement VIII. in 1594. The Magdalen hospital, London, was founded in 1758, under the direction of Dr. Dodd. The asylum in Dublin was opened in June, 1766.

MAGDEBURG (Prussia). The archbishopric was founded about 967. The city suffered much during the religious wars in Germany. It was besieged and taken by the elector Maurice, Nov. 1550, and Nov. 1551; blockaded for seven months by the imperialists, under Wallenstein, in 1629; and barbarously sacked by Tilly on 10 May, 1631.

It was given to Brandenburg in 1648; was taken by the French, 8 Nov. 1806; annexed to the kingdom of Westphalia, 9 July, 1807; restored to Prussia, May, 1813.

The *Magdeburg Experiment* is shown by means of a hollow sphere, composed of two hemispheres, fitting air-tight. When the air is exhausted by the air pump, the hemispheres are held together by the pressure of the atmosphere, and require great force to separate them. The apparatus was suggested, by Otto von Guericke, the inventor of the air-pump. He died in 1686. *Brande.*

MAGELLAN, STRAITS OF (connecting the Atlantic and Pacific oceans), was passed by Fernando de Magelhaens (Magellan), a Portuguese, on 27 Nov. 1520. He gave the latter ocean its name on account of its calmness. Magellan completed the first voyage round the world, with a fleet of discovery fitted out by the emperor Charles V., but was killed in 1521. The Spaniards had a fort here, called Cape Famine, because the garrison perished for want.

MAGENTA, a small town in Lombardy, near which the French and Sardinians defeated the Austrians, 4 June, 1859. The emperor Louis Napoleon commanded, and he and the king of Sardinia were in the thickest of the fight. It is said that 55,000 French and Sardinians, and 75,000 Austrians were engaged. The former are asserted to have lost 4000 killed and wounded, and the Austrians 10,000, besides 7000 prisoners. The French generals Espinasse and Clerc were killed. The arrival of general MacMahon during a deadly struggle between the Austrians and the French, greatly contributed to the victory. The contest near the bridge of Buffalora was very severe. The Austrians fought well, but were badly commanded. The emperor and king entered Milan on 8 June following; MacMahon and Regnault d'Angely were created marshals of France. A monument erected here in memory of the slain was solemnly inaugurated 4 June, 1872.—The red dye, rosaniline, obtained by chemists from gas-tar, is termed *magenta;* see *Aniline.*

MAGI or WORSHIPPERS OF FIRE. The Persians adored the invisible and incomprehensible God as the principle of all good, and paid homage to fire, as the emblem of his power and purity. They built no altars nor temples; their sacred fires blazed in the open air, and their offerings were made upon the earth. The Magi, their priests, are said to have had skill in astronomy, &c.; hence the term Magi was applied to all learned men, till they were confounded with the magicians. Zoroaster, king of Bactria, the reformer of the sect of the Magi, flourished about 550 B.C. This religion was superseded in Persia by Mahometanism, A.D. 652, and the Parsees at Bombay are descendants of the Guebres or fire-worshippers.

MAGIC, see *Alchemy, Witchcraft,* &c. The invention of the MAGIC LANTERN is ascribed to Roger Bacon, about 1260, but more correctly to Athanasius Kircher, who died 1680. See Godwin's "Lives of the Necromancers," 1834, and Ennemoser's "History of Magic," translated by W. Howitt, 1854.

MAGISTRATES, see *Justices.* Stipendiary borough magistrates may be appointed by 5 & 6 Will. IV. c. 76, 1835; and by 26 & 27 Vict. c. 97, 1863. The present arrangement of metropolitan magistrates (the chief sitting at Bow-street) was made by act of parliament in 1792. Their salaries raised from 25 March, 1875. Henry Fielding, the novelist, was acting magistrate for Westminster and at Bow-street. He was succeeded by his half-brother, sir John Fielding, *in 1761;* by

MAGNA CHARTA. Its fundamental parts were derived from Saxon charters, continued by Henry I. and his successors. On 20 Nov. 1214, the archbishop of Canterbury and the barons met at St. Edmondsbury. On 6 Jan. 1215, they presented their demands to king John, who deferred his answer. On 19 May they were censured by the pope. On 24 May they marched to London, and the king was compelled to yield. The charter was sealed by John at Runnymede, near Windsor, 15 June, 1215. It was many times confirmed, by Henry III. and his successors. This last king's grand charter was granted in 1224, and was assured by Edward I.; see *Forests.* The original MS. charter is lost. The finest MS. copy, which is at Lincoln, was reproduced by photographs in the "National MSS." published by government, 1865.

MAGNA GRÆCIA, the independent states founded by Greek colonists in South Italy, Sicily, &c. Cumæ, in Campania, is said to have been founded in 1034 B.C. Pandosia and Metapontum in 774 B.C. These states were ruined through siding with Hannibal when he invaded Italy, 216 B.C.

MAGNANO (N. Italy). Here Schérer and a French army were defeated by the Austrians under Kray, 5 April, 1799.

MAGNESIA (Asia Minor). Here Antiochus the great, king of Syria, was defeated by the Scipios, 190 B.C.—*Magnesia alba,* the white akaline earth used in medicine, was in use in the beginning of the 18th century. Its properties were developed by Dr. Black in 1755.

MAGNESIUM, a metal first obtained from magnesia by sir Humphry Davy in 1808, and since produced in larger quantities by Bussy, Deville, and especially by Mr. E. Sonstadt, in 1862-4. Its light when burnt is very brilliant, and is so rich in chemical rays that it may be used in photography. Lamps made for burning magnesium wire, were employed by the excavators of the tunnel through Mount Cenis. By its light photographs of the interior of the Pyramids were taken in 1865. Larkin's magnesium lamp (in which the metal is burnt in the form of a powder) was exhibited at the Royal Institution on 1 June, 1866, and before the British Association at Nottingham in Aug. 1866.

MAGNETISM. Magnes, a shepherd, is said to have been detained on Mount Ida by the nails in his boots. The attractive power of the loadstone or magnet was early known, and is referred to by Homer, Aristotle, and Pliny; it was also known to the Chinese and Arabians. The Greeks

are said to have obtained the loadstone from Magnesia in Asia, 1000 B.C. Roger Bacon is said to have been acquainted with its property of pointing to the north (1294). The invention of the mariner's compass is ascribed to Flavio Gioia, a Neapolitan, about 1310; but it was known in Norway previous to 1266; and is mentioned in a French poem, 1150; see under *Electricity*, p. 246.

Wilde's magneto-electric machine exhibited (see under *Electricity*, p. 246) . . . . . ,,
In the present century our knowledge of the phenomena of magnetism has also been greatly increased by the labours of Arago, Ampère, Hansteen, Gauss, Weber, Poggendorff, Sabine, Lamont, Du Moncel, Archibald Smith, &c. (see *Animal Magnetism*).
In the Royal Institution, London, is a magnet by Logeman, of Haarlem, constructed on the principles of Dr. Elias, which weighs 100 lb, and can sustain 430 lb. Hæcker, of Nuremberg, constructed a magnet weighing 36 grains, capable of sustaining 146 times its own weight. This was exhibited in 1851, also at the Royal Institution.

MAGNETO-ELECTRICITY, the discovery of professor Faraday; see *Electricity*, p. 246. Magneto-electricity has been recently applied to telegraphic and to lighthouse purposes. The South Foreland lighthouse, near Dover, was illuminated by the magneto-electric light in the winter of 1858-9 and 1859-60, and removed to Dungeness in 1861. See *Faradisation*.

MAGNOLIA. *Magnolia glauca* was brought here from N. America, 1688. The laurel-leaved Magnolia, *Magnolia grandiflora*, from N. America about 1734. The dwarf Magnolia, *Magnolia pumila*, from China in 1789; and (also from China), the brown stalked, 1789: the purple, 1790; and the slender, 1804.

MAHEDPORE, see *Mehedpore*.

MAHOGANY is said to have been brought to England by Raleigh, in 1595; but not to have come into general use till 1720.

MAHOMETANISM embodied in the Koran, includes—the unity of God, the immortality of the soul, predestination, a last judgment, and a sensual paradise. Mahomet asserted that the Koran was revealed to him by the angel Gabriel during a period of twenty-three years. He enjoined on his disciples circumcision, prayer, alms, frequent ablution, and fasting, and permitted polygamy and concubinage.

The Mahometans are divided into several sects, the two chief being the *Sonnites*, or the Orthodox (who recognised as caliph Abubeker, the father-in-law of Mahomet, in preference to Omar and Ali), and the *Shiites* (Sectaries), or *Fatimites*, the followers of Ali, who married Fatima, the prophet's daughter.
The Ottoman empire is the chief seat of the Sonnites, the sultan being considered the representative of the caliphs; Persia has been for centuries the stronghold of the Shiites.
The Mahometans conquered Arabia, North Africa, and part of Asia, in the 7th century; in the 8th they invaded Europe, conquering Spain, where they founded the califat of Cordova, which lasted from 756 to 1031, when it was broken up into smaller governments, the last of which, the kingdom of Grenada, endured till its subjugation by Ferdinand in 1492; but the Mahometans were not finally expelled from Spain till 1609
Their progress in France was stopped by their defeat at Tours by Charles Martel, in 732
After a long contest, the Turks under Mahomet II. took Constantinople; he made it his capital and the chief seat of his religion 1453
Though considered to be declining, Mahometanism is calculated as including 100 millions amongst its votaries.

MAHRATTAS, a people of Hindostan, who originally dwelt north-west of the Deccan, which they overran about 1676. They endeavoured to overcome the Mogul, but were restrained by the Afghans. They entered into alliance with the East India company in 1767, made war against it in 1774, again made peace in 1782, and were finally subdued in 1818. Their prince, Sindiah, is now a pensioner of the British government.

MAIDS OF HONOUR. Anne, daughter of Francis II. duke of Brittany, and queen of Charles VIII. and Louis XII. of France (1483-98), had young and beautiful ladies about her person, called maids of honour. The queen of Edward I. of England is said to have had four maids of honour (1272-1307); queen Victoria has eight.

MAIL-COACHES, for the conveyance of letters, were first set up at Bristol by Mr. John Palmer, of Bath, 2 Aug. 1784. They were employed for other routes in 1785, and soon became general in England. The mails were first sent by *rail* in 1838.

MAILLOTINS (small mallets), a name given to certain citizens of Paris, who, in March, 1382, violently opposed the collection of new taxes imposed by the duke of Anjou, the regent. They armed themselves with small iron mallets (taken from the arsenal), and killed the collectors; for which they were severely punished in Jan. 1383.

MAIMING AND WOUNDING, see *Coventry Act.*

MAIN PLOT, a name given to a conspiracy to make Arabella Stuart sovereign of England in place of James I. in 1603. Lord Cobham, sir Walter Raleigh, and lord Grey, were condemned to death for implication in it, but reprieved; others were executed. Raleigh was executed, 29 Oct. 1618.

MAINE, 1. a province, N.W. of France, seized by William I. of England in 1069. It acknowledged prince Arthur, 1199; was taken from John of England by Philip of France, 1204; was recovered by Edward III. in 1357; but given up, 1360. After various changes it was finally united to France by Louis XI. in 1481.—2. MAINE (N. America), was discovered by Cabot, 1497; and colonised by the English about 1638; it became a state of the union in 1820. The boundary line between the British and the United States territories in Maine was settled by the Ashburton treaty, concluded 9 Aug. 1842. The *Maine liquor law*, prohibiting the manufacture, sale, and use of intoxicating drinks, with certain exceptions, was enacted in 1851. In 1872, it was officially reported to have greatly decreased drunkenness and rendered the trade disreputable.

MAJESTY. Among the Romans, the emperor and imperial family were thus addressed, and also the popes and the emperors of Germany. The style was given to Louis XI. of France in 1461. *Voltaire.* Upon Charles V. being chosen emperor of Germany in 1519, the kings of Spain took the style. Francis I. of France, at the interview with Henry VIII. of England, on the Field of the Cloth of Gold, addressed the latter as Your Majesty, 1520. James I. used the style "Sacred," and "Most Excellent Majesty."

MAJORCA, see *Balearic Isles*, and *Minorca.* Majorca opposed Philip V. of Spain in 1714; but submitted, 14 July, 1715. Its first railway, from Palma, capital of the Balearic isles, to Inca, 18 miles, opened, 24 Feb. 1875.

MALABAR (W. coast of Hindostan). The Portuguese established factories here in 1505; the English did the same in 1601.

MALACCA, on the Malay peninsula, E. Indies, was made a Portuguese settlement in 1511. The Dutch factories were established in 1640. The Dutch government exchanged it for Bencoolen in Sumatra in 1824, when it was placed under the Bengal presidency. It is now part of the *Straits Settlements* (which see).

MALAGA (S. Spain), a Phœnician town, taken by the Arabs, 714; retaken by the Spaniards, after a long siege, 1487; see *Naval Battles*, 1704. An insurrection against the provisional government was put down with much slaughter, 31 Dec. 1868.

MALAKHOFF, a hill near Sebastopol, on which was situated an old tower, strongly fortified by the Russians during the siege of 1854-55. The allied French and English attacked it on 17, 18 June, 1855, and after a conflict of forty-eight hours were repulsed with severe loss; that of the English being 175 killed and 1126 wounded; that of the French 3338 killed and wounded. On 8 Sept. the French again attacked the Malakhoff; at eight o'clock the first mine was sprung, and at noon the French flag floated over the conquered redoubt; see *Sebastopol.* In the Malakhoff and Redan were found 3000 pieces of cannon of every calibre, and 120,000 lbs. of gunpowder.

MALDON (Essex), built 28 B.C., is supposed to have been the first Roman colony in Britain. It was burnt by queen Boadicea, and rebuilt by the Romans; burnt by the Danes, A.D. 991, and rebuilt by the Saxons. Maldon was incorporated by Philip and Mary. The singular custom of Borough-English is kept up here, by which the youngest son, and not the eldest, succeeds to the burgage tenure on his father's death; see *Borough-English.*

MALO, ST. (N. W. France). This port, as a great resort of privateers, sustained a tremendous bombardment by the English under admiral Benbow in 1693, and under lord Berkeley in July, 1695. In June, 1758, the British landed in considerable force in Cancalle bay, and went up to the harbour, where they burnt upwards of a hundred ships, and did great damage to the town, making a number of prisoners. It is now defended by a very strong castle, and the harbour is very difficult of access.

MALO-JAROSLAVITZ, near Moscow, central Russia: the site of severe encounters between the Russians and the retreating French army, 24 Oct. 1812. The latter were victorious, but with great loss.

MALPLAQUET (N. France). Here the allies under the duke of Marlborough and prince Eugene defeated the French commanded by marshal Villars, 11 Sept. 1709. Each army consisted

of nearly 120,000 choice soldiers. There was great slaughter on both sides, the allies losing 18,000 men, which loss was but ill repaid by the capture of Mons.

MALT, barley prepared for brewing and distillation. A duty was laid upon malt in 1667, 1697, *et seq.* Important acts for the regulation of malt duties was passed in 1830 and 1837. In March, 1858, there were 6157 licensed maltsters in the United Kingdom. The duty on malt in 1863 amounted to 6,273,727*l.* In 1864 the duty was remitted on malt used for cattle feeding; and in 1865, an act was passed allowing the excise duty to be charged according to the weight of the grain used. A parliamentary committee to consider repeal of malt tax (6*d.* a bushel) was agreed to, 14 May, 1867, without success; a motion to repeal the tax was negatived (244–17), 23 April, 1874.

MALTA (formerly Melita), an island in the Mediterranean, held successively by the Phœnicians, Carthaginians, and Romans, which last conquered it, 259 B.C. The apostle Paul was wrecked here, A.D. 62 (*Acts* xxvii. xxviii.) Malta was taken by the Vandals, 534; by the Arabs, 870; and by the Normans from Sicily, 1090. With Sicily it became successively part of the possessions of the houses of Hohenstaufen, of Anjou (1266), and of Aragon (1260). In 1530 Charles V. gave it to the Knights Hospitallers, who defended it most courageously and successfully, in 1551 and 1565, against the Turks, who were obliged to abandon the enterprise after the loss of 30,000 men. The island was taken by Bonaparte in the outset of his expedition to Egypt, 12 June, 1798. He found in it 1200 pieces of cannon, 200,000 lbs. of powder, two ships of the line, a frigate, four galleys, and 40,000 muskets, besides an immense treasure collected by superstition; and 4500 Turkish prisoners, whom he set at liberty. Malta surrendered to the British under Pigot, 5 Sept. 1800. At the peace of Amiens it was stipulated that it should be restored to the knights. The British, however, retained possession, and the war recommenced between the two nations; but by the treaty of Paris, in 1814, the island was guaranteed to Great Britain. *La Valetta*, the capital, was founded in 1557 by the grand master La Valetta, and completed and occupied by the knights, 18 Aug. 1571. The Protestant college was founded in 1846. A grand new naval dry dock was opened, May, 1871. Governor of Malta and Gozo, sir Patrick Grant, March, 1867; sir C. T. Van Straubenzee, 1872.—The visit of prince of Wales, 6 April, 1876.

MALTA, KNIGHTS OF. A military religious order, called also Hospitallers of St. John of Jerusalem, Knights of St. John, and Knights of Rhodes. Some merchants of Malfi, trading to the Levant, obtained leave of the caliph of Egypt to build a house for those who came on pilgrimage to Jerusalem, and whom they received with zeal and charity, 1048. They afterwards founded a hospital for the reception of pilgrims, from whence they were called Hospitallers (Latin, *hospes*, a guest). The military order was founded about 1099; confirmed by the pope, 1113. In 1119 the knights defeated the Turks at Antioch. After the Christians had lost their interest in the East, and Jerusalem was taken, the knights retired to Acre, which they defended valiantly in 1290. John, king of Cyprus, gave them Limisso in his dominions, where they stayed till 1310, in which year they took Rhodes, under their grand master De Vallaret, and the next year defended it under the duke of Savoy against an army of Saracens. The story that his successors have used F. E. R. T. (*Fortitudo ejus Rhodum tenuit*, or his valour kept Rhodes) for their device is much doubted. From this they were also called *knights of Rhodes;* but Rhodes being taken by Solyman in 1522, they retired into Candia, thence into Sicily. Pope Adrian VI. granted them the city of Viterbo for their retreat; and in 1530 the emperor Charles V. gave them the isle of Malta. The order was suppressed in England in 1540; restored in 1557; and again suppressed in 1559. St. John's Gate, Clerkenwell, a relic of their possessions, still exists. The emperor Paul of Russia declared himself grand master of the order in June, 1799. The knights sent a hospital establishment into Bohemia during the war in 1866, which afforded great relief to the wounded and sick.

MAMELUKES, originally Turkish and Circassian slaves, established by the sultan as a bodyguard, about 1240. They advanced one of their own corps to the throne of Egypt, May, 1250, and continued to do so until it became a Turkish province, in 1517, when the beys took them into pay, and filled up their ranks with renegades from various countries. On the conquest of Egypt by Bonaparte, in 1798, they retreated into Nubia; but, assisted by the Arnauts, reconquered Egypt from the Turkish government. In 1804, Napoleon embodied some of them in his guard. On 1 March, 1811, they were decoyed into the power of the Turkish pacha, Mehemet Ali, and slain at Cairo.

MAMELON, a hill, one of the defences of Sebastopol, was captured by the French, 7 June, 1855.

MAMERTINI, sons of Mamers or Mars, were Campanian soldiers of Agathocles. They seized Messina in Sicily, in 281 B.C., and when closely besieged by the Carthaginians, and Hiero of Syracuse, in 264, they implored the help of the Romans, which led to the first Punic war.

MAMMOTH, an extinct species of elephant. An entire mammoth, flesh and bones, was discovered in Siberia, in 1799. Remains of this animal have since been found at Harwich, in 1803, and at places in Europe, Asia, and America.

MAN, ANTIQUITY OF. In 1836, M. Boucher de Perthes found some rude flint implements, which he believed to be of human manufacture, mingled with bones of extinct animals, in the old alluvium near Abbeville in Picardy, France, and also in 1847, near Amiens. Similar flints have since been found in Sicily by Dr. Falconer, at Brixham by Mr. Pengelly, and lately in various parts of the world. Hence many geologists infer that man existed on the earth many ages earlier than has been hitherto believed.

Some burnt bricks found in the Nile are considered to be 20,000 years old, and some bones found in lacustrine deposits in Florida, 30,000 years old.

MAN, ISLE OF,* was subdued by Edwin, king of Northumberland, about 620; by Magnus of Norway, 1098; by the Scots, 1266; occupied by Edward at the wish of the inhabitants; recovered by the Scots in 1313; but taken from them by Montacute, afterwards earl of Salisbury, to whom Edward III. gave the title of king of Man, in 1343. It was afterwards subjected to the earl of Northumberland, on whose attainder Henry IV. granted it in fee to sir John Stanley, 1406. It was taken from this family by Elizabeth, but was restored in 1610 to the earl of Derby, through whom it fell by inheritance to the duke of Athol, 1735. He received 70,000*l.* from parliament for the sovereignty in 1765; and the nation was charged with the further sum of £32,244*l.* for the purchase of his remaining interest in the revenues of the island in Jan. 1829. The countess of Derby held the isle against the parliament forces for a time in 1651. The new queen's landing pier (cost 46,400*l.*) inaugurated by the lieut. governor, H. B. Loch, 1 July, 1872. Act relating to the harbours and coasts, passed June, 1872. The first railway (from Douglas to Peel) opened, 1 July, 1873.—Revenue to government, 1873, 12,625*l.* 18*s.* 1*d.*—The BISHOPRIC is said to have been presided over by Amphibalus about 360. Some assert that St. Patrick was the founder of the see, and that Germanus was the first bishop, about 447. It was united to Sodor in 1113. The bishop has no seat in the house of lords; but lord Auckland (bishop, 1847-54) sat by right of his barony. Present income, 2000*l.*

MANASSAS JUNCTION (Virginia, United States), an important military position, where the Alexandria and Manassas Gap railways meet, near a creek named BULL RUN. 1. It was held by the confederates in 1861, when they were attacked by the federal general Irwin McDowell. He began his march from Washington on 16 July, and gained some advantage on the 18th at Centreville. On the 21st was fought the *first* battle of Bull Run. The federals, who began the fight, had the advantage till about three o'clock p.m., when the confederate general Johnston brought up reinforcements, which at first the federals took for their own troops. After a brief resistance, the latter were seized with sudden panic, and, in spite of the utmost efforts of their officers, fled, abandoning a large quantity of arms, ammunition, and baggage. The confederate generals Johnston and Beauregard did not think it prudent to pursue the fugitives, who did not halt till they arrived at Washington. The federal army is said to have had 481 killed, 1011 wounded, 1216 missing. The loss of the confederates was stated to be about 1500.—In March, 1862, when the army of the Potomac, under general McClellan, marched into Virginia, they found that the confederates had quietly retreated from the camp at Manassas. 2. On 30 Aug. 1862, this place was the site of another great battle between the northern and southern armies. In August, general "Stonewall" Jackson, after compelling the federal general Pope to retreat, defeated him at Cedar mountain on the 9th, turned his flank on the 22nd, and arriving at Manassas repulsed his attacks on the 29th. On the 30th general R. E. Lee (who had defeated general McClellan and the invading northern army before Richmond, 26 June to 1 July) joined Jackson with his army, and Pope received reinforcements from Washington. A desperate conflict ensued, which ended in the confederates gaining a decisive victory, compelling the federals to a hasty retreat to Centreville, where they were once more routed, 1 Sept. The remains of their army took refuge behind the lines of Washington on 2 Sept. Pope was at once superseded, and McClellan resumed the command to march against the confederates, who had crossed the Potomac and entered Maryland; see *United States*.

MANCHESTER (Lancashire), in the time of the Druids, was one of their most principal stations, and had the privilege of sanctuary attached to its altar, in the British language *Meyne*, a stone. It was one of the seats of the Brigantes, who had a castle, or stronghold, called *Mancenion*, or the place of tents, near the confluence of the rivers Medlock and Irwell. The site of this, still called the "Castle Field," was, about 79, selected by the Romans as the station of the *Cohors Prima Frisiorum*, and called by them *Mancunium*; hence its Saxon name *Manceastre*, from which its modern appellation is derived. *Lewis.*

MANCHESTER, BISHOPRIC OF. An order in council in Oct. 1838, declared that the sees of St. Asaph and Bangor should be united on the next vacancy in either, and that the bishopric of Manchester should be immediately created within the jurisdiction of the archiepiscopal see of York; the county of Lancaster for that purpose to be detached from Chester. By act 10 Vict. (1847) the sees of St. Asaph and Bangor were to exist undisturbed, and that of Manchester was to be created.

BISHOPS.

1847. James Prince Lee; died 24 Dec. 1869.
1870. James Fraser, Jan. 1870.

MANERU, near Puente de la Reyna Navarre. Here took place a conflict between the republicans, under Moriones, and the Carlists, under Otto; both claimed a victory; 6 Oct. 1873. The Carlists were considered to have the advantage.

MANES, the name applied by the ancients to the soul when separated from the body. The Manes were reckoned among the infernal deities, and were generally supposed to preside over the burial-places and monuments of the dead. They were worshipped by the Romans, and invoked by the augurs; Virgil (22 B.C.) makes his hero sacrifice to the Manes. The Romans superscribed their epitaphs with D. M., *Diis Manibus.*

MANGANESE. Black oxide of manganese, long used to decolorise glass, and called *Magnesia nigra*, was formerly included among the ores of iron. Its distinctive character was proved by the researches of Pott (1740), Kaim and Winterl (1770), and Scheele and Bergmann (1774); it was first eliminated by Gahn. Manganese combined with potassium is called mineral chameleon, from its rapid change of colour under certain circumstances. Forchammer employed it as a test for the presence of organic matter in water; and Dr. Angus Smith successfully applied this test to air in 1858.

MANICHEANS, a sect founded by Manes, in Persia, about 261. It spread into Egypt, Arabia, and Africa. A rich widow, whose servant Manes had been, left him much wealth, after which he assumed the title of Apostle, or envoy of Jesus Christ, and announced that he was the paraclete or comforter that Christ had promised to send. He maintained two principles, the one good he called light, the other bad he called darkness. He rejected the Old Testament, and composed a system of doctrine from Christianity and the dogmas of the ancient fire-worshippers. Sapor, king of Persia, believed in him at one time; but afterwards banished him. He was burnt alive by Bahram or Varanes, king of Persia, in 277. His followers spread themselves over the Roman empire, and several sects sprang from them.

MANILLA (built about 1573), capital of the Philippine isles, a great mart of Spanish commerce. Manilla was taken by the English, 6 Oct. 1762, when the archbishop engaged to ransom it for about a million sterling; never wholly paid. Manilla has suffered greatly by earthquakes. It is stated that nearly 3000 persons perished by one in 1645. In Sept. 1852, the city was nearly destroyed, and on 3 July, 1863, about a thousand lives were lost. The duke of Edinburgh was hospitably entertained here, 19 Nov. 1869.

MANNHEIM (S. Germany), founded in 1606, became the court residence of the palatine of the Rhine in 1719; but his becoming elector of Bavaria in 1777 caused the removal of the court to Munich. Mannheim surrendered to the French, under command of general Pichegru, 20 Sept. 1795. On 31 Oct. the Austrians under general Wurmser defeated the French near the city. Several battles were fought with various success in the neighbourhood during the wars of Napoleon I. Kotzebue, the popular dramatist, was assassinated at Mannheim, by Sand, a student of Wurtzburg, 2 April, 1819.

MANOMETER (Greek, *manos*, thin), an instrument for measuring the rarity of the atmosphere, gases, and vapours. One is said to have been made by Otto von Guericke about 1660, and the "statical barometer" of Robert Boyle was a simple manometer. Various forms of the apparatus were devised by Ramsden (about 1773), by Roy (1777), by Cazalet (1789), and by Bourdon and others. A manometer was constructed for the investigation respecting the elasticity of steam conducted by Prony, Arago, Dulong, and Girard, 1830.

MANITOBA, see *Rupert's Land* and *Hudson's Bay* (N. America), a new colony. A Fenian attack on the colony was suppressed by American troops about 12 Oct. 1871.

MANORS are as ancient as the Saxon times, and imply a territorial district with its jurisdiction, rights, and perquisites. They were formerly called baronies, and still are lordships. Each lord was empowered to hold a court called the court-baron for redressing misdemeanors, and settling disputes between the tenants. *Cabinet Lawyer.*

MANSION-HOUSE, LONDON. The residence of the lord mayor. It is situate at the east end of the Poultry on the site of the ancient Stocks-market. It was built of Portland stone by George Dance the elder, 1739-53; repaired and redecorated, 1867-68; see *Mayor.*

MANSION-HOUSE FRENCH RELIEF FUND for the sufferers by the siege of Paris, was established at a meeting at the Mansion-house, London, 18 Jan. 1871. In four days about 24,000*l.* had been received; up to 4 March, 113,599*l.*; finally, 126,609*l.* Col. H. Stuart Wortley and Mr. George Moore went to Paris on 3 Feb. with 68 tons of provisions, and personally superintended their distribution by the clergy, foreign consuls, and others. An official report issued by the lord mayor, dated 7 Nov. 1871, showed a balance of 4679*l.* in hand.

MANSION-HOUSE BENGAL RELIEF FUND, begun 24 Jan. 1874; prince of Wales became patron, 24 Feb.; public meeting, 14 April; above 55,000*l.* subscribed, 19 March; 125,000*l.*, 27 July, when the fund was closed.

MANSOURAH (Lower Egypt). Here *Louis* IX. was defeated by the Saracens and taken prisoner, 5 April, 1250. He gave Damietta and 400,000 livres for his ransom.

MANTINEA (Arcadia, Greece). Here—(1) Athenians and Argives were defeated by Agis II. of Sparta, 418 B.C. (2) And here Epaminondas and the Thebans defeated the combined forces of Lacedæmon, Achaia, Elis, Athens, and Arcadia, 362 B.C. Epaminondas was killed in the engagement, and Thebes lost its power among the Grecian states. The emperor Adrian built a temple at Mantinea in honour of his favourite Alcinoüs. The town was also called Antigonia. Other battles were fought in the neighbourhood.

MANTUA (N. Italy), an Etruscan city, near which Virgil was born, 70 B.C. Mantua was ruled by the Gonzagas, lords of Mantua, from 1328 to 1708, when it was seized by the emperor Joseph I. It surrendered to the French, 2 Feb. 1797, after a siege of eight months; retaken by the Austrians and Russians, 30 July, 1799, after a short siege. After the battle of Marengo (14 June, 1800), the French again obtained possession of it. It was included in the kingdom of Italy till 1814, when it was restored to the Austrians, who surrendered it to the Italians, 11 Oct. 1866, after the peace.

MAORIS, see *New Zealand.*

MAPLE-TREE. The *acer rubrum*, or scarlet maple, was brought here from N. America, before 1656. The *Acer Negundo*, or ash-leaved maple, before 1688. From the *Acer saccharinum* (introduced here in 1735) the Americans make very good sugar.

MARANON, see *Amazon.*

MARATHON (in Attica). Here, on 28 or 29 Sept. 490 B.C., the Greeks, only 11,000 strong, defeated the Persian army amounting to about 110,000. The former were commanded by Miltiades, Aristides, and Themistocles. Among the slain (about 6400) was Hippias, the instigator of the war. The Persian army was forced to retreat to Asia; see *Greece.*

MARBLE. Dipœnus and Scyllis, statuaries of Crete, were the first artists who sculptured marble, and polished their works; all statues previously being of wood, about 568 B.C. *Pliny.* The edifices or monuments of Rome were constructed of, or ornamented with, fine marble. The ruins of Palmyra are chiefly of white marble. The marble arch, London, erected at Buckingham palace, 1830, was removed to Hyde-park, March, 1851.

MARBURG (W. Germany). The cathedral was founded, 1231; and the first Protestant university in 1527. It suffered much during the Seven years' war, 1753-60.

MARCH, the first month of the year, until Numa added January and February, 713 B.C. Romulus, who divided the year into months, gave to this month the name of his supposed father, Mars; though Ovid observes, that the people of Italy had the month of March before the time of Romulus, but placed it differently in the calendar. The year formerly commenced on the 25th of this month; see *Year*.

MARCHES. The old boundaries between England and Wales, and England and Scotland. The Lords Marchers of the Welsh borders had vice-regal authority; the wardens of the Scotch marches were subordinate officers. These powers were abolished, 1536, and 1689.

MARCHFELD (Austria). Here Ottocar II. of Bohemia was defeated and slain by his rival, the emperor Rodolph of Hapsburg, 26 Aug. 1278; see *Bohemia*.

MARCIONITES, followers of Marcion, a heretic, about 150, who preceded the Manichees, and taught similar doctrines. *Cave*.

MARCOMANNI, a people of Southern Germany, expelled the Boii from Bohemia, and, united with other tribes, invaded Italy about 167, but were repelled by the emperors Antoninus and Verus. They were defeated by the legion called, from a fabled miracle, the Thundering Legion, 179; and finally driven beyond the Danube by Aurelian, 271.

MARENGO (N. Italy). Here the French army, commanded by Bonaparte, after crossing the Alps into Piedmont, attacked the Austrians, 14 June, 1800; his army was retreating, when the arrival of general Dessaix turned the fortunes of the day. The slaughter on both sides was dreadful. By a treaty between the Austrian general Melas and Bonaparte, signed 15 June, the latter obtained twelve strong fortresses, and became master of Italy.

MARESCHALS or MARSHALS, in France, were the esquires of the king, and originally had the command of the vanguard to observe the enemy and to choose proper places for its encampment. Till the time of Francis I., in 1515, there were but two marshals, who had 500 livres per annum in war, but no stipend in time of peace. The number was afterwards greatly increased. Napoleon's marshals were renowned for skill and courage; see *Marshal*.

MARIAN PERSECUTION, see *Protestants*.

MARIGNANO (now MALEGNANO), N. Italy, near Milan. Three battles have been fought near here—1. Francis I. of France defeated the duke of Milan and the Swiss, 13, 14 Sept. 1515; above 20,000 men were slain. This conflict has been called the Battle of the Giants.—2. Near here was fought the battle of Pavia (*which see*), 24 February, 1525.—3. After the battle of Magenta, 4 June, 1859, the Austrians entrenched themselves at Malegnano. The emperor sent marshal Baraguay d'Hilliers with 16,000 men to dislodge them, which he did with a loss of about 850 killed and wounded, on 8 June. The Austrians are said to have lost 1400 killed and wounded, and 900 prisoners, out of 18,000 engaged.

MARINER'S COMPASS, see *Compass*, and *Magnetism*.

MARINES were first established with the object of forming a nursery to man the fleet. An order in council, dated 16 Oct. 1664, authorised 1200 soldiers to be raised and formed into one regiment. In 1684, the third regiment of the line was called the Marine Regiment; but the system of having soldiers exclusively for sea service was not carried into effect until 1698, when two marine regiments were formed. More regiments were embodied in subsequent years; and in 1741 the corps consisted of ten regiments, each 1000 strong. In 1759 they numbered 18,000 men. In the latter years of the French war, ending in 1815, they amounted to 31,400, but there were frequently more than 3000 supernumeraries. The *jollies*, as they are called, frequently distinguished themselves. The "Royal Marine Forces" (so named 1 May, 1802), now comprehend artillery and light infantry. The vote for 1857 was for 16,000 marines, inclusive of 1500 artillery. *P. H. Nicolas*. Marine Engineers' Institution, founded in 1872.

MARINE SOCIETY (for the maintenance and instruction of boys for the navy), was founded by Jonas Hanway, 1756, and incorporated, 1772. It instituted the first training ship on the Thames, 1786. H.M.S. *Warspite* was burnt, without loss of life, 3 Jan. 1876; and the boys were removed to the *Conqueror*.

MARINO, SAN, a republic in central Italy. Its origin is ascribed to St. Marinus, a hermit, who resided here in the 5th century. Its independence was confirmed by pope Pius VII. in 1817. Population, in 1858, about 8000; in 1869, 7303; in 1874, 7816.

MARIOLATRY, worship of the virgin Mary, began in the 4th century, greatly increased in the 10th.

MARITIME EXHIBITION at Havre opened by representatives of the government 1 June, 1868: a similar exhibition was opened at Naples by the prince of Piedmont, 17 April, 1871; at Paris, 10 July, 1875.

MARK, a silver coin of the northern nations, and the name *mark-lubs* is still retained in Denmark. In England, the mark means the sum of 13*s*. 4*d*., and the name is retained in law courts.

MARKET, see *Smithfield*, *Metropolitan Cattle Market*, *London*, 1868.

MARK'S, St. (Venice). The church was erected in 829; the piazza in 1592.

MARLBOROUGH, STATUTES OF, were enacted in the castle of Marlborough, Wiltshire, 1267.—MARLBOROUGH HOUSE, Pall Mall, London, was built by Wren for the duke of Marlborough, 1709-10; was bought for the princess Charlotte and prince Leopold in 1817; held by queen Adelaide till 1849, and became the residence of the prince of Wales, 1863. See *Gems*.

MAROCCO, see *Morocco*.

MARONITES, Christians in the East, followers of one Maron in the 5th century; they are said to have embraced the errors of the Jacobites Nestorians, and Monothelites. About 1180 they numbered 40,000, living in the neighbourhood of mount Libanus, and were of service to the Christian kings of Jerusalem. They were reconciled to the church of Rome soon after. For an account of the massacres of the Maronites in 1860, see *Druses*.

MAROONS, a name given in Jamaica to runaway negroes. When the island was conquered from the Spaniards, a number of their negroes fled to the hills and became very troublesome to the colonists. A war of eight years' duration ensued,

when the Maroons capitulated on being permitted to retain their free settlements, about 1730. In 1795 they again took arms, but were speedily put down and many were transported. *Brande.*

MAR-PRELATE TRACTS, virulently attacking episcopacy, were mostly written, it is believed, by Henry Penry, who was cruelly executed, 29 May, 1593, for writing seditious words against the queen (found about his person when seized). The tracts appeared about 1586. Some had very singular titles: such as "An Almand for a Parrat," "Hay any Worke for Cooper?" &c. They were collected and reprinted in 1843.

MARQUE, LETTERS OF, see *Privateer.*

MARQUESAS ISLANDS (Polynesia) were discovered in 1595 by Mendana, who named them after the viceroy of Peru, Marquesa de Mendoça. They were visited by Cook in 1774, and were taken possession of by the French admiral Dupetit Thouars, 1 May, 1842.

MARQUIS, a dignity, called by the Saxons markin-reve, by the Germans markgrave, took its original from mark or March, a limit or bound (see *Marches*); the office being to guard or govern the frontiers of a province. Marquis is next in honour to a duke. The first Englishman on whom the title was conferred was the favourite of king Richard II., Robert de Vere, earl of Oxford, created marquis of Dublin, and placed in parliament between the dukes and earls, 1385. James Stewart, second son of James III. of Scotland, was made marquis of Ormond, in 1476, without territories, afterwards earl of Ross.

MARRIAGE was instituted by God (*Gen.* ii.), and confirmed by Christ (*Mark* x.), who performed a miracle at the celebration of one (*John* ii.). Matrimonial ceremonies among the Greeks are ascribed to Cecrops, king of Athens, 1554 B.C. See *Age.*

ROYAL MARRIAGE ACT was passed in 1772, in consequence of the marriage of the duke of Gloucester, the king's brother, with the widow of the earl Waldegrave, and of the duke of Cumberland with the widow of colonel Horton and daughter of lord Irnham. [By this act, none of the descendants of George II., unless of foreign birth, can marry under the age of 25, without the consent of the king; at and after that age, the consent of parliament is necessary to render the marriage valid.] The marriage of the duke of Sussex with the lady Augusta Murray, solemnised in 1793, was pronounced illegal, 1794, and the claims of their son, sir Augustus d'Este, declared invalid, by the house of lords, 9 July, 1844. He married lady Cecilia Underwood (afterwards duchess of Inverness), 1831.

H. R. H. the princess Louise was married to the marquis of Lorne by the queen's consent, 21 March, 1871.

* Of these marriages, it is stated in the registrar's returns that 47,570 men and 70,601 women could not write, and that they signed the marriage register with their marks.—In France, the marriages were 208,893 in 1820; 243,674 in 1825; and 259,177 in 1830. As respects Paris, 7754 marriages were, bachelors and maids, 6456; bachelors and widows, 368; widowers and maids, 708; widowers and widows, 222.

wife or a concubine, provided they had not both together. Constantine the Great checked concubinage, but did not abolish it. This ancient custom of the Romans was preserved, not only among the Lombards, but by the French when they held dominion in that country. Cujas assures us that the Gascons and other people bordering on the Pyrenean mountains had not relinquished this custom in his time, 1590. The women bore the name of "wives of the second order." *Henault.* See *Morganatic Marriages.*

DOUBLE MARRIAGES. There are some instances of a husband and two wives (but they are very rare) in countries where polygamy was interdicted by the state. The first Lacedæmonian who had two wives was Anaxandrides, the son of Leon, about 510 B.C. Dionysius of Syracuse married two wives, viz.: Doris, the daughter of Xenetus, and Aristomache, sister of Dion, 398 B.C. It is said that the count Gleichen, a German nobleman, was permitted, under peculiar circumstances, by Gregory IX., in A.D. 1237, to marry and live with two wives. The Mormonites practise and encourage polygamy.

FORCED MARRIAGES. The stat. 3 Henry VII. (1487) made the principal and abettors in marriages with heiresses, &c., contrary to their will, equally guilty as felons. By 39 Eliz. (1596) such felons were denied the benefit of clergy. This offence was made punishable by transportation, 1 Geo. IV. (1820). The remarkable case of Miss Wharton, heiress of the house of Wharton, whom captain Campbell married by force, occurred in William III.'s reign. Sir John Johnston was hanged for seizing the young lady, and the marriage was annulled by parliament, 1690.—Edward Gibbon Wakefield was tried at Lancaster, and found guilty of the felonious abduction of Miss Turner, 24 March, 1827; and his marriage with her was immediately dissolved by act of parliament.

MARRIAGES BY SALE. Among the Babylonians, at a certain time every year, the marriageable females were assembled, and disposed of to the best bidder. This custom is said to have originated with Atossa, daughter of Belochos, about 1433 B.C.

MARSEILLAISE HYMN. The words and music are ascribed to Rouget de Lille, or L'Isle, a French engineer officer, who composed it at the request of marshal Luckner, in 1791, to cheer the conscripts at Strasburg. It derived its name from a body of troops from Marseilles marching into Paris in 1792 playing the tune. The author was pensioned by Louis Philippe, 1830.

MARSHALSEA COURT, having jurisdiction in the royal palace, was very ancient, of high dignity, and coeval with the common law. Since the decision of the case of the Marshalsea (see *lord Coke's* 10 *Rep.* 68) no business has been done in this court; but it was regularly opened and adjourned at the same time with the Palace court, the judges and other officers being the same. These courts were removed from Southwark to Scotland-yard in 1801, were abolished by parliament, and discontinued 31 Dec. 1849; see *Prisons.*

MARSI, a brave people of Southern Italy, who, after several contests, yielded to the Romans, about 301 B.C. During the civil wars they and their allies rebelled, having demanded and been refused the rights of Roman citizenship, 91 B.C. After many successes and reverses, they sued for and obtained peace and the rights they required, 87 B.C. The Marsi being *Socii* of the Romans, this was called the *Social war.*

MARSTON MOOR (near York). The Scots and parliamentary army were besieging York, when prince Rupert, joined by the marquis of Newcastle, determined to raise the siege. Both sides drew up on Marston-moor, on 2 July, 1644, and the contest was long undecided. Rupert, commanding the right wing of the royalists, was opposed by Oliver Cromwell, at the head of troops disciplined by himself. Cromwell was victorious; he drove his op-

ponents off the field, followed the vanquished, returned to a second engagement and a second victory. The prince's artillery was taken, and the royalists never recovered the blow.

MARTELLO TOWERS or MORTELLA TOWERS, were circular buildings erected in the beginning of the present century, on the southern coast of England, and other parts of the empire, as defences against invasion.

MARTIAL LAW, see *Courts-Martial*, and *Military Law*.

MARTINESTI, see *Rimnik*.

MARTINIQUE (French West Indies), discovered in 1493 or 1502; settled by France, 1635. This and the adjacent isles of St. Lucia and St. Vincent, and the Grenadines, were taken by the British from the French in Feb. 1762. They were restored to France at the peace of the following year. They were again taken, 16 March, 1794; restored at the peace of Amiens in 1802; again captured 23 Feb. 1809. A revolution in this island in favour of Napoleon was finally suppressed by the British, 1 June, 1815, and Martinique reverted to its French masters. Severe earthquakes occurred here in 1767 and 1839.

MARTINMAS, 11 Nov., the feast of St. Martin, bishop of Tours, in the 4th century, is quarter day in parts of the north of England and in Scotland. The high sheriffs of England and Wales are nominated on the morrow of St. Martin, 12 Nov.

MARTINS' HALL, ST. (Long Acre, London), was opened as a concert-room for Mr. John Hullah, on 11 Feb. 1850; burnt down 26 Aug. 1860; rebuilt, 1861; opened as the New Queen's Theatre, by Mr. Alfred Wigan, 24 Oct. 1867.

MARTYRS. Stephen the first Christian martyr, was stoned, 37. The festivals of the martyrs, of very ancient date, took their rise about the time of Polycarp, who suffered martyrdom about 169. St. Alban is the English protomartyr, 286; see *Persecutions*, *Protestants*, and *Diocletian Era*. The Martyrs' Memorial, Smithfield, erected by the Protestant Alliance, was inaugurated 11 March, 1870. The Martyrs' memorial Church, St. John's-street, Clerkenwell, was consecrated 2 June, 1871.

MARYLAND, named after queen Henrietta Maria, one of the first thirteen United States of North America, was granted in 1632 to lord Baltimore, and settled by a company of English Romanists in 1634. It contains the district of Colombia, in which Washington is situate. It continued in the Union when the other slave states seceded in 1860 and 1861. The confederate army, under general Lee, after their victory at Bull Run, 30 Aug. 1862, crossed the Potomac and entered Maryland. They were followed by the federal army under McClellan. Severe conflicts ensued, especially on 17 Sept., at Antietam Creek, with great loss on both sides, each claiming the victory. The confederates retired into Virginia in good order, and it is said with much booty.

MASCAT, see *Muscat*.

MASKS. Poppæa, the wife of Nero, is said to have invented the mask to guard her complexion from the sun; but theatrical masks were in use among the Greeks and Romans. Horace attributes them to Æschylus; yet Aristotle says the inventor and time of their introduction were unknown.—Modern masks, and muffs, fans, and false hair for the women, were devised in Italy, and brought to England from France in 1572. *Stow*; see *Iron Mask*.

MASQUERADES were in fashion in the court of Edward III., 1340; and in the reign of Charles I. 1660, masquerades were frequent among the citizens. The bishops preached against them, and made such representations as occasioned their suppression, 9 Geo. I. 1724. They were revived and carried to a shameful excess in violation of the laws, and tickets of admission to a masquerade at Ranelagh were on some occasions subscribed for at twenty-five guineas each, 1776. *Mortimer*. At the close of a bal masqué, given by Anderson the Wizard, 5 March, 1856, Covent-garden theatre was destroyed by fire.

MASS, in the Roman church, is the office or prayers used at the celebration of the Eucharist, in memory of the passion of Christ, and to this every part of the service alludes. The general division consists in high and low; the first is that sung by choristers, and celebrated with the assistance of a deacon and sub-deacon; low masses are those in which the prayers are rehearsed without singing. Mass was first celebrated in Latin about 394; it was introduced into England in the 7th century. Prostration was enjoined at the elevation of the host in 1201. Dr. Daniel Rock, in "The Church of our Fathers" (1849), describes an ancient MS. of "The Service of the Mass, called the Rite of Salisbury," compiled for that cathedral, by St. Osmund and others, during the 12th century. The English communion service was adopted in 1549; see *Missal*, and *Ritualism*.

MASSACHUSETTS, the mother state of New England, North America, founded by the English puritans at Plymouth-rock, 1620. It abolished slavery 1783, and adopted the constitution of the United States, 1788.

Of the Jews, in England. Some few pressing into Westminster hall at Richard I.'s coronation, were put to death by the people; and a false alarm being given that the king had ordered a general massacre of them, the people in many parts of England slew all they met. MASTER OF THE CEREMONIES, see *Ceremonies.*

MASTERS IN CHANCERY, chosen from the equity bar, were first appointed, it is said, to assist the ignorance of sir Christopher Hatton, lord chancellor of England, in 1587. The office was abolished in 1852.

MASTER AND SERVANT ACT (amending the statute respecting them) was passed 20 Aug. 1867; see *Servants.*

Royal commission to examine into its working, reported 31 July; published evidence . Oct. 1874

MASTER OF THE GREAT WARDROBE, an officer of great antiquity and dignity. The establishment was abolished in 1782, and the duties transferred to the lord chamberlain.

MASTER OF THE REVELS, an officer of the court. Solomon Dayrolle was the last appointed. Part of the duties were transferred to the licenser of plays, 1737.

MASTER OF THE ROLLS, an equity judge, derives his title from having the custody of all charters, patents, commissions, deeds, and recognizances, entered upon rolls of parchment; his decrees are appealable to the court of chancery. The repository of public papers, called the Rolls, was in Chancery-lane. The rolls were formerly kept in a chapel founded for the converted Jews; but after the Jews were expelled the kingdom in 1290 it was annexed for ever afterwards to the office of the mastership of the rolls. Here were kept all the records since the beginning of the reign of king Richard III., 1483; all prior to that period being kept in the Tower of London; see *Records.* The first recorded master of the rolls was either John de Langton, appointed 1286, or Adam de Osgodeby, appointed 1 Oct. 1295; but it is clear that the office was in existence long before. *Hardy.* The duties were defined in 1833; the salary regulated in 1837.

MASTODON, see *Mammoth*.

MATCHES, see *Lucifers*.

MATERIALISM, the doctrine held by those who maintain that the soul of man is not a spiritual substance distinct from matter, but is the result of a particular organisation of matter in the body. The term is rather loosely applied to the system of Epicurus, about 310 B.C.; Hobbes, about A.D. 1642; Priestley, about 1772; and many eminent men in the present day. It is not necessarily identical with atheism.

MATHEMATICS formerly signified all kinds of learning; but the term is now applied to the sciences relating to numbers and quantity; see *Arithmetic*. Among the most eminent mathematicians were Euclid, 300 B.C.; Archimedes, 287 B.C.; Descartes, died 1650 A.D.; Barrow, died 1677; Leibnitz, died 1716; sir Isaac Newton, died 1727; Euler, died 1783; Lagrange, died 1813; Laplace, died 1827; and Dr. Peacock, died 1858; sir G. B. Airy (astronomer royal), Bartholomew Price, and I. Todhunter are eminent mathematicians. Mary Somerville, born 1790, author of the "Mechanism of the Heavens," died 1873. The London Mathematical Society was founded, 16 Jan. 1865; professor Aug. De Morgan, president.

MATHURINS, see under *Trinity*.

MATINS. The service or prayers first performed in the morning or beginning of the day in the Roman Catholic church. The *French Matins* were the massacre of St. Bartholomew, 24 Aug. 1572. The *Matins of Moscow* were the massacre of prince Demetrius, and the Poles his adherents, in the morning of 27 May, 1606.

MATTERHORN, a part of the main ridge of the Alps, about 14,836 feet high, S. Switzerland. After various fruitless attempts by professor Tyndall and other eminent climbers, in 1860, the summit was reached on 14 July, 1865, by Mr. Edward Whymper and others. During their descent, four of the party were killed. Mr. Hadow fell; the connecting rope broke, and he himself, lord Francis Douglas, the rev. Mr. Hudson, and Michael Croz, a guide, slipped down, and fell from a precipice nearly 4000 feet high. Miss Walker, with her father, ascended the Matterhorn, 22 July, 1871. Three gentlemen ascended without a guide, 21 July, 1876.

MAUNDY-THURSDAY (derived by Spelman from *mande*, a hand-basket, in which the king was accustomed to give alms to the poor; by others from *dies mandati*, the day on which Christ gave his grand *mandate*, that we should love one another), the Thursday before Good Friday. *Wheatly*. On this day it was the custom of our sovereigns or their almoners to give alms, food, and clothing to as many poor persons as they were years old. It was begun by Edward III., when he was fifty years of age, 1363, and is still continued.

MAUR, ST., see *Benedictines*.

MAURITANIA (N. Africa), with Numidia, became a Roman province, 45 B.C., with Sallust for pro-consul. Augustus created (30 B.C.) a kingdom formed of Mauritania and part of Getulia, for Juba II., a descendant of the ancient African princes. Suetonius Paulinus suppressed a revolt here, A.D. 42, when it was made a province, divided into parts. The country was subjugated by the Vandals and Greeks, and fell into the hands of the Arabs, about 667; see *Morocco*, and *Moors*.

MAURITIUS or **ISLE OF FRANCE** (in the Indian Ocean), was discovered by the Portuguese, 1505; but the Dutch were the first settlers in 1598. They called it after prince Maurice, their stadtholder, but on the acquisition of the Cape of Good Hope, they deserted it; and it continued unsettled until the French landed, and gave it the name of one of the finest provinces in France, 1715. This island was taken by the British, 2 Dec. 1810, and confirmed to them by the treaty of Paris in 1814. The bishopric was founded 1854. Sir Henry Barkly, governor, in 1863, succeeded by sir Arthur H. Gordon, 1870; sir Arthur Purves Phayre, 1874. Population in 1861, 313,462; in 1872, 326,454. In 1866 two railways were in progress; both now opened. By an awful hurricane, on 11 March, 1868, great damage was done to shipping and buildings, with much loss of life.

MAUSOLEUM. Artemisia married her own brother, Mausolus, king of Caria, Asia Minor, 377 B.C. At his death she drank in liquor his ashes after his body had been burned, and erected to his memory at Halicarnassus a monument, one of the seven wonders of the world (350 B.C.), termed *Mausoleum*. She invited all the literary men of her age, and proposed rewards to him who composed the best elegiac panegyric upon her husband. The prize was adjudged to Theopompus, 357 B.C. She died 352 B.C. The statue of Mausolus is among the antiquities brought from Halicarnassus by Mr. C. T. Newton in 1857, and placed in the British Museum. A mausoleum for the royal family of England was founded by the queen at Frogmore, 15 March, 1862.

MAUVE (French for *malva*, mallow), a dye produced by Dr. Stenhouse from lichens in 1848; now produced from *Aniline* (*which see*).

MAY, the fifth month of the year, received its name, some say, from Romulus, who gave it this appellation in respect to the senators and nobles of his city, who were denominated *majores*; others supposed it was so called from Maia, the mother of Mercury, to whom they offered sacrifices on the first day. The ancient Romans used to go in procession to the grotto of Egeria on May-day; see *Evil May-day*.

Mrs. Elizabeth Montague (who died in 1800) gave for many years, on May-day, an entertainment at her house in Portman-square, to the chimney-sweepers of London. They were regaled with roast beef and plum pudding, and a dance succeeded. Upon their departure, each guest received a shilling from the mistress of the feast. It is said, though the statement is much doubted, that this entertainment was instituted to commemorate the circumstance of Mrs. Montague's having once found a boy of her own, or that of a relation, among the sooty tribe. In allusion to this incident, perhaps, a story resembling the adventures of this lost child is pathetically related by Montgomery, in "The Chimney-Sweeper's Boy."

The annual festival of "Jack in the Green," and his companion sweeps, has gradually ceased, 1876.

MAYENCE, see *Mentz*.

MAY-FLOWER, see *Pilgrim Fathers*.

MAYNOOTH COLLEGE (Ireland), founded by parliament, 1795, and endowed by a yearly grant voted for the education of students designed for the Roman Catholic priesthood in Ireland. An act for its government was passed in 1800. It contains about 500 students. Permanent endowment of this college (30,000*l.* for the enlargement of the buildings and 26,000*l.* annually) was granted by parliament, June, 1845. This occasioned much controversy in England, a motion being made for its abolition almost every session. The college was repaired and enlarged in 1860. By the Irish Church act, passed 26 July, 1869, the annual parliamentary grant was to cease after 1 Jan. 1871; a compensation being made. A synod held here, Sept. 1875, condemned mixed education.

MAYO ASSASSINATION. Richard Southwell Bourke, earl of Mayo, was born 21 Feb. 1822. As lord Naas he was chief secretary for Ireland, in the Derby and Disraeli administrations, 1852, 1858-9, 1866-8. In Sept. 1868, he was appointed viceroy of India, and energetically fulfilled the duties. He was assassinated at Port Blair in the Andaman islands, on a visit of inspection, by Shere Ali, a convict, 8 Feb. 1872. The Indian government granted an annual pension of 1000*l.* to the countess, and 20,000*l.* for the children; and 1000*l.* a year was added to lady Mayo's pension by parliament, voted unanimously, 22 July, 1872.

MAYORS OF CORPORATIONS. At the time of the Norman conquest, 1066, the chief officer of London was called *port-grave*, afterwards softened into *port-reeve*, from Saxon words signifying chief governor of a harbour. He was afterwards called provost; but in Henry II.'s reign the Norman title of *maire* (soon after *mayor*) was brought into use. At first the mayor was chosen for life, but afterwards for periods of irregular duration; now he is chosen annually, but is eligible for re-election. He must be an alderman, and have been sheriff. His duties commence on 9 Nov. The prefix LORD is peculiar to the chief civic officer of London, Dublin, Edinburgh, and York.

MEAL TUB PLOT, against the duke of York, afterwards James II., contrived by one Dangerfield, who secreted a bundle of seditious letters in the lodgings of colonel Maunsell, and then gave information to the custom-house officers to search for smuggled goods, 23 Oct. 1679. After Dangerfield's apprehension, on suspicion of forging these letters, papers were found concealed in a *meal-tub* at the house of a woman with whom he cohabited, which contained the scheme to be sworn to, accusing the most eminent persons in the Protestant interest, who were against the duke of York's succession, of treason,—particularly the earls of Shaftesbury, Essex, and Halifax. On Dangerfield being whipped the last time, as part of his punishment, 1 June, 1685, one of his eyes was struck out by a barrister named Robert Francis. This caused his death, for which his assailant was hanged.

MEATH (Ireland). Many episcopal sees in Meath (as Clonard, Duleek, and others of less note) were fixed at Clonard, before 1151-2, when the division of the bishoprics in Ireland was made by John Paparo, then legate from Pope Eugene III. Eugene was the first styled bishop of Meath, about 1174. Meath was valued, 30 Henry VIII., at 373*l.* 12*s.* per annum.

MECCA (in Arabia), the birth-place of Mahomet, about 571, whence he was compelled to flee, 15 July, 622 (the Hegira). On one of the neighbouring hills is a cave, where it is asserted he retired to perform his devotions, and where the greatest part of the Koran was brought to him by the angel Gabriel, 604. Mecca, after being vainly besieged by Hosein for the caliph Yezid, 682, was taken by Abdelmelek, 692. In 1803 it fell into the hands of the Wahabees, a Mahometan sect. They were expelled by the pacha of Egypt in 1818, who retired in 1841. It is said that 160,000 pilgrims visited Mecca in 1858, and only 50,000 in 1859.

MECHANICS' INSTITUTIONS. One was founded by Dr. Birkbeck in London, and another in Glasgow, in 1823; and soon after others arose in different parts of the empire. They have revived since 1857, many noblemen and gentlemen giving lectures in them.

MECHANICS' MAGAZINE, weekly; established 30 Aug. 1823; was incorporated with a new paper termed "Iron," Jan. 1873.

MECHLIN or **MALINES** (Belgium), renowned for its lace manufacture, was founded in the 6th century; destroyed by the Normans in 884; sacked by the Spaniards, 1572; taken by the prince of Orange, 1578, and by the English, 1580; and frequently captured in the 17th and 18th centuries, partaking in the evil fortunes of the country. A Roman Catholic congress was held here Sept. 1867.

MECKLENBURG (N. Germany), formerly a principality in Lower Saxony, now independent as the two grand duchies of Mecklenburg-Schwerin (population in 1871, 557,734) and Mecklenburg-Strelitz (population in 1871, 96,982). The house of Mecklenburg claims to be descended from Genseric the Vandal, who ravaged the western empire in the 5th century, and died 477. During the Thirty years' war Mecklenburg was conquered by Wallenstein, who became its duke, 1628; it was restored to its own duke, 1630. After several changes the government was settled in 1701 as it now exists in the two branches of Schwerin and Strelitz. In 1815 the dukes were made grand dukes. The dukes joined the new North German confederation by treaty, 21 Aug. 1866. Disputes between the two chambers respecting a new constitution, Feb. 1875.

1860. Frederic William, born 17 Oct. 1819; married princess Augusta of Cambridge, 28 June, 1843.
Heir: his son, Adolphus-Frederic, born 22 July 1848.

The royal family of England is intimately allied with the house of *Mecklenburg-Strelitz*. King George III. married Charlotte, a daughter of the duke, in 1761; their son, the duke of Cumberland (afterwards king of Hanover) married princess Frederica Caroline, a daughter of the duke, in 1815.

MEDALS, see *Numismatics*. The ancient medals resembled medallions. Modern medals began about 1453 in Germany. The house of commons resolved to grant rewards and medals to the fleet whose officers (Blake, Monk, Penn, and Lawson) and men gained a glorious victory over the Dutch fleet, off the Texel, in 1653. Blake's medal of 1653 was bought by his majesty, William IV. for 150 guineas. In 1692 an act was passed for applying the tenth part of the proceeds of prizes for medals and other rewards for officers, seamen, and marines. Subsequent to Lord Howe's victory, 1 June, 1794, it was thought expedient to institute a naval medal. Medals were struck for the victory of Waterloo; a general war medal was ordered in 1847; and special medals were given after the Caffre and Chinese wars. Medals were presented by the queen to persons distinguished in the war in the Crimea, 18 May, 1855.

MEDICAL COUNCIL. The Medical Act, 1858, "to regulate the qualifications of practitioners in medicine and surgery;" was amended in 1860. It established "the General Council of Medical Education and Registration of the United Kingdom." The first meeting of this council took place on 23 Nov. 1858, when sir B. C. Brodie was elected first president (who on 30 Nov. was elected president of the Royal Society). He was succeeded by Mr. J. H. Green in June, 1860; by Dr. George Burrows, Jan. 1864. The first Medical Register was issued in July, 1859. In 1862 the council was incorporated by parliament, and authorised to prepare and sell a new Pharmacopœia, which was published as the "British Pharmacopœia," in 1864. New editions have appeared since.

MEDICI FAMILY, the restorers of literature and the fine arts in Italy, were chiefs or *signori* of the republic of Florence from 1434, in which year Cosmo de' Medici, who had been banished from the republic, was recalled and made its chief; he ruled for thirty years. Lorenzo de' Medici, styled "the Magnificent," and the "Father of Letters," ruled Florence from 1469 to 1492. Giovanni de' Medici (pope Leo X.) was the son of Lorenzo. *Roscoe.* From 1569 to 1737 the Medici family were hereditary grand dukes of Tuscany (*which see*). Cattarina de' Medici became queen of France in 1547, and regent in 1550. She plotted with the duke of Alva to destroy the Protestants in 1565.

MEDICINE, see *Physic*, and *Physicians*.

MEDINA (Arabia Deserta), famous for the tomb of Mahomet, in a large mosque, lighted by rich lamps. Medina was called the City of the Prophet, because here Mahomet was protected when he fled from Mecca, 15 July, 622; see *Hegira*. Medina was taken by the Wahabees in 1804; retaken by the pacha of Egypt, 1818.

The Megarians founded Byzantium 657 B.C. and sent a second colony, 628 B.C. The Megarian (Eristic or disputatious) school of philosophy was founded by Euclid and Stilpo, natives of Megara.

MEHADPORE or **MAHEDPORE** (W. India). Here sir Thomas Hislop and sir John Malcolm defeated the Mahrattas under Holkar, 21 Dec. 1817.

MEISTERSINGERS, see *Minnesingers*.

MELANESIA, South West Pacific Isles. The rev. J. C. Patteson (son of sir John), born 1827, was consecrated missionary bishop of Melanesia. He and the rev. J. Atkin were murdered at the isle of Santa Cruz, one of the Queen Charlotte group, by the natives, Sept. 1871, it is supposed in revenge for the kidnapping natives for slaves for Queensland and the Fiji isles, a measure which the bishop himself strenuously opposed.

MELAZZO (W. Sicily). Here Garibaldi, on 20, 21 July, 1860, defeated the Neapolitans under general Bosco, who lost about 600 men; Garibaldi's loss being 167. The latter entered Messina; and on 30 July a convention was signed, by which it was settled that the Neapolitan troops were to quit Sicily. They held the citadel of Messina till 13 March, 1861.

MELBOURNE ADMINISTRATIONS.

On the retirement of earl Grey, 9 July, 1834, viscount Melbourne * became first minister of the crown, 16 July. When viscount Althorp became earl Spencer, on his father's decease, Nov. same year, lord Melbourne waited on the king to receive his majesty's command as to the appointment of a new chancellor of the Exchequer, when his majesty said he considered the administration at an end. Sir Robert Peel succeeded, but was compelled to resign in 1835, and lord Melbourne returned to office. MELEGNANO, see *Marignano.*

MELFI (Apulia, S. Italy) was nearly destroyed by an earthquake, 14 Aug. 1851: about 600 persons perished.

MELODRAMA originated with or was introduced by Thomas Holcroft in 1793.

MELORA or **MELORIA,** a small isle in the Mediterranean, near which the Pisan fleet defeated the Genoese, in 1241, capturing many bishops going with much treasure to a council. The total destruction of the Pisan fleet on 6 Aug. 1284, by the Genoese near the same place, after a most sanguinary conflict, was considered to be the just punishment of their impiety.

MELOS (now Milo), one of the Cyclades in the Ægean sea, colonised by the Spartans about 1116 B.C. During the Peloponnesian war the Melians adhered to Sparta, till the island was captured, after seven months' siege, by the Athenians, who massacred all the men and sold the women and children as slaves, 416 B.C.

MEMEL, an important commercial port in Prussia, built about 1279. It was taken by the Teutonic knights, about 1328. It has suffered much by fire, and was almost totally destroyed 4 Oct. 1854. The loss was estimated at 1,100,000*l.*

MEMNONEIUM or **RAMESEION** (Thebes, Egypt), the tomb of Osymandyas, according to Diodorus, now considered to be that of Rameses III., 1618 B.C.

MEMORY, see *Mnemonics.*

MEMPHIS, an ancient city of Egypt ("of which the very ruins are stupendous"), is said to have been built by Menes, 3890 B.C.; or by Misraim, 2188 B.C. It was restored by Septimius Severus, A.D. 202. The invasion of Cambyses, 525 B.C., began the ruin of Memphis, and the founding of Alexandria, 332, completed it. In the 7th century, under the dominion of the Saracens, it fell into decay.—**MEMPHIS,** Tennessee, U. S., on the Mississippi, was taken from the confederates by the federals after a severe conflict, 6 June, 1862.

MENAI STRAIT (between the Welsh coast, and the isle of Anglesey). Suetonius Paulinus, when he invaded Anglesey, transported his troops across this strait in flat-bottomed boats, while the cavalry swam over on horseback, and attacked the Druids in their last retreat. Their horrid practice of sacrificing their captives, and their opposition so incensed the Roman general, that he gave the Britons no quarter, throwing all that escaped from that battle into fires which they had prepared for the destruction of himself and his army, 61.—In crossing this strait, a ferry-boat was lost, and fifty persons, chiefly Irish, 4 Dec. 1785. The road from London to Holyhead has long been regarded as the highway from the British metropolis to Dublin; Mr. Telford was applied to by the government to perfect this route by the London and Holyhead

mail-coach road, which he did by erecting beautiful suspension bridges over the river Conway and the Menai Strait, commenced in July, 1818, finished in July, 1825, opened 30 Jan. 1826. The Britannia tubular bridge over the Menai was constructed by Stephenson and Fairbairn in 1849-50; see *Tubular Bridges.*

MENDICANT FRIARS. Several religious orders commenced alms-begging in the 13th century, in the pontificate of Innocent III. They spread over Europe, and formed many communities; but at length by a general council, held by Gregory X. at Lyons, in 1272, were reduced to four orders—Dominicans, Franciscans, Carmelites, and Augustines. The Capuchins and others branched off; see *Franciscans*, &c.

MENDICITY SOCIETY (Red Lion-square, London), was established in 1818 for the suppression of public begging, and other impositions. Tickets received from the society are given by subscribers to beggars, who obtain relief at the society's house, if deserving. The society has caused above 23,000 vagrants to be convicted as impostors. In 1857, 54,074 meals; in 1860, 42,912; in 1865, 52,137; in 1872, 26,330 were distributed. In 1857, 3785; and in 1865, 3809; in 1872, 2192 begging letters were investigated. See *Poor*. The society has been much aided by the action of the charity organization society; established in 1870.

MENIPPÉE, see *Satire.*

MENSURATION. The properties of conic sections were discovered by Archimedes, to whom the chief advancement in mensuration may be attributed. He also determined the ratio of spheres, spheroids, &c., about 218 B.C.; see *Arithmetic.* The *Mensurator*, a new machine for the solution of triangles, was explained by Mr. W. Marsham Adams, at the British Association Meeting at Brighton, Aug. 1872.

MENTANA, (near Monte Rotondo, in the old papal states). Here Garibaldi and his volunteers, after having intrenched his positions at Monte Rotondo and Mentana on their march towards Tivoli, on Sunday, 3 Nov. 1867, were totally defeated by the pontifical and French troops under generals Kanzlar and Polhès, after a severe conflict, in which general Failly said "the Chassepot rifles did wonders." There were about 5000 men on each side, but the Garibaldians were very badly armed. The loss of the papal and French troops was about 200 killed and wounded; that of Garibaldi about 800. Garibaldi crossed the Italian frontier, and was arrested at Correse, and eventually sent to Caprera (about 25 Nov.). See *Rome.*

MENTZ or MAYENCE (S. W. Germany), the Roman *Moguntiacum*, built about 13 B.C. The archbishopric was founded by Boniface, 745. Many diets have been held here; and here John Faust established a printing press, about 1440. A festival in honour of John Guttenburg was celebrated here in 1837. See *Printing*. Mentz was given up to the Prussians, 26 Aug. 1866.

Their school was founded in 1561. *Stow.*

MERCHANT SHIPPING ACT of 1854 was amended by acts passed in 1862, 1867, 1871, 1872, and 1873. The Act suddenly passed 13 Aug. 1875, gave further power to the Board of Trade for stopping unseaworthy ships. Another Act passed 15 Aug. 1876; see *Seamen.*

MERIDA (Spain), a town in Estremadura (built by the Romans), was taken by the French, Jan. 1811. Near this town, at Arroyos Molinos, the British army under general (afterwards lord) Hill defeated the French under general Girard, after a severe engagement, 28 Oct. 1811. The British took Merida from the French in 1812, general Hill leading the combined forces of English and Spanish troops.

MESMERISM. Frederick Anthony Mesmer, a German physician, of Merseburg, published his doctrines in 1766, contending, in a thesis on planetary influence, that the heavenly bodies diffused through the universe a subtle fluid which acts on the nervous system of animated beings. Quitting Vienna for Paris, in 1778, he gained numerous proselytes and much money. A committee of physicians and philosophers investigated his pretensions, and Bailly, in a paper drawn up in 1784, exposed the futility of animal magnetism. Mesmerism excited attention again about 1848, when Miss Harriet Martineau and others announced their belief in it. In 1859, the Mesmeric Infirmary issued its tenth annual report, archbishop Whately being president, and the earl of Carlisle and Mr. Monckton Milnes (since lord Houghton) among the vice-presidents.

MESSENIA (now *Maura-Matra*), in the Peloponnesus, a kingdom founded by Polycaon, 1499 B.C. It had long sanguinary wars with Sparta, and once contained a hundred cities. It was at first governed by kings; after its restoration to power in the Peloponnesus it formed an inferior republic, under the protection first of the Thebans, and afterwards of the Macedonians.

The *first* Messenian war began 743 B.C.; was occasioned by violence offered to some Spartan women in a temple of devotion common to both nations; the king of Sparta being killed in his efforts to defend the females. Eventually, Ithome was taken, and the Messenians became slaves to the conquerors	724

METALS. The metals and metalloids are now about fifty in number. Tubal-Cain is mentioned as an "instructor of every artificer in brass and iron." (*Gen.* iv.) Moses and Homer speak of the seven metals, and Virgil of the melting of steel. The Phœnicians had great skill in working metals. Bunsen and Kirchhoff's method of chemical analysis by means of the spectrum has added cæsium, rubidium, thallium, and indium to the known metals. See *Elements*, *Mines*, *Iron*, and the other metals.

METAMORPHISTS in the 15th century affirmed that Christ's natural body, with which he ascended into heaven, was wholly deified.

METAPHYSICS, the science of abstract reasoning, or that which contemplates the existence of things without relation to matter. The term, literally denoting "after physics," originated from these words having been put at the head of certain essays of Aristotle, which follow his treatise on Physics. *Mackintosh*. Modern metaphysics arose in the 15th century—the period when an extraordinary impulse was given to the study of the human mind in Europe, commonly called the "revival of learning." Hobbes, Cudworth, S. T. Coleridge, Dugald Stuart, and sir W. Hamilton, were eminent British metaphysicians, and Descartes, Pascal, Kant, Schelling, and Fichte, foreign ones. See *Philosophy*.

METAURUS, a river in central Italy, where Hasdrubal, the brother of Hannibal, was defeated and slain, 207 B.C., when marching with abundant reinforcement. The Romans were led by Livius and Claudius Nero, the consuls. The latter commanded the head of Hasdrubal to be thrown into his brother's camp. The victory saved Rome.

METEMPSYCHOSIS, a doctrine attributed to Pythagoras, about 528 B.C., asserts the transmigration of the soul from one body to another. It is also ascribed to the Egyptians, who would eat no animal food lest they should devour the body into which the soul of a deceased friend had passed. They had also an idea that so long as the body of the deceased was kept entire, the soul would not transmigrate; and therefore embalmed the dead. See *Buddhism*.

METEOROGRAPH, an apparatus for the invention of which father Secchi of Rome received a prize at the Paris International Exhibition, July, 1867. It is self-acting, and registers the various changes of the atmosphere in the form of a diagram.

METEOROLOGY (from the Greek *meteōros*, aërial), the science which treats of the phenomena which have their origin in the air, such as rain, lightning, meteors, fogs, &c. Bacon, Boyle, and Franklin wrote on the subject.

John Dalton's essay on meteorology appeared in 1793.
Luke Howard's work on the clouds appeared in 1802, and his "Barometrographia" in 1848. See *Clouds*.
Sir W. Reed published his work on the "law of storms" in 1838. The works of Daniell (1845), Kæmtz (1845), Müller (1847), and Buchan (1867) are esteemed.

Mr. James Glaisher, the secretary of the Meteorological Society (established in 1850 and chartered in 1866) is a most eminent meteorologist. By his exertions the apparatus at Greenwich was erected; and meteorology, has appeared in the "Greenwich Observations" since 1848. See *Balloon—Scientific Ascents.*

Meteorological observatories have been erected in all parts of the globe.

The Meteorological department of the board of trade, established in 1855, under admiral Fitzroy, commenced the publication of reports in 1857. The admiral published his "Weather-Book" in 1863. His exertions are said to have overworked his brain; and on 30 April, 1865, he died by his own hand. The meteorological office was soon after placed under the direction of Mr. Robert H. Scott. It has issued apparatus and instruction books to captains of ships and established observatories in many places in the empire.

The Kew meteorological observatory given to the British Association in April, 1860: was purchased and presented to the Royal Society by Mr. J. P. Gassiot, 1871.

At the recommendation of M. Le Verrier and admiral Fitzroy, meteorological information, obtained by the telegraph from the principal places in the United Kingdom, has been transmitted daily to Paris, and thence to other parts of Europe since 1 Sept. 1860.

METEORS, LUMINOUS, include shooting stars, fire-balls, and falling stones or aërolites. They were described by Halley, Wallis, and others early in the 17th century. The periodicity of the star showers about the 10th of August (termed in the middle ages St. Lawrence's tears) was discovered separately by Quetelet, 1836, and by Herrick in 1837. The following are remarkable epochs for their annual return:—2 Jan.; 29 July; 3 and 9-12 Aug.; 8-14 Nov.; 11 Dec. *R. P. Greg.* See *August.*

The magnificent continuous star-shower of 14 Nov. 1866, had been predicted by professor Newton some time previously. A fine display occurred on the night of 13 Nov. 1868, in the United States. A similar phenomenon had been witnessed by Humboldt at Cumana (S. A.), 12 Nov. 1799; and by Dr. D. Olmsted, at Newhaven (U.S.), 13 Nov. 1833. They were well observed in Britain and Europe, 27 Nov. 1872.

AEROLITES, falling-stones, accompanying meteors, are found in our museums. They contain iron, nickel, and other minerals.

METHOD (Greek, a way of transit), that which gives to knowledge its character. S. T. Coleridge's treatise on the science of method is prefixed to the first volume of the "Encyclopædia Metropolitana." 1845.

The most recent work on this subject is Professor Stanley Jevons' "Principles of Science: a treatise on Logic and Scientific Method," 1874. "The powers of mind concerned in creation of science are discrimination, detection of identity, and retention."

METHUEN TREATY, a treaty for regulating the commerce between Great Britain and Portugal, made 27 Dec. 1703, concluded by Paul Methuen, our ambassador at Lisbon. It greatly favoured the importation of port wine into this country by lowering the duty, to the discouragement of French wines. It was abrogated in 1834.

In 1861 an act was passed permitting the methylated spirits to be retailed by licence.

METONIC CYCLE, a period of 19 years, or 6940 days, at the end of which the changes of the moon fall on the same days; see *Calippic Period.*

METRIC SYSTEM. Before the revolution there was no uniformity in French weights and measures. On 8 May, 1790, the constituent assembly charged the Academy of Sciences with the organisation of a better system. The committee named for the purpose by the academy included the names of Berthollet, Borda, Delambre, Lagrange, Laplace, Méchain, and Prony. Delambre and Méchain were charged with the measurement of an arc of the meridian between Dunkirk and Barcelona, and from their calculations the *mètre,* which is equal to a ten-millionth part of the distance between the poles and the equator (3·2808 English feet) was made the unit of length and the base of the system by law on 7 April, 1795. The system was completed in 1799, and made by law the only legal one on 2 Nov. 1801. A decree on 12 Feb. accommodated the old measures to the new system; but on 4 July, 1837, it was decreed that after 1 Jan. 1840, the metric and decimal system in its primitive simplicity should be used in all business transactions. The example of France has been followed by the greater part of Europe, and will probably in time be adopted in the British empire.

Much discussion ensued respecting the appointment of his successor; Mr. Bruce, the home secretary, having intimated the probability of the office being abolished by parliament, with other changes, 11 Aug. METZ, a fortified city in Lorraine, now in the department of the Moselle, N.E. France. It was the Roman Divodunum or Meti, capital of the Mediomatrici, a powerful Gaulish tribe, and afterwards of the kingdom of Austrasia, or Metz, in the 6th century. It was made a free imperial city, 985. It was besieged by Charles VII. of France for seven months in 1444, and was ransomed for 100,000 florins; was captured by Henry II., 10 April, 1552, and successfully defended by the duke of Guise against the emperor Charles V. with an army of 100,000 men, 31 Oct. 1552 to 15 Jan. 1553. Metz was ceded to France by the peace of Westphalia, 24 Oct. 1648, and was fortified by Vauban and Belleisle. On 28 July, 1870, the emperor Napoleon III. arrived at Metz and assumed the chief command. After the disastrous defeats at Woerth and Forbach, on 6 Aug. the whole French army (except the corps of MacMahon, De Failly, and Douay) was concentrated here, 10, 11 Aug., and by delay was hemmed in by the Germans. Marshal Bazaine assumed the chief command, 8 Aug. The emperor departed with the vanguard, which crossed the Moselle early on 14 Aug.

By the unexpected unmasking of a mitrailleuse battery, Henry, prince of Reuss, and many German nobles were killed in a few moments. The victory was at first claimed by the French. (This battle, the most sanguinary in the war hitherto, included a Balaclava charge of a German regiment of cavalry upon a French battery, by which it was decimated, but to which the victory was greatly due. Twice as many Germans were killed as at Königgrätz, the killed and wounded being estimated at 17,000. The French loss was said to have been equally great) 16 Aug. ,,
Bazaine masses his troops for a decisive conflict, 17 Aug. ,,
Battle of Rézonville or Gravelotte, gained by the combined 1st and 2nd armies, commanded by the king in person, after twelve hours' fighting. "The most desperate struggle took place on the slopes over Gravelotte, which the Germans gained by nightfall, after repeated fatal charges; the fortune of the day being long in suspense. But the right of the French had been outflanked, they fell back fighting to the last, and retired under cover of Metz. The French are said to have lost 19,600; and the Germans, 25,080." (The king, on the 19th, had not undressed for thirty hours. The carnage is considered to have been unexampled; a large number of French prisoners were made; and enormous loss was experienced by the imperial guard. The German army included Saxons and Hessians), 18 Aug. ,,

This order of knighthood, founded for the Ionian Isles and Malta, 27 April, 1818, was reorganised in March, 1869, in order to admit servants of the crown connected with the colonies. Among the first of the new knights were the earl of Derby, earl Russell, and earl Grey.

MICHAELMAS, 29 Sept., the feast of St. Michael, the reputed guardian of the Roman Catholic church, under the title of "St. Michael and All Angels." Instituted, according to Butler, 487.

The custom of eating goose at Michaelmas has been erroneously attributed to Queen Elizabeth's eating of the bird at dinner on 29 Sept. 1588, at the house of sir Neville Umfreyville, at the time she heard of the destruction of the Spanish Armada. The custom is of much older date, and is observed on the continent. *Clavis Calendaria.*

MICHAEL'S MOUNT, ST. (Cornwall), is considered by some to be the Iktis of Diodorus Siculus, and an ancient resort of the tin merchants. St. Michael was said to have appeared on the mount, 495 or 710; and the place, thus reputed holy, became the seat of a body of monks, who received a charter from Edward the Confessor, 1044, and many privileges from pope Gregory VII., 1079.

MICROSCOPES, said to have been invented by Jansen, in Holland, about 1590; by Fontana, in Italy, and by Drebbel, in Holland, about 1621. Those with double glasses were made at the period when the law of refraction was discovered, about 1624. Solar microscopes were invented by Dr. Hooke. In England great improvements were made in the microscope by Benjamin Martin (who invented and sold pocket microscopes about 1740), by Henry Baker, F.R.S., about 1763, and still greater during the present century by Wollaston, Ross, Jackson, Varley, Powell, and others. *Diamond microscopes* were made by Andrew Pritchard in 1824; and the properties of "test objects" to prove

the qualities of microscopes, discovered by him and Goring in 1824-40. A *binocular microscope* (*i.e.*, for two eyes), was constructed by professor Riddell in 1851, and Wenham's important improvements were made known in 1861. Treatises on the microscope by J. Quekett (1848), by Dr. W. B. Carpenter (1856), by Dr. Lionel Beale (1858-64), and Griffith and Henfrey's "Micrographic Dictionary" (1856), are valuable. The Microscopical Society of London was established 20 Dec. 1839, and the Quekett Microscopical Club, 1865. In 1865 Mr. H. Sorby exhibited his *spectrum microscope*, by which the millionth of a grain of blood was detected.

MIDWIFERY. Women were the only practitioners among the Hebrews and Egyptians. Hippocrates, in Greece, 460 B.C. is styled the father of midwifery, as well as of physic.* It advanced under Celsus, who flourished A.D. 37, and of Galen, who lived 131. In England midwifery became a science about the period of the institution of the college of physicians, 10 Hen. VII. 1518. * Agnodice, an Athenian virgin, disguised her sex to learn medicine. She was taught by Hierophilus, her father, the art of midwifery, and, when employed, always discovered her sex to her patients. This brought her into so much practice, that the profession, now out of employment, accused her, before the Areopagus, of corruption. She confessed her sex to the judges, and a law was made to empower all free-born women to learn midwifery. The whole story is doubtful.

MILLENARIANS suppose that the world will end at the expiration of the seven thousandth year from the creation; and that during a thousand years (millennium) Christ and the saints will reign upon the earth; see *Rev.* xx. MINERALOGY AND MINES. Strabo and Tacitus enumerate gold and silver as among the products of Britain. The earliest instance of a claim to a mine royal being enforced occurs 47 Hen. III. 1262. It related to mines containing gold, together with copper, in Devonshire. In Edward I.'s reign, according to Mr. Ruding, the mines in Ireland, which produced silver, were supposed to be so rich that the king directed a writ for working them to Robert de Ufford, lord justice, 1276. The lead mines of Cardiganshire, from which silver has ever since been extracted, were discovered by sir Hugh Middleton in the reign of James I.; see *Coal,* and the various metals.

The study of mineralogy was advanced by Becker, Kircher, and Woodward in the 17th century.

MINIÉ RIFLE, invented at Vincennes, about 1833, by M. Minié (born 1810). From a common soldier he raised himself to the rank of chef d'escadron. His rifle, considered to surpass all made previous to it, was adopted by the French, and, with modifications, by the British, 1852; see *Fire Arms.*

MINIMS (from *minimi,* the least), an order of monks, founded by S. Francisco di Paolo, in Calabria, received their name, as professing themselves inferior to the Minorites (from *minor,* less); see *Franciscans.* St. Francis died in France in 1507; where he had established houses of his order.

* This militia act was consequent upon the then prevailing opinion of the necessity of strengthening our national defences against the possibility of French invasion. The act empowered her majesty to raise a force not exceeding 80,000 men, of which number 50,000 were to be raised in 1852, and 30,000 in 1855; the quotas for each county or riding to be fixed by an order in council.

MINISTER OF WAR, see *War Minister*.

MINISTERS, see *Administrations*.

MINISTERS in Scotland: church patronage was abolished in 1874.

MINNESINGERS, lyric German poets, of the 12th and 13th centuries, who sang of love and war to entertain knights and barons of the time. The *Meistersingers*, their successors, an incorporated fraternity in the 14th century, composed satirical ballads for the amusement of the citizens and lower classes. Hans Sachs, a shoemaker (1494-1576), a poet of the reformation, was for a time their dean. His works were published at Nuremberg, 1560. "Owleglass" and "Reynard the Fox," are attributed to the Meistersingers.

MINNESOTA, a western state of N. America, was organised as a territory, 3 March, 1849, and admitted into the union in 1857. On 17 Aug. 1862, the Sioux Indians commenced a series of outrages at Acton in Messler county, desolating the country and massacring above 500 persons, of both sexes, and of all ages. General Sibley beat the Indians in two battles and rescued many captives. Thirty-eight Indians were executed as assassins.

MINORCA AND MAJORCA, the Balearic Isles (*which see*). Minorca was captured by lieutenant-general Stanhope and sir John Leake in 1708, and was ceded to the British by the treaty of Utrecht in 1713. It was retaken by the Spanish and French in July, 1756, and admiral Byng fell a victim to public indignation for not relieving it; see *Byng*. It was restored to the British at the peace in 1763; taken 5 Feb. 1782; again captured by the British under general Stuart, without the loss of a man, 15 Nov. 1798; given up at the peace of Amiens, 25 March, 1802.

MINORITIES. In the new reform bill, passed 15 Aug. 1867, provision was made for the representation of minorities in constituencies with three members by limiting each elector to two votes. It was introduced as an amendment by lord Cairns in the lords, 30 July, and accepted by the commons, Aug. 1867. The principle was adopted in a new constitution by the state of Illinois, U.S., July, 1870.

MINSTER, or **MONASTERIUM**, a place occupied by monks; see *Westminster* and *York*.

MINSTRELS, originally pipers appointed by lords of manors to divert their copyholders while at work, owed their origin to the glee men or harpers of the Saxons, and continued till about 1560. John of Gaunt erected a court of minstrels at Tutbury in 1380. So late as the reign of Henry VIII. they intruded without ceremony into all companies, even at the houses of the nobility; but in Elizabeth's reign they were adjudged rogues and vagabonds (1597).

MINT. Athelstan enacted regulations for the government of the mint about 928. There were several provincial mints under the control of that of London. Henry I. is said to have instituted a mint at Winchester, 1125. Stow says the mint was kept by Italians, the English being ignorant of the art of coining, 7 Edw. I. 1278. The operators were formed into a corporation by the charter of king Edward III., in which condition it consisted of the warden, master, comptroller, assay-master, workers, coiners, and subordinates. The first entry of gold brought to the mint for coinage occurs in 18 Edw. III. 1343. Tin was coined by Charles II. 1684; and gun-metal and pewter by his successor James after his abdication. Sir Isaac Newton was warden, 1699-1727, during which time the debased coin was called in, and new issued at the loss of the government. Between 1806 and 1810, grants amounting to 262,000*l.* were made by parliament for the erection of the present mint, which was completed in 1810; it was injured by fire, 31 Oct. 1815. The new constitution of the mint, founded on the report of the hon. Wellesley Pole, took effect in 1817. Professor Thomas Graham, the master of the mint, died 16 Sept. 1869. By the Coinage Act, passed 4 April, 1870, the office was combined with that of the chancellor of the exchequer, the duties being transferred to the deputy-master (Mr. C. W. Freemantle).

MINUET, a French dance, said to have been first danced by Louis XIV. 1653.

MINUS, see *Plus*.

MIRACLE PLAYS, see under *Drama*.

MIRRORS. In ancient times mirrors were made of metal; those of the Jewish women of brass. Mirrors of silver were introduced by Praxiteles, 328 B.C. Mirrors or looking-glasses were made at Venice, A.D. 1300; and in England, at Lambeth, near London, in 1673. The improvements in manufacturing plate-glass, and that of very large size, have cheapened looking-glasses very much. Various methods of coating glass by a solution of silver, thus avoiding the use of mercury, so injurious to the health of the workmen, have been made known; by M. Petitjean in 1851; by M. Cimeg in 1861, and by Liebig and others.

MISCHNA, see *Talmud*.

MISSAL, or **MASS BOOK**, the Romanist ritual compiled by pope Gelasius I. 492-6; revised by Gregory I. 590-604. Various missals were in use till the Roman missal was adopted by the council of Trent, 1545-63. The missal was superseded in England by the book of common prayer, 1549.

MISSIONARY BISHOPS, see under *Bishops*.

MISSIONS *, see *Mark* xvi. 15. Among the Romanists, the religious orders of St. Dominic, St. Francis, St. Augustin, &c., have missions to the Levant and to America. Marco Polo is said to have introduced missionaries into China, 1275. The Jesuits have missions to China (*which see*) and to most other parts of the world. Among the Protestants, an early undertaking of this kind was a Danish mission, planned by Frederick IV. in 1706. The Society for the Propagation of the Gospel in foreign parts was established 1701, and the Moravian Brethren encouraged missions about 1732. The London Missionary Society held their first

meeting, 4 Nov. 1794. Most Christian sects now support missions.

Commander Allan Gardner, R.N., who left England in the *Ocean Queen* in Sept. 1850, on the Patagonian mission, with Mr. Williams, surgeon, Mr. Maidment, catechist, and four others, died on Picton Island, at the mouth of the Beagle Channel, to the south of Tierra del Fuego, having been starved to death; all his companions having previously perished, 6 Sept. 1851.

M. Schoffler, a missionary to Cochin-China, was publicly executed at Son-Tay, by order of the grand mandarin, for preaching Christianity, such preaching being prohibited by the law of that country, 4 May, 1851.

MISSISSIPPI, a great river, N. America, explored by De Soto about 1541. The Mississippi trade was begun in England, in Nov. 1716. Law's Mississippi scheme in France, commenced about the same period, exploded in 1720; at which time the nominal capital is said to have amounted to 100,000,000*l*. The ruin of thousands soon followed. See *Law's Bubble*.—The North American state, **MISSISSIPPI**, was settled in 1716; admitted as a state of the union, 1817; seceded from it by ordinance, 8 Jan. 1861; submitted, 1865. Capital, Jackson.

MISSOLONGHI, a town in Greece, taken from the Turks, 1 Nov. 1821, and heroically and successfully defended against the Turks by Marco Botzaris, Oct. 1822—27 Jan. 1823. It was taken 22 April, 1826, after a long siege. Here Lord Byron died, 19 April, 1824. It was surrendered to the Greeks in 1829.

MISSOURI, a south-western state in N. America, was settled in 1763, and admitted into the union, 10 Aug. 1821. It decided on neutrality in the conflict of 1861, but was invaded by both the confederate and federal forces in June of that year, and became one of the seats of war. Capital, Jefferson city; see *United States*, 1861 *et seq.*—For the **MISSOURI COMPROMISE**, see *Slavery in America*.

MISTLETOE, see *Wrecks*.

MITHRIDATE, a medical preparation in the form of an electuary, supposed to be an antidote to poison and the oldest compound known, is said to have been invented by Mithridates, king of Pontus, about 70 B.C.

MITHRIDATIC WAR, caused by the massacre of 80,000 Romans, by Mithridates VI., king of Pontus, 88 B.C., and remarkable for its duration, its many sanguinary battles, and the cruelties of its commanders. Mithridates having taken the consul Aquilius, made him ride on an ass through a great part of Asia, crying out as he rode, "I am Aquilius, consul of the Romans." He is said to have killed him by causing melted gold to be poured down his throat, in derision of his avarice, 85 B.C. Mithridates was defeated by Pompey, 66 B.C.; and committed suicide, 63 B.C.

MITRAILLEUSE, or **MITRAILLEUR**, a machine-gun in which 37 or more large-bored rifles are combined with breech-action, by means of which a shower of bullets may be rapidly projected by one man. It was invented in Belgium, and adopted by the French emperor soon after the Prusso-Austrian war in 1866, and was much used in the Franco-Prussian war in 1870. Its peculiar "dry, shrieking, terrible sound" was described in the bombardment of Saarbrück, 2 Aug. 1870. Modifications of the mitrailleuse have been made by Montigny and others. The Fosbery mitrailleuse was tried and approved at Shoeburyness, 11 Aug. 1870.—It is mentioned in *Grose's Military Antiquities* (1801) that in England, in 1625, a patent was granted to William Drummond for a machine composed of a number of muskets joined together, by the help of which two soldiers can oppose a hundred, and named, on account of its effect, "thunder carriage," or more usually, "fire carriage." An English mitrailleuse, a modification of the American gatling, containing 50 cartridges, was tried at Woolwich, 18 Jan. 1872; fifty of them were ordered to be made by Armstrong.

MITRE. The cleft cap or mitre was worn by the Jewish high-priest, 1491 B.C. It had on it a golden plate inscribed "HOLINESS TO THE LORD." *Exodus* xxxix. 28. The most ancient mitre that has the nearest resemblance to the present one is that upon the seal of the bishop of Laon, in the 10th century. *Fosbroke*. Anciently the cardinals wore mitres, but at the council of Lyons, in 1245, they were directed to wear hats.

MITYLENE, or **LESBOS**, Ægean Sea. Near here the Greeks defeated and nearly destroyed the Turkish fleet, 7 Oct. 1824.

MNEMONICS, artificial memory, was introduced by Simonides the younger, 477 B.C. *Arund. Marbles*. "Mnemonica" was published by John Willis in 1618; and the "Memoria Technica" of Dr. Grey first appeared in 1730. A system of mnemonics was announced in Germany in 1806-7; and others since.

MOABITES, descendants of Lot, a people living to the south-east of Judæa. They were frequently at war with the Israelites, and were subdued with divine help by Ehud about 1336, by David about 1040, and by Jehoshaphat, 895 B.C., but often harassed the Jews in the decay of their monarchy. The discovery of a stone with inscription in Phœnician characters, said to relate to Mesha, king of Moab, referred to in 2 *Kings*, iii., was announced in Jan. 1870, and impressions were exhibited soon after, which caused much discussion among orientalists.

MÖCKERN (Prussia). Here the French army under Eugène Beauharnais were defeated by the Prussians under Yorck, 5 April, 1813; and here Blücher defeated the French, 16 Oct. 1813.

MODELS. The first were figures of living persons, and Dibutades, the Corinthian, is the reputed inventor of those in clay. His daughter, being about to be separated from her lover, traced his profile by his shadow on the wall; her father filled up the outline with clay, which he afterwards baked, and thus produced a figure of the object of her affection, giving rise to an art till then unknown, about 985 B.C.

A beautiful model of the new town of Edinburgh, before the building began, was formed in wood.

A model was made of a bridge over the Neva, of uncommon strength as well as elegance; and of the mountains of Switzerland, by general Pfiffer (1766-85).

M. Choffin's model of Paris also was remarkable for its precision.

Fine models of Gibraltar, Quebec, and other fortified places, are deposited in the Rotunda at Woolwich.

MODENA (formerly Mutina), capital of the late duchy in Central Italy; was governed by the house of Este, from 1288 till 1796, when the last male of that house, the reigning duke Hercules III., was expelled by the French. By the treaty of Campo Formio, the Modenese possessions were incorporated with the Cisalpine republic, 1797; and

with the kingdom of Italy, 1805. The archduke Francis of Este, son of the archduke Ferdinand of Austria, and of Mary, the heiress of the last duke, was restored in 1814. Modena, in accordance with the voting by universal suffrage, was annexed to Sardinia on 18 March, 1860. Population, in 1857, 604,512.

GRAND DUKES.

1814. Francis IV. An invasion of his states by Murat was defeated, 11 April, 1815. He was expelled by his subjects in 1831, but was restored by the Austrians.

1846. Francis V. (born 1 June, 1819) succeeded 21 Jan. His subjects rose against him soon after the Italian war broke out, in April, 1859. He fled to Verona, establishing a regency, 11 June; which was abolished, 13 June; Farina was appointed dictator, 27 July; a constituent assembly was immediately elected, which offered the duchy to the king of Sardinia, 15 Sept., who incorporated it with his dominions, 18 March, 1860. Francis died, 20 Nov. 1875.

MODERADOS. A political party in Spain, long headed by Ramon Maria Narvaez, duke of Valencia (who died 23 April, 1868), who opposed the Progresistas headed by Espartero and Prim. The party was reinforced by the favourers of Don Carlos, after his total defeat in 1876.

MODOC INDIANS (a few hundreds), dwelling in lands south of Oregon, were removed to other lands by the United States government. Not obtaining subsistence, they returned to their old possessions, and their able leader captain Jack defeated the troops sent to expel them, 17 Jan. 1873. During negotiations for a peaceful settlement, they decoyed the United States commissioners into an ambush (11 April), and massacred general Canby and about 40 others. Fighting took place, 15, 16 April, and the Indians retreated to almost impregnable positions. The troops were fired on, and suffered much loss, 27 April. The Indians were gradually surrounded. Jack and about twenty warriors held out desperately. Some surrendered, and he himself was captured, 1 June; tried, July, and executed 3 Oct. 1873.

MŒSIA (now Bosnia, Servia, and Bulgaria), was finally subdued by Augustus, 29 B.C. It was successfully invaded by the Goths, A.D. 250, who eventually settled here; see *Goths*.

MOGULS, see *Tartary*.

MOHACZ (Lower Hungary). Here Louis king of Hungary, defeated by the Turks under Solyman II. with the loss of 22,000 men, was suffocated by the fall of his horse in a muddy brook, 29 Aug. 1526. Here also prince Charles of Lorraine defeated the Turks, 12 Aug. 1687.

MOHAMMERAH, a Persian town near the Euphrates, captured, after two hours' cannonading, by sir James Outram, during the Persian war, 26 March, 1857. News of the peace arrived 4 April.

MOHILOW (Russia). Here the Russian army, under prince Bagration, was signally defeated by the French under marshal Davoust, prince of Eckmühl, 23 July, 1812.

MOHOCKS, ruffians, who went about London at night, wounding and disfiguring the men, and indecently exposing the women. One hundred pounds were offered by royal proclamation in 1712, for apprehending any one of them. *Northouck.*

MOHURRUM, a Mahometan festival in honour of the prophet's nephews: at its celebration in Bombay, Feb. 1874, the Mahometans fiercely attacked the Parsees, and were quelled by the military.

MOLDAVIA, see *Danubian Principalities*.

MOLINISTS, a Roman Catholic sect, followers of Louis Molina, a Jesuit, born 1535. He maintained the reconcileability of the doctrines of predestination and free will, 1588.

MOLUCCAS, an archipelago in the Indian Ocean (the chief island, Amboyna), discovered by the Portuguese, about 1511, and held by them secretly until the arrival of the Spaniards, who claimed them, till 1529, when Charles V. yielded them to John III. for a large sum of money. The Dutch conquered them in 1607, and have held them ever since,—except from 1810 to 1814, when they were subject to the English.

MOLWITZ (in Prussian Silesia). Here the Prussians, commanded by Frederick II., obtained a great victory over the Imperialists, 10 April (O. S. 30 March), 1741.

MOLYBDENUM, a whitish, brittle, almost infusible metal. Scheele, in 1778, discovered molybdic acid in a mineral hitherto confounded with graphite. Hjelm, 1782, prepared the metal from molybdic acid; and in 1825 Berzelius described most of its chemical characters. *Gmelin.*

MONACHISM (from the Greek *monos*, alone). Catholic writers refer to the prophet Elijah, and the Nazarites mentioned in *Numbers*, ch. vi., as early examples. The first Christian ascetics appear to be derived from the Jewish sect of the Essenes, whose life was very austere, practising celibacy, &c. About the time of Constantine (306-22) numbers of these ascetics withdrew into the deserts, and were called *hermits*, *monks*, and *anchorets*;* of whom Paul, Anthony, and Pachomius were most celebrated. Simeon, the founder of the Stylitæ (or pillar saints), died 451. He is said to have lived on a pillar thirty years. St. Benedict, the great reformer of western monachism, published his rules and established his monastery at Monte Casino, about 529. The Carthusians, Cistercians, &c., are varieties of Benedictines. In 964, by decree of king Edgar, all married priests were ineffectually ordered to be replaced by monks. See *Abbeys*, and *Benedictines*.

MONACO, a principality, N. Italy, held by the Genoese family Grimaldi since 968. By treaty on 2 Feb. 1861, the prince ceded the communes of Roquebrune and Mentone, the chief part of his dominions, to France, for 4,000,000 francs. The present prince, Charles III., born 8 Dec. 1818, succeeded his father Florestan, 20 June 1856. A commercial convention between the prince and France, signed 9 Nov. 1865, was much discussed as tending towards the abolition of the French navigation laws. Population, 1873, 5741.

MONARCHY. Historians reckon various grand monarchies—the Chaldæan, Assyrian, Babylonian, Median, Persian, Grecian, Parthian, and Roman (*which see*).

MONCRIEFF SYSTEM, see *Cannon*.

* The anchorites of the 12th, 13th, and 14th centuries must not be confounded with the anachorets and anchorets, or hermits. The former were confined to solitary cells; the latter permitted to go where they pleased.

MONDOVI (Piedmont). Here the Sardinian army, commanded by Colli, was defeated by Napoleon Bonaparte, 22 April, 1796.

MONEY is mentioned as a medium of commerce in *Genesis* xxiii., 1860 B.C., when Abraham purchased a field as a sepulchre for Sarah. The coinage of money is ascribed to the Lydians. Moneta was the name given to their silver by the Romans, it having been coined in the temple of Juno-Moneta, 269 B.C. Money was made of different metals, and even of leather and other articles, both in ancient and modern times. It was made of pasteboard by the Hollanders so late as 1574; see *Coin; Gold; Copper; Mint; Banks*, &c. For *Money Orders*, see *Post Office*.

MONEYERS travelled with our early kings, and coined money as required; see *Mint*.

MONGOLS, see *Tartary*.

MONITEUR UNIVERSEL, a French newspaper, was established in Paris, by C. J. Panckoucke, 5 May, 1789; daily paper, 24 Nov. 1789; the organ of the government, 28 Dec. 1799. It was superseded by the *Journal Officiel*, 1 Jan. 1869; resumed its official position about 23 Sept. 1870; and was again superseded by the *Journal Officiel*, Feb. 1871. It became the organ of MacMahon's government in 1875.

MONMOUTH'S REBELLION. James, duke of Monmouth (born at Rotterdam, 9 April, 1649), a natural son of Charles II. by Lucy Waters, was banished England for his connection with the Rye-house plot, in 1683. He invaded England at Lyme, 11 June 1685; was proclaimed king at Taunton, 20 June; was defeated at Sedgmoor, near Bridgewater, 6 July; and beheaded on Tower-hill, 15 July.

MONOLITH, Greek for single stone; see *Obelisk*.

MONOPHYSITES, see *Eutychians*.

MONOPOLIES were formerly so numerous in England that parliament petitioned against them, and many were abolished, about 1601-2. They were further suppressed by 21 Jas. I., 1624. Sir Giles Mompesson and sir Francis Mitchell were punished for their abuse of monopolies, 1621. In 1630, Charles I. established monopolies of soap, salt, leather, and other common things, to supply a revenue without the help of parliament. It was decreed that none should be in future created by royal patent, 16 Chas. I. 1640.

MONOTHELITES, heretics who affirmed that Jesus Christ had but one will, were favoured by the emperor Heraclius, 630; they merged into the Eutychians (*which see*).

MONROE DOCTRINE, a term applied to the determination expressed by James Monroe, president of the United States, 1817-24, not to permit any European power to interfere in restraining the progress of liberty in North or South America. This doctrine was referred to in 1859, with the view of weakening the influence of Great Britain and Spain on the American continent, and, in 1865, in relation to the new Mexican empire.

MONTALEMBERT'S TRIAL, see *France*, 1858.

MONTANISTS, followers of Montanus, of Ardaba, in Mysia, about 171, who was reputed to have the gift of prophecy, and proclaimed himself the Comforter promised by Christ. He condemned second marriages as fornication, permitted the dissolution of marriage, forbade avoiding martyrdom, and ordered a severe fast of three lents; he hanged himself with Maximilla, one of his female scholars, before the close of the 2nd century. *Cave.* The eloquent father, Tertullian, joined the sect, 204.

MONT BLANC, in the Swiss Alps, is the highest mountain in Europe, being 15,781 feet above the level of the sea. The summit was first reached by Saussure, aided by a guide named Balma, on 2 Aug. 1787. The summit was attained by Dr. Hamel (when three of his guides perished) in 1820, and by many other persons before and since. Accounts of the ascents of Mr. John Auldjo, Charles Fellows (1827), and of professor Tyndall (1857-8) have been published; see *Alps*. 57 ascents reported in 1873.

MONT CENIS, see *Alps*.

MONTEBELLO, in Piedmont, where Lannes defeated the Austrians, 9 June, 1800, and acquired his title of duke of Montebello; and where, after a contest of six hours, the French and Sardinians defeated the Austrians, who lost about 1000 killed and wounded, and 200 prisoners, 20 May, 1859. The French lost about 670 men, including general Beuret.

MONTE CASINO (Central Italy). Here Benedict formed his first monastery, 529. After affording a refuge for many eminent persons, its monastic character was abolished by the Italian government in 1866, care being taken for the preservation of its historical and literary monuments.

MONTENEGRO, an independent principality in European Turkey, was conquered by Solyman II. in 1526. Population, in 1871, about 120,000.

MONUMENT OF LONDON, built by sir Christopher Wren, 1671-7. The pedestal is forty feet high, and the edifice altogether 202 feet, that being the distance of its base from the spot where the fire which it commemorates commenced. It is the loftiest isolated column in the world. Its erection cost about 14,500*l.* The staircase is of black marble, consisting of 345 steps.* Of the four original inscriptions, three were Latin, and the following in English,—cut in 1681, obliterated by James II.; re-cut in the reign of William III.; and finally erased by order of the common council, 26 Jan. 1831. They produced Pope's indignant lines:—

"Where London's column, pointing at the skies,
Like a tall bully, lifts the head, and lies."

MOORS, formerly the natives of Mauritania (*which see*), but afterwards the name given to the Numidians and others, and now applied to the natives of Morocco and the neighbourhood. They frequently rebelled against the Roman emperors, and assisted Genseric and the Vandals in their invasion of Africa, 429. They resisted for a time the progress of the Arab Mahometans, but were overcome in 707, and in 1019 by them introduced into Spain, where their arms were long victorious. In 1063 they were defeated in Sicily by Roger Guiscard. The Moorish kingdom of Grenada was set up in 1237, and lasted till 1492, when it fell before Ferdinand V. of Castile, mainly owing to internal discord. The expulsion of the Moors from Spain was decreed by Charles V., but not fully carried into effect till 1609, when the bigotry of Philip III. inflicted this great injury to his country. About 1518 the Moors established the piratical states of Algiers and Tunis (*which see*). In the history of Spain, the Arabs and Moors must not be confounded.

MOPLAHS, industrious fanatical Mahometans in Malabar, E. Indies, gave trouble by their attacks on Hindoos and the British, especially in 1845; an outbreak was suppressed about 15 Sept. 1873.

MORAVIA, an Austrian province, occupied by the Slavonians about 548, and conquered by the Avars and Bohemians, who submitted to Charlemagne. About 1000 it was subdued by Boleslas of Poland, but recovered by Ulrich of Bohemia in 1030. After various changes, Moravia and Bohemia were amalgamated into the Austrian dominions in 1526. Moravia was invaded by the Prussians in 1866, and they established their head quarters at Brünn, the capital, 13 July. The demand of the Moravians for home rule was resisted Oct. 1871.

MORAVIANS, or UNITED BRETHREN, said to have been part of the Hussites, who withdrew into Moravia in the 15th century; but the brethren assert that their sect was derived from the Greek church in the 9th century. In 1722 they formed a settlement (called *Herrnhut*, the watch of the Lord) on the estate of count Zinzendorf. Their church consisted of 500 persons in 1727. They were introduced into England by count Zinzendorf about 1738; he died at Chelsea in June, 1760. In 1851 they had thirty-two chapels in Eng-

MORGANATIC* MARRIAGES, when the left hand is given instead of the right, between a man of superior and a woman of inferior rank, in which it is stipulated that the latter and her children shall not enjoy the rank or inherit the possessions of the former. The children are legitimate. Such marriages are frequently contracted in Germany by royalty and the higher nobility. It has been asserted that our George I. was thus married to the duchess of Kendal; and Frederic VI. of Denmark to the countess of Danner, 7 Aug. 1850; and several Austrian princes, recently.

MORGARTEN (Switzerland). 1300 Swiss engaged 20,000 Austrians, commanded by the duke Leopold, whom they completely defeated, 15 Nov. 1315, upon the heights of Morgarten, overlooking the defile through which the enemy was to enter their territory from Zug.

MORISONIANS, followers of the Rev. James Morison of Kilmarnock, suspended for heterodoxy, 1841.

MORMONITES (calling themselves the Church of Jesus Christ of LATTER-DAY SAINTS). This sect derives its origin from Joseph Smith, called the Prophet, who announced in 1823, at Palmyra, New York, that he had had a vision of the angel Moroni. In 1827 he said that he found the book of Mormon, written on gold plates in Egyptian characters. This book is said to have been written about 1812, by a clergyman named Solomon Spaulding (or by Martin Harris, who died Sept. 1875), as a religious romance in imitation of the scripture style. It was translated and published in America in 1830, in England in 1841. It fell into the hands of Rigdon and Smith, who determined to palm it off as a new revelation. The Mormonites command the payment of tithes, permit polygamy, encourage labour, and believe in their leaders working miracles. Missionaries are propagating these doctrines in Europe with more success than would be expected.

These were succeeded by the Almohades (1121), the Merinites (1270), and in 1516 by the Scherifs, pretended descendants of Mahomet, the now reigning dynasty. The mortar left by Soult at Cadiz in Spain was fixed in St. James's-park in Aug. 1816. On 19 Oct. 1857, a colossal mortar, constructed by Mr. Robert Mallet, was tried at Woolwich; with a charge of 70 lbs. it threw a shell weighing 2550 lbs. 1½ mile horizontally, and about ¾ mile in height.

MORTIMER'S CROSS (Herefordshire). The earl of Pembroke and the Lancastrians were here severely defeated by the young duke of York, afterwards Edward IV., 2 Feb. 1461. He assumed the throne as Edward IV. in March following.

MORTMAIN ACTS (*mort main*, dead hand). When the survey of all the land in England was made by William I., 1085-6, the whole was found to amount to 62,215 knights' fees, of which the church then possessed 28,015, to which additions were afterwards made, till the 7th of Edward I., 1279, when the statute of mortmain was passed, from a fear that the estates of the church might grow too bulky. By this act it was made unlawful to give any estates to the church without the king's leave; and this act, by a supplemental provision, was made to reach all lay-fraternities, or corporations, in the 15th of Richard II., 1391. Mortmain being such a state of possession as makes property inalienable, it is said to be in a dead hand. Several statutes have been passed on this subject; legacies by mortmain were especially restricted by the 9th Geo. II., c. 36 (1736).

MOSAIC WORK (the Roman *opus tessellatum*), is of Asiatic origin, and is probably referred to in *Esther*, ch. i. 6, about 519 B.C. It had attained to great excellence in Greece, in the time of Alexander and his successors, when Sosos of Pergamus, the most renowned Mosaic artist of antiquity, flourished. He acquired great fame by his accurate representation of an "unswept floor after a feast." The Romans also excelled in Mosaic work, as evidenced by the innumerable specimens preserved. Byzantine Mosaics date from the 4th century after Christ. The art was revived in Italy by Tafi, Gaddi, Cimabue, and Giotto, who designed Mosaics, and introduced a higher style in the 13th century. In the 16th century Titian and Veronese also designed subjects for this art. The practice of copying paintings in Mosaics came into vogue in the 17th century; and there is now a workshop in the Vatican where chemical science is employed in the production of colours, and where 20,000 different tints are kept. In 1861, Dr. Salviati of Venice had established his manufacture of "Enamel-mosaics," and in July, 1864, he fixed a large enamel Mosaic picture in one of the spandrils under the dome of St. Paul's cathedral, London. He has since executed commissions for the queen and other persons.

MOSCOW, the ancient capital of Russia, was founded, it is said, by Dolgorouki, about 1147. The occupation of the south of Russia by the Mongols, in 1235, led to Moscow becoming the capital, and beginning with Jaroslav II., 1238, its princes became the reigning dynasty. It is regarded as a holy city by the Russians.

MOSQUITO COAST (Central America). The Indians inhabiting this coast were long under the protection of the British, who held Belize and a group of islands in the bay of Honduras. The jealousy of the United States long existed on this subject. In April, 1850, the two governments covenanted not "to occupy, or fortify, or colonise, or assume, or exercise any dominion over any part of Central America." In 1855 the United States charged the British government with an infraction of the treaty; on which the latter agreed to cede the disputed territory to the republic of Honduras, with some reservation.* The matter was finally settled in 1859.

MOURNING FOR THE DEAD. The Israelites neither washed nor anointed themselves during the time of mourning, which for a friend lasted seven days; upon extraordinary occasions a month. The Greeks and Romans fasted. White was used in mourning for the imperial family at Constantinople, 323. The ordinary colour for mourning in Europe is black; in China, white; in Turkey, violet; in Ethiopia, brown; it was white in Spain until 1498. Anne of Brittany, the queen of two successive kings of France, mourned in black, instead of the then practice of wearing white, on the death of her first husband, Charles VIII., 7 April, 1498. *Hénault*.

MÜHLDORF (Bavaria). Near this place Frederick, duke of Austria, was defeated and taken prisoner by Louis of Bavaria, 28 Sept. 1322.

MULBERRY TREES. The alleged first planted in England are in the gardens of Sion-house. Shakspeare planted a mulberry-tree with his own hands at Stratford-upon-Avon; and Garrick, Macklin, and others were entertained under it in 1742. Shakspeare's house was afterwards sold to a clergyman of the name of Gastrel, who cut down the mulberry-tree for fuel, 1765. A silversmith purchased the whole, and manufactured it into memorials.

MULE, a spinning machine invented in 1779 by Samuel Crompton, born at Bolton, Lancashire, in 1753; named, from Crompton's residence, *Hall-in-the-wood-wheel*; and *muslin-wheel*, from its giving birth to the British muslin and cambric manufacture; and *mule*, from its combining the advantages of Hargreave's spinning jenny, and Arkwright's adaptation. It is stated that Crompton at the time knew nothing of the latter. He did not patent his invention, but gave it up in 1780. It produced yarn treble the fineness and very much softer than any ever before produced in England. Parliament voted him 5000*l*. in 1812, now considered a most inadequate compensation. Mr. Roberts invented the *self-acting mule* in 1825.

MUMMIES (from the Arabic *mum*, wax); see *Embalming*. The mummies in the British Museum, with other Egyptian antiquities, were placed there about 1803. Mr. Alex. Gordon, in 1737, published an essay on three Egyptian mummies, one of which was brought to England in 1722 by capt. Wm. Lethieullier; two others came in 1734, one of which was retained by Dr. Mead, the other was given to the College of Physicians. In 1834, Mr. T. J. Pettigrew published a "History of Egyptian Mummies."

MÜNCHENGRÄTZ (Bohemia) was taken by the Prussians under prince Frederick Charles, after a severe action, 28 June, 1866. The Austrians lost about 300 killed and 1000 prisoners, and the prince gained about 12 miles of country.

MUNDA (now Monda, S. Spain). Here Cneius Scipio defeated the Carthaginians, B.C. 216; and here Julius Cæsar defeated the sons of Pompey, 17 March, 45, after a severe conflict.

MUNDANE ERAS. That of Alexandria fixed the creation at 5502 B.C. This computation continued till A.D. 284, Alex. era, 5786; but in A.D. 285 ten years were subtracted, and 5787 became 5777. This coincided with the Mundane era of Antioch (which dated the creation 5492 B.C.). *Nicholas*.

MUNICH, the capital of Bavaria, founded by duke Henry of Saxony, 962. It was taken by Gustavus Adolphus of Sweden in 1632; by the Austrians, in 1704, 1741, and 1743; and by the French under Moreau, 2 July, 1800. It abounds in schools, institutions, and manufactories. The university was founded by king Louis in 1826. A Bavarian art-exhibition was opened here by prince Adalbert, 20 July, 1869. A congress of "Old Catholics" (*which see*) met here, 23 Sept. 1871.

MUNSTER (W. Prussia). The bishopric, said to have been founded by Charlemagne, 780, was secularised in 1802; seized by the French, 1806; part of the duchy of Berg, 1809; annexed to France, 1810; ceded to Prussia, 1815. The Anabaptists, under John of Leyden, the king of Munster, held the city in 1534-5. Here were signed the preliminaries of the treaty of Westphalia (*which see*), or Munster, Jan. 1647; definitively signed 24 Oct. 1648.—**MUNSTER**, the southern province of Ireland, an ancient kingdom. In 1568 a commission was issued for its government by a president and council, and new colonies were founded in 1588.

MURCIA, a province, N. E. Spain, was subdued by the Moors, 713; by Ferdinand of Castile, 1240; and divided between Castile and Aragon, 1305.

MURDER, the highest offence against the law of God. (*Genesis* ix. 6, 2348 B.C.) A court of Ephetæ was established by Demophoön of Athens for the trial of murder, 1179 B.C. The Persians did not punish the first offence. In England, during a period of the heptarchy, murder was punished by fines only. So late as Henry VIII.'s time the crime was compounded for in Wales. Murderers were allowed benefit of clergy in 1503. Aggravated murder, or *petit treason* (a distinction now abolished), happened in three ways: by a servant killing his master, a wife her husband, and an ecclesiastical person his superior, stat. 25 Edw. III. 1350. The enactments relating to this crime are very numerous, and its wilful commission has been rarely pardoned by our sovereigns. The act whereby the murderer should be executed on the day next but one after his conviction, was repealed, 1836; see *Executions* and *Trials*.

MUSEUM, originally a quarter of the palace of Alexandria, like the Prytaneum of Athens, where eminent learned men were maintained by the public. The foundation is attributed to Ptolemy Philadelphus, who here placed his library about 280 B.C. Besides the British Museum, Soane's Museum, and the Museum of Geology (*which see*), there are very many others in London. The opening of public museums and galleries on Sunday was long advocated in parliament: negatived by 271-68, 19 May, 1874.

MUSIC.* "Jubal, the father of all such as handle the harp and the organ" (3875 B.C. *Gen.* iii. 21). The flute, and harmony, or concord in music, are said to have been invented by Hyagnis, 1506 B.C. *Arund. Marbles*. Vocal choruses of men are first mentioned 556 B.C. *Dufresnoy*. See *Organ*, and other musical instruments. Prior to 1600, the chief music in England was masses, ballads, and madrigals, but dramatic music was much cultivated from that time. About the end of James I.'s reign, a music professorship was founded in the university of Oxford by Dr. Wm. Hychin; and the year 1710 was distinguished by the arrival in England of George Frederick Handel. Mozart came to England in 1763; Joseph Haydn in 1791; and Carl Maria von Weber in 1825.

Counterpoint was brought to perfection by Palestrina about 1555. Gafforio of Lodi read lectures on musical composition in the 15th century, and they effected great improvement in the science. The Italian style of composition was introduced into these countries about 1616.

A lower pitch was adopted at concerts in London in Jan. 1869. 528 vibrations for C adopted for performances at the international exhibition of 1872, at a meeting, 20 Jan. 1872.

MUSICAL FESTIVALS IN ENGLAND. Dr. Bysse, chancellor of Hereford, about 1724, proposed to the members of the choirs, a collection at the cathedral door after morning service, when forty guineas were collected and appropriated to charitable purposes. It was then agreed to hold festivals at Hereford, Gloucester, and Worcester, in rotation annually. Until the year 1753, the festival lasted only two days; it was then extended at Hereford to three evenings; and at Gloucester, in 1757, to three mornings, for the purpose of in-

* Pythagoras (about 555 B.C.) maintained that the motions of the twelve spheres must produce delightful sounds, inaudible to mortal ears, which he called "the music of the spheres." MUSLIN, a fine cotton cloth, so called, it is said, from having a downy nap on its surface, resembling moss (French, *mousse*); according to others, because it was first brought from Moussol, in India. Muslins were first worn in England in 1670. *Anderson.* By means of the *Mule* (*which see*), British have very much superseded India muslins.

MUTA (Syria). Here Mahomet and his followers defeated the Christians in his first conflict with them, 629.

Major Strangeway suffered death in a similar manner at Newgate for the murder of his brother-in-law, Mr. Fussell, 1657.

Judgment was awarded against mutes, as if they were convicted or had confessed, by 12 Geo. III. 1772.

It subsided on a promise from the Admiralty, which not being quickly fulfilled, occasioned a second mutiny on board the *London* man-of-war; admiral Colpoys, and his captain, were put into confinement for ordering the marines to fire, whereby some lives were lost. The mutiny sub-

sided 10 May, 1797, when an act was passed to raise the wages, and the king pardoned the mutineers.

MYCALE (Ionia, Asia Minor), BATTLE OF, fought between the Greeks (under Leotychides, the king of Sparta, and Xantippus the Athenian) and the Persians, 22 Sept. 479 B.C.; the day on which Mardonius was defeated and slain at Platæa by Pausanias. MYSTERIES. "Mystery" is said to be derived from the Hebrew *mistar*, to hide. The *Sacred* mysteries is a term applied to the doctrines of Christianity, called the "mystery of godliness," 1 *Tim.* iii. 16, as opposed to the "mystery of iniquity," 2 *Thess.* ii. 7. The *Profane* mysteries were the secret ceremonies performed by a select few in honour of some deity. The Eleusinian mysteries were introduced at Athens by Eumolpus, 1356 B.C.—MYSTERY PLAYS; see *Drama*.

MYSTICS, a name given to those theologians who, in addition to the obvious meaning of the Holy Scriptures, assert that there are interpretations to be discovered by means of an emanation of the Divine Wisdom, by which the soul is enlightened and purified; for which purpose they advocate seclusion for contemplation and asceticism.

Mysticism taught at Alexandria by Clemens, Pantænus, Origen, and others, who mingled Christianity and Platonism, 2nd and 3rd centuries.
Much promoted by the works of the pseudo-Dionysius ("The Mystic Theology," &c), 6th century.
Introduced into the Western empire, 9th century.
Eminent Mediæval mystics (opposed by the schoolmen): Master Eckhart (1251-1329); John Tauler of Strasburg, where he acted heroically during the plague, termed the "black death (1290-1361); Henry Suso (1300-65). They aimed at a more spiritual religion than Romanism; but their followers were charged with immorality, pantheism, communism, and maintaining private inspiration.

The first day of the era was Wednesday (said, in mistake, to be Thursday, in *L'Art de Vérifier les Dates*), 26 Feb. 747 B.C.—3967, Julian period. To find the Julian year on which the year of Nabonassar begins, subtract the year, if before Christ, from 748; if after Christ, add to it 747.

NAG'S HEAD STORY. Matthew Parker was consecrated archbishop of Canterbury at Lambeth, 17 Dec. 1559, by bishops Barlow, Coverdale, Scory, and Hodgkins. Many years after, the Romish writers asserted that Parker and others had been consecrated at the Nag's Head Tavern, Cheapside, by Scory. This fiction was refuted by Burnet.

NAHUM, FESTIVAL OF. Nahum, the seventh of the twelve minor prophets, about 713 B.C.; the festival is the 24th of December.

NAMES. Adam and Eve named their sons. *Gen.* iv. 25, 26. A Roman citizen had generally three names; *prænomen*, denoting the individual; *nomen*, the gens or clan; *cognomen*, the branch of the clan: sometimes he had the *agnomen* (*e. g.*, Publius Cornelius Scipio Africanus). The popes change their names on their exaltation to the pontificate, "a custom introduced by pope Sergius, whose name till then was Swine-snout," 687. *Platina.* Onuphrius refers it to John XII., 956; stating that it was done in imitation of SS. Peter and Paul, who were first called Simon and Saul. In France the name given at baptism was sometimes changed. The two sons of Henry II. of France were christened Alexander and Hercules; at their confirmation these names were changed to Henry and Francis. Monks and nuns, at their entrance into monasteries, assume new *names*. See *Surnames*. Miss Yonge's "History of Christian Names," published 1863. M. A. Lower's "Patronymica Britannica," 1860.

The city of Namur was ceded to Austria, 1713; taken by the French in 1746, but was restored in 1749. In 1782, the emperor Joseph expelled the Dutch garrison. In 1792 it was again taken by the French, who were compelled to evacuate it in 1793; regained 1794; delivered up to the allies, 1814; assigned to Belgium, 1831. It was a site of a severe conflict in June, 1815, between the Prussians and the French under Grouchy, when retreating after the battle of Waterloo.

Nancy was embellished by Stanislas, ex-king of Poland, who resided and died here Feb. 1766. It was captured by Blücher, Jan. 1814, and on the retreat of Mac-Mahon's army, and expecting the German army, surrendered to four Uhlans, 12 Aug. 1870. It was restored at the peace.

NAPLES, formerly the continental division and seat of government of the kingdom of the Two Sicilies, began with a Greek colony named Parthenope (about 1000 B.C.), which was afterwards divided into Palæopolis (the *old*) and Neapolis (the *new* city); from the latter the present name is derived. The colony was conquered by the Romans in the Samnite war, 326 B.C. Naples, after resisting the power of the Lombards, Franks, and Germans,

was subjugated by the Normans under Roger Guiscard, king of Sicily, A.D. 1131. Few countries have had so many political changes, and cruel and despotic rulers, or suffered so much by convulsions of nature, such as earthquakes, volcanic eruptions, &c. In 1856, the population of the kingdom of Naples was 6,886,030, of Sicily 2,231,020; total, 9,117,050. It now forms part of the revived kingdom of Italy.

NATIONAL ASSEMBLY, FRENCH. Upon the proposition of the abbé Siéyes, the states-general of France constituted themselves the National Assembly, 17 June, 1789. On the 20th the hall of this new assembly was shut by order of the king; upon which the deputies of the *Tiers Etat* repaired to the *Jeu de Paume*, or Tennis-court, and swore not to dissolve until they had digested a constitution for France. On the 22nd they met at the church at St. Louis. This assembly abolished the state religion, annulled monastic vows, divided France into *departments*, sold the national domains, established a national bank, issued assignats, and dissolved itself 21 Sept. 1792; see *National Convention*. In 1848 the legislature was again termed the National Assembly. It met 4 May, and a new constitution was proclaimed, 12 Nov. A new constitution was once more proclaimed by Louis Napoleon in Jan. 1852, after dissolving the National Assembly, 2 Dec. 1851. The present French national assembly was elected 8 Feb., and met 13 Feb. 1871; see *France*.

NATIONAL ASSOCIATIONS. One was formed in 1584, headed by the earl of Leicester, to protect queen Elizabeth from assassination, in consequence of the discovery of various plots. Another for the defence of William III. against assassins was established in 1696, of which all persons holding office under government were required to be members; see *Aid to Sick and Wounded*, *Artillery*, *Colonies*, *Employers*, *Farmers*, *Social Science*, and *Volunteers* for other national associations.

NATIONAL CONVENTION OF FRANCE, constituted in the hall of the Tuileries 21 Sept. and formally opened 21 Sept. 1792, when M. Grégoire, at the head of the National Assembly, announced that that assembly had ceased its functions. It was then decreed, "That the citizens named by the French people to form the National Convention, being met to the number of 371, after having verified their powers, declare that the National Convention is constituted." This convention continued until a new constitution was organised, and the Executive Directory was installed at the Little Luxembourg, 1 Nov. 1795; see *Directory*. The Chartists (*which see*) in England formed a National Convention in 1839.

NATIONAL DEBT. The first mention of parliamentary security for a debt of the nation occurs in the reign of Henry VI. The present national debt may be said to have commenced in the reign of William III., 1689. It amounted, in 1697, to about five millions sterling, and was then thought to be of alarming magnitude. The sole cause of the increase has been *war*. By an act passed 31 May, 1867, the conversion of 24,000,000*l.* of the debt into terminable annuities was provided for. The law is consolidated by the national debt act, passed 9 Aug. 1870; amended by act passed 2 Aug. 1875; see *Sinking Fund*.

NATIONAL GALLERY, LONDON, began with the purchase, by the British government, of the Angerstein collection of 38 pictures, for 57,000*l.*, in 1824. The first exhibition of them took place in Pall-mall, on 10 May, 1824. Sir G. Beaumont (1826), Mr. Holwell Carr (1831), and many other gentlemen, as well as the British Institution, contributed many fine pictures; and the collection has been since greatly augmented by gifts and purchases. The present edifice in Trafalgar-square, designed by Mr. Wilkins, was completed and opened 9 April, 1838. In July, 1857, a commission appointed to consider the propriety of removing the pictures reported, in favour of their remaining in their present locality; and in 1860, 15,000*l.*, were voted to be expended in adapting the central part of the building to exhibition purposes. On 11 May, 1861, the National Gallery was reopened after having been closed eight months, during which time great improvements were made in the internal arrangements. On 19 June, 1865, the house of commons voted 20,000*l.* to buy land to enlarge the building, and an act for this purpose was passed 15 July, 1866. Visitors in 1866, 775,901; in 1871, 911,658; sum voted for year 1867-8, 15,895*l.*, for 1876, 20,098*l.*

Sir William Boxall succeeded sir Charles Eastlake as director, 1866; succeeded by Fred. W. Burton, 1874.

A parliamentary return gives a list of pictures presented to or purchased for the National Gallery—284 presented, 256 bequeathed, and 313 purchased. The cost of the 313 purchases, which has been spread over 45 years, has been 254,527*l.* Up to 1871, 337,195*l.* had been expended. NATIONAL GUARD OF FRANCE was instituted by the Committee of Safety at Paris on 13 July, 1789 (the day before the destruction of the Bastile), to maintain order and defend the public liberty. Its first colours were blue and red, to which white was added, when its formation was approved by the king. Its action was soon paralysed by the revolution, and it ceased altogether under the consulate and empire. It was revived by Napoleon in 1814, and maintained by Louis XVIII., but was broken up by Charles X., after a tumultuous review in 1827. It was revived in 1830, and helped to place Louis Philippe on the throne. In 1848 its reconstitution and its enlargement from 80,000 to 100,000 men led to the frightful conflict of June, 1848. Its constitution was entirely changed in Jan. 1852, when it was subjected entirely to the control of the government. Formerly it had many privileges, such as choosing their own officers, &c. In consequence of the defection of part of the National Guard and the incompetency of the rest during the outbreak in Paris in 1871, its gradual abolition was decreed by the national assembly at Versailles (488-154), 24 Aug. 1871. The peaceful disarmament began in September. National Guards have been established in Spain, Naples, and other countries, during the present century.

The sum of 2000*l.* was appropriated for the purchase of portraits of persons eminent in British history. Donations are received under certain restrictions. The gallery, Gt. George-street, Westminster, was opened 15 Jan. 1859. The collection was removed to South Kensington Dec. 1869, and re-opened 28 March, 1870. A valuable collection of National Portraits appeared at the Manchester Exhibition in 1857.

NATIONAL WORKSHOPS, see *Ateliers Nationaux*.

NATIONALITY; a word much used since 1848. In Poland, Hungary, Italy, and Germany, the struggle for nationality has been long and severe. In 1866 agitation for this principle began in Bohemia, Slavonia, and other parts of the Austrian empire. The nationality of Ireland is the alleged basis of the Fenian agitation; see *Ireland*, 1870, and *Home Government*.

NATIVITY. There are three festivals in the Roman and Greek churches under this name. The Nativity of Christ also observed by the Protestants on 25 Dec. (see *Christmas*); the Nativity of the Virgin Mary, not observed by the Protestants at all. Pope Sergius I., about 690, established the latter, but it was not generally received in France and Germany till about 1000; nor by the eastern Christians till the 12th century. The festival of the Nativity of St. John the Baptist, 24 June, Midsummer-day, is said to have been instituted in 488.

NATURAL HISTORY was studied by Solomon, 1014 B.C. (1 *Kings* iv. 33); Aristotle (384-322 B.C.); by Theophrastus (394-297 B.C.); and by Pliny (23-79 A.D.); see *Botany*, *Zoology*, &c.

NATURAL PHILOSOPHY, see *Philosophy*.

NATURAL SELECTION, see *Species*.

NATURALISATION is defined to be "the making a foreigner or alien a denizen or freeman of any kingdom or city, and so becoming, as it were, both a subject and a native of a king or country that by nature he did not belong to." The first act of naturalisation passed in 1437; and various similar enactments were made in most of the reigns from that time; several of them special acts relating to individuals. An act for the naturalisation of the Jews passed May, 1753, but was repealed in 1754, on the petition of all the cities in England; see *Jews*, for the privileges since granted them. The act for the naturalisation of prince Albert passed 3 Vict., 7 Feb. 1840. A committee to inquire into the naturalisation laws, appointed May, 1868, earl of Clarendon chairman, met 25 Oct. 1868; reported about Feb. 1869; and new acts for this purpose were passed 12 May, 1870, and 25 July, 1872. In 1870 there were about 9500 Americans in England, and about 2,500,000 British subjects in the United States of America. By the new act the latter were enabled to renounce their allegiance; and by the convention signed 3 Feb. 1871, the nationality of British subjects was made dependent on choice and not on birth.

NATURE, a weekly illustrated journal of science, first appeared 4 Nov. 1869, editor Mr. Joseph Norman Lockyer, F.R.S.

NATURE PRINTING. This process consists in impressing objects, such as plants, mosses, feathers, &c., into plates of metal, causing these objects, as it were, to engrave themselves; and afterwards taking casts or copies fit for printing from. Kniphoff of Erfurt, between 1728 and 1757, produced his *Herbarium vivum* by pressing the plants themselves (previously inked) on paper; the impressions being afterwards coloured by hand. In 1833, Peter Kyhl, of Copenhagen, made use of steel rollers and lead plates. In 1842 Mr. Taylor printed lace. In 1847 Mr. Twining printed ferns, grasses, and plants; and in the same year Dr. Branson suggested the application of electrotyping to the impressions. In 1849, professor Leydolt, of Vienna, by the able assistance of Mr. Andrew Worring, obtained impressions of agates and fossils. The first practical application of this process is in Von Heufler's work on the Mosses of Arpasch, in Transylvania; the second (the *first* in this country) in "The Ferns of Great Britain and Ireland," edited by Dr. Lindley, the illustrations to which were prepared under the superintendence of Mr. Henry Bradbury in 1855-56, who also in 1859-60 printed "The British Sea-weeds," edited by W. G. Johnstone and Alex. Croall. The process was applied to butterflies by Joseph Merrin of Gloucester, in 1864.

NAVARINO (S. W. Greece), settled by the Arabs 6th century; taken by the Turks, 1500; by Venetians, 1686; by Turks, 1718; by Greeks, 1821; by Turks, 1825. Near here, on 20 Oct. 1827, the combined fleets of England, France, and Russia, under command of admiral Codrington, nearly destroyed the Turkish and Egyptian fleet. More than thirty ships, many of them four-deckers, were blown up or burnt, chiefly by the Turks themselves, to prevent their falling into the hands of their enemies. This destruction of the Turkish naval power was characterised by the duke of Wellington as an "untoward event."

NAVARRE, now a province of Spain, formed a part of the Roman dominions, and was conquered from the Saracens by Charlemagne, 778. His descendants appointed governors, one of whom, Garcias Ximenes, took the title of king in 857. In 1076, king Sancho IV. was poisoned, and Sancho Ramorez of Aragon seized Navarre. In 1134, Navarre became again independent under Garcias Ramorez IV. In 1234, Thibault, count of Champagne, nephew of Sancho VII., became sovereign of Navarre; and in 1284, by the marriage of the heiress Jane with Philip IV. le Bel, Navarre was united to France.

NAVIGATION began with the Egyptians and Phœnicians. The first laws of navigation originated with the Rhodians, 916 B.C. The first account we have of any considerable voyage is that of the Phœnicians sailing round Africa, 604 B.C. *Blair*.

NAVIGATION LAWS. A code of maritime laws is attributed to Richard I. of England, said to have been decreed at the isle of Oleron, 1194 (see *Oleron*), and further enactments were made by Richard II. in 1381.—In Oct. 1651, the parliament passed an act entitled "Goods from foreign parts, by whom to be imported," the principles of which were affirmed by 12 Charles II. c. 18, "an act for the encouraging and increasing of shipping and navigation" (1660). The latter act restricts the importation and exportation of goods from or to Asia, Africa, or America, to English ships, of which the masters and three-fourths of the mariners are to be English. This was followed by many acts of similar tenor; which were consolidated by 3 & 4 Will. IV. c. 54 (1833). These acts were in the whole or in part repealed by the act "to amend the laws in force for the encouragement of British shipping and navigation" (passed 12 & 13 Vict. c. 29, 26 June, 1849, after much opposition), and which came into operation 1 Jan. 1850. The steam

navigation act passed 14 & 15 Vict. c. 79, 1851, came into operation 1 Jan. 1852. The act regulating the navigation of the river Thames was passed in 1786.—In Feb. 1865 the emperor recommended the modification of the French navigation laws; in Feb. 1872, new restrictions were laid upon foreign ships, chiefly affecting British.

NAVIGATORS (or Navvies). These helpers in the construction of railways probably derived their name (about 1830) from formerly making the inland navigation in Lincolnshire, &c., and are said to be descendants of the original Dutch canal labourers.

NAVAL SALUTE TO THE BRITISH FLAG began in Alfred's reign, and though sometimes disputed, may be said to have been continued ever since. The Dutch agreed to strike to the English colours in the British seas, in 1673. The honour of the flag salute at sea was also formally assented to by France in 1704, although it had been long previously exacted by England; see *Flag* and *Salutes at Sea*.

NAVAL UNIFORMS. The first notice of the establishment of a uniform in the British naval service, which we have met with, occurs in the *Jacobite's Journal* of 5 March, 1748, under the head of "Domestic News," in these terms:—"An order is said to be issued, requiring all his majesty's sea-officers, from the admiral down to the midshipman, to wear a uniformity of clothing, for which purpose pattern coats for dress, suits and frocks for each rank of officers are lodged at the Navy-office, and at the several dock-yards for their inspection." This is corroborated by the *Gazette* of 13 July, 1757, when the first alteration in the uniform took place, and in which a reference is made to the order of 1748, alluded to in the formal above mentioned, and which in fact is the year when a naval uniform was first established. James I. had indeed granted, by warrant of 8 April, 1609, to six of his principal masters of the navy, "liverie coats of fine red cloth." The warrant is stated to have been drawn *verbatim* from one signed by queen Elizabeth, but which had not been acted upon by reason of her death. This curious document is in the British Museum; but king James's limited red livery is supposed to have been soon discontinued. *Quarterly Review.*

NAVY PAY OFFICE, organised in 1644, was abolished in 1836, when the army and navy pay departments were consolidated in the Paymaster General's office.

NAVY LIST was first officially compiled by John Finlaison, the celebrated actuary, and published monthly in 1814.

NAVAL REVIEWS. The queen reviewed the fleet at Spithead, near Portsmouth, 11 Aug. 1853; again, March, 1854, before it sailed to the Baltic, at the commencement of the Russian war; and again, at Portsmouth, on the conclusion of peace, in the presence of the parliament, &c. The fleet extended in an unbroken line of 5 miles, and consisted of upwards of 300 men-of-war, with a tonnage of 150,000, carrying 3800 guns, and manned by 40,000 seamen. There were about 100,000 spectators, 23 April, 1856.

A grand naval review (15 great wooden ships, 15 iron-plated, 26 gun-vessels and boats), was held at Spithead (the queen, the sultan, and the viceroy of Egypt present), 17 July, 1867; another at Spithead before the shah of Persia, 23 June, 1873.

NAVAL VOLUNTEERS (or *Reserve*). By 16 & 17 Vict. c. 73 (1853), the admiralty were empowered to raise a body of sea-faring men to be called the "Naval Coast Volunteers," not to exceed 10,000, for the defence of the coast, and for actual service if required. On 13 Aug.

1859, an act was passed to enable the admiralty to raise a number of men, not exceeding 30,000, as a reserve force of seamen, to be called the "Royal Naval Volunteers." In November following, the admiralty issued a statement of the "qualifications, advantages, and obligations" of this reserve. The enrolment commenced on 1 Jan. 1860. The engagement is for five years, and the volunteers are entitled to a pension when incapacitated after the expiration of the term. At the prospect of war with the United States in Dec. 1861, a great number of seamen at Hartlepool, Dundee, London, Aberdeen, &c., offered their services.

First enrolled body of Royal Naval Volunteers inspected, about 18 Jan. 1873; see *Naval College*.

NAVY OF FRANCE. It is first mentioned in history, 728, when, like that of England at an early period, it consisted of galleys; in this year the French defeated the Frisian fleet. The French fleet was almost annihilated by Edward III. at the battle of Sluys, 24 June, 1340. It was considerably improved under Louis XIV. at the instance of his minister Colbert, about 1697. The French navy was in its splendour about 1781; became greatly reduced in the wars with England; see *Naval Battles*. It was greatly increased by the emperor Napoleon III., and in 1859 consisted of 51 ships of the line (14 sailing vessels and 37 steamers), and 398 other vessels, in all 449; including vessels building, converting, or ordered to be built. The new French iron-clad frigate *Gloire*, constructed by M. Dupuy de Lôme, launched in 1860, was generally considered as successful. The *Solferino* and *Magenta* were launched in June, 1861; other iron vessels since. The *Magenta* was destroyed by fire, 6 killed, 31 Aug. 1875.

NAZARENE, a name given to Jesus Christ, and his disciples; but afterwards to a sect who rejected the doctrine of Christ's divinity in the first century. A sect named Nazarenes, resembling the society of Friends in Britain, became prominent in Hungary in the autumn of 1867.

NEAPOLIS, see *Naples*.

NEBRASKA, a N.W. territory of North America (part of Louisiana), was organised 30 May, 1854. Capital, Omaha city.

NEBULAR HYPOTHESIS, put forth by sir Wm. Herschel, 1811, supposes that the universe was formed out of shapeless masses of nebulæ or clusters of small stars. It has not been generally received. In Oct. 1860, Mr. Lassell strictly scrutinised the dumb-bell nebula, and stated that the brightest parts did not appear to be stars. In 1865, Mr. Wm. Huggins reported that he had analysed certain nebulæ by their spectra, and believed them to be entirely gaseous.

NECROMANCERS, see *Magic*.

NECTARINE, the *Amygdalis Persica*, originally came from Persia about 1562. Previously, presents of nectarines were frequently sent to the court of England from the Netherlands; and Catherine, queen of Henry VIII., distributed them among her friends.

NEEDLES. "The making of Spanish needles was first taught in England by Elias Crowse, a German, about the eighth year of queen Elizabeth, and in queen Mary's time there was a negro made fine Spanish needles in Cheapside, but would never teach his art to any." *Stow.* The manufacture was greatly improved at Whitechapel, London; Redditch, in Gloucestershire, and Hathersage, in Derbyshire. An exhibition of ancient needlework was formed at South Kensington Museum in 1873.

NEEDLE-GUN (*Zündnadelgewehr*), a musket invented by J. N. Dreyse of Sœmmerda, about 1827, and made a breech-loader in 1836, which was adopted by the Prussian general Manteuffel about 1846. It was found to be a most effective weapon in the war with Denmark in 1864, and in that with Austria in 1866. The ignition of the charge is produced by a fine steel rod or needle being pressed through the cartridge. The principle is claimed for James Whitley, of Dublin, 1823; Abraham Mosar, 1831, and John Hanson, of Huddersfield, 1843.

NEPAUL (N. India) was conquered by the Ghoorkas, 1768, who made treaties with the British, 1791 and 1801; but frequently made incursions; and in consequence war with them commenced 1 Nov. 1814; terminated 27 April, 1815. A treaty of peace was signed between the parties, 2 Dec. 1815. War was renewed through an infraction of the treaty by the Nepaulese, Jan. 1816; and, after several contests, unfavourable to the Nepaulese, the former

treaty was ratified, 15 March, 1816. An extraordinary embassy from the king of Nepaul to the queen of Great Britain arrived in England, landing at Southampton, 25 May, and remained till Aug. 1850; it consisted of the Nepaulese prince, Jung Bahadoor, and his suite, to whom many honours were paid. He supported the English during the Indian mutiny in 1857. The prince of Wales was honourably received in Nepaul, 12 Feb. 1876.

NEPTUNE, a primary planet, first observed on 23 Sept. 1846, by Dr. Galle at Berlin, in consequence of a letter from M. Le Verrier, who had conjectured from the anomalous movements of Uranus, that a distant planet might exist nearly in the position where Neptune is situated. Calculations to the same effect had been previously made by Mr. J. Couch Adams, of Cambridge. A satellite of Neptune was discovered by Mr. Lassell on 10 Oct. following. Neptune is said to have been seen by Lalande, and thought to be a fixed star.

NESTORIANS, the followers of Nestorius, bishop of Constantinople (428-431), who is represented as a heretic for maintaining that though the Virgin Mary was the mother of Jesus Christ as man, yet she was not the mother of God, since no human creature could impart to another what she had not herself; he also held that God was united to Christ under one person, but remained as distinct in nature and essence as though he had never been united at all. He was opposed by Eutyches, and died 439; see *Eutychians*. NEUFCHATEL, a canton in Switzerland, formerly a lordship, afterwards a principality. The first known lord was Ulric de Fenis, about 1032, whose descendants ruled till 1373, after which by marriages it frequently changed governors. On the death of the duchesse de Nemours, the last of the Longuevilles, in 1707, there were many claimants; among them our William III. He and the allies however gave it to Frederick I. of Prussia with the title of prince. In 1806 the principality was ceded to France, and Napoleon bestowed it on his general Berthier, who held it till 1814, when it fell to the disposal of the allies. They restored the king of Prussia with the title of prince with certain rights and privileges; but constituted it a part of the Swiss confederation.

After an unsuccessful attempt in 1831, the inhabitants repudiated their allegiance to Prussia, and proclaimed Neufchatel a free and independent member of the Swiss confederation 1848
The king of Prussia protested against this; and a protocol was signed between England, France, and Austria, recognising his claims 1852
Some of his adherents, headed by the count de Pourtalès, broke out into insurrection against the republican authorities, who, however, quickly subdued and imprisoned them, with the intention of bringing them to trial . . . . Sept. 1856
War threatened by the king of Prussia, and great energy and determination manifested by the Swiss. On the intervention of the English and French governments, a treaty was signed by which the king of Prussia virtually renounced his claims, on receiving a pecuniary compensation, which he eventually gave up. He retains the title of prince of Neufchatel, without any political rights. 11 June, 1857
The prisoners of Sept. 1856 were released without trial 18 Jan. ,,

* In 1306 the use of coal for fuel was prohibited in London, by royal proclamation, chiefly because it injured the sale of wood for fuel, great quantities of which were then growing about the city; but this interdiction did not long continue, and we may consider coal as having been dug and exported from this place for more than 500 years.

NEW ENGLAND (N. America). The first settlement made in 1607, was named New England by captain Smith, in 1614. A band of 102 Puritans, now termed the "Pilgrim Fathers" (with 28 women) arrived here in the *May Flower*, and founded the settlement on Plymouth Rock, 25 Dec. 1620, which was named New Plymouth. This was the nucleus of Massachusetts; from whence were gradually developed New Hampshire, Vermont, Connecticut, and Rhode Island. In 1643 these settlements formed the first American confederation, a defensive union, with a constitution based on the Mosaic law, governed by a religious aristocracy, which lasted till 1693. Maine was made an independent state in 1820. See *Forests.*

NEW FOREST (Hampshire), was made ("afforested") by William the Conqueror, 1079-85. It is said that the whole country, for thirty miles in compass, was laid waste. William Rufus was killed in this forest by an arrow shot by Walter Tyrrel, that accidentally glanced against a tree, 2 Aug. 1100, the site of which is now pointed out by a triangular stone. The New Forest Deer

Removal act was passed 14 & 15 Vict. c. 76, 7 Aug. 1851. Agitation for the preservation of this forest, autumn, 1870.

NEWFOUNDLAND (N. America), discovered by Sebastian Cabot, who called it *Prima Vista*, 24 June, 1497. It was formally taken possession of by sir Humphry Gilbert, 1583. In the reign of Elizabeth, other nations had the advantage of the English in the fishery. In 1577 there were 100 fishing vessels from Spain, 50 from Portugal, 150 from France, and only 15, but of larger size, from England. *Hakluyt.* But the English fishery in some years afterwards (1625) had increased so much that the ports of Devonshire alone employed 150 ships, which sold their fish in Spain, Portugal, and Italy. The sovereignty of England was recognised in 1713. Newfoundland obtained the privilege of a colonial legislature in 1832; and the bishopric was established in 1839; population about 130,000.—Appalling fire at St. John's, a great portion of the town destroyed, the loss estimated at 1,000,000*l.* sterling, 9 June, 1846. On 14 Jan. 1857, a convention was concluded between the English and French governments, confirming certain French privileges of fishery in exchange for others. The English colonists were dissatisfied with this convention. Newfoundland consented to union with the dominion of Canada, March, 1869. Lieut.-governor, col. sir Stephen J. Hill, 1870; sir John H. Glover, Jan. 1876.

NEWGATE, LONDON. The PRISON derives its name from the gate which once formed part of it, and stood a little beyond the Sessions-house in the Old Bailey. It was used as a prison for persons of rank, as early as 1218; but was rebuilt about two centuries afterwards by the executors of sir Richard Whittington, whose statue with a cat stood in the niche till the time of its demolition by the great fire of London, in 1666. It was then reconstructed; but becoming an accumulation of misery and inconvenience, was pulled down and rebuilt between 1778 and 1780. During the riots in 1780, the interior was destroyed by fire, but shortly afterwards restored. In 1857 the interior was pulled down to be re-erected on a plan adapted to the reformatory system. Newgate MARKET, established in 1681, was ordered to be abolished by an act passed in 1861, which took effect when the meat and poultry market in Smithfield was opened, 1 Dec. 1868.

NEW GRENADA (S. America), discovered by Ojeda in 1499, and settled by the Spaniards in 1536. It formed part of the new republic of Bogota, established in 1811; and, combined with Caracas, formed the republic of Colombia, 17 Dec. 1819; see *Colombia.*

NEW GUINEA or **PAPUA**, a large island, Pacific Ocean, discovered by the Portuguese after their settlement of the Moluccas between 1512 and 1530. It was visited by Saavedra, a Spaniard, in 1528. It is said to have been named New Guinea by Ortiz de Retes, a Portuguese, 1549. Torres Straits, which divide New Guinea and Australia, were discovered by Torres, a Spaniard, in 1606. It was frequently visited by the Dutch in the 17th century. They established a colony and erected a fortress, named Dubus, on the S.W. coast, in 1828, which was unsuccessful; and removed in 1835.

On 9 Oct. the New Guinea Colonizing Association proposed to lord Carnarvon, the colonial secretary, to send to New Guinea an expedition of 200 men with 50 officers, in a ship of 1200 tons burden; he declined to sanction it, and referred to dangers 30 Oct. 1875

NEW LANARK (W. Scotland). Here Robert Owen endeavoured to establish socialism in 1801; and here the first infant school was set up, 1815.

NEWMARKET (Cambridgeshire), renowned for its horse-races. It is first mentioned in 1227; and probably derived its name from the market then recently established. James I. erected a hunting seat here, called the king's house, to which Charles I. was taken as a prisoner in 1647, when the parliament army was quartered in the neighbouring village of Kennet. Charles II., who was fond of racing, built a stand-house for the sake of the diversion, about 1667,* and from that period races have been annual to the present time; and many extraordinary races have been run; see *Races.*

* During the races, on 22 March, 1683, Newmarket was nearly destroyed by an accidental fire, which occasioned the hasty departure of the company then assembled, including the king, the queen, the duke of York, the royal attendants, and many of the nobility; and to this disaster historians have ascribed the failure of the Rye-house plot, the object of which was said to be the assassination of the king and his brother on the road from Newmarket to London, if the period of their journey had not been thus anticipated; see *Rye-House Plot.*

NEW MEXICO (N. America), ceded to the United States in 1848, and organised as a territory, 9 Sept. 1850, admitted a State, 1876. Capital, Santa Fé.

NEW ORLEANS, capital of Louisiana, N. America (*which see*), founded in 1717, under the regency of the duke of Orleans. In 1788, seven-eighths of the city were destroyed by fire. The British attacked New Orleans in Dec. 1814, and were repulsed with great loss, by the Americans under general Jackson, 8 Jan. 1815. New Orleans was surrendered to the Federals in April, 1862. The strong feeling of the inhabitants in favour of the Confederates and against the Federals induced general B. Butler to rule them with military rigour, occasionally degenerating into brutal tyranny, especially towards females, May to October, 1862. He was replaced by general Banks, 16 Dec. 1862. Sanguinary riots; due to agitators, begun 30 July, 1866, only suppressed by martial law; about 40 persons, white and coloured, were killed, and about 160 wounded, similar riots occurred, 24 Oct. 1868, and often since.

New Orleans.—John McEnery elected governor of Louisiana by the southern whites, 4 Nov. 1872; but W. P. Kellogg, elected by the coloured people and their white friends, was recognised by the Federal government. To defend themselves against tyranny, the southerns formed the "white league," and collected arms, which they refused to surrender on demand on 15 Sept. 1874. They deposed Kellogg at New Orleans after some resistance, and established McEnery as governor, but submitted to the president's proclamation; and Kellogg was restored 18 Sept., much to the regret of the citizens.

NEWPORT (Monmouthshire). Chartered by Edward III. and James I.

CHARTIST RIOTS.—About 10,000 chartists (*which see*) from the neighbouring mines, armed with guns, pikes, &c., arrived at Newport, 4 Nov. 1839. They divided themselves into two bodies—one, under the command of Mr. John Frost, an ex-magistrate, proceeded down the principal street; whilst the other, headed by his son, took the direction of Stow-hill. They met in front of the Westgate hotel, where the magistrates were assembled with about 30 soldiers of the 45th regiment, and several special constables. The rioters broke the windows and fired on the inmates, by which the mayor, Mr. (afterwards sir Thomas) Phillips, and several other persons were wounded. The soldiers returned the fire, and dispersed the mob, which fled, leaving about 20 dead, and others wounded. A detachment of the 10th royal hussars arrived from Bristol, and the town became tranquil.

Frost was apprehended on the following day, together with his printer, and other influential persons among the chartists. He and others were tried and sentenced to death (afterwards commuted to transportation) . . . . . Jan. 1840
An amnesty was granted them, 3 May, and they returned to England . . . . . Sept. 1856

NEW RIVER, for the supply of London with water, was begun 1609, and finished in 1613, when the projector, Hugh Myddelton, a London goldsmith, was knighted by James I. *Strype.* This artificial river, which rises in Hertfordshire,* and which, with its windings, then forty-eight miles long, was brought to London, and opened 29 Sept. 1613. So little was the benefit of it understood, that for above thirty years the seventy-two shares, into which it was divided, netted only 5*l.* apiece. Each of these shares was sold originally for 100*l.* A part of a share sold at the rate of 40,000*l.* the share, 14 May, 1873.

* Myddelton turned the first sod at Chadwell, a spring rising at the foot of a hill near Ware, 19 April 1609; the water issued out of a deep hole, and combined with another spring, Amwell; forming a river about 20 feet wide; he died poor, 10 Dec. 1631.

NEW ROAD, N. London (now Pentonville, Euston, and Mary-le-bone roads) was cut through verdant meadows, 1756-7, after much opposition.

NEW ROSS (Wexford), S. E. Ireland. Here general Johnston totally defeated the rebels under Beauchamp D. Bagenal Harvey, 4 June, 1798.

NEWRY (N. Ireland). In the rebellion of 1641, Newry was reduced to a ruinous condition; it was surprised by sir Con. Magenis, but was retaken by lord Conway. After the Restoration the town was rebuilt. It was burnt by the duke of Berwick when fleeing from Schomberg and the English army, and only the castle and a few houses escaped, 1689.

NEWS-LETTERS. News-writers in the reign of Charles II. collected from the coffee-houses information, which was printed weekly and sent into the country. The *London Gazette*, then the only authorised newspaper, contained little more than proclamations and advertisements.

NEW SOUTH WALES, the principal colony of Australia on the eastern coast of New Holland, was explored and taken possession of and named by captain Cook in 1770. At his recommendation a convict colony was first formed here. Captain A. Phillip, the first governor, arrived at Botany Bay with 800 convicts, 20 Jan. 1788; but he subsequently preferred Sydney, about seven miles distant from the head of Port Jackson, as a more eligible situation for the capital. A new constitution was granted in 1855 (18 & 19 Vict. c. 54). The Intercolonial Exhibition was opened at Sydney, by the governor-general lord Belmore, 30 Aug. 1870. It consisted of two departments, agricultural and non-agricultural. A conference of delegates from the Australian colonies met at Sydney in Jan. 1873, to deliberate on a customs' union, postal and railway arrangements, &c. The ministry introduced a free trade budget near the end of the year. Industrial exhibition opened by the governor, 11 April, 1874. Population, in 1856, 269,722; in 1862, 367,495; in 1866, 411,388; in 1871, 519,163. The imports for 1859 amounted to 6,597,053*l.*; the exports to 4,768,049*l.* Governor, sir John Young, 1860; earl of Belmore, 1867; sir Hercules Robinson, April, 1872; sir Alfred Stephen, Nov. 1875. NEWSPAPERS. The Roman *Acta Diurna* were issued, it is said, 691 B.C. In modern times, a *Gazetta*, which derived its name from its price, a small coin, was published in Venice (about 1536). The *Gazette de France*, now existing, first appeared in April, 1631, edited by Renaudot, a physician. It was patronised by the king, Louis XIII., who wrote one article for it, and by Richelieu. The first real newspaper published in England* was established

* Some copies of a publication are in existence called *The English Mercury*, professing to come out under the authority of queen Elizabeth, in 1588, the period of the Spanish Armada. The researches of Mr. T. Watts, of the British Museum, proved these to be forgeries, executed about 1766. The full title of No. 50 is "*The English Mercurie*, published by authoritie, for the prevention of false reports, imprinted by Christopher Barker, her highness's printer, No. 50." It describes the Spanish Armada, giving "A journall of what passed since the 21st of this month, between her majestie's fleet and that of Spayne, transmitted by the Lord Highe Admiral, to the Lordes of council."

NEW STYLE. Pope Gregory XIII., in order to rectify the errors of the current calendar, published a new one, in which ten days were omitted—5 Oct. 1582, becoming 15 Oct. The new style was adopted in France, Italy, Spain, Denmark, Holland, Flanders, Portugal, in 1582, in Germany in 1584, in Switzerland in 1583 and 1584, in Hungary in 1587; and in Great Britain in 1751. In 1752 eleven days were left out of the calendar—3 Sept. being reckoned as 14 Sept. The difference between the old and new style up to 1699 was 10 days; after 1700, 11 days; after 1800, 12 days. In Russia, Greece, and throughout the East, the old style is still retained. The czar, Alexander II., was born on the 17th April, 1818, old style, 29 April, new style; see *Calendar*.

NEW TESTAMENT, see *Bible*.

NEWTONIAN PHILOSOPHY, the doctrines respecting gravitation, &c., taught by sir Isaac Newton in his "Principia," published in 1687; see *Gravitation*. He was born 25 Dec., 1642; became master of the mint, 1699; president of the Royal Society, 1703; and died 20 March, 1727. A statue of him in marble by Roubiliac was set up at Trinity College, Cambridge, 14 July, 1755, and one in bronze by Theed, at Grantham, 21 Sept. 1858, when lord Brougham delivered a discourse on the life and works of Newton. NEW YEAR'S DAY, &c. The beginning of the Jewish year was changed and the passover instituted, 1491 B.C. A feast is said to have been instituted by Numa, and dedicated to Janus (who presided over the new year), 1 Jan. 713 B.C.

On this day the Romans sacrificed to Janus a cake of new sifted meal, with salt, incense, and wine; and all the mechanics began something of their art of trade: the men of letters did the same, as to books, poems, &c.; and the consuls, though chosen before, took the chair and entered upon their office this day. Nonius Marcellus refers the origin of NEW-YEAR'S GIFTS among the Romans to Titus Tatius, king of the Sabines, who having considered as a good omen a present of some branches cut in a wood consecrated to Strenia, the goddess of strength, which he received on the first day of the new year, authorised the custom afterwards, and gave these gifts the name of Strenæ, 747 B.C.

NEY'S EXECUTION. Ney, duke of Elchingen, prince of the Moskwa, and one of the most valiant of the marshals of France, was shot as a traitor, 7 Dec. 1815. On 7 Dec. 1853, his statue was erected on the spot where he fell.

After the abdication of Napoleon I., 5 April, 1814, Ney took the oath of allegiance to the king, Louis XVIII. On Napoleon's return to France from Elba, he marched against him; but his troops deserting, he regarded the cause of the Bourbons as lost, and opened the invader's way to Paris, March, 1815. Ney led the attack of the French at Waterloo, where he fought in the midst of the slain, his clothes pierced with bullet-holes, five horses having been shot under him; night and defeat obliged him to flee. Though included in the decree of 24 July, 1815, which guaranteed the safety of all Frenchmen, he was sought out, and on 5 Aug. taken at the castle of a friend at Urillac, and brought to trial before the Chamber of Peers, 4 Dec. The 12th article of the capitulation of Paris, fixing a general amnesty, was quoted in his favour in vain.

NEZIB, Syria. Here Ibrahim and the Egyptians defeated the Turks, 24 June, 1839.

NIAGARA (N. America). At the head of this river, on the western shore, is Fort Erie, which was taken by the English, 24 July, 1759. It was abandoned in the war with the United States, 27 May, 1813, but was retaken, 19 Dec. following. A suspension bridge of a single span of 820 feet over the Niagara, connecting the railways of Canada and New York, was opened in March, 1855. It is elevated 18 feet on the Canadian, and 28 feet on the American side.

About eighteen miles below Fort Erie are the remarkable falls. The river is here 740 yards wide; the half-mile immediately above the cataracts is a rapid, in which the water falls 58 feet; it is then thrown, with astonishing grandeur, down a stupendous precipice of 150 feet perpendicular, in three distinct and collateral sheets; and, in a rapid that extends to the distance of nine miles below, falls nearly as much more. The river then flows in a deep channel till it enters lake Ontario, at Fort Niagara.
The falls visited by the prince of Wales, Sept. 1860.
Blondin crossed the falls on a tight rope, 17 Aug. 1859.
Professor Tyndall visited the falls, Nov., 1872, and lectured on them at the Royal Institution, 4 April, 1872.

NIBELUNGENLIED or **NIBELUNGEN-LIED,** a popular German epic of the 12th century, composed of various ancient mythical poems, termed sagas; which according to the poet Wm. Morris, should be to our race what Homer was to the Greeks.

The first critical edition, by K. Lachmann, appeared 1826 and 1846. The best translation in modern German, by Simrock, 1827; a useful edition, with translation and glossary, by L. Braunfels, 1846.
Richard Wagner's musical dramas, "The Ring of the Nibelungen," are based on this poem: the persons include the great Northern gods and goddesses, the giants, the dwarfs, and the daughters of the Rhine (see under *Music*).

NICÆA, see *Nice.*

NICARAGUA, a state in Central America (*which see*). The present constitution was established 19 Aug. 1858. At the commencement of 1855 it was greatly disturbed by two political parties: that of the president, Chamorro, who held Grenada, the capital, and that of the democratic chief, Castellon, who held Leon. The latter invited Walker, the filibuster, to his assistance, who in a short time became sole dictator of the state.* By

* William Walker was born at Tennessee, in the United States, where he became successively doctor, lawyer, and journalist, and afterwards gold-seeker in California, whence he was invited to Nicaragua by Castellon, with the promise of 52,000 acres of land, on condition of bringing with him a band of adventurers to sustain the revolutionary cause. Walker accepted the terms, and on 28 June landed at Realejo with 68 men. He increased his forces at Leon, and soon after attacked the town of Rivas, where he was repulsed with loss. He then joined col. Kinney, who had occupied and governed Grey Town, 6 Sept. On 13 Oct. Walker captured Grenada by surprise when in a defenceless state, shot Mayorga, one of the ministers, and established a rule of terror. By intervention of the American consul he made peace with the general of the state army, Corral, but shot him on 7 Nov., on finding him corresponding with fugitives at Costa Rica. Walker at first was only general-in-chief: but on Rivas, whom he had made president, deserting him, he became sole dictator. On 14 May, 1856, his envoy Vijil was recognised by the president of the United States, whence also he obtained reinforcements during his retention of power. Costa Rica declared war against him, 28 Feb. 1856; the other states of central America soon followed the example, and a sanguinary struggle ensued, lasting till May, 1857. On 25 Nov. 1856, Walker totally burnt Grenada, being unable to defend it, and removed the seat of government to Rivas. This place he surrendered to gen. Mora on 1 May, 1857, on the intervention of capt. Davis, of the *St. Mary's*, U.S. Himself, his staff, and 260 men, were conveyed in that vessel to New Orleans, where they were received with great enthusiasm. On 25 Nov., 1857, he again invaded Nicaragua, landing at Punta Arenas with 400 men; but on 8 Dec. was compelled to surrender to capt. Paulding, U.S., and was conveyed to New York. He escaped punishment by *nolle prosequi* (2 June, 1858): but capt. Paulding was tried for exceeding orders, and blamed—

the united efforts of the confederated states the filibusters were all expelled in May, 1857. On 1 May, 1858, Nicaragua and Costa Rica appealed to the great European powers for protection. Nicaragua railway, a transit route between the Pacific and Atlantic, proposed, and company formed Nov. 1866. President T. Martinez elected, 1859 and 1863; Fernando Guzman, elected 1 March, 1867; Vicente Quadra elected 1 Feb. 1871. Population increased to about 400,000.

Louis Napoleon, afterwards emperor, proposed the making a ship canal by the lake Nicaragua from the Atlantic to the Pacific, between 1842—4; the government of Nicaragua proposed it in 1846; colonel Childs made a survey in 1851; a company was chartered for 85 years, and conventions were signed, but the capitalists declined their support.

The scheme was revived in Feb. 1875. See *Panamá*; and *Loans*.

NICE or NICÆA, a town in Bithynia, Asia Minor, N. W. Antigonus gave it the name Antigoneia, which Lysimachus changed to Nicæa, the name of his wife. It became the residence of the kings of Bithynia about 208 B.C. At the battle of Nice, A.D. 194, the emperor Severus defeated his rival, Pescennius Niger, who was again defeated at Issus, and soon after taken prisoner and put to death. The first general council was held here 19 June to 25 Aug. 325, which adopted the NICENE CREED and condemned the Arians. It was attended by 318 bishops from divers parts, who settled both the doctrine of the Trinity and the time for observing Easter. An addition was made to the creed, 381, was rejected, 431, (when it was decreed unlawful to make further additions), but accepted, 451. When the Crusaders took Constantinople, and established a Latin empire there in 1204, the Greek emperors removed to Nice and reigned there till 1261, when they returned to Constantinople; see *Eastern Empire*, p. 237. Nice was taken by the Ottoman Turks in 1330.

NICE (N. Italy), was the seat of a colony from Massilia, now Marseilles, and formed part of the Roman empire. In the middle ages it was subject to Genoa, and suffered from the frequent wars, being taken and re-taken by the imperialists and French. It was taken by the Austrians under Melas, 1800; seized and annexed to France 1792; restored to Sardinia in 1814. Nice was again annexed to France in virtue of the treaty of 24 March, 1860; the people having voted nearly unanimously for this change by universal suffrage. The French troops entered 1 April and definite possession was taken 14 June following. Garibaldi, a native, vehemently protested against this annexation. Population of the province, in 1857, 256,593.

NICIAS, PEACE OF, between Athens and Sparta for 50 years, 421 B.C., negotiated by that unfortunate Athenian general, who with his colleague, Demosthenes, was put to death after the disastrous termination of the expedition against Syracuse, 413 B.C.

NICKEL, a white, ductile, malleable, magnetic metal, employed in the manufacture of German silver. Cronstadt in 1751 discovered nickel in the mineral copper-nickel.

NICOBAR ISLES, Indian Ocean, S. of Bay of Bengal, given up by Denmark and occupied by Great Britain to suppress piracy; announced June, 1869.

NICOLAITANES, a sect mentioned in *Rev.* ii. 6, 15, said to have sprung from Nicolas, one of the first seven deacons (*Acts* vi.), and to have advocated a community of wives, and to have denied the divinity of Christ.

NICOMEDIA, the metropolis of Bithynia, Asia Minor, N. W., founded by king Nicomedes I., 264 B.C., on the remains of Astacus; destroyed by an earthquake, A.D. 115; and restored by the emperor Adrian, 124. The Roman emperors frequently resided here during their eastern wars. Here Diocletian resigned the purple, 305; and Constantine died at his villa in its neighbourhood, 337. It surrendered to the Seljukian Turks, 1078; and to Orchan and the Ottoman Turks in 1338.

NICOPOLIS (now in Bulgaria), BATTLE OF, 28 Sept. 1396, between the allied Christian powers under Sigismund, king of Hungary, afterwards emperor, and the Turks under Bajazet; said to have been the first battle between the Turks and Christians; the latter were defeated, losing 20,000 slain, and as many wounded and prisoners.

NIELLO-WORK, believed to have been produced by rubbing a mixture of silver, lead, copper, sulphur, and borax into engravings on silver, &c., an art known to the ancients was practised in the middle ages, and said to have given to Maso Finiguerra the idea of engraving upon copper, about 1460.

NIEMEN, or MEMEL, a river flowing into the Baltic, and separating Prussia from Russia. On a raft on this river the emperor Napoleon met Alexander of Russia, 22 June 1807, and made peace with him and Prussia. He crossed the Niemen to invade Russia, 24 June, 1812, and re-crossed with the remains of his army, 28 Dec. Near it the Poles defeated the Russians 27 May, 1831.

NIGER EXPEDITION, see *Africa*, 1841.

NIGHTINGALE FUND. On 21 Oct. 1854, Miss Florence Nightingale left England with a staff of thirty-seven nurses, and arrived at Scutari, 5 Nov. She rendered invaluable services to the army; and returned to London, 8 Sept. 1856. In honour of this, a meeting was held at Willis's Rooms on 29 Nov. 1855, to raise funds to establish an institution for the training of nurses and other hospital attendants. Madame Jenny Lind Goldschmidt sang at Exeter Hall on 11 March 1856, and gave the proceeds (1872*l.*) to the fund. The subscriptions closed, 24 April, 1857, amounting to 44,039*l.* The queen gave Miss Nightingale a valuable jewel.

NIHILISM, a popular name for the school of philosophy which renounces all forms of Divine revelation and gives nothing in their place.

NIHILISTS, ultra-reformers in Russia, said to propose the destruction of all government, and to begin society afresh. They became known in 1872; their alleged leader, Zychareff. The government began to suppress them, Sept. 1875. One of the leaders, Michael Bakounin, died at Lugano, 1 July, 1876.

NIKA CONTESTS, see *Circus*.

yet excused by president Buchanan. On 5 Aug. 1860, Walker landed near Truxillo, Honduras, and took the fort on the 6th. On the 7th he proclaimed that he made war on the government, not on the people of Honduras. On being summoned to surrender his booty by capt. Salmon, R. N., of the *Icarus*, he refused, and fled. He was pursued, caught, given up to the Honduras government, tried, and shot (12 Sept.). His followers were dismissed.

NIKOLSBURG (Moravia). Here were signed, 26 July 1866, the preliminaries of a peace between Austria and Prussia.

NIL DARPAN, see *India*, June 1861.

NILE (Egypt). This great river rises in the Mountains of the Moon, in about ten degrees of N. lat. and in a known course of 1250 miles receives no tributary streams. The travels of Bruce were undertaken to discover the source of the Nile. He set out from England in June, 1768; on the 14th of November, 1770, discovered the source of the Blue Nile, and returned home in 1773. This river overflows regularly every year, from about the 15th of June to the 17th of September, when, having given fertility to the land, it begins to decrease. It must rise 16 cubits to ensure that fertility. The first Nilometer (a pillar) was set up by Solyman the Caliph, 715. In 1829, the inundations of the Nile rose to 26 instead of 22, by which 30,000 people were drowned and immense property lost. Mr. Petherick set out early in 1861 to explore the country at the source of the Nile. For recent discoveries, see *Africa* 1863. A bridge over the Nile (above 1300 feet) at Cairo, was completed by a French company, Aug. 1872.

NILE, BATTLE OF THE (or Aboukir), 1 Aug. 1798, near Rosetta, between the French fleet under Brueys, and the British under sir Horatio Nelson. Nine of the French line-of-battle ships were taken, two were burnt, and two escaped. The French ship, *L'Orient*, with Brueys and 1000 men on board, blew up, and only 70 or 80 escaped. Nelson's exclamation upon commencing the battle was, "Victory or Westminster Abbey!"

NIMEGUEN (Holland). Here was signed the treaty of peace between France and the United Provinces, 1678. The French were successful against the British under the duke of York, before Nimeguen, 28 Oct. 1794; were defeated by them 3 Nov.; but gained the place 8 Nov.

NINEVEH, the capital of the Assyrian empire (see *Assyria*), founded by Ashur about 2245 B.C. Ninus reigned in Assyria, and named this city Nineveh, 2069 B.C. *Abbé Lenglet.* Jonah preached against Nineveh (about 862 B.C.), which was taken by Nebuchadnezzar, 606 B.C. The discoveries of Mr. Layard and others since 1839, in the neighbourhood of Mosul, the supposed site of this ancient capital, have in a manner disinterred and repeopled a city which for centuries had ceased to figure on the page of history. Botta commenced his explorations at Khorsabad in 1843, and published his great work "Monuments de Ninive," 1849-50. In 1848 Mr. Layard published his "Nineveh and its Remains," and in 1853 his "Discoveries," in his second visit in 1849-50. Mr. Hormusd Rassam, in 1854, discovered an ancient palace. Mr. George Smith described his excavations and their results in 1873-4, in "Assyrian Discoveries," 1875. He died at Aleppo, 19 Aug. 1876.

The forms, features, costume, religion, modes of warfare, and ceremonial customs of its inhabitants stand before us as distinct as those of a living people; and by help of the sculptures and their cuneiform inscriptions, the researches of the learned have increased the knowledge of Assyrian history. Among the sculptures that enrich the British Museum, may be mentioned, the winged bull and lion, and numerous hunting and battle pieces; and the bas-relief of the eagle-headed human figure, presumed to be a representation of the Assyrian god Nisroch (from *Nisr*, an *eagle* or *hawk*), whom Sennacherib was in the act of worshipping when he was assassinated by his two sons, about 710 B.C. 2 *Kings* xix. 37.

NIOBIUM, a rare metal, discovered by Hatchett in columbite, a black earth, and named columbium, 1801. It was pronounced to be identical with tantalum by Wollaston; but was rediscovered by H. Rose in 1846, and named niobium.

NISBET or **NESBIT** (Northumberland). Here a battle was fought between the English and Scotch armies, the latter greatly disproportioned in strength to the former. Several thousands of the Scots were slain upon the field and in the pursuit, 7 May, 1402.

NISMES (Nimes), S. France, was the flourishing Roman colony, Nemausus. Its noble amphitheatre was injured by the English in 1417. The inhabitants embraced Protestantism, and suffered much persecution in consequence, and Nismes has frequently been the scene of religious and political contests. The treaty termed the Pacification of Nismes (14 July, 1629) gave religious toleration for a time to the Huguenots.

NITRE, see *Saltpetre.*

NITRIC ACID, a compound of nitrogen and oxygen, formerly called *aqua fortis*, first obtained in a separate state by Raymond Lully, an alchemist, about 1287; but we are indebted to Cavendish, Priestley, and Lavoisier for our present knowledge of its properties. H. Cavendish demonstrated the nature of this acid in 1785. *Nitrous acid* was discovered by Scheele about 1774. Nitrous gas was accidentally discovered by Dr. Hales. *Nitrous oxide gas* (laughing gas) was discovered by Dr. Priestley in 1776. The use of this gas as an anæsthetic began in America in 1864; at Paris, 1866; in London, 31 March, 1868, ingenious apparatus having been invented for its application.

NITROGEN or **AZOTE** (from the Greek *a*, no, and *zoo*, I live), an irrespirable elementary gas, and an important element in food, discovered by Rutherford about 1772. Before 1777, Scheele separated the oxygen of the air from the nitrogen, and almost simultaneously with Lavoisier discovered that the atmosphere is a mixture of these two gases. Nitrogen combined with hydrogen forms the volatile alkali ammonia, so freely given off by decomposing animal and vegetable bodies.

NITRO-GLYCERINE (also called **NITROLEUM**), an intensely explosive amber-like fluid, discovered by Sobrero in 1847, is produced by adding glycerine (in successive small quantities) to a mixture of one part of nitric acid, and two parts of sulphuric acid. Alfred Nobel, a Swede, first attempted its application as an explosive agent, in 1864. It has caused several most disastrous accidents, with great loss of life. In attempting to bury some nitro-glycerine in the town-moor at Newcastle-on-Tyne, 17 Dec. 1867, an explosion took place, and seven persons lost their lives, including Mr. Mawson, the sheriff, and Mr. Bryson, town surveyor; see *Dynamite.* Mr. Alfred Nobel's nitro-glycerine manufactory, near Stockholm, blown up, 15 persons killed, many injured, 10 June, 1868. An act prohibiting its importation for a time, and regulating its transmission, was passed in 1869: see *Explosives.*

NIZAM, see *Hyderabad.*

NOBILITY. The Goths, after they had seized a part of Europe, rewarded their heroes with titles

of honour, to distinguish them from the common people. The right of peerage seems to have been at first territorial. Patents to persons having no estate were first granted by Philip the Fair of France, 1095. George Neville, duke of Bedford (son of John, marquis of Montague), ennobled in 1470, was degraded from the peerage by parliament, on account of his utter want of property, 19 Edw. IV., 1478. Noblemen's privileges were restrained in June, 1773; see *Lords*, and the various orders of the nobility.

NOBILITY OF FRANCE preceded that of England. On 18 June, 1790, the National Assembly decreed that hereditary nobility could not exist in a free state; that the titles of dukes, counts, marquises, knights, barons, excellencies, abbots, and others, be abolished; that all citizens take their family names; liveries and armorial bearings also to be abolished. The records of the nobility, 600 volumes, were burnt at the foot of the statue of Louis XIV., 25 June, 1792. A new nobility was created by the emperor Napoleon I., 1808. The hereditary peerage was abolished 27 Dec. 1831; re-instituted by Napoleon III., 1852.

NOBLE, an English gold coin (value 6*s.* 8*d.*), first struck in the reign of Edward III., 1343 or 1344, said to have derived its name from the excellency of the metal of which it was composed.

"NOLUMUS LEGES ANGLIÆ MUTARI," see *Bastards*, and *Merton*.

NOMINALISTS (or CONCEPTUALISTS), a scholastic sect, opposed to the Realists, maintain that general ideas have no existence outside our minds, and only exist by the names we give them. The founder of the sect, Jean Roscellin, a canon of Compiègne, was condemned by a council at Soissons, 1092, but the controversy was revived in the 12th century. Among the Nominalists are reckoned Abelard, Occam, Hobbes, Locke, Berkeley, and Dugald Stewart. The Realists assert that general ideas are real things with positive existence.

NON-CONFORMISTS. The Protestants in England are divided into conformists and non-conformists, or, churchmen and dissenters. The first place of meeting of the latter, in England, was established at Wandsworth, near London, 20 Nov. 1572. The name of non-conformists was taken by the Puritans when the Act of Uniformity came into operation on 24 Aug. 1662 (termed "Black Bartholomew's day"), when 2000 ministers of the established religion resigned, not choosing to conform to the statute passed "for the uniformity of public prayers and administration of the sacraments;" see *Puritans*, and *Dissenters*. The laws against them were relaxed by the Toleration act, 24 May, 1689.—The *Nonconformist* newspaper (edited by Mr. Edward Miall, since M.P.) first appeared 14 April, 1841.

NONES, in the Roman calendar, were the fifth day of each month, excepting March, May, July, and October, when the nones fell on the seventh day.

NON-JURORS considered James II. to have been unjustly deposed, and refused to swear allegiance to William III. in 1689. Among them were Sancroft, archbishop of Canterbury; Ken, bishop of Bath and Wells, and the bishops of Ely, Gloucester, Norwich, and Peterborough, and many of the clergy, who were deprived 1 Feb. 1691. Non-jurors were subjected to double taxation, and obliged to register their estates, May, 1723. They formed a separate communion, which existed till the beginning of the present century.

NON NOBIS, DOMINE! ("Not unto us, O Lord!" &c., *Psalm* cxv. 1), a musical canon, sung as a grace at public feasts, was composed by W. Bird in 1618.

NON-RESISTANCE OATH (containing a declaration that it is unlawful to take arms against the king upon any pretence whatever), enforced by the Corporation act, 1661, was repealed in 1719.

NOOTKA SOUND (Vancouver's Island), discovered by captain Cook in 1778, and settled by the British in 1786, when a few British merchants in the East Indies formed a settlement to supply the Chinese market with furs; but the Spaniards in 1789 captured two English vessels and took possession of the settlement. The British ministry demanded reparation, and the affair was amicably terminated by a convention, and a free commerce was confirmed to England in 1790.

"NO-POPERY RIOTS," see *Gordon*. The cry was revived against the Catholic emancipation bill, 1829.

NORDLINGEN (Bavaria). Here the Swedes under count Horn were defeated by the Austrians, 27 Aug. 1634; and the Austrians and allies by Turenne in 1645.

NORE MUTINY, see *Mutinies*.

NORFOLK ISLAND (Pacific Ocean), discovered in 1774, by captain Cook, who found it uninhabited, except by birds. The settlement was made by a detachment from Port Jackson under governor Phillip, in 1788, in Sydney bay, on the south side of the island. This was at one time the severest penal colony of Great Britain. The island was abandoned in 1809, but re-occupied as a penal settlement in 1825. The descendants of the mutineers of the *Bounty* were removed to it in June, 1856, from *Pitcairn's Island* (*which see*).

NORICUM, see *Austria*.

NORMAL SCHOOLS (from *norma*, a rule). One for the instruction of teachers, established at Paris by a law, 30 Oct. 1794, opened 20 Jan. 1795, under the direction of La Place, La Harpe, Haüy, and other eminent men, was soon closed. Another, established by Napoleon in 1808, was closed in 1822. The plan was revived in 1826, and has been developed in England and other countries.

NORMANDY (N. France), part of Neustria, a kingdom founded by Clovis in 511 for his son Clotaire, which, after various changes, was united to France by Charles the Bald in 837. From the beginning of the 9th century it was continually devastated by the Scandinavians, termed Northmen or Normans, to purchase repose from whose irruptions Charles the Simple of France ceded the duchy to their leader Rollo, 905. Rollo, the first duke, held it as a fief of the crown of France, and several of his successors after him, until William the seventh duke, acquired England, in 1066. It remained a province of England till the reign of king John, 1204, when it was reunited to France. It was re-conquered by Henry V., 1418, and held by England partially till 1450. The English still pos-

sess the islands on the coast, of which Jersey and Guernsey are the principal.

NORTHALLERTON (Yorkshire). Near here was fought the "battle of the Standard," where the English totally defeated the Scotch armies, 22 Aug. 1138. The archbishop of York brought forth a consecrated standard on a carriage at the moment when they were hotly pressed by the invaders, headed by king David.

NORTH AMERICA, see *America, United States, Indians, Canada*, &c.

NORTHAMPTON was burnt by the Danes in 1010. Here Henry III. proposed to found a university in 1260, and held a parliament in 1269. On 10 July, 1460, a conflict took place between the duke of York and Henry VI. of England, in which the king was defeated, and made prisoner (the second time) after a sanguinary fight which took place in the meadows below the town. Northampton was ravaged by the plague in 1637. It was seized and fortified by the parliamentary forces in 1642. A fire nearly destroyed the town, 3 Sept. 1675. Riots here because Mr. C. Bradlaugh was not elected M.P., 6 Oct. 1874, were suppressed by the military.

NORTH-EAST AND WEST PASSAGES. The attempt to discover a north-west passage was made by a Portuguese named Corte Real, about 1500. In 1585, a company was formed in London called the "Fellowship for the discovery of the North-West Passage." From 1743 to 1818 parliament offered 20,000*l.* for this discovery. In 1818 the reward was modified by proposing that 5000*l.* should be paid when either 110°, 120°, or 130° W. long. should be passed: one of which payments was made to sir E. Parry. For their labours in the voyages enumerated in the *list below*, Parry, Franklin, Ross, Back, and Richardson, were knighted.

† Capt. M'Clure sailed in the *Investigator* in company with com. Collinson in the *Enterprise* in search of sir John Franklin, 20 Jan. 1850. On 6 Sept. he discovered high land, which he named Baring's land; on the 9th, other land, which he named after prince Albert; on the 30th the ship was frozen in. Entertaining a strong conviction that the waters in which the *Investigator* then lay communicated with Barrow's straits, he set out on 21 Oct., with a few men in his sledge, to test his views. On 26 Oct. he reached Point Russell (73° 31′ N. lat., 114° 14′ W. long.), where from an elevation of 600 feet he saw Parry or Melville Sound beneath them. The strait connecting the Atlantic and Pacific Oceans he named after the prince of Wales. The *Investigator* was the first ship which traversed the Polar sea from Behring's straits to Behring island. Intelligence of this discovery was brought to England by com. Inglefield, and the Admiralty chart was published 14 Oct. 1853. Capt. M'Clure returned to England, Sept. 1854. In 1855, 5000*l.* were paid to capt. (afterwards sir Robert) M'Clure, and 5000*l.* were distributed among the officers and crew. NORWICH, BISHOPRIC OF, originally East Anglia; the first bishop was Felix, a Burgundian, sent to convert the East Anglians about 630. The see was divided into two distinct bishoprics—Elmham, in Norfolk, and Dunwich, in Suffolk, about 673. Both sees suffered extremely from the Danish invasions, insomuch that after the death of St. Humbert, they lay vacant for a hundred years. At last the see of Elmham was revived, and Dunwich was united to it; but Arfastus removed the seat to Thetford, where it continued till Herbert Losinga removed it to Norwich 1094. This see has given to the church of Rome two saints; and to the nation five lord chancellors. It was valued in the king's books at 899*l.* 18*s.* 7½*d.* per annum. Present income, 4500*l.*; see *Bishoprics*.

NOTABLES, French assemblies of nobles, bishops, knights, and lawyers. An assembly of the notables was convened by the duke of Guise, 20 Aug. 1560, and by other statesmen. Calonne, the minister of Louis XVI., summoned one which met on 22 Feb. 1787, on account of the deranged state of the king's finances, and again in 1788, when he opened his plan: but as any reform militated too much against private interest to be adopted, Calonne was dismissed, and soon after retired to England. Louis having lost his confidential minister, De Vergennes, by death, called De Brienne, an ecclesiastic, to his councils. The notables were re-assembled on 6 Nov. 1788. In the end, the states-general were convoked 5 Dec.; and from this assembly sprang the national assembly (*which see*). The notables were dismissed by the king, 12 Dec. 1788.—The *Spanish notables* assembled and met Napoleon (conformably with a decree issued by him commanding their attendance), at Bayonne, 25 May, 1808.

The contest began at 10 A.M. and lasted till late in the evening; the Austrians lost 396 killed, and had about 1850 wounded; the Sardinians lost between 3000 and 4000 men, 27 cannons, and 3000 prisoners. NOVA SCOTIA (N. America), was discovered by Cabot, 1497; visited by Verrazzani, 1524, and named Acadia; settled in 1622, by the Scotch under sir William Alexander, in the reign of James I. of England, from whom it received the name of Nova Scotia. Since its first settlement it has more than once changed proprietors, and was not confirmed to England till the peace of Utrecht, in 1713. It was taken in 1745 and 1758; but was again confirmed to England in 1763. Nova Scotia was divided into two provinces in 1784, and was erected into a bishopric in Aug. 1787. King's College, Windsor, was founded in 1788; see *Baronets*. Gold was found in Nova Scotia in 1861. By an act passed 29 March, 1867, Nova Scotia and New Brunswick were united with Canada for legislative purposes. On the agitation for secession Mr. John Bright presented a petition in the commons 15 May; his motion for a royal commission of inquiry negatived 16 June, 1868. The agitation soon subsided. NUITS. A small fortified town, near Dijon, in Burgundy, N.E. France, chartered in 1212; frequently captured and ravaged, specially in 1569, 1576, and 1636. It was taken by the Badenese under Von Werder, 18 Dec. 1870, after five hours' conflict, in which above 1000 French are said to have been killed and wounded, and 700 prisoners taken. The German loss was also heavy. A depot of arms and ammunition was gained by the victors.

NUMANTINE WAR. The war between the Romans and the Celtiberians (Celts who possessed the country near the Iber, now the Ebro) began, 143 B.C., on account of the latter having given refuge to their allies the Sigidians, who had been defeated by the Romans. Numantia, an unprotected city, withstood a long siege, in which the army of Scipio Africanus, 60,000 men, was opposed by no more than 4000 men able to bear arms. The Numantines fed upon horse-flesh, and their own dead, and then drew lots to kill one another. At length they set fire to their houses, and destroyed themselves, so that not one remained to adorn the triumph of the conqueror, 133 B.C.

NUMIDIA (N. Africa), the seat of the war of the Romans with Jugurtha, which began 111 B.C., and ended with his subjugation and captivity, 106. The last king, Juba, joined Cato and was killed at the battle of Thapsus, 46 B.C., when Numidia became a Roman province; see *Mauritania*.

Ruding's *Annals* is the great work on British coinage (new edition, 1840).—The Numismatic Society in London was founded by Dr. John Lee in 1836. It publishes the *Numismatic Chronicle*.—

Mr. Yonge Akerman's Numismatic Manual (1840) is a useful introduction to the science. Foreign works are numerous.

NUNCIO, an envoy from the pope of Rome to catholic states. The pope deputed a nuncio to the Irish rebels in 1645. The arrival in London of a nuncio, and his admission to an audience by James II., July, 1687, is stated to have hastened the Revolution.

NUNEHAM COLLEGE, see *Girton*.

NUNNERY. The first founded is said to have been that to which the sister of St. Anthony retired at the close of the 3rd century. In Feb. 1861, monastic establishments were abolished in Naples, compensation being made to the inmates. For memorable instances of the fortitude of nuns, see *Acre*, and *Coldingham.*

NUREMBERG, a free imperial German city in 1219. In 1522, the diet here demanded ecclesiastical reforms and a general council, and in 1532 secured religious liberty to the Protestants. It was annexed to Bavaria in 1805. Albert Dürer was born here in 1471.

OATES'S PLOT. Titus Oates, at one time chaplain of a ship of war, was dismissed for immoral conduct, and became a lecturer in London. In conjunction with Dr. Tongue, he invented a plot against the Roman Catholics, who he asserted had conspired to assassinate Charles II., and extirpate the Protestant religion. He made it known 12 Aug. 1678, and in consequence about eighteen Roman Catholics were accused, and upon false testimony convicted and executed; among them the aged viscount Stafford, 29 Dec. 1680. Oates was afterwards tried for perjury (in the reign of James II.), and being found guilty, was fined, put in the pillory, publicly whipped from Newgate to Tyburn, and sentenced to imprisonment for life, May, 1685. On the accession of William and Mary he was pardoned, and a pension of 3*l*. a week granted to him, 1689.

OATHS were taken by Abraham, B.C. 1892 (*Gen.* xxi. 24), and authorised (B.C. 1491) *Exod.* xxii. 11. The administration of an oath in judicial proceedings was introduced by the Saxons into England, 600. *Rapin.* That administered to a judge was settled 1344.

OBELISK. (Greek *obelos*, a spit, *monolithos*, a single stone.) The first mentioned in history was that of Rameses, king of Egypt, about 1485 B.C. The Arabians called them Pharaoh's needles, and the Egyptian priests the fingers of the sun. Several were erected at Rome; one was erected by the emperor Augustus in the Campus Martius, on the pavement of which was a horizontal dial that marked the hour, about 14 B.C. Of the obelisks brought to Rome by the emperors, several have been restored and set up by various popes, especially Sixtus V. In London are three obelisks: first in Fleet-street, at the top of Bridge-street, erected to John Wilkes, lord mayor of London in 1775 (see *North Briton*); and immediately opposite to it at the south end of Farringdon-street, stands another of granite to the memory of Robert Waithman, lord mayor in 1824, erected 25 June, 1833; the third at the south end of the Blackfriars-road marks the distance of one mile and a fraction from Fleet-street. An obelisk from Luxor was set up in the Place de la Concorde, Paris, in Oct. 1836.

OBLIVION. In 1660 was passed an act of "free general pardon, indemnity, and oblivion for all treasons and state offences" committed between 1 Jan. 1637, and 24 June, 1660. The regicides and certain Irish popish priests were excepted. A similar act was passed 20 May, 1690. See *Amnesty*.

feet in diameter; that at Benares was at least as ancient as these. The first in authentic history was at Alexandria, about 300 B.C. erected by Ptolemy Soter.

The Brazilian steam-frigate, *Alfonso*, happened to be out on a trial trip at the time, with the prince and princess de Joinville and the duke and duchess d'Aumale on board, who witnessed the catastrophe, and aided in rescuing and comforting the sufferers. The crews and passengers of the *Alfonzo* and the yacht *Queen of the Ocean* saved 156 persons, and 62 others escaped by various means.

OCTARCH, the chief of the kings of the heptarchy, was called *Rex gentis Anglorum*. Hengist was the first octarch, 455, and Egbert the last, 800; see *Britain*. Some authors insist that the English heptarchy should have been called the *octarchy*.

OCTOBER, the eighth month in the year of Romulus, as its name imports, and the tenth in the year of Numa, 713 B.C. October still retained its first name, although the senate ordered it to be called *Faustinus*, in honour of *Faustina*, wife of Antoninus the emperor; and Commodus called it *Invictus*, and *Domitianus*. October was sacred to Mars.

OCTROIS (from the low Latin *auctorium*, authority), a term applied to concessions from sovereigns, and to the taxes levied at the gates of towns in France on articles of food before entering the city. These octrois, of ancient origin, were suppressed in 1791; re-established, 1797, and reorganised in 1816, 1842, and 1852. In 1859, the octrois of Paris produced above 54 million francs. The Belgian government became very popular in July, 1860, by abolishing the *Octrois*.

ODES are very ancient; amongst the Greeks they were extempore compositions sung in honour of the gods. Anacreon's odes were composed about 532; Pindar's, 498 to 446; and Horace's from 24 to 13, all B.C. Anciently odes were divided into strophe, antistrophe, and epode; see *Poets Laureate*, and *Lyric Poetry*.

It was partially bombarded by the British, 21 April, 1854, in consequence of the Russian batteries having fired on a flag of truce, 6 April. On 12 May the English frigate *Tiger* stranded here, and was destroyed by Russian artillery. The captain, Giffard, and many of his crew were killed, and the rest made prisoners.

ODOMETER (from the Greek *odos*, way, and *metron*, measure), see *Pedometer*.

ODONTOLOGY (from the Greek *odontes*, teeth), the science of the teeth, may be said to have really begun with the researches of professor Richard Owen, who in 1839 made the first definite announcement of the organic connection between the vascular and vital soft parts of the frame and the hard substance of a tooth. His comprehensive work, "Odontography" (illustrated with beautiful plates), was published 1840-45.

ODRYSÆ, a people of Thrace. Their king Teres retained his independence of the Persians, 508 B.C. Sitalces, his son, enlarged his dominions, and in 429, aided Amyntas against Perdiccas II., of Macedon, with an army of 150,000 men. Sitalces, killed in battle with the Triballi, 424, was succeeded by Seuthes, who reigned prosperously; Cotys, another king (382-353), disputed the possession of the Thracian Chersonesus with Athens. After 9 or 10 years' warfare, Philip II. of Macedon reduced the Odrysæ to tributaries, and founded Philippopolis and other colonies, 343. The Romans, after their conquest of Macedon, favoured the Odrysæ, and in 42 their king Sadales bequeathed his territories to the Romans. The Odrysæ, turbulent subjects, and often chastised, were finally incorporated into the empire by Vespasian, about A.D. 70.

ODYL, the name given in 1845 by baron von Reichenbach to a so-called new "imponderable, or influence," said to be developed by magnets, crystals, the human body, heat, electricity, chemical action, and the whole material universe. The odylic force is said to give rise to luminous phenomena, visible to certain sensitive persons only. The baron's "Researches on Magnetism, &c., in relation to the Vital Force," translated by Dr. Gregory, were published in 1850. Emanuel Swedenborg (died 1772) described similar phenomena.

It was the custom of the Jews to anoint with oil persons appointed to high offices, as the priests and kings, *Psalm* cxxxiii. 2; 1 *Sam.* x. 1; xvi. 13. The fact that oil, if passed through red-hot iron pipes, will be resolved into a combustible gas, was long known to chemists; and after the process of lighting by coal-gas was made apparent, Messss. Taylor and Martineau contrived apparatus for producing oil-gas on a large scale, 1815.—OIL SPRINGS; see *Petroleum*. OIL FRESCOS; see under *Painting*.

After three days' conference at Munich, Sept. 1871, they decided to set up independent worship, first meeting in a church given them by the town council of Munich. The abbé Michaud began a similar movement in Paris in Feb. 1872. Dr. Döllinger preached in favour of union with the church of England, March, 1872. Père Hyacinthe, (Charles Loyson,) president of the party at Rome, issued a programme, respecting the Vatican decrees, recognising ecclesiastical authorities, demanding reform, yet opposing schism, about 5 May, 1872. The bishops of Lincoln (Wordsworth) and Ely (Browne) and the dean of Westminster (Dr. Stanley), by invitation attended the conference at Cologne, and delivered addresses, 20-22 Sept. 1872. The Old Catholics elected their first bishop, Dr. Joseph Reinkens, 1 June, 1873, who was recognised by the emperor and other powers.

The prize contended for was a crown made of a kind of wild olive, appropriated to this use. The festival was abolished by Theodosius, A.D. 394. In 1858 M. Zappas, a wealthy Peloponnesian, gave funds to re-establish these games, under the auspices of the queen of Greece.—Olympic Theatre, London, opened 1806; see *Theatres*.

It is largely cultivated in British India, and was introduced into China by our merchants, which led eventually to the war of 1839, the importation being forbidden by the Chinese government. OPTIC NERVES are said to have been discovered by N. Varole, a surgeon and physician of Bologna, about 1538. *Nouv. Dict.*

OPTIMISM (from *optimus*, the best), the doctrine that everything which happens is for the best, in opposition to Pessimism (from *pessimus*, the worst). The germ of optimism is to be found in Plato, and in St. Augustin, and other fathers; and has been especially propounded by Malebranche and Leibnitz, and adopted by Pope, Bolingbroke, Rousseau, and others.

"OPTION," a term given at the time to the permission given to the inhabitants of Alsace and Lorraine by the German government to choose, before 30 Sept. 1872, whether they would quit their country or become German subjects. Great numbers emigrated into the French territories.

ORACLES, a term applied to revelations made by God to man. They were given to the Jews at the Mercy-seat in the tabernacle; see *Exod.* xxv. 18-22. The Holy Scriptures are the Christian "oracles," *Rom.* iii. 2; 1 *Pet.* iv. 11. King Ahaziah sent to consult the oracle of Baalzebub at Ekron about 896 B.C. The Greeks consulted especially the oracles of Jupiter and Apollo (see *Dodona* and *Delphi*); and the Italians those of Faunus, Fortune, and Mars.

ORAN, Algeria (N. Africa), a Moorish city several times captured by the Spaniards; definitively occupied by the French in 1831: who have since added docks, &c.

ORANGE, a principality in S.E. France, formerly a lordship in the 9th or 10th century. It has been ruled by four houses successively: that of Giraud Adhemar (to 1174); of Baux (1182 to 1393); of Chalons (to 1530); and of Nassau (1530 to 1713); see *Nassau*. Philibert the Great, prince of Orange, the last of the house of Chalons, having been wronged by Francis I. of France, entered the service of the emperor Charles V., to whom he rendered great services by his military talents. He was killed at the siege of Florence, 3 Aug. 1530. He was succeeded by his nephew-in-law, René of Nassau; see *princes of Orange* under *Holland*. The eldest son of the king of Holland is styled the prince of Orange, although the principality was ceded to France in 1713. See *Arausio*.

ORANGEMEN. The "Battle of the Diamond," 21 Sept. 1795 (see *Diamond*), and the treachery experienced by the Protestants on that occasion convinced them they would become an easy prey to the Roman Catholics, from their small numbers, unless they associated for their defence, and the first Orange lodge was formed in Armagh; but the name of Orangemen already existed. An Orange lodge was formed in Dublin; the members published a declaration of their principles (the maintenance of church and state) in Jan. 1798. After 1813 Orangeism declined; but revived again in 1827, when the duke of Cumberland became grand-master; and it is stated that in 1836 there were 145,000 Orangemen in England, and 125,000 in Ireland. After a parliamentary inquiry Orange clubs were broken up in conformity with resolutions of the house of commons; but were revived in 1845. In Oct. 1857, the lord chancellor of Ireland ordered that justices of the peace should not belong to Orange clubs. The Orangemen in Canada were greatly excited during the visit of the prince of Wales in Sept. 1860. Mr. Wm. Johnston, a grand master, convicted of violating the Party Processions Act, was elected M.P. for Belfast, Nov. 1869. See *Belfast*.

ORANGE RIVER TERRITORY, a free state in South Africa. The British government proclaimed its authority over this territory, on 3 Feb. 1848, but transferred (by sir George Clerk) its powers to a provisional government, 29 March, 1854. A Volksraad (legislative council) and governor were appointed. Disputes arose respecting the ownership of the diamond fields in 1868.

ORANGES. The sweet, or China orange, was first brought into Europe from China by the Portuguese, in 1547; and it is asserted that the identical tree, whence all the European orange-trees of this sort were produced, is still preserved at Lisbon, in the gardens of one of its nobility. Orange-trees were first brought to England, and planted, with little success in 1595; they are said to have been planted at Beddington park, near Croydon, Surrey. The duty on imported oranges was repealed in 1860.

ORATOR HENLEY. An eccentric English gentleman of some talents, in 1726, opened his "oratory," a kind of chapel in Newport-market, where he gave lectures on theological topics on Sundays, and on other subjects on Wednesdays, every week. Novelty procured him many hearers; but he was too imprudent to gain any permanent advantage. He removed his oratory to Clare-market, and sank into obscurity previously to his death, in 1756.

ORATORIANS (from the Latin *orare*, to pray), a regular order of priests established by St. Philip Neri, about 1564, and so called from the oratory of St. Jerome, at Rome, where they prayed. They had a foundation in France, commenced by Guillaume Gibieuf and Pierre de Berulle (afterwards cardinal), 1612, approved by pope Paul V. 1613.—The rev. Frederick Faber and others, as "Fathers of the Oratory," established themselves first in King William-street, Strand, in 1848, and afterwards at Brompton.

ORATORIO, a kind of musical sacred drama, the subject of it being generally taken from the Scriptures. The origin of oratorios (so named from having been first performed in an oratory), is ascribed to St. Philip Neri, about 1550. The first oratorio in London was performed in Lincoln's-inn theatre in Portugal-street, in 1732. Handel's oratorio of "Israel in Egypt" was produced in 1738, and the "Messiah" in 1741; Haydn's "Creation" in 1798; Mendelssohn's "St. Paul" in 1837, and "Elijah" in 1846; Costa's "Eli," 1865; "Naaman," 1864; Benedict's "St. Peter," 1870; MacFarren's "John the Baptist," 1873; and "Resurrection," 1876.

ORCHOMENUS, a small Greek state in Bœotia, was destroyed by the Thebans, 368 B.C.; restored by Philip II. of Macedon, 354; and given up by him to Thebes, 346.

ORDEAL was known among the Greeks and Jews (*Num.* v. 2). It was introduced into England by the Saxons. A prisoner who pleaded not guilty might choose whether he would put himself for trial upon God and his country, by twelve men, as at this day, or upon God only. The trial by ordeal was abolished in 1218.

ORDERS, see *Knighthood*.

ORDERS IN COUNCIL were issued by the British government 7 Jan. and 11 Nov. 1807, prohibiting trade with the ports occupied by the French, being reprisals for Napoleon's *Berlin decree* (*which see*). They greatly checked the progress of manufactures in this country, and caused much distress till their removal in 1814.

ORDINANCES, see *Ordonnances*, *Self-Denying Ordinances*.

ORDINATION of ministers in the Christian church began with Christ and his apostles; see *Mark* iii. 14, and *Acts* vi. and xiv. 23. In England in 1549 a new form of ordination of ministers was ordered to be prepared by a committee of six prelates and six divines.

ORDNANCE OFFICE. Before the invention of guns, this office was supplied by officers under the following names: the bowyer, the crossbowyer, the galeater, or purveyor of helmets, the armourer, and the keeper of the tents. Henry VIII. placed it under the management of a master-general, a lieutenant, surveyor, &c. The master-general was chosen from among the first generals in the service of the sovereign. The appointment was formerly for life; but since the restoration, was held *durante bene placito*, and not unfrequently by a cabinet minister. *Beatson*. The letters patent for this office were revoked 25 May, 1855, and its duties vested in the minister of war, lord Panmure. The last master-general was lord Fitzroy-Somerset, afterwards lord Raglan.

ORDNANCE SURVEY. The trigonometrical survey of England was commenced by gen. Roy, in 1783, continued by col. Colby, and completed by col. (aft. sir Henry) James in 1856. The publication of the maps commenced in 1819, under the direction of col. Mudge, and was completed in

1862; a large part of these maps have been coloured geologically. The survey of Ireland has been completed and published; that of Scotland is still going on. By the survey act, passed 12 May, 1870, the ordnance survey was transferred to the Board of Works. Major-Gen. John Cameron succeeded sir Henry James in 1875, as superintendent.

ORDONNANCES, the laws enacted by the Capetan kings of France previous to 1789. They began with "in the name of the king," and ended with "such is our good pleasure." The first in French is dated 1287 (Phillip IV.) The publication of these "ordonnances," ordered by Louis XIV., 1706, is still in progress. The "ordonnances" of Charles X., promulgated 26 July, 1830, led to the revolution.

OREGON TERRITORY (N. America). A dispute respecting boundaries arose in 1845 between the British government and that of the United States, which was settled by treaty, 12 June, 1846. Oregon was admitted as a state, Feb. 1859.

ORGANIC SYNTHESIS, see *Chemistry*.

ORGANS. Their invention is attributed to Archimedes, about 220 B.C.; and to Ctesibius, a barber of Alexandria, about 100 B.C. The organ was brought to Europe from the Greek empire, and was applied to religious devotions in churches, about A.D. 657. *Bellarmine.* Organs were used in the western churches by pope Vitalianus, in 658. *Ammonius.* It is affirmed that the organ was known in France in the time of Louis I. 815, when one was constructed by an Italian priest. The organ at Haarlem is one of the largest in Europe; it has 60 stops and 8000 pipes. At Seville is one with 110 stops and 5300 pipes. The organ at Amsterdam has a set of pipes that imitate a chorus of human voices. Of the organs in ENGLAND that at St. George's Hall, Liverpool, by Mr. Willis, was the largest; next in order that at York minster, and that in the music-hall, Birmingham. In London, the largest was, perhaps that of Spitalfields church; and that in Christ Church was nearly as extensive. The erection of the famous Temple organ was competed for by Schmidt and Harris; after long disputes, the question was referred to vote, and Mr. Jefferies, afterwards chief justice, gave the casting vote in favour of Schmidt (called Father Smith), about 1682. A monster organ was erected in the Crystal Palace, Sydenham, in June, 1857. The organ, by Willis, at the Royal Albert Hall, is now said to be the largest in the world; 187F. A noble organ (by Bryceson), with many appliances, opened in the hall, Primrose-hill-road, London, N. Jan. 1876.

ORIEL COLLEGE (Oxford), founded in 1326, by Adam de Brome archdeacon of Stow, and almoner to king Edward II. This college derives its name from a tenement called *l'Oriole*, on the site of which the building stands.

ORIENTALISTS. The first International Congress of these scholars was held at Paris, 1 Sept. 1873; M. Léon de Rosny, the founder, president. The second Congress met at the Royal Institution, in London, 14—19 Sept. 1874; Dr. S. Birch, president. The second Congress met at St. Petersburg, 1 Sept. 1876; the third will be at Florence, see *Asiatic Societies*.

ORIFLAMME, see *Auriflamma*.

ORIGENISTS pretended to draw their opinions from the writings of Origen, who lived 185-253. They maintained that Christ was the son of God no other way than by adoption and grace; that souls were created before the bodies; that the sun, moon, stars, and the waters that are under the firmament, have souls; that the torments of the damned shall have an end, and that the fallen angels shall, after a time, be restored to their first condition. They were condemned by councils, and the reading of Origen's work was forbidden. *Burke.* These doctrines were condemned by the council of Constantinople in 553.

"ORIGIN OF SPECIES, BY MEANS OF NATURAL SELECTION," by Charles Darwin, F.R.S., first published, 24 Nov. 1859. See *Species*.

ORION STEAM-SHIP. On 18 June, 1850, this splendid vessel, bound from Liverpool to Glasgow, struck on a sunken rock, northward of Portpatrick, within a stone's throw of land, and instantly filled. Of two hundred passengers more than fifty were drowned.

ORISSA, a province of N. W. Bengal, India, with an area of 74,413 square miles, and a population of 20,000,000. It was conquered by Clive in 1755, and nearly all acquired by the company in 1765. It suffered much by famine in 1770, and 1792-3, and more especially from the end of 1865 to Nov. 1866, when it is said about 750,000 persons perished. The government and officials were censured for neglect and want of forethought. It is also said that during a hurricane in Oct. 1836, 22,500 persons were drowned.

ORKNEY AND SHETLAND ISLES (North of Scotland), were conquered by Magnus III. of Norway, 1099, and were ceded to James III. as the dowry of his wife Margaret, in 1469. The Orkneys were the ancient Orcades; united with Shetland, they now form one of the Scotch counties. The bishopric of Orkney, founded by St. Servanus early in the 5th century, some affirm by St. Colm, ended with the abolition of episcopacy in Scotland, about 1689; see *Bishops*.

ORLEANS (a city in central France), formerly *Aurelianum;* gave title to a kingdom, 491, and afterwards to a duchy, usually held by one of the royal family. Attila the Hun, besieging it, was defeated by Aetius and his allies, 451. It was besieged by the English under earls of Salisbury and Suffolk, 12 Oct. 1428, bravely defended by Gaucour (as its fall would have ruined the cause of Charles VI. king of France), and relieved by the heroism of Joan of Arc, afterwards surnamed the Maid of Orleans, 29 April, 1429, and the siege was raised 18 May; see *Joan of Arc.* (The 439th anniversary was celebrated 10 May, 1868; the emperor and empress being present.) During the siege of Orleans, Feb. 1563, the duke of Guise was assassinated.

After nine hours' severe fighting, Orleans captured by the Germans, under general Von der Tann. More than 4000 prisoners were taken. The loss on both sides was heavy. About 35,000 on each side were engaged. The city was made to pay a war contribution of 60,000*l.* . . . 11 Oct. 1870

Von der Tann and the Bavarians defeated by generals D'Aurelle de Paladines and Pallières, and Orleans re-taken. The Germans acknowledged the loss of about 700 men and 1000 prisoners, chiefly wounded. The French asserted the numbers of both to be higher, and were much cheered with their victory. The French loss was heavy. The chief conflict took place between Coulmiers and Bacon or Baccon . 9, 10 Nov. 1870

ORNITHOLOGY, see *Birds*.

ORNITHORHYNCHUS, the duck-billed platypus, or water-mole, a singular compound of the mammal and the bird, a native of Australia, was first described by Dr. Shaw, in 1819.

OROQUIETA, Navarre, N. Spain. Here don Carlos, calling himself king Carlos VII., grandson of don Carlos, brother of Ferdinand VII., commanding about 4000 men, was suddenly attacked by general Moriones with about 2000, and defeated after a short conflict, 4 May, 1872. He fled, leaving 757 prisoners, and 38 dead.

ORPHAN-HOUSES. The emperor Trajan first formed establishments for this purpose. Pliny relates in his Panegyric that he had caused 5000 free-born children to be sought out and educated, about A.D. 105. Orphan-houses properly so called, are mentioned for the first time in the laws of the emperor Justinian. At the court of Byzantium the office of inspector of orphans, *orphanotrophos*, was so honourable that it was held by the brother of the emperor Michael IV. in the 11th century; see *Foundling Hospitals*.

ORPHEUS, STEAMER, see *Wrecks*, 7 Feb. 1863.

ORRERY, a planetary machine to illustrate and explain the motions of the heavenly bodies, appears to have been coeval with the clepsydra. Ptolemy devised the circles and epicycles that distinguish his system about 130. The planetary clock of Finée was begun 1553. The planetarium of De Rheita was formed about 1650. The planetarium, now termed the Orrery, it is said, was constructed by Rowley, after a pattern devised by the clock-maker, George Graham, at the expense of Charles Boyle, earl of Orrery, about 1715. A large "planetarium" was constructed by the rev. Wm. Pearson, for the Royal Institution, London, about 1803.

ORSINI'S PLOT against the emperor Napoleon III.; see *France*, Jan. 1858.

ORTHES or **ORTHEZ** (S. France), once capital of the principality of Bearn. Near it the British and Spanish armies, commanded by Wellington, defeated the French, under Soult, 27 Feb. 1814. The battle of Toulouse soon followed.

OSBORNE HOUSE (Isle of Wight), was purchased by the queen in 1845, and rebuilt by Mr. Cubitt.

OSMIUM, the heaviest known metal, discovered in platinum ore by Tennant in 1803.

OSNABURG (N. Germany), made the seat of a bishopric, by Charlemagne, near the end of the 8th century. After the treaty of Westphalia in 1648, the bishop was a Roman Catholic and protestant alternately, the latter being chosen from the house of Brunswick. Frederick, duke of York, the last bishop, resigned in 1803, when the lands were annexed to Hanover. He died 5 Jan. 1827.

OSSORY (S. E. Ireland), BISHOPRIC OF, was first planted at Saiger, about 402; translated to Aghadoe, in Upper Ossory, in 1052; and to Kilkenny about the end of the reign of Henry II. It was united to Ferns and Leighlin in 1835.

OSTEND (Belgium), sustained a siege by the Spaniards, from July, 1601, to Sept. 1604, when it honourably capitulated. On the death of Charles II. of Spain, the French seized Ostend; but in 1706, after the battle of Ramilies, it was retaken by the allies. It was again taken by the French in 1745, but restored in 1748. In 1756, the French garrisoned this town for the empress-queen Maria Theresa. In 1792, the French once more took Ostend, which they evacuated in 1793, but regained in 1794. The English destroyed the works of the Bruges canal; but the wind shifting before they could re-embark, they surrendered to the French, 19 May, 1798. See *Cuba, note.*

OSTRACISM (from the Greek *ostrakon*, a potsherd or shell), a mode of proscription at Athens, is said to have been first introduced by the tyrant Hippias; others ascribe it to Cleisthenes, about 510 B.C. The people wrote the names of those whom they most suspected upon small shells; these they put in an urn or box and presented to the senate. Upon a scrutiny, he whose name was oftenest written was sentenced by the council to be banished from his altar and hearth. 6000 votes were required. Aristides, noted for his justice, and Miltiades for his victories, were thus ostracized. The custom was abolished by ironically proscribing Hyperbolus, a mean person, about 338 B.C.

OSTRICH (the *struthios* of the ancients), a native of Africa (see *Job* xxxix. 14). Ostriches were hatched and reared at San Donato, near Florence, 1859-60; and at Tresco abbey, the seat of Augustus Smith, in the Scilly isles, 1866.

OSTROGOTHS, or EASTERN GOTHS, were distinguished from the Visigoths (Western Goths) about 330. After ravaging eastern Europe, Thrace, &c., their great leader, Theodoric, established a kingdom in Italy, which lasted from 493 to 553; see *Italy*.

OSTROLENKA (Poland). Near here the French defeated the Prussians, 16 Feb. 1807. In another battle here between the Poles and Russians the slaughter was immense, but the Poles remained masters of the field, 26 May, 1831.

OTAGO, see *New Zealand*, 1848, 1861, 1866.

OTAHEITE or TAHITI, an island in the S. Pacific Ocean, seen by Byron in 1765, and visited in 1767 by captain Wallis, who called it George the Third Island. Captain Cook came hither in 1768 to observe the transit of Venus; sailed round the whole island in a boat, and stayed three months; he visited it twice afterwards. See *Cook*. Omai, a native of this island, was brought to England by Cook, and carried back in his last voyage. In 1799, king Pomare ceded the district of Matavai to some English missionaries. Queen Pomare was compelled to put herself under the protection of France, 9 Sept. 1843. She retracted, and Otaheite and the neighbouring islands were taken possession of by admiral Dupetit-Thouars in the name of the French king, Nov. 1843. The French imprisoned Mr. Prichard, the English consul, 5 March, 1844, but the act was censured in France.

OTTAWA (formerly BYTOWN), on the river Ottawa, was appointed to be the capital of Canada by the queen in August, 1858. The executive council met here 22 Nov. 1865, and the Canadian parliament was, for the first time, opened here by the governor-general, lord Monck, on 8 June, 1866. Mr. Darcy McGee, M.P. for Montreal (once an Irish agitator, but latterly exceedingly loyal), was assassinated on his return from parliament, 7 April, 1868. Fenians were suspected, and the town was put in a state of siege. Whelan, convicted of the murder, 15 Sept. 1868, was executed Feb. 1869. Population in 1861, 14,669 in 1874, 21,545.

OTTERBURN (Northumberland). In 1388 the Scotch besieged Newcastle and were driven off by Henry Percy (Hotspur), son of the earl of Northumberland. Percy pursued them to Otterburn, where a battle was fought on 10 Aug., in which the earl of Douglas was killed and Percy taken prisoner. On this battle the ballad of *Chevy Chase* is founded.

OUZEL GALLEY SOCIETY. In 1700, the case of the *Ouzel Galley*, a ship in the port of Dublin, excited great legal perplexity, and was referred to an arbitration of merchants, whose prompt decision was highly approved. This led to the present society, founded in 1705.

OWHYHEE or **HAWAII**, an island in the N. Pacific Ocean, discovered Dec. 1778, by capt. Cook. On 14 Feb. 1779, he here fell a victim to a sudden resentment of the natives. A boat having been stolen by one of the islanders, the captain went on shore to seize the king, and keep him as a hostage till the boat was restored. The people would not submit to this insult, and their resistance brought on hostilities, and captain Cook and some of his companions were killed. Great progress has been recently made in civilisation here; and an order of nobility and a representative assembly were instituted in 1860. The population then was about 120,000; see *Sandwich Isles*.

OXFORD'S ACT, BISHOP OF, see *District Churches.*

OXFORD'S ASSAULT ON THE QUEEN. Edward Oxford, a youth who had been a servant in a public-house, discharged two pistols at queen Victoria and prince Albert, as they were proceeding up Constitution-hill in an open phaeton from Buckingham palace, 10 June, 1840. He stood within a few yards of the carriage but neither her majesty nor the prince was injured. Oxford was tried at the Old Bailey (10 July), and was adjudged to be insane, and sent first to Bethlehem hospital, next to Broadmoor; and set at liberty in 1868, on condition of going abroad.

OXYGEN, a gas (named from the Greek *oxus*, sharp, as being generally found in acids), is the most abundant of all substances, constituting about one-third of the solid earth, and forming about nine-tenths of water and one-fifth of the atmosphere. It was first separated from red oxide of mercury by Priestley, 1 Aug. 1774, and by Scheele, who was ignorant of Priestley's discovery, in 1775. It is a supporter of animal life (in respiration), and of combustion. An oxygen gas company was announced in Dec. 1864; its object being the cheap manufacture of oxygen for its application to the production of perfect combustion in lamps, stoves, furnaces, &c.; see *Ozone.*

A statue of Priestley, by F. J. Williamson, at Birmingham was unveiled by professor T. H. Huxley, 1 Aug. 1874, the centenary of the discovery of oxygen. This was also celebrated at Northumberland, Pennsylvania, where he was buried, Feb. 1804. The following telegram was sent 31 July: "The brethren at the grave to the brethren at the home of Priestley send greeting on this centennial anniversary of the birth of chemistry."

OYER AND TERMINER, a commission directed to the judges of the courts, by virtue whereof they have power to *hear and determine* treasons, felonies, &c., 1285.

O YES! A corruption of the French *oyez*, hear ye! The ancient term still used by a public crier and by the usher of courts of justice to enjoin silence and attention.

OYSTER (the Latin *Ostrea edulis*). British oysters are celebrated by the Roman satirist Juvenal (Sat. iv. 140) about 100. The robbery of oyster-beds is prohibited by 7 & 8 Geo. IV. c. 29 (1827). About 15,000 bushels of oysters were said to be produced from the Essex beds alone. In 1858 M. Coste commenced rearing oysters in great numbers on the coast of Brittany, and his plan has been found successful. An act for promoting the cultivation of oysters in the United Kingdom was passed Aug. 1866, and one for the preservation of oyster fisheries 3 May, 1867. Certain restrictions of the Oyster Fisheries Act, 1862, removed by the Fisheries Act of 1868.

Oysters, formerly the commonest of food, are now becoming scarcer and carcer, although their reproduction is about half a million-fold. A committee recommend a close time for dredging, viz., 1 May to 1 Sept., deep-sea fishing to be restricted, as at present, from 15 June

to 15 Aug, no oyster to be sold under 2½ inches in diameter. The Whitstable beds in 1875 are said to have produced about 79,564,000 oysters; value about, 55,140*l.*
American oysters are now largely imported (1876).

OZOKERIT, a mineral hydro-carbon found in Moldavia and Wallachia. From it is distilled a substance suitable for making candles, introduced in the autumn of 1871.

OZONE (from the Greek *ozein*, to yield an odour), was discovered by Schönbein, of Basel, in 1840, when experimenting with the then newly-invented battery of sir Wm. Grove, and was recognised by him successively as a minute constituent of the oxygen gas resulting from the electrolysis of water effected by a current of high tension; of air or oxygen through which electric discharges have taken place; and of air in which moist phosphorus has been undergoing slow oxidation.

Marignac determined the action of ozone on various substances to be due to their oxidation . . 1845
Ozonometers constructed 1858
M. Schönbein announced his discovery of another modification of oxygen, which he termed *antozone*, hitherto found only in the compound state (in peroxides of sodium, potassium, &c.) . 1859
The French Academy of Sciences appointed a committee of eminent philosophers to inquire into the nature and relations of ozone . 4 Dec. 1865
Andrews and Tait demonstrated ozone to be a condensed form of oxygen . . . . 1860, "
This further established by Soret and Brodie, by quantitative reactions. (Odling suggested and Brodie proved ozone to be 3 parts of oxygen compressed into the space of 2) 1872
Ozone, generated by a current produced by Wilde's magneto-electric machine, employed to bleach sugar, by Edward Beane's patent . . Aug. 1868

PADLOCKS are said to have been invented by Beecher at Nuremberg, 1540, but are mentioned much earlier.

PADUA, the Roman Patavium, in Venetia, N. Italy, said to have been founded by Antenor, soon after the fall of Troy, 1183 B.C. It flourished under the Romans. Patavian Latin was considered very corrupt, and is traced in Livy, a native of Padua. After being an independent republic, and a member of the Lombard league, Padua was ruled by the Carrara family from 1318 with a short interruption till 1405, when it was seized by the Venetians. The university was founded about 1220. It was closed through disturbances, 1848-50.

PAGANS, the heathen, worshippers of idols, not agreeing in any set form or points of belief. Constantine ordered the Pagan temples to be destroyed throughout the Roman empire, 331; his nephew, Julian, attempted their restoration, 361; but Paganism was renounced by the Roman senate in 388, and finally overthrown in the reign of Theodosius the younger, about 391.

It revived about the end of the 13th century, and to Giovanni Cimabue, of Florence, is awarded the honour of its restoration; died 1300

PALÆOGRAPHY, ancient writing; see *Diplomatics*, *Writing*.

PALÆOLOGI, a family which reigned as emperors of the east from 1260 to 1453. George Palæologus raised Alexius Comnenus to the throne in 1081, and thereby founded his own family. Andrew, the last Palæologus, son of Thomas, ruler of the Morea, after the overthrow of his father, became a Mahometan at Constantinople about 1533. A person who called himself John Anthony Palæologus Lascaris, died at Turin, Sept. 1874. His claims were doubted.

PALÆONTOLOGY (from the Greek *palaios*, ancient, and *onta*, beings), treats of the evidences of organic beings in the earth's strata. It is a branch of geology (*which see*). Cuvier, Mantell, Agassiz, Owen, Edward Forbes, and Blainville, all of the present century, may be reckoned as fathers of this science. The Palæontographical society, which publishes elaborate monographs of British organic remains, was founded in 1847. Professor Owen's "Palæontology" was published in 1860. "Nearly 40,000 species of animals and plants have been added to the Systema Naturæ by palæontological research." *Huxley*. See *Man*.

PALÆOPOLIS, see *Naples*.

PALAIS ROYAL, Paris, originally Palais Cardinal, built for cardinal Richelieu, by Lemercier, 1620-36, received its present name when occupied by Louis XIII., to whom the cardinal gave it shortly before his death in 1642. Louis XIV., in 1692, gave it to his nephew Philippe, duke of Orleans, and it became the residence of his successors. It was confiscated by the republic in 1793, after the execution of Philippe Egalité. Louis Philippe resided in it, 1814-31. It suffered much injury at the revolution in 1848. Under the second empire it became the residence of prince Jerome and his son Napoleon. The buildings were much injured by fire by the communists, 24 May, 1871.

PALATINATE OF THE RHINE, one of the seven ancient electorates of Germany, It was long united to Bavaria, but was separated in 1294.—Frederic V., the elector palatine in 1610, married in 1613 Elizabeth, the daughter of James I. of England, and thus was an ancestor of queen Victoria; see *Hanover*. In 1619 he was elected king of Bohemia, but lost all by his defeat by the Austrians at Prague in 1620. The Palatinate was horribly ravaged by Tilly in 1622, and by the French in 1688. Several thousands of the ruined peasantry were sent to America by the British government and people. The elector palatine, Charles Theodore, inherited Bavaria in 1778; since when the two electorates have been united; see *Bavaria*.

PALATINE. William the conqueror made his nephew, Hugh D'Abrincis, count palatine of Chester with the title of earl, about 1070. Edward III. created the palatine of Lancaster, 1539; see *Lancaster, duchy of*. The bishoprics of Ely (963) and Durham were also made counties palatine. There is also mention made of the county palatine of Hexham, in 33 Henry VIII. c. 10, which then belonged to the archbishop of York, but by the 14th of Elizabeth it was dissolved, and made part of the county of Northumberland. The palatinate jurisdiction of Durham was separated from the diocese, and vested in the crown, 6 Will. IV. c. 19, 21 June, 1836.

PALE, the name given to the part of Ireland colonised by the English—viz., parts of the counties of Louth, Dublin, Meath, and Kildare. Anglo-Irish rulers were termed lords of the pale. Their arbitrary exactions led to a royal commission of inquiry in 1537. The defection of the lords of the pale in 1641 was followed by a general insurrection, and the royal cause was ruined in 1647. In 1652 Ireland was committed to the rule of four commissioners.

PALERMO (N. W. Sicily), the ancient Panormus. It has been held by the Carthaginians, 415 B.C.; taken by the Romans, 254 B.C.; by the Saracens, A.D. 832; and by the Normans, 1072. Here Roger II. was crowned king of Sicily, 1130. Palermo was the scene of the Sicilian Vespers

(*which see*), 30 March, 1282. It suffered from earthquake in 1726 and 1740. The king Ferdinand resided at Palermo from 1806 to 1815, while Naples was ruled by Joseph Bonaparte and Joachim Murat. It revolted against the tyranny of Ferdinand II. 12 Jan. 1848. It was attacked by general Filangieri, 29 March, 1849, and surrendered on 14 May. It was taken by Garibaldi, 6 June, 1860. An insurrection against the abolition of the monastic establishments broke out in Palermo on 13 Sept. 1866, and was suppressed by the royal troops with much bloodshed; order was restored by 22 Sept.

PALESTINE, see *Jews*. After being several times conquered by the Saracens, and retaken from the 7th to the 10th century, and after being the scene of the wars of the Crusades (*which see*), and other conflicts, Palestine was united to the Ottoman empire by Selim I. in 1516. See *Bible* (note), *Holy Places*, and *Syria*.

PALIMPSEST (from the Greek, *palin*, again; and *psao*, I efface), parchments written on after the previous writing had been partially effaced. Cardinal Mai, by removing the second writing in some MSS., recovered the original. This was the case with Cicero's "De Republicâ," published by Mai in 1821. It had been covered by a treatise of Lactantius.

PALL, PALLIUM, in the Roman Church an ensign of dignity conferred by the pope upon archbishops. By a decretal of pope Gregory XI. (about 1370), no archbishop could call a council, bless the chrism, consecrate churches, ordain a clerk, or consecrate a bishop, till he had received his pall from the see of Rome. The pall was first worn by an Irish archbishop in 1152, when Gelasius was recognised as primate of all Ireland.

PALLADIUM, the statue of Pallas, said to have fallen from heaven near the tent of Ilus, as he was building Ilium, which the oracle of Apollo declared should never be taken so long as the Palladium was found within its walls. The Greeks are said to have obtained it by craft during the Trojan war, 1184 B.C.; but some writers assert, another statue was taken, and that the real Palladium was conveyed from Troy to Italy by Æneas, 1183 B.C., and preserved by the Romans with the greatest secrecy in the temple of Vesta.—PALLADIUM is a rare metal, discovered in platinum ore by Dr. Wollaston, in 1803.

PALLAS, the planet, was discovered by Olbers, at Bremen, 28 March, 1802.

PALLISER'S CHILLED SHOT, see *Cannon*.

PALL MALL, a street near St. James's palace, London, is named from a French game at ball (*paille-maille*, being a wooden mallet), resembling the modern croquet, having been played there about 1621. Among eminent inhabitants were Nell Gwyn and Dr. Thomas Sydenham. The PALL MALL GAZETTE, a daily independent political and literary journal, first appeared in 1865.

PALMERSTON ADMINISTRATION.* The resignation of the Aberdeen administration was announced 1 Feb. 1855, but nearly all its members returned to office soon after under lord Palmerston, lord Derby and lord John Russell having each in vain endeavoured to form an administration. Lord Canning was appointed governor-general of India, 4 July, 1855. PALM-SUNDAY. When Christ made his entry into Jerusalem, multitudes of the people who were come to the feast of the Passover, took branches of the palm-tree, and went forth to meet him, 33. It is usual, in some countries, to carry palms on the Sunday before Easter, hence called Palm-Sunday.

PALMYRA (Syria) was supposed to have been the Tadmor in the wilderness built by Solomon, but was manifestly Grecian. The brilliant part of the history of Palmyra was under Odenatus and his queen Zenobia. At the death of Odenatus, Zenobia assumed the title of queen of the East, in 267. Aurelian defeated her at Emesa, in 272, and made her captive, 273, and killed Longinus, the philosopher, her friend. Palmyra is now inhabited by a few Arab families. The ruins were visited in 1751, by Mr. Wood, who published an account of them in 1753. Mr. Dawkins and Mr. Bruce also visited Palmyra.

PAMPELUNA (N. E. Spain, taken by the French on their invasion of Spain), was invested by the British, between whom and the French obstinate conflicts took place, 27 and 29 July, 1813. It surrendered to the British, 31 Oct. in that year.

PAMPHLETS. Their first appearance amongst us is generally thought to have been in opposition to the church of Rome. Those who were first convinced of the reasonableness of the "new learning," as it was then called, propagated their opinions in small pieces, cheaply printed, and (what was then of great importance) easily concealed. Political pamphlets began in Edward VI.'s time, and were very numerous in the 17th century. Large collections are in the libraries of the British Museum and the Royal and London Institutions. Certain enactments respecting pamphlets removed by an act passed July, 1869.

PANAMÁ, the isthmus which joins the two Americas; see *Darien.* Across this a ship canal was proposed by the *Bulwer-Clayton treaty,* 19 April, 1850. A treaty for the construction of a ship canal through the isthmus by the United States was signed by representatives of that government and that of Colombia 26 Jan. 1870. A railway was opened in 1855. In that year a new state, New Granada, was divided into eight federal states, one of which is named PANAMÁ. A revolution took place in Panamá, on 9 March, 1865; the government was deposed, and don Jil Colunje became president; succeeded by Vincent Olarte, 1 Oct. 1866. Panamá is now subject to Colombia (*which see*). The government overthrown by Columbian troops without bloodshed, about 12 Oct. 1875.

PAN-ANGLICAN SYNOD, the popular name of a conference of 75 bishops, British, colonial, and American, who met at Lambeth-palace, 24-27 Sept. 1867. They issued an address, published their resolutions, of a very general character, and formally closed their conference on 10 Dec. Another synod proposed for July, 1878.

PANDECTS, a digest of the civil law, made by order of Justinian, 533. It is stated that a copy of these Pandects was discovered in the ruins of Amalfi, 1137; removed from Pisa in 1415, and preserved in the library of the Medici at Florence, as the *Pandectæ Florentinæ.*

PANDOSIA (Bruttium, S. Italy). Here Alexander, king of Epirus, was defeated and slain by the Bruttians, 326 B.C. Lævinus, the Roman consul, was defeated at Pandosia, in Lucania, by Pyrrhus, king of Epirus, 280 B.C.

It had a very large electrical machine, battery, &c. The speculation did not succeed; the building was sold in 1857, and in Feb. 1858, was opened for concerts and horsemanship, and called the Alhambra.

Jeremy Bentham's book "Panopticon, or the Inspection House," an establishment in which persons may be kept under inspection, published 1791; see *Milbank.*

PANORAMAS, invented by Robert Barker, are bird's eye views painted round the wall of a circular building. In 1788 he exhibited at Edinburgh a view of that city, the first picture of the kind. He then commenced similar exhibitions in London in 1789, having adopted the name "*Panorama,*" and was ultimately enabled to build commodious premises in Leicester-square for that purpose. (He died in April, 1806.) J. P. Loutherbourg, a painter, termed the panoramist, invented the "Eidophusikon," natural phenomena represented by moving pictures, exhibited at Lisle-street, Leicester-square, 3 April, 1781. "This was certainly not a panorama." *Dr. Rimbault.*

PANORMUS, see *Palermo.*

PANTAGRAPH (from the Greek *panta*, all things, and *graphein*, to write, and incorrectly termed *Pentagraph*), an instrument for copying, reducing, or enlarging plans, &c., invented by Christopher Scheiner, about 1603, and improved by professor Wallace, and called "Eidograph," about 1821.

PANTHAYS, Mahometans in the Chinese province, Yunan, became independent under a sultan, during the Tae-ping revolt, 1851-64. After its suppression, the Panthays, after a severe struggle, were also subdued. Their capital, Talifoo, was captured, and its inhabitants cruelly massacred in Feb. 1873. The Panthays sent an embassy to England in 1872, without effect. Sultan Suleiman committed suicide.

PANTHEISM, the formula of which is "everything is God, and God is one," was especially taught by Xenophanes, who died 500 B.C. The doctrine is attributed to Spinoza, Kant, Fichte, and other modern philosophers.

PANTHEON, at Rome, a circular temple built by Agrippa, the son-in-law of Augustus, 27 B.C. It had niches in the wall, where the image or representation of a particular god was set up; the gates brass, the beams covered with gilt brass, and the roof covered with silver. Pope Boniface III. dedicated it to the Virgin Mary and all the saints, by the name of S. Maria della Rotunda, or "ad Martyres," A.D. 608.—The PANTHEON IN LONDON was erected by subscription, and opened 25 Jan. 1772; formed into an opera house; burned down 14 Jan. 1792; rebuilt in 1795 and 1812; made a bazaar in 1834. The bazaar was closed in 1867, and the premises taken by Gilbey and Co., wine merchants, who lent the south part for a temporary church.

PANTOGEN, see *Atomic Theory*.

PANTOMIMES were representations by gestures and attitudes among the ancients, and were introduced on the Roman stage by Pylades and Bathyllus, 22 B.C. Comic masques were introduced here from Italy about 1700. The first regular English pantomime is said to have been "Harlequin executed," produced by Rich at the Lincoln's-inn-fields theatre, 26 Dec. 1717.

"PAPAL AGGRESSION." In a consistory holden in Rome, 30 Sept. 1850, the pope (Pius IX.) named fourteen new cardinals, of whom four only were Italians. Among them was Dr. Nicholas Wiseman, vicar-apostolic of the London district, who was at the same time nominated lord archbishop of Westminster.

The answer of the bishop of London (Dr. Blomfield) to a memorial from the protestant clergy of Westminster, against a Romish hierarchy in this country, was followed by the "Durham" letter from lord John Russell, then chief minister of the crown, to the bishop of Durham, in which he severely censured, not only the papal aggression, but also the proceedings of the tractarian clergy of the Church of England . . . 4 Nov. 1850

It was not acted upon, and was repealed 24 July, 1871

PAPAL INFALLIBILITY. This dogma, maintained by one party in the Roman church, tolerated by another, and utterly rejected by a third, was adopted and promulgated at the general council at Rome 18 July, 1870, a great many bishops having withdrawn. The dogma was inculcated by the false decretals of Isidore and others, but not adopted by the council of Trent; see *Councils XXI.* Professor Döllinger, the historian, was excommunicated at Munich for rejecting this dogma, 18 April, 1871: he was made a D.C.L. at Oxford about 16 June following; see *Old Catholics*. The doctrine was strenuously attacked by Mr. W. E. Gladstone, in his pamphlet, "The Vatican Decrees," Nov. 1874.

PAPAL STATES, see *Rome*, and *Popes*.

PAPER, see *Papyrus*. Paper was probably made in Egypt, and centuries before the Christian era. It was made of cotton about 600 A.D.; and of rags about 1300.* White coarse paper was made by sir John Spelman, a German, at Dartford, in England, 33 Eliz. 1580; and here the first paper mills were erected. *Stow*. Paper for writing and printing manufactured in England, and an act passed to encourage it, 2 Will. III. 1690; before this time we paid for these articles to France and Holland 100,000*l*. annually. The French refugees taught our people; we had made coarse brown paper almost exclusively, until they came among us; we made white paper first in 1690. *Anderson*. Paper-making by a machine was suggested by Louis Robert, who sold his model to Didot, the great printer, who brought it to England, and, conjointly with Fourdrinier, perfected the machinery. The latter obtained a patent for paper-making machinery in 1801; and for manufacturing paper of an indefinite length in 1807. The machinery was improved by Bryan Donkin. A sheet of paper, 13,800 feet long, and 4 feet wide, was made at Whitehall-mills, Derbyshire, in 1830; and one 21,000 feet long, and 6 feet 3 inches wide, was made at Colyton in Devon in 1860. Esparto, a Spanish grass, first imported in 1857, has been largely employed in the paper manufacture since 1864. In 1866 wood was largely manufactured into paper at Philadelphia; and at the Paris exhibition, 1867, fine specimens of wood-paper were shown; see *Parchment* (note). The paper duty, imposed in

* Mr. Joseph Hunter (in the *Archæologia*, xxxvii.) states that the earliest paper which he had seen was a MS. account-book, dated 1302, probably of Bordeaux manufacture. He gives engravings of manufacturers' marks, French and English, the dates of which range from 1330 to 1431. He also gives an extract from a work by Bartholus, a writer of the middle of the 14th century, in which mention is made of a paper manufactory in the Marches of Ancona.

1694 (producing, latterly, about 1,400,000*l.* annually), after having been the subject of agitation for several years, was repealed in 1861. Hop-stalks, said to be used for paper-making in France, 1873.

PAPER-HANGINGS, &c. Stamped paper for this purpose was first made in Spain and Holland about 1555. Made of velvet and floss, for hanging apartments, about 1620. The manufacture of this kind of paper rapidly improved in this country during the present century. — PAPER BRICKS have been made in America; and paper tubing for water and gas, made by M. Jaloureau of Paris, was shown in 1860.

PAPER-MONEY, see *Banks*.

PAPIER MACHÉ. This manufacture (of paper-pulp combined with gum and sometimes with china clay) has existed for above a century. Martin, a German snuff-box maker, is said to have learnt the art from one Lefevre about 1740. In 1745 it was taken up by Baskerville, the printer at Birmingham, and soon spread over that district. Papier maché is now largely employed in ornamenting the interior of buildings, &c.

PAPIN'S DIGESTER (see *Steam*), invented about 1681. Denis Papin, a French philosopher, assisted Boyle in his experiments about 1678.

PAPISTS, see *Roman Catholics*.

PAPUA, see *New Guinea*.

PAPYRUS, the reed from which was made the paper of Egypt and India, used for writings until the discovery of parchment, about 190 B.C. Ptolemy prohibited the exportation of it from Egypt, lest Eumenes of Pergamus should make a library equal to that of Alexandria, 263 B.C. Many papyri were discovered at Herculaneum in 1754; and many were collected by the French in Egypt, 1798. A manuscript of the *Antiquities of Josephus* on papyrus, among the treasures seized by Bonaparte in Italy, and sent to the National Library at Paris, was restored in 1815.

PARADOX (Greek, *para*, beyond; and *doxa*, opinion), something contrary to common opinion. Professor De Morgan's "Budget of Paradoxes" (of all kinds) was published in 1872. John Paget's "Paradoxes and Puzzles, Historical, Judicial, and Literary," published 1874.

PARAFFIN (from *parum affinis*, from its having little affinity with anything), also called photogen, a solid substance, somewhat like spermaceti, produced by distillation of coal, and first obtained by Reichenbach in 1830. It was procured from mineral oil by Mr. James Young about 1847, and is also obtained from Irish peat. It makes excellent candles. Much litigation ensued through interference with Mr. Young's patent-right.

PARAGRAPH BIBLES, see under *Bibles*.

PARAGUAY, a republic in S. America, discovered by Sebastian Cabot in 1526; conquered by Alvarez Nuñez in 1535, and civilized by the Jesuits, who in 1608 commenced their missions there and held it till their expulsion in 1768. Paraguay rose against the Spanish yoke in 1811. In 1814, Dr. José G. R. Francia was elected dictator; he ruled vigorously but tyrannically; he was succeeded on his death in 1840 by Vibal. From 1814 to 1844 the country was rigidly closed against foreigners. The president, C. A. Lopez, elected in 1844, was succeeded by his son, Francis S. Lopez, Sept. 1862 (*see below*). Paraguay was recognised as an independent state by the Argentine Confederation, 14 July, 1852, and by Great Britain in 1853. Population in 1857, 1,337,431; in 1873, 221,079.

PARC AUX CERFS, a deer-park at Versailles, near Paris, made by Louis XII., and kept as such till 1694, when Louis XIV. took the land for building. The name was given to a house erected on it by madame Pompadour popularly said to form a seraglio for Louis XV. in 1755. It was closed by madame Du Barry in 1771.

PARCHMENT. Invented for writing books by Eumenes (some say by Attalus), of Pergamus, the founder of the celebrated library at Pergamus, formed on the model of the Alexandrian, about 190 B.C. Parchment-books from this time became those most used, and the most valuable as well as oldest in the world are written on the skins of goats. It should be mentioned that the Persians and others are said to have written all their records on skins long before Eumenes' time.

Parchment paper (or vegetable parchment) was invented and patented in 1857, by Mr. W. E. Gaine, C.E., who discovered, that when paper is exposed to a mixture of two parts of concentrated sulphuric acid and one part of water for no longer time than is required to draw it through the fluid, it is immediately converted into a strong tough skin-like material. It must be instantly washed with water. Its great strength points out many applications of this material, *e.g.*, maps, school and account-books, and drawing-paper. In 1859 it appeared that a similar invention had been made in Paris by Figuier and Poumarède in 1846.

PARDONS. General pardons were proclaimed at coronations: first by Edward III. in 1327. The king's power of pardoning is said to be derived *à lege suæ dignitatis;* and no other person has power to remit treason or felonies, stat. 27 Hen. VIII. 1535. *Blackstone.* A pardon cannot follow an impeachment of the house of commons: stat. Will. III. 1700.

PARGA, a city in European Turkey: retained its civic independence under the protection of Venice till 1797, when that state was conquered by the French. It resisted various attempts to capture it; and in 1806 was garrisoned by Russians. It was given up to the French in 1807; taken by the English, 22 March, 1814; surrendered to the Turks, 1817; and abandoned by above 3000 of its inhabitants, who retired to the Ionian Isles, May, 1819.

PARIS (formerly *Lutetia Parisiorum*), the capital of France, situated on the river Seine, which cuts it into two unequal parts, the strongest being towards the north, and in which are three isles, *la ville* (*the city*), the *île St. Louis*, and the *île Louviers*. In the time of Julius Cæsar, Lutetia comprised the *city* only. It was greatly improved by the emperor Julian, who made it his residence while he governed Gaul, 355 to 361. It became successively the capital of the kingdoms of Paris, Soissons, and Neustria, and eventually of all the kingdom. Many ecclesiastical councils were held at Paris, 360-1528. The representative of the house of Orleans is styled count of Paris. Population of Paris in 1856, 1,178,262; in 1860, 1,525,535; in 1866, 1,825,274; see *France*.

PARISHES. Their boundaries in England were first fixed by Honorius, archbishop of Canterbury, 636. They were enlarged, and the number of parishes was consequently reduced in the 15th century, when there were 10,000. The parishes of England and Wales now amount to 11,077. Parish registers were commenced in 1538. Acts were passed in 1844 and 1856 by which new parishes may be formed out of too extensive ones; acts amended in 1869. The appointment of parish constables was made unnecessary by an act passed Aug. 1872. See *Registers*, and *Benefices*.

PARKESINE. A new substance, composed of gun-cotton, obtained from various vegetable bodies, and oil. It can be formed with the properties of ivory, tortoiseshell, wood, india-rubber, gutta-percha, &c. It is the invention of Mr. Alexander Parkes, of Birmingham, and was shown by him at the Exhibition in 1862. In Dec. 1865, at the Society of Arts, parkesine was proved to be an excellent electric insulator, and therefore likely to be suitable for telegraphic purposes.

PARK LANE MURDER, see *Trials*, 1872.

PARKS. The Romans attached parks to their villas. Fulvius Lupinus, Pompey, and Hortensius, among others, had large parks. In England, the first great park of which particular mention is made, was that of Woodstock, formed by Henry I., 1125. Queen Caroline, consort of George II., inquired, it is said, of the first Mr. Pitt (afterwards earl of Chatham), how much it would cost to shut up the parks as private grounds. He replied, "Three crowns, your majesty." The design was never afterwards entertained. See *Finsbury*, *Southwark*, *Green*, *Hyde*, *James's*, *St.*, *Regent's*, *Victoria*, *Alexandra*, *Battersea*, and *People's Parks*.

PARK'S TRAVELS. Mungo Park set sail on his first voyage to Africa, under the patronage of the African society, to trace the source of the river Niger, 22 May, 1795; and returned 22 Dec. 1797, after having fruitlessly encountered great danger. He again sailed from Portsmouth on his second voyage, 30 Jan. 1804, appointed to a new expedition by government; but never returned. His murder at Broussa on the Niger was well authenticated.

PARLIAMENT (from the French *parlement*, discourse) derives its origin from the Saxon general assemblies, called *Wittenagemot*. The name was applied to the assemblies of the state under Louis VII. of France, about the middle of the 12th century, but it is said not to have appeared in our law till its mention in the statute of Westminster I., 3 Edw., 1272: and yet Coke declared in his *Institutes*, and spoke to the same effect, when speaker (1592), that this name was used even in the time of Edward the Confessor, 1041. The first clear account we have of the representatives of the people forming a house of commons, was in the 43rd Hen. III. 1258, when it was settled by the statutes of Oxford, that twelve persons should be chosen to represent the commons in the three parliaments, which, by the sixth statute, were to be held yearly. *Burton's Annals*. The general representation by knights, citizens, and burgesses, took place 49 Hen. III. 1265. *Dugdale's Summons to Parliament, edit.* 1685; see *Commons* and *Lords*. The power and jurisdiction of parliament are so transcendent and absolute, that it cannot be confined, either for causes or persons, within any bounds. It hath sovereign and uncontrollable authority in making and repealing laws. It can regulate or new-model the succession to the crown (as was done in the reigns of Henry VIII. and William III.). It can alter and establish the religion of the country, as was done in the reigns of Henry VIII., Edward VI., Mary, and Elizabeth. *Sir Edward Coke.** The fourth edition of May's "Practical Treatise on Parliament" was published in 1859; see *Triennial* and *Septennial*.

* When the royal assent is given to a public bill, the clerk says "*Le roi* [or *la reine*] *le veut.*" If the bill be a private bill, he says "*Soit fait comme il est désiré.*" If the bill have subsidies for its object, he says, *Le roi* [or *la reine*] *remercie ses loyaux sujets, accepte leur bénévolence, et aussi le veut.*" If the king do not think proper to assent to the bill, the clerk says, "*Le roi* [or *la reine*] *s'avisera,*" which is a mild way of giving a refusal. It is singular that the French language should still be used.

* Termed the "Palace of Westminster." The first contract for the embankment of the river was taken in 1837, by Messrs Lee; this embankment, faced with granite, is 886 feet in length, and projected into the river in a line with the inner side of the third pier of old Westminster-bridge. Sir Charles Barry (born 1795, died 1860) was the architect of the sumptuous pile of buildings raised since 1840. The whole stands on a bed of concrete twelve feet thick; to the east it has a front of about 1000 feet, and covers an area of nine statute acres. It contains 1100 apartments, 100 staircases, and two miles of passages or corridors. The great Victoria tower at the south-west extremity is 346 feet in height, and towers of less magnitude crown other portions of the building.

PARLIAMENT OF IRELAND, it is said, began with conferences of the English settlers on the hill of Tara, in 1173. Writs for knights of the shire were issued in 1295. The Irish parliament met last on 7 Aug. 1800; the bill for the union having passed.

PARLIAMENT OF SCOTLAND consisted of barons, prelates, and abbots, and occasionally of burgesses. A great national council was held at Scone by John Balliol, 9 Feb. 1292; and by Robert Bruce at Cambuskenneth, in 1326. A house of commons was never formed in Scotland. The parliament of Scotland sanctioned the act of union on 16 Jan. 1707, and met for the last time on 22 April, same year.

PARLIAMENT OF PARIS was made the chief court of justice in France by Philip IV.; at his suggestion it revoked a bull of pope Boniface VIII., 1302. It was suppressed by Louis XV., 1771; restored by Louis XVI., 1774; demanded a meeting of the states-general in 1787; and was suspended by the national assembly, 3 Nov. 1789; see *Commune*.

PARRICIDE. There was no law against it in Athens or Rome, such a crime not being supposed possible. About 172 B.C., L. Ostius having killed his father, the Romans scourged the parricide; sewed him up in a leathern sack made air-tight, with a live dog, a cock, a viper, and an ape, and thus cast him into the sea. Miss Blandy was executed at Oxford for the murder of her father, April, 1752.

PARSEES or **GUEBRES**, the followers of Zerdusht, dwelt in Persia till 638, when, at the battle of Kadseah, their army was decimated by the Arabs, and the monarchy annihilated at the battle of Náhárand in 641. Many submitted to the conquerors, but others fled to India, and their descendants still reside at Bombay (where they are termed Parsees), and where they numbered 114,098 in 1849. Mr. Dadabhai Naoroji, a Parsee merchant, was for several years professor of Gujerati at University college, London. See *Bombay*.

PARTHENON (from Greek *parthenē*, virgin), a temple at Athens dedicated to Minerva, erected

about 442 B.C. In it Phidias placed his renowned statue of that goddess, 438 B.C. The roof was destroyed by the Venetians in 1687; see *Elgin Marbles*.

PARTHENOPEAN REPUBLIC was established by the French at Naples (anciently called Parthenope), 23 Jan. 1799, and overthrown in June same year.

PARTHIA (Asia). The Parthians were originally a tribe of Scythians, who, being exiled, as their name implies, from their own country, settled near Hyrcania. Arsaces laid the foundation of an empire which ultimately extended over a large part of Asia, 250 B.C.; the Parthians were never wholly subdued by the Romans. The last king, Artabanus V., was killed, A.D. 226; and his territories were annexed to the new kingdom of Persia founded by Artaxerxes, who had revolted against Parthia.

PARTITION ACT, relative to the division of property sold by direction of the court of chancery, passed 25 June, 1688.

PARTICULARISTS. The name given to those Germans who desire the maintenance of the independence of the German states, and oppose their absorption into the empire. M. Gasser, one of them, failed in an attempt to form a ministry in Bavaria, Sept. 1872.

PARTITION TREATIES. The first treaty between England and Holland for regulating the Spanish succession (declaring the elector of Bavaria next heir, and ceding provinces to France) was signed 19 Aug. 1698; and the second (between France, England, and Holland, declaring the archduke Charles presumptive heir of the Spanish monarchy, Joseph Ferdinand having died in 1699), 13 March, 1700. Treaty for the partition of Poland; the first was a secret convention between Russia and Prussia, 17 Feb. 1772; the second between the same powers and Austria, 5 Aug. same year; the third was between Russia, Austria, and Prussia, 24 Oct. 1795.

PARTNERSHIP. The laws respecting it were amended in 1863; see *Limited Liability*.

PARTY, see *Processions*.

PASIGRAPHY (from Greek, *pasi*, for all): a system which professes to teach people to communicate with each other by means of numbers which convey the same ideas in all languages. A society for this purpose was established at Munich; and the president, Anton Bachmaier, published a dictionary and-grammar for German, French, and English, 1868—71; 4334 mental conceptions may be thus communicated.

PASQUINADES. Small satirical poems obtained this name about 1533.

At the stall of a cobbler named Pasquin, at Rome, idle persons used to assemble to listen to his sallies, to relate anecdotes, and rail at the passers-by. After the cobbler's death, his name was given to a statue to which lampoons were affixed.

PASSAROWITZ TREATY, concluded 21 July, 1718, between Germany and Venice, and the Turks, by which the house of Austria ceded certain commercial rights, and obtained from Turkey the Temeswar, Belgrade, and part of Bosnia, Servia, and Wallachia. The Turks gained the Morea.

PASSAU (Germany), **TREATY OF**, whereby religious freedom was established, was ratified between the emperor Charles V. and the protestant princes of Germany, 31 July, 1552. In 1662 the cathedral and great part of Passau were consumed by fire.

PASSENGERS—by public vehicles, are protected by 1 & 2 Will. IV. c. 22 (1831), 1 & 2 Vict. c. 79 (1838), and 16 & 17 Vict. c. 33 (1853). Mr. Cleghorn, under whom the front seat on the near side of one of the general omnibus company's carriages had given way, recovered 400*l.* damages against the company, in a verdict by consent, in the Queen's Bench, 10 Dec. 1856. The Ships' Passenger act, 18 & 19 Vict. c. 119, passed in 1855, was amended in 1863; see *Campbell's Act*.

PASSIONISTS, a congregation of clerks of the holy cross, founded by St. Paul of the Cross, who died 1775, and was canonized by the pope 1867. A home was set up in England in 1841, and others since. The monastery, Highgate, London, N., solemnly blessed by cardinal Manning, and opened, 16 July, 1876.

PASSION PLAY, see *Drama*.

PASSION-WEEK, the name given since the Reformation to the week preceding Easter, was formerly applied to the fortnight. Archbishop Laud says the two weeks were so called "for a thousand years together," and refers to an epistle, by Ignatius, in the 1st century, in which the practice is said to have been "observed by all." The week preceding Easter is now by some termed "Holy Week," the previous week "Passion Week."

PASSOVER, the most solemn festival of the Jews, instituted 1491 B.C. (*Exodus* xii.) in commemoration of their coming out of Egypt; because the night before their departure, the destroying angel, who put to death the firstborn of the Egyptians, *passed over* the houses of the Hebrews without entering them; the door posts being marked with the blood of the Paschal Lamb killed the evening before. The passover was celebrated in the new temple, 18 April, 515 B.C. *Usher*.

PASSPORT SYSTEM forbids subjects to quit one country or enter another without the consent of the sovereign thereof. In 1858 the system was somewhat changed in this country, and the stamp duty on passports was reduced from 5*s.* to 6*d.* Passports were abolished in Norway in 1859; in Sweden in 1860; and (with regard to British subjects) in France, 16 Dec. 1860; in Italy, 26 June, 1862; in Portugal, 23 Jan. 1863; and are falling into disuse in other countries. The passport system was *established* in the United States on 19 Aug. 1861. The passport system, revived in France on account of the war, 1 Aug. 1870, was abolished by M. Thiers, 10 April, 1872, in compliance with the wish of the British government.

PASTON LETTERS, the correspondence of a Norfolk family, 1422-83, giving a picture of social life in England, were edited by sir John Fenn, and published in five volumes, quarto, 1787-1823. PATAY (France), where Joan of Arc, the maid of Orleans, was present, when the earl of Richemonte signally defeated the English, 18 June, 1429.

Talbot was taken prisoner, and the valiant Fastolfe was forced to flee. In consequence, Charles VII. of France entered Rheims in triumph, and was crowned 17 July, following year, Joan of Arc assisting in the ceremony in full armour, and holding the sword of state, see *Joan of Arc.*

PATENTS (from *pateo*, I open), licences and authorities granted by the king. Patents granted for titles of nobility were first made 1344, by Edward III. They were first granted for the exclusive privilege of printing books, in 1591. The property and right of inventors in arts and manufactures were secured by letters patent by an act passed in 1623. The later laws regulating patents are very numerous; among them are 5 & 6 Will. IV. c. 83 (1835), and 15 & 16 Vict. c. 83 (1852). By the latter COMMISSIONERS OF PATENTS were appointed, viz., the lord chancellor, the master of the rolls, the attorney-general for England and Ireland, the lord advocate, and the solicitors-general for England, Scotland, and Ireland. In 1853, a journal was published under their authority, and indexes of patents, from March, 1617 to the present time. Specifications of patents may be consulted by the public at the Free Library and Reading-Room, in Southampton-buildings, opened 5 March, 1854. A museum containing models, portraits, &c., was established in 1859 at South Kensington, mainly by the exertions of Mr. Bennet Woodcroft.

An international congress for the protection of patents met at Vienna . . . . . Aug. 1873

New patent bills introduced into parliament withdrawn 1875, 1876

In 1864, the alleged defalcations of Mr. Edmunds, a clerk in the patent office and an official of the house of lords, led to his retirement. He obtained a pension of 800*l.*, which was taken from him by a vote of the house of lords on 9 May, 1865. Much litigation ensued. In an action against Mr. Gladstone, the prime minister, and others, for a libel, Mr. Edmunds was non-suited, 21-22 June, 1872; and he failed in actions against several newspapers for printing a treasury minute. His appeal to the house of lords failed 16 June, 1873.

PATNA (N. India). Near here the English, under major Carnac, defeated the emperor Shah Alum on 15 Jan. 1761. The town was acquired by the British by their defeat of the sanguinary Meer Cassim, 23 Oct. 1764.

PATRIARCHS (a name given to Abraham, Isaac, Jacob, and his sons). The ecclesiastical historian Socrates gives this title to the chiefs of Christian dioceses, about 440. It was first conferred on the five grand sees of Rome, Constantinople, Alexandria, Antioch, and Jerusalem. The Latin church had no patriarchs till the 6th century. The first founders or heads of religious orders are called patriarchs.

Nectarius, bishop of Constantinople, as *ex-officio* chief of the Eastern bishops, was nominated patriarch of Constantinople at the second general council of Constantinople, 9 July, 381. This led the way to the schism between the Eastern and Western churches.

PATRICIANS, the senators of Rome; their authority began with the city itself; see *Rome.*

PATRICK'S CATHEDRAL, ST. (Dublin), was founded in 1190 by archbishop Comyn, on the site of an old church. The cathedral was desecrated in 1546, and used as a law court; restored 1553. After renovation by the munificence of the late sir Benjamin Lee Guinness, it was re-opened 24 Feb. 1865; see *Dublin.*

PATRICK, ST., KNIGHTS OF, an order instituted by king George III., 5 Feb., the statutes were signed 28 Feb. 1783. The number, originally fifteen, was increased in 1821, 1831, and 1833, and is now twenty-two. The prince of Wales was installed as knight, 18 April, 1868.—St. Patrick's Benevolent Society, London, instituted 1784.

PATRIOTIC FUNDS, established to encourage the army and navy in times of war.

   The overplus, 200,000*l.* was appropriated to founding an asylum for 300 orphan girls (the Royal Victoria Patriotic Asylum) on Wandsworth common, the first stone of which was laid by the queen, 11 July, 1857.
   The royal family and many of the aristocracy contributed drawings, some of which were sold for high prices, in May, 1855.
3. A large fund contributed for the relief of the sufferers by the Indian mutiny, Aug. 1857, 434,729*l.* collected up to Nov. 1858. An act for its administration was passed, 12 Aug. 1867; see *India*, 1857.

PATRONAGE OF LIVINGS by Laymen in England is very ancient; in Scotland was opposed by the books of discipline 1560 and 1578, abolished 1649, restored 1660. The system led to the disruption of the established church, and the foundation of the free church, 18 May, 1843. The abolition of lay patronage was earnestly advocated by the authorities of the established church in March, 1870, and the duke of Argyll volunteered to resign his patronage in May. Of 1109 livings 319 belonged to the crown, and about 600 to private persons. An act (37 & 38 Vict. c. 82) for abolishing patronage in Scotland, brought in by the duke of Richmond, 18 May, passed, 7 Aug. 1874.

PAULIANISTS or **PAULINIANS**, followers of Paul bishop of Samosata, afterwards patriarch of Antioch, 260, who are said to have denied Christ's divinity and the trinity; he was excommunicated 269 by a council at Antioch.

PAULICIANS, a sect of Christian reformers, arose about 652. Although they were severely persecuted, they spread over Asia Minor, in the 9th century, and finally settled at Montford, in Italy, where they were attacked by the bishop of Milan in 1028. Severe decrees against them were made in 1163, and they gradually dispersed; very probably sowing the seeds of the great reformation of the 16th century.

PAUL JONES, a Scotchman, born 1742; died at Paris, 1792. He commanded an American privateer during the American war, and made daring depredations on British commerce. He pillaged the house of lord Selkirk, near Kirkcudbright, and at Whitehaven burnt shipping in the harbour, April 1778. The Dutch permitted Paul Jones to enter their ports with two British ships of war which he had taken, and which the stadtholder peremptorily refused to deliver up, 1779.

PAUL'S CROSS, ST. (London), which stood at the north side of the cathedral, was a pulpit formed of wood, mounted upon steps of stone, and covered with lead, from which the most eminent divines were appointed to preach every Sunday in the forenoon. To this place the court, the mayor, the aldermen, and principal citizens used to resort. It was in use as early as 1259, and was appropriated not only to preaching, but to political and ecclesiastical discourses, &c. The cross was demolished in 1643, by order of the parliament.

PAUL'S SCHOOL, ST., was endowed in 1512 by John Colet, dean of St. Paul's, for 153 boys "of every nation, country, and class," in memory of the number of fishes taken by Peter. (*John* xxi. 11). The first schoolhouse was burnt in 1666; the second, by Wren, was taken down in 1824, and the present building erected by George Smith. William Lilly was the first master, and his grammar is still used by the school. *Timbs.* The claim of the Mercers company to be owners instead of trustees of Colet's estate was set aside by the vice chancellor, 11 Feb. 1870.

PAUPERS, see *Poor.*

PAVEMENT. The Carthaginians are said to have been the first who paved their towns with stones. The Romans, in the time of Augustus, had pavement in many of their streets; the Appian way, a paved road, was constructed 312 B.C. In England there were few paved streets before Henry VII.'s reign. London was first paved about 1533. It was paved with flagstones between 1815 and 1825. Wood and asphalte paving were tried in 1839, and have been disused since 1847; see *Wood Pavement.* Asphalte has been much used since 1869. Wood reported to be the best for London, May, 1876.

PAVIA (N. Italy), the ancient *Ticinum* or *Papia.* Its university, founded by Charlemagne, is said to be the oldest in Europe. Pavia was built by the Gauls, who were driven out by the Romans, and these in their turn were expelled by the Goths. In 568 it was taken by the Lombards, and became the capital of their kingdom. In the 12th century it was erected into a republic, but soon after was subjected to Milan and followed its fortunes. On 24 Feb. 1525, a battle was fought near here between the French and the Imperialists, when the former were defeated, and their king, Francis I., after fighting with heroic valour, and killing seven men with his own hand, was at last obliged to surrender himself a prisoner. It was long asserted that Francis wrote to his mother, Louisa of Savoy, regent of the kingdom during his absence, saying, *Tout est perdu, madame, fors l'honneur* (All is lost, madam, except honour). The words are now said to have been, *L'honneur et la vie qui est saulvé,*

PAWNBROKING. The Roman emperors lent money upon land. The origin of borrowing money by means of pledges deposited with lenders is referred to Perugia, in Italy, about 1462. The institutions were termed *monti di pietà* (*which see*). Soon afterwards, it is said that the bishop of Winchester established a system of lending on pledges, but without interest. The business of pawnbrokers was regulated in 1756, and licences issued in 1783. The rate of interest on pledges was fixed in 1800. In London there were, in 1851, 334 pawnbrokers; and in England, exclusively of London, 1127; the number is increasing more than in proportion to the population. In 1860 an act was passed enabling pawnbrokers to charge a halfpenny for every ticket describing things pledged for a sum under 5*s.* The acts relating to pawnbrokers were amended in 1856, 1859, 1860. Pawnbrokers in Great Britain; 1851, 1873; in 1861, 2578; in 1871, 3540. The law was consolidated in the pawnbrokers act passed 10 Aug. 1872.

PAX, a small tablet, generally silver, termed, *tabula pacis* or *osculatorium,* kissed by the Roman Catholic priests and laity; substituted for the primeval kiss of peace in the early church. The Pax is said to have been introduced about the 12th century.

PAYMASTER GENERAL. In 1836 the army and navy pay departments were consolidated into the paymaster-general's-office, sometimes held by a cabinet minister.

PEABODY FUND. Mr. George Peabody, an American merchant (born 18 Feb. 1795, died 4 Nov. 1869), who had made his fortune in London, gave on 12 March, 1862, 150,000*l.*, on 21 Jan. 1866, 100,000*l.*, on 5 Dec. 1868, 100,000*l.*, and by his will directed his trustees to pay 150,000*l.*—in all 500,000*l.*—to ameliorate the condition of the London poor.

It was visited by lord Macartney, Sept. 1793; surrendered to the allied English and French armies, 12 Oct. 1860; and evacuated by them 5 Nov., after peace had been signed 24 Oct. It was described as being in a very desolate state, and the inhabitants scattered and indigent. The population in 1864 was estimated at 1,600,000. English and French representatives were settled at Pekin, March, 1861.

PELAGIANS, followers of Pelagius, a Briton, appeared at Rome about 400. Their doctrines were condemned by councils at Jerusalem, Carthage, and other places, 415, 530. They maintained:—

See *Clocks*. George Graham invented the compensating pendulum, 1715. Experiments were made to determine the density of the earth by pendulums by Mr. G. B. Airy (aftds. astronomer royal), and others, in a mine in Cornwall, in 1826 and 1828; and at Horton colliery in 1854. In 1851, M. PERJURY. The early Romans threw the offender headlong from the Tarpeian precipice; and the Greeks set a mark of infamy upon him. After the empire became Christian, any one who swore falsely upon the Gospels, was to have his tongue cut out. The canons of the primitive church enjoined eleven years' penance; and in some states the false swearer became liable to the punishment he chargod upon the innocent. In England perjury was punished with the pillory, fine, and imprisonment, 1562. By the Abolition of Oaths bill, persons making a false declaration are deemed guilty of a misdemeanor; Act 5 & 6 Will. IV. cc. 60 and 61, 9 Sept. 1835. Perhaps the greatest perjurer in modern times was Titus Oates; see *Oates.* A woman named Alice Grey was convicted of many perjuries in 1856. See *Trials,* 1873.

PERUGIA, a city of central Italy; as Perousia, anciently one of the Etruscan confederation. It allied itself with the Samnites, but was ruined by two defeats by the Romans, 309 and 295 B.C. It was taken by Octavius Cæsar from the adherents of Antony; many of whom were immolated on altars by their victor, 41. Leo X. took Perugia from the rival families Oddi and Baglioni, in A.D. 1520. An insurrection here against the pope was put down by the Swiss with great cruelty, 20 June, 1859. Perugia was taken by the Sardinian general Fanti, in Sept. 1860, when the cruel papal general Schmidt and 1600 men were made prisoners.

PERUKE or **WIG**. The ancients used false hair, but the present peruke was first worn in France and Italy about 1620; and introduced into England about 1660, and prevailed more or less till about 1810.

It is said that either bishop Blomfield (of London) or Tomline (of Lincoln), obtained permission for the bishops to discontinue wearing their wigs in parliament, of which they gradually availed themselves. On account of the heat, sir J. P. Wilde, and other judges and several counsel, appeared in court without wigs, 22, 23 July, 1868.

The Sardinians were preparing to besiege it in July, 1859, when peace was made. It was given up to the Italians, 9 Oct. 1866; see *Quadrilateral*.

PESSIMISM, see *Optimism*.

PESTALOZZIAN SYSTEM of education was devised by John Henry Pestalozzi, born at Zurich in Switzerland, in 1746, died 17 Feb. 1827. In 1775 he turned his farm into a school for educating poor children in reading, writing, and working; but he did not succeed. In 1798 he established an orphan school where he began with the mutual instruction, or monitorial system, since adopted by Lancaster; but his school was soon after turned into a hospital for the Austrian army. In 1802, in

conjunction with Fellenberg, he established his school at Hofwyl, which at first was successful, but eventually declined through mismanagement.

PESTH (Hungary), built about 889, on the east bank of the Danube, opposite Buda, was repeatedly taken and besieged in the wars of Hungary, particularly with the Turks. The great insurrection broke out here, and the minister, count Lamberg, was killed, 28 Sept. 1848. Buda-Pesth was taken by the imperialists, 5 Jan. 1849. The Hungarians afterwards defeated the Austrians, who were obliged to evacuate it 18 April, same year; see *Hungary*. Buda-Pesth formally constituted capital of Hungary, Nov. 1873.

PESTILENCE, see *Plague*.

PETALISM (from the Greek *petalon*, a leaf), a mode of deciding upon the guilt of citizens of Syracuse, similar to the Athenian ostracism, the name being written on a leaf (generally of an olive) instead of a shell, about 460 B.C. If guilt were established the sentence was usually banishment.

PETARD, an instrument whose invention is ascribed to the Huguenots in 1579. Petards of metal, nearly in the shape of a hat, were employed to blow up gates or other barriers, and also in countermines to break through into the enemy's galleries. Cahors was taken by Henry IV. by means of petards, in 1580, when it is said they were first used.

PETER THE WILD BOY, a savage creature found in the forest of Hertswold, electorate of Hanover, when George I. and his friends were hunting. He was found walking on his hands and feet, climbing trees like a squirrel, and feeding on grass and moss, Nov. 1725. At this time he was supposed to be thirteen years old. He died, while under the care of an English farmer, Feb. 1785.

> The king caused him to taste of all the dishes at the royal table; but he preferred wild plants, leaves, and the bark of trees, which he had lived on from his infancy. No efforts of the many philosophic persons about court could entirely vary his savage habits, or cause him to utter one distinct syllable. Lord Monboddo represented him to be a proof of the hypothesis that "man in a state of nature is a mere animal."

PETERBOROUGH, anciently Medeshamstede (Northamptonshire); obtained its present name from a king of Mercia founding an abbey and dedicating it to St. Peter about 655. The church, destroyed by the Danes, was rebuilt with great beauty. The bishopric erected by Henry VIII., out of the lands of dissolved monasteries in the diocese of Lincoln. The first bishop was John Chambers, the last abbot of Peterborough, 1541. The see was valued in the king's books at 419*l.* 19*s.* 11*d.* Present income 4500*l.*

PETERSBURG, ST., the modern capital of Russia, founded by Peter the Great, 27 May, 1703. He built a small hut for himself, and some wooden hovels. In 1710, the count Golovkin built the first house of brick; and the next year, the emperor, with his own hands, laid the foundation of a house of the same material. The seat of empire was transferred from Moscow to this place in 1711. Here, in 1736, a fire consumed 2000 houses; and in 1780, another fire consumed 11,000 houses; this last fire was occasioned by lightning. Again, in June, 1796, a large magazine of naval stores and 100 vessels were destroyed. The winter palace was burnt to the ground, 29 Dec. 1837. The railway to Moscow was finished in 1851; to Berlin, opened 5 May, 1862. The university was closed in Oct. 1861, on account of the riotous conduct of the students. On 10 June, 1862, property to the amount of nearly a million sterling was destroyed by fire.—**PETERSBURG**, Virginia, see *United States*, 1864.

PETER'S CHURCH, ST. (Rome), originally erected by Constantine, 306. About 1450, pope Nicholas V. commenced a new church. The present magnificent pile was designed by Bramante; the first stone laid by pope Julius II. in 1506. In 1514, Leo X. employed Raphael and two others to superintend the building. Paul III. committed the work to Michael Angelo, who devised the dome, in the construction of which 30,000 lb. of iron were used. The church was consecrated 18 Nov. 1626. The front is 400 feet broad, rising to a height of 180 feet, and the majestic dome ascends from the centre of the church to a height of 324 feet; the length of the interior is 600 feet, forming one of the most spacious halls ever constructed. The length of the exterior is 669 feet; its greatest breadth within is 442 feet; and the entire height from the ground 432 feet.

PETER'S PENCE, presented by Ina, king of the West Saxons, to the pope at Rome, for the endowment of an English college there, about 725; so called because agreed to be paid on Peter Mass, 1 Aug. The tax was levied on all families possessed of thirty pence yearly rent in land, out of which they paid one penny. It was confirmed by Offa, 777, and was afterwards claimed by the popes as a tribute from England, and regularly collected, till suppressed by Henry VIII. 1534. *Camden*. PETITIONS. The right of petitioning the crown and parliament for redress of grievances is a fundamental principle of the constitution. Peti-

tions are extant of the date of Edward I. In the reign of Henry IV. petitions began to be addressed to the house of commons in considerable numbers. In 1837 there were presented to parliament 10,831 petitions, signed by 2,905,905 persons; in 1859, 24,386, signed by 2,290,579; in 1867, 12,744, signed by 1,145,216. See *Abhorrers*, and *Rights*.

PETRA, the ancient Sela, in mount Seir, near mount Hor, in the land of Edom. In the 4th century B.C. it was held by the Nabathæans, who successfully resisted Antigonus. About A.D. 70 it was the residence of the Arab princes named Aretas. It was conquered by Cornelius Palma, and annexed to the empire under Trajan, 105, to which period its remarkable monuments are ascribed. It was an important station for commercial traffic with Rome. It has been described by Burckhardt and other travellers.

PETRARCH AND LAURA; celebrated for the refined passion of the former for the latter, began in 1327, and the chief subject of his sonnets. He was born 1304, crowned with laurel, as a poet and writer, on Easter-day, 8 April, 1341; and died at Arqua, near Padua, 18 July, 1374. Laura died 6 April, 1348. A commemoration of his death at Avignon and other places, 18 July, 1874.

PETROLEUM, rock oil or mineral oil similar to paraffin, has been found in many parts of the world, especially at Rangoon. In 1859-61 a number of oil-springs were discovered in the bituminous coal regions of N. W. Pennsylvania, now termed "Petrolia," and others have been since discovered in Ohio and other states, and also in Canada. Numerous artesian wells were sunk, manufactories erected, and an almost unlimited supply obtained. Still abundant, Aug. 1871. In consequence of the importation of this oil into this country, and many accidents having taken place through its inflammability at low temperature, acts for "the safe keeping of petroleum" were passed, 29 July, 1862; July, 1868, and Aug. 1871. Petroleum became an awful weapon in the hands of the insurgents in Paris, 23-27 May, 1871. About fifty killed by explosion at a petroleum manufactory near Rheims, 16 July, 1871. The Petroleum Association test petroleum, with the view of preventing the importation of that which is dangerous.

PETROLEUSES, a name given to women charged with throwing petroleum on the burning houses in Paris during the siege by the government, May, 1871.

PETRO-BRUSIANS, followers of Pierre de Bruys, an early reformer, who was burnt at St. Gilles, Languedoc, as a heretic, in 1130.

PETROPAULOVSKI, a fortified town on the east coast of Kamtschatka, was attacked by an English and French squadron, 30 Aug. 1854. They destroyed the batteries, but failed in taking some Russian frigates, except the *Sitka*, a store-ship taken by the *President*, and a schooner taken by the *Pique*. Admiral Price was killed, it is supposed by the accidental discharge of his own pistol. A party of 700 sailors and marines landed to assault the place, but fell into an ambuscade; many were killed, including captain Parker and M. Bourasset, English and French officers. The objects of the attack were not attained, it is thought from want of stores. After this the Russians greatly strengthened their defences, but on 30 May, 1855, the allied squadron in the Pacific arriving here found the place deserted. The fortifications were destroyed, but the town was spared. The Russian ships escaped.

PETTY BAG, clerk of the: power was given to the treasury, with consent of the lord chancellor and master of the rolls, to abolish this office, by the Great Seal Offices Act, 1874.

PEVENSEY (Sussex), said to be the site of the Roman Anderida, on which a Norman castle was erected. Here William of Normandy landed, 28 or 29 Sept. 1066. The duke of York, in the reign of Henry IV., was for some time confined within the walls of this castle; as was also queen Joan of Navarre, the last wife of Henry IV., who, with her confessor, friar Randal, was accused of a design to destroy Henry V., her step-son.

PEWS in churches. "In a London will we read of *sedile vocatum pew*" (a seat called pew), 1453. Pews were censured by Latimer and Bradford, 1553. *Walcot*. The church of Geddington St. Mary, Northamptonshire, long contained a pew dated 1602. The rev. W. M. H. Church (vicar 1844-6) restored and re-seated the church, and preserved the panel with the date in the door of the surplice press. Another pew in the chancel was dated 1604.

PFAFFENDORF AND LIEGNITZ (Silesia). Near these two places was fought a battle between the Imperialists and Prussians, 15 Aug. 1760. The Austrians were defeated by Frederick of Prussia, who thus prevented the junction of the Russian and Austrian armies.

PHALANX, the Greek phalanx consisted of 8000 men in a square battalion, with shields joined, and spears crossing each other. The battalion of Philip of Macedon, called the Macedonian phalanx, was formed by him about 360 B.C.

PHALANSTERY, see *Fourierism*.

PHALSBOURG (Pfalzburg, Palatine city), a strong town of Alsace, was founded in 1570, by the elector palatine George John. It was ceded to France in 1661, and its fortress erected by Vauban, 1679. It checked the progress of the victorious armies of the allies both in 1814 and 1815, and withstood the Germans from 16 Aug. to 12 Dec. 1870, when it capitulated unconditionally. It was retained at the peace in Feb. 1871.

In 1862 the General Medical Council were empowered to prepare and sell a new pharmacopœia, to supersede those of the colleges of London, Edinburgh, and Dublin, which was published in June, 1864; succeeded by a new one in May, 1867; reprinted, 1874.

PHARMACY: the knowledge of the chemical and medical properties of drugs and other things employed medicinally. The Pharmaceutical Society of Great Britain, founded 1 June, 1841, mainly by Mr. Jacob Bell, obtained its charter in 1843. It publishes a weekly journal.—The pharmacy act, 1852, regulates the qualifications of pharmaceutical chemists. It was amended by the pharmacy act of 1868 which required all sellers of poisons to be registered after 31 Dec. 1868; act amended in 1869.

PHAROS, of Ptolemy Philadelphus of Alexandria, was esteemed as one of the wonders of the world. It was a tower built of white marble, completed about 283 B.C. On the top fires were constantly kept to direct sailors in the bay. The building cost 800 talents, which are equivalent to above 165,100*l.* English, if Attic; or, if Alexandrian, double that sum. It is said that there was this inscription upon it—"King Ptolemy to the gods, the saviours, for the benefit of sailors;" but Sostratus, the architect, wishing to claim all the glory, engraved his own name upon the stones, and afterwards filled the hollow with mortar, and wrote the above inscription. When the mortar had decayed, Ptolemy's name disappeared, and the following inscription became visible: "Sostratus, the Cnidian, son of Dexiphanes, to the gods, the saviours, for the benefit of sailors" See *Lighthouses.*

PHARSALIA, a strong city in Thessaly, N. Greece. Near it Julius Cæsar defeated his rival Pompey, 9 Aug. 48 B.C., and became virtually master of the known world. Pompey fled to Egypt, where he was treacherously slain, by order of Ptolemy the younger, then a minor, and his body left naked on the strand, till it was burnt by his faithful freedman, Philip.

PHERÆ (Thessaly, N. Greece), see *Thessaly.*

PHIGALIAN MARBLES, in the British Museum, were purchased for it by the prince regent in 1815. They consist of portions of the frieze taken from the temple of Apollo Epicurus at Phigaleia in Arcadia, and are reputed to be works of the earlier school of Phidias, who died 432 B.C. The bas-reliefs represent the conflicts of the Greeks and Amazons, and of the Centaurs and Lapithæ.

The first American congress assembled here in 1774, and promulgated the declaration of independence on 4 July, 1776. It was the capital of the Union till 1800, when Washington was selected in its place. The National Union Convention held its first meeting here 14 Aug. 1866; see *United States.*

PHILIPPI (Macedonia), so named by Philip II. of Macedon. Here Octavius Cæsar and Marc Antony, in two battles, defeated the republican forces of Cassius and Brutus, who both committed suicide, Oct. 42 B.C. Paul preached here, A.D. 48, and wrote an epistle to the converts, 64.

PHILIPPICS, the term applied to the orations of Demosthenes against Philip II. of Macedon, 352-341 B.C., and also to the orations of Cicero against Marc Antony (one of which, called divine by Juvenal, cost Cicero his life), 44-43 B.C.

PHILIPPINE ISLES (in the Malay Archipelago), discovered by Magellan, in March, 1521, who here lost his life in a skirmish. They were taken possession of in 1565 by a fleet from Mexico, which first stopped at the island of Zeba, and subdued it. In 1570 a settlement was effected at the mouth of the Manilla river, and Manilla became the capital of the Spanish possessions in the Philippines; see *Manilla.* The Philippine commercial company was unsuccessful, 1785.

PHILISTINES, a people of Palestine, conquered Israel, 1156 B.C., and ruled it forty years. They were defeated by Samuel, 1120; and by Saul and Jonathan, 1087. They again invaded Israel about 1063, when David slew their champion, Goliath. After David became king he thoroughly subdued them, 1040. In common with Syria their country was subjugated by the Romans, under Pompey, about 63.—In Germany, about 1830, Heine and the liberal party applied the term "Philistines" to the opponents of progress, or conservative party.

PHILOSOPHY (love of wisdom), the knowledge of the reason of things (distinguished from history, the knowledge of facts, and from mathematics, the knowledge of the quantity of things)—*the* hypothesis or system upon which natural effects are explained. *Locke.* Pythagoras first adopted the name of philosopher (such men having been previously called sages) about 528 B.C. PHIPPS' EXPEDITION. The hon. captain Phipps (afterwards lord Mulgrave) sailed from England in command of the *Sea-Horse* and *Carcase* ships, to make discoveries, as near as possible to the North Pole. In August 1773, he was for nine days environed with barriers of ice, in the Frozen Ocean, north of Spitzbergen, 80° 48′ N. lat. All progress or retreat was impossible, and all on board gave themselves up for lost; but a brisk wind in two or three days accomplished their deliverance. They returned to England without having made any discoveries, 20 Sept. 1773. Nelson was coxswain to the second in command.

PHLOGISTON, a term employed by Stahl to designate the matter or principle of fire; "the inflammable principle" of bishop Watson, near the close of the 17th century. The chemical theory based upon it, considered to have been totally refuted by Lavoisier, 1790, has been recently revived in a modified form.

PHOCIS, a state in Northern Greece. The Phocians seized Delphi 357 B.C., and commenced the second Sacred War. They were opposed by Thebes and other states, and were utterly subdued by Philip II. of Macedon in 346.

PHŒNICIA, on the sea coast of Syria. The natives were the most eminent navigators and traders of antiquity; their cities or allied states being Tyre, Sidon, Berytus, Tripoli, Byblos, and Ptolemais, or Acre. From the 19th to the 13th centuries before Christ, they established colonies on the shores or isles of the Mediterranean—Carthage, Hippo, Utica, Gades, Panormus, and are said to have visited the British Isles. Phœnicia was conquered by Cyrus, 537 B.C.; by Alexander, 332; by the Romans, 47; and after partaking of the fortunes of Palestine, was added to the Ottoman empire, A.D. 1516.

PHŒNIX CLUBS, of a treasonable character, were formed in Ireland in 1858. They met at night to drill. Several persons were arrested and tried in March, 1859, at Tralee; but the jury could not agree on their verdict. Daniel Sullivan was condemned to penal servitude for ten years, April, 1859. Eventually some of the prisoners pleaded guilty, and were discharged on being bound over to keep the peace.

PHONOGRAPH, a machine proposed to be attached to pianofortes and other keyed instruments, by which any music that is played may be written down on blank paper, since it rules and prints the notes simultaneously. It was patented by Mr. Fenby, 13 June, 1863. The motive-power is electro-magnetism. Machines with a similar object were projected by Mr. Creed in 1747; Mr. J. F. Unger in 1774; and by Mr. Carreyre in 1827.

PHONOGRAPHY (from the Greek *phone*, sound), suggested by Franklin, 1768. The Phonetic society, whose object was to render our mode of writing and printing more consonant to sound, was established, 1 March, 1843; sir W. C. Trevelyan, president, and Mr. Isaac Pitman, secretary, the latter being the inventor of the system which was made known in 1837. Among other works published by the promoters of the system, was the "Phonetic News," in 1849; see *Visible Speech*.

PHONOSCOPE, an apparatus for testing the quality of musical strings, invented by M. Kœnig, and exhibited at the International Exhibition in 1862.

PHOSPHORUS was discovered in 1667, by Brandt, of Hamburg, who procured it from urine. The discovery was prosecuted by John Kunckel, a Saxon chemist, about 1670, and by the hon. R. Boyle about the same time. *Now. Dict.* Phosphoric acid is first mentioned in 1743, but is said to have been known earlier. Gahn pointed out its existence in bones in 1769, and Scheele devised a process for extracting it. Canton's phosphorus is so called from its discoverer, 1768. Phosphoretted hydrogen was discovered by Gengembre in 1812. The consumption of phosphorus has immensely increased since the manufacture of lucifer matches. In 1845, Schrötter, of Vienna, discovered allotropic or amorphous phosphorus, which ignites more slowly and is less unwholesome in working than ordinary phosphorus.

PHOSPHOR-BRONZE, an alloy of copper, tin, and phosphorus, invented by Messrs. Montefiore-Levi and Künzel, of Belgium, in 1867. It is very hard, ductile, and elastic, with a colour resembling gold.

PHOTOGRAPHY. The action of light on chloride of silver was known as early as the 16th century. The phenomenon was studied by Scheele

(1777), Senebier (1790), Ritter and Wollaston (1801). From the results of these investigations, experiments were made by Thos. Wedgwood and Humphry Davy, in the Royal Institution, London, which were published in its Journal, 1802. Wedgwood may be regarded as the first *photographer*. His paper was entitled "an account of a method of copying paintings upon glass, and of making profiles by the agency of light upon nitrate of silver."

Further discoveries were made by Niépce in 1814, and sir J. Herschel in 1819.

Louis J. M.-Daguerre commenced his experiments in 1824; and in 1826 joined Joseph Nicéphore Niépce, and worked with him till the death of the latter in 1833. The production of *Daguerreotype* plates was announced in Jan. 1839: and the French chamber of deputies granted a pension to Daguerre and to Niépce's son Isidore.

In 1839 Mr. Henry Fox Talbot first published his mode of multiplying photographic impressions by producing a *negative* photograph (*i. e.*, with the light and shades reversed) from which any number of positive copies may be obtained. His patent for producing the *Talbotype* or *Calotype* (on paper) is dated Feb. 1841.

In 1851, Collodion (*which see*) was applied to photography by Mr. F. Archer.

The Photographic Society of London was established in 1853. It publishes a journal. On 22 Dec. 1852, 774 specimens of photography were exhibited at the rooms of the Society of Arts, Adelphi.

Carte de Visite portraits (*which see*) taken by M. Ferrier at Nice, 1857.

In 1861 Mr. Thompson, of Weymouth, photographed the bottom of the sea.

Photography was successfully applied to the transfer of works of art to wood blocks by Mr. John Leighton, in his illustrated edition of Lyra Germanica, 1861.

In 1861 professor O. M. Rood suggested the application of photography to the microscope.

The tannin process introduced by major Russell about 1861.

The *copyright* of photographs is secured by an act passed in 1862.

Dr. Henry Wright photographed objects of surgical interest in Jan. 1863.

Criminals ordered to be photographed (by the act for prevention of crime), from 2 Nov. 1871.

The *Autotype process* for transferring and printing reported successful, April, 1873.

Celestial Photography began with professor Bond, the astronomer, of Cambridge, U.S., who exhibited a photograph of the moon in 1851. Since then, Mr. Warren De la Rue, of London, has produced excellent photographs of the moon, and other heavenly bodies, and on 18 July, 1860, photographed the solar eclipse.

PHOTOHELIOGRAPH, an apparatus for registering the position of the sun's spots by means of clockwork and photography: erected at the suggestion of sir John Herschel at Kew observatory about 1857. It was used by Mr. Warren De la Rue to photograph the disc of the sun during the eclipse of 18 July, 1860.

PHOTOGALVANOGRAPHY, the art of producing engravings by the action of light and electricity. The earliest specimens were produced by Nicéphore Niépce, and presented by him in 1827 to the great botanist, Robert Brown. Great advances have since been made in this art by MM. Niépce de St. Victor (who published a treatise on it in 1856), Vitry, W. R. Grove, H. Fox Talbot, &c. In 1852, Paul Pretsch patented a process which he called "Photogalvanography."

PHOTOGLYPHIC ENGRAVING (a process by which the light actually etches a picture on a plate that may be and has been printed from) was patented by Mr. Fox Talbot in 1858, and is described and exemplified in the Photographic News, 9 and 16 Sept. 1859, a specimen being given in the latter number.

PHOTOZINCOGRAPHY (a process by which photographs are transferred to zinc plates which may be printed from) was devised by sir Henry James, chief of the Ordnance Survey, and made known in 1860. By it maps, charts, and engravings may be printed at a small cost.

PHRYGIA (now Karamania), a province in Asia Minor, became part of the Persian empire in 537 B.C., and partook of its changes. It became a Roman province in 47 B.C., and a Turkish one, A.D. 1392.

PHYLLOXERA, see *Vine*.

PHYSIC appears to have been first practised by the Egyptian priests. Pythagoras endeavoured to explain the philosophy of disease and the action of medicine, about 529 B.C. Hippocrates, the father of medicine, flourished about 422 B.C., and Galen, born A.D. 131, was the oracle of medical science. About 980 Avicenna, an Arab, wrote a system of medicine. The discovery of the circulation of the blood, by Dr. Harvey, furnished an entirely new system of physiological and pathological speculation, 1628. On 28 Sept., 1865, Miss Garrett, at Apothecaries' Hall, London, received the licence to practise medicine. See *Medical* and *Societies*.

PHYSICIAN TO THE KING.—John, the king's chaplain and physician (afterwards bishop of Bath and Wells), mentioned 1090.

The earliest mandate or warrant for the attendance of a physician at court is dated 1454, and 33 Henry VI., a reign fertile in the patronage which was afforded to practitioners in medicine; but no appointment existed which can justly be called physician to the royal person. By this warrant the king, with the consent of his privy council, deputed to three physicians and two surgeons the regulation of his diet, and the administration of such medicines and remedies as might be sufficient for his cure, without any allusion to the previous existence or permanency of the office which they were authorised for a time to fill, or to a remuneration for their services.—*Life of Linacre.*

At a meeting of the Royal Medical and Chirurgical Society, 3 May, 1869, it was resolved that the "Royal Society of Medicine" (including the various sections) be founded; the resolution was affirmed, 22 Feb. 1870; but in 1871 the project dropped.

School of Medicine for Women in London (council: Professors Burdon-Sanderson and Huxley, Mrs. Garrett-Anderson, M.D., Mrs. Blackwell, M.D., and others); opened, Oct. 1874.

PHYSIC GARDENS. The first cultivated in England was by John Gerard, surgeon of London, in 1567; that at Oxford was endowed by the earl of Danby, in 1652; that at Cambridge was commenced about the middle of the last century; and that at Chelsea, originated by sir Hans Sloane, was given to the Apothecaries' company in 1721; this last was very much admired by the illustrious Linnæus.

PHYSICAL SOCIETY, established 14 Feb. 1874; Dr. J. H. Gladstone, first president.

PHYSICIANS, ROYAL COLLEGE OF, of London (of England since 1858), was projected by Dr. Linacre, physician to Henry VIII., who, through his interest with cardinal Wolsey, obtained letters patent, constituting a corporate body of regular physicians in London, with peculiar privileges, 23 Sept. 1518. Linacre was elected the first president of the college. Dr. W. Harvey was a great benefactor to this institution, 1653. He built a library and public hall, which he granted for ever to the college, with his books and instruments. The college was afterwards held in a building in Warwick-lane, erected by sir C. Wren, where it continued till 1825, when the present elegant stone edifice in Trafalgar-square was erected from designs by sir R. Smirke.—The College of Physicians, Dublin, was founded by charter of Charles II. 1667, and was re-incorporated in 1692. The Royal College of Physicians, Edinburgh, 29 Nov. 1681.

PHYSICS, see under *Philosophy.*

PHYSIOGNOMY, a science which affirms that the dispositions of mankind may be discovered from the features of the face. The origin of the term is referred to Aristotle; and Cicero was attached to the science. It became a fashionable study from the beginning of the 16th century; and in the last century, the essays of Le Cat and Pernethy led to the modern system. Lavater's researches in the pursuit arose from his having been struck with the singular countenance of a soldier who passed under a window at which he and Zimmerman were standing; his "Fragment" on this subject appeared in 1776.

PHYSIOLOGY is that part of physics which treats of the inner constitution of animals and plants, and the several functions and operations of all their organs and tissues. The works of Müller, Milne-Edwards, Huxley, and Carpenter are much celebrated, and Todd's "Cyclopædia of Physiology" (1836-59) is a library in itself. Physiological Society, in London, founded by Dr. Burdon-Sanderson and others, early in 1876; see *Royal Institution.*

PIACENZA, see *Placentia.*

PIANOFORTE, said to have been invented by J. C. Schröder, of Dresden, in 1717; he presented a model of his invention to the court of Saxony, and, some time after, G. Silverman, a musical instrument maker, began to manufacture pianofortes with considerable success. The invention has also been ascribed to father Wood, an English monk at Rome, 1711; and to an instrument-maker at Florence. The square pianoforte was first made by Freiderica, an organ-builder of Saxony, about 1758. Pianofortes were made in London by M. Zumpie, a German, 1766; and have been since greatly improved by Broadwood, Collard, Kirkman, Erard, and others. A "*stone pianoforte,*" formed of a series of flints and other stones of various sizes, collected in France and arranged by M. Baudre, was played on by him at the Royal Institution on 16 March, 1866.

PICARDY (N. France), was conquered by the English in 1346, and by the duke of Burgundy in 1417, to whom it was ceded by the treaty of Arras, 21 Sept. 1435, and annexed to France by Louis XI., 1463.

PICENTINES, a Sabine tribe, subdued by the Romans, and their capital, Asculum, taken, 268 B.C. They began the Social war in 90, and were conquered in 89 B.C.

PICQUET, a game with cards, invented, it is said, by Joquemin, for the amusement of Charles VI. of France, then in feeble health, 1390. *Mézéray.*

PICTS (from *Picti,* painted), Scythians, who landed in Scotland much about the time that the Scots began to seize upon the Hebrides, or Western Isles (Hebudes). They afterwards lived as two distinct nations, the Scots in the highlands and isles, and the Picts in that part now called the lowlands. Between 838 and 842, the Scots under Kenneth II. totally subdued the Picts, and seized all their kingdom. Their incursions in England led to the Saxon invasion; see *Roman Wall.*

PIEDMONT (*Pedemontium,* Latin, foot of the mountains), a region in N. Italy, formerly the seat of government of the kingdom of Sardinia, *which see,* and *Savoy.*

PIE-POUDRE COURT, the Court of Dusty Foot, whose jurisdiction was established for cases arising at fairs and markets, to do justice to the buyer and seller immediately upon the spot. By stat. 17 Edw. IV., it had cognizance of all disputes in the precincts of the market to which it might belong, 1477.

PIER AND HARBOUR ACT, to facilitate the formation, management, and maintenance of piers and harbours in Great Britain and Ireland, was passed in 1862.

PIETISTS, a Lutheran sect, instituted in Leipsic, by Philip James Spener, a professor of theology, about 1689, with the view of reforming the popular religion. He established "colleges of pietists," with preachers resembling those of the society of friends and the methodists in Britain, about 1760. A body resembling the Pietists, named Chasidim, arose among the Jews in the Ukraine, and spread through Poland and European Turkey.

PIGEONS were employed as carriers by the ancients. Hirtius and Brutus corresponded by means of pigeons at the siege of Modena. The pigeons of Aleppo served as couriers at Alexandretta and Bagdad. Thirty-two pigeons liberated from

London at 7 o'clock in the morning, 22 Nov. 1819; at noon one of them arrived at Antwerp; a quarter of an hour afterwards a second arrived; the remainder on the following day. *Phillips.* At a pigeon race, 25 July, 1872, from Spalding to London, the speed allowed was 90 seconds a mile; see *Post Office*, 1870.

PILGRIMAGE OF GRACE, a name assumed by religious insurgents in the north of England, who opposed the dissolution of the monasteries. The movement, which commenced in Lincolnshire in Sept. 1536, was suppressed in Oct.; but soon after revived in Yorkshire; and an expedition, bearing the foregoing name, having banners on which were depicted the five wounds of Christ, was headed by Aske, and other gentlemen, and joined by priests and 40,000 men of York, Durham, Lancaster, and other counties. They took Hull and York, with smaller towns. The duke of Norfolk marched against them, and by making terms dispersed them. Early in 1537 they again took arms but were promptly suppressed, and the leaders, several abbots, and many others, were executed.

PILGRIMAGES began with the pilgrimage of the empress Helena to Jerusalem, 326. They became very frequent at the close of the 10th century. Robert II. of France made several pilgrimages; among others one to Rome about the year 1016, perhaps in 1020, when he refused the imperial dignity and the kingdom of Italy. The pilgrimage to Canterbury is described by Chaucer in his Canterbury Tales about 1383. The pilgrimage of Mahometans to Mecca, the birth-place of the prophet, is commanded in the Koran. Pilgrimages to shrines of the Virgin Mary in France revived in 1872, and since, in consequence of miracles alleged to have taken place at La Salette in 1846 and at Lourdes, 11 Feb. 1858; see *Sacred Heart*.

PILGRIM FATHERS, the name given in North America to a party of 74 English puritans and 28 women, members of John Robinson's church, who sailed in the *May Flower* from Leyden to North America, and landed on Plymouth Rock, where they founded a colony, 25 Dec. 1620.

"PILGRIM'S PROGRESS FROM THIS WORLD TO THAT WHICH IS TO COME," written by John Bunyan, in Bedford gaol, where he was imprisoned twelve years, 1660-72. The first part was published in 1678. A Hebrew version appeared in 1851; see *Bedford*.

PILLAR SAINTS, see *Monachism.*

PILLORY, a scaffold for persons to stand on, to render them publicly infamous. This punishment was awarded against persons convicted of forgery, perjury, libelling, &c. In some cases the head was put through a hole, the hands through two others, the nose slit, the face branded with one or more letters, and one or both ears were cut off. There is a statute of the pillory, 41 Hen. III. 1256. Many persons died in the pillory by being struck with stones by the mob, and pelted with rotten eggs and putrid offal. It was abolished as a punishment except for perjury, 1815, and totally abolished in 1837. The last who suffered at the Old Bailey was Peter Jas. Bossy, for perjury, 24 June, 1830.

PILNITZ (near Dresden, Saxony). The convention of Pilnitz, took place between the emperor Leopold and the king of Prussia, 20 July, 1791. On 27 Aug. the treaty of Pilnitz, or, as some style it, the Partition treaty, was finally agreed upon at Pavia by the courts in concert. It was to the effect "that the emperor should retake all that Louis XIV. had conquered in the Austrian Netherlands, and uniting these provinces to the Netherlands, give them to his serene highness the elector palatine, to be added to the palatinate; Bavaria to be added to the Austrian possessions," &c.

PILOT. The act relating to pilots, 16 & 17 Vict. c. 129 (1853), with other acts, is embodied in the Merchant Shipping act; see *Trinity-House.*

PINE-TREES. The stone pine (*Pinus Pinea*), brought to these countries before 1548. The cluster pine (*Pinus Pinaster*), brought from the south of Europe before 1596. The Weymouth pine (*Pinus Strobus*), from North America, 1705. Frankincense pine (*Pinus Tæda*), from North America, before 1713. There are other varieties.

PINKEY (near Edinburgh), where the English under the Earl of Hertford, protector, totally defeated the Scots under the regent Arran, 10 Sept. 1547. There fell not 200 of the English, but above 10,000 of the Scots. Above 1500 were taken prisoners. *Hume.*

PINS are mentioned in a statute of 1483. Brass pins were brought from France in 1540, and first used in England, it is said, by Catherine Howard, queen of Henry VIII. Pins were made in England in 1543. *Stow.* They were first manufactured by machinery in England in 1824, under a patent of Lemuel Wellman Wright, of the United States.

PIOMBINO, a principality, Italy, previously ruled by the Appiani family, was acquired by the Spaniards, 1589. It was ceded to France, 1801, and given by Napoleon to his sister Elise, wife of prince Bacciochi, who held it from 1805 to 1815, when it was restored to the Buoncampagni family, subject to Tuscany. It became part of the kingdom of Italy, 1860.

PIRACY was severely suppressed by the Romans. Pompey destroyed the Cilician pirates, 67 B.C.; see *Buccaneers.* Many acts of parliament have been passed for the suppression of piracy; the latest in 1837.

PIRÆUS, the port of Athens, was united to the city by two long walls, one erected by Themistocles, and the other by Pericles, 456 B.C., which were destroyed by Lysander, 404 B.C. It was fortified by Conon, 393 B.C. The Piræus was able to contain 400 Greek vessels. It was occupied by the French during the Russian war in 1854.

PIRMASENS (Bavaria). Here Moreau and the French were defeated by the duke of Brunswick and the Prussians, 14 Sept. 1793.

PISA, an ancient city in Tuscany, was founded about six centuries before Christ, and was favoured by the early Roman emperors as a flourishing republic. The citizens took an active part in the Italian wars of the middle ages, but became subject to Florence, after a long siege, 1405-6. In 1494 Pisa became independent under the protection of Charles VIII. of France, but was retaken by the Florentines in 1509. The university was founded

in 1343, and revived by the Medici in 1472, and 1542. The rival popes, Benedict XIII. and Gregory XII., were deposed at a council held at Pisa in 1409, and Alexander V. elected in their room. The Campanile or leaning tower was built about 1154,* and the Campo Santo about the same time.

PISCICULTURE, see *Fisheries*.

PISTOLS, the smallest fire-arms, said to have been invented at Pistoia in Italy; were first used by the cavalry of England about 1544. Of late years they have been made with a revolving cylindrical breech, in which are formed several chambers for receiving cartridges, and bringing them in succession into a line with the barrel ready for firing. The earliest model of this kind of arm is to be found in the museum of the United Service Institution, and is supposed to date from the reign of Charles I. An eight-chambered matchlock revolver of the 16th century is placed in the Royal Artillery Museum, Woolwich. The manufacture of pistols by machinery was first introduced into England from the United States, America, in the year 1853, by col. Colt, who invented the Colt revolving pistol, 1851. This system of manufacture induced the British government to establish the Enfield armoury, in 1855; see *Fire-Arms*.

PITCAIRN'S ISLAND, in the Pacific Ocean, said to have been discovered by Pitcairn in 1768, seen by Cook in 1773, and since colonised by ten mutineers from the ship *Bounty*, captain Bligh, in 1789; see *Bounty*.

The mutineers remained unknown to England until discovered accidentally in 1814. A ship nearing the island was hailed by a swarthy youth in the English language, when it appeared that the mutineers, soon after settling there, had married some black women from a neighbouring island, and had become a well-conducted community under the care of Adams, the principal mutineer. He died in 1829, when Nobbs, an Englishman, who arrived a few years before, became chief. In Aug. 1852 admiral Moresby spent a few days on the island. By his means Nobbs was sent to England and obtained ordination. As their numbers increased, the island proved incapable of their support. The English government removed them, with all their property, in the ship *Morayshire*, on 3 May, 1856, and landed them, after a boisterous passage, on Norfolk Island, prepared previously for their reception, 8 June. The government stocked Norfolk Island with 2000 sheep, 450 head of cattle, and twenty horses, and gave them stores to last twelve months; their numbers were 96 males and 102 females. The island visited by H.M.S. *Peterel* was found to be prosperous . . . . . Dec. 1875

PITT ADMINISTRATIONS.† The first administration was formed on the dismissal of the coalition ministry (*which see*) 18 Dec. 1783, and terminated by resignation in 1801. The second was formed 12 May, 1804; and terminated (after various changes) by Mr. Pitt's death, 23 Jan. 1806. A public funeral was decreed to him, and 40,000*l.* to pay his debts.

* The Campanile was erected to contain bells, and stands in a square close to the cathedral. It is built entirely of white marble, and is a cylinder of eight stories, each adorned with a round of columns, rising one above another. It inclines so far on one side from the perpendicular, that in dropping a plummet from the top, which is 188 feet in height, it falls sixteen feet from the base. Some thought this was done purposely by the architect; others attributed it to an accidental subsidence of the foundation. From this tower Galileo made his observation on gravitation (about 1635).

† William Pitt, second son of the great earl of Chatham, was born 28 March, 1759; became M.P. 23 Jan. 1782; moved for a reform in parliament, 7 May, 1782; became chancellor of the exchequer, July, 1782; died 23 Jan. 1806.

PITTSBURG LANDING (near Corinth, Tennessee). On Sunday, 6 April, 1862, a great battle was fought between the American federals under Grant and Prentiss, and the confederates under Albert Sydney Johnston and Beauregard. The latter began the attack and were victorious, but lost their able general Johnston. The federals were reinforced the next day and renewed the attack; the confederates maintained their ground; but soon after retired in good order to Corinth. This engagement is also named the battle of Shiloh.

PIUS IV., CREED OF, see *Confessions*.

PLACENTIA (now Piacenza), N. Italy, founded by the Romans about 220 B.C. It suffered in all the convulsions attending the fall of the empire, and the wars of the middle ages. In 1254 it fell under the rule of the family of the Scotti. In 1302 Alberto Scotto was overcome, and Placentia was united to Milan, then ruled by the Visconti. On their extinction in 1447, Placentia revolted, but was taken by Sforza duke of Milan, and treated very cruelly. In 1513 it was given to pope Leo X. In 1545, Paul III. gave it with Parma as a duchy to his son Peter Louis Farnese. The French and Spaniards were defeated by the Austrians and Sardinians near Placentia, 16 June, 1746; see *Parma*.

PLAGUE. The plagues of Egypt (1491 B.C.) are described in *Exodus* ix., &c. The first recorded general plague in all parts of the world occurred 767 B.C. *Petavius*. At Carthage a plague was so terrible that people sacrificed their children to appease the gods, 534 B.C. *Baronius*. At Rome a desolating plague prevailed, 453 B.C. The devastating plague at Athens, which spread into Egypt and Ethiopia, 430 B.C., is admirably described by Thucydides. Another which raged in the Greek islands, Egypt, and Syria, destroyed 2000 persons every day, 187 B.C. *Pliny*; see *Cattle*.

At Rome, a most awful plague; 10,000 persons perished daily, A.D. 80.
Again ravaged the Roman empire, 167, 169, 189.
Another in the Roman empire. For some time 5000 persons died daily at Rome; many towns entirely depopulated, 250-265.
In Britain, a plague swept away such multitudes that the living were scarcely sufficient to bury the dead, 430.
A long-continued dreadful one began in Europe in 558, extended all over Asia and Africa.
At Constantinople, when 200,000 of its inhabitants perished, and in Calabria, Sicily, and Greece, 746-749.

Again, in Ireland, when a prodigious number perished, 1204.
The "Black Death" in Italy, 1340.

In London and Paris a dreadful mortality prevailed in 1361-2, 1367, 1369, and in Ireland in 1370.
A great pestilence in Ireland called the *Fourth*, destroyed a great number of the people, 1383.
30,000 persons perished of a dreadful pestilence in London, 1407.
Again, in Ireland, superinduced by a famine; great numbers died, 1466; and Dublin was wasted by a plague, 1470.
An awful pestilence at Oxford, 1471; and throughout England, a plague which destroyed more people than the continual wars for the fifteen preceding years, 1478. *Rapin: Salmon.*

In France a general mortality; at Lyons, 60,000 persons died, 1632.
The plague brought from Sardinia to Naples (being introduced by a transport with soldiers on board), raged with such violence as to carry off 400,000 of the inhabitants in six months, 1656.

THE GREAT PLAGUE OF LONDON, began Dec. 1664, which carried off 68,596 persons; some say 100,000. Fires were kept up night and day to purify the air for three days; and it was thought the infection was not totally destroyed till the great conflagration of Sept. 1666.

A great cattle plague (*which see*) in England, resembling typhus, near London, begins June, 1865.
A new, and hitherto an incurable disease, named *black death*, on account of purple blotches coming out on the skin, appeared in Dublin; many persons of all ranks died a few hours after the seizure. March *et seq.* 1866.

PLANE. A true plane, so important in machinery, has been most successfully obtained by sir Joseph Whitworth. Fine specimens were exhibited at the Royal Institution in 1873.

PLANETS. Jupiter was known as a planet to the Chinese and the Chaldeans, and inserted in a chart of the heavens, made about 600 B.C., and in which 1460 stars are accurately described; this chart is said to be in the national library at Paris. The satellites of Jupiter discovered by Galileo, 7 Jan. 1610. We now know nine primary planets, termed major; *Mercury*, *Venus*, the *Earth*, *Mars*, *Jupiter*, *Saturn*, *Uranus*, *Neptune*, and *Vulcan*; and, secondary or minor, situated between the orbits of Mars and Jupiter. The numerical order differs in the lists of English, German, and French astronomers. In the French and German lists, *Aglaia* to *Pandora* are numbered 47 to 55; *Meletè* is 56.

* It was believed at first to be *Daphne*, No. 41; and hence was called "*Pseudo-Daphne*," when E. Schubert proved it to be a new planet. It was not re-discovered by M. Goldschmidt till 1 Sept. 1862, when it received its present name, that of the Muse of Meditation.

† *Atropos* said to have been discovered by R. Luther, 14 April, 1869. Not observed since.

PLANIMETER, a machine for measuring the area of any figure by the passage of a tracer round about its perimeter. *Amsler's* planimeter (in use for several years) was described at the British Association meeting at Brighton, Aug. 1872.

PLANING-MACHINE. One for wood was constructed by Bramah, about 1802; and one for iron by Joseph Clement in 1825.

PLASSEY, in Bengal, India, the site of a battle fought between the British under Clive, and the Hindoos under Surajah Dowlah, 23 June, 1757. The nabob, although at the head of about 68,000 men, was vanquished by 1000 British and about 2000 sepoys. The victory laid the foundation of our empire in India; see *India*.

* Fulke Martel, earl of Anjou, having contrived the death of his nephew, the earl of Brittany, in order to succeed to the earldom, his confessor sent him, in atonement for the murder, to Jerusalem, attended by only two servants, one of whom was to lead him by a halter to the Holy Sepulchre, the other to strip and whip him there, like a common malefactor. Broom, in French *genet*, in Latin *genista*, being the only tough, pliant shrub in Palestine, the noble criminal was smartly scourged with it, and from this instrument of his chastisement he was called *Planta-genista*, or Plantagenet; other accounts are given. *Skinner* and *Mézeray*.

tained its name. The method of taking likenesses by its use was first discovered by Andrea del Verrochio, about 1466.

PLATA, LA, see *Argentine Republic.*

PLATÆA (Bœotia, N. Greece), site of the battle between Mardonius, commander of the army of Xerxes of Persia, and Pausanias, commander of the Lacedæmonians and Athenians, 22 Sept. 479 B.C.; the same day as the battle of Mycale. Of 300,000 Persians scarce 3000 escaped with their lives. The Grecian army, about 110,000, lost but few men. The Greeks obtained immense plunder, and were henceforth delivered from the fear of Persian invasions. Platæa, as an ally of Athens, was destroyed by the Thebans, 372; and rebuilt by Philip II. after his victory at Chæronea, 338.

PLATE. In England, plate, with the exception of spoons, was prohibited in public-houses by statute 8 Will. III. (1696). The celebrated Plate act passed in May, 1756. This act was repealed in 1780. The act laying a stamp-duty upon plate passed in 1784; see *Goldsmiths' Company.* By 17 & 18 Vict. c. 96 (1854), gold wares were allowed to be manufactured at a lower standard; but a later act excepted marriage rings.—The art of covering baser metals with a thin plate of silver, either for use or for ornament (PLATING), said to have been invented by a Birmingham spur-maker, who began with making the branches of a pair of spurs hollow, and filling the hollow with a slender rod of steel. He continued to make the hollow larger and the iron thicker, till at last he merely coated the iron spur with silver; see *Electrotype.*

PLATINUM, the heaviest of all the metals, except osmium. The name originated with the Spaniards on account of its silvery colour; *Plata,* signifying silver. It was found in the auriferous sand of the river Pinto, in South America, and was unknown in Europe until 1741, when don Antonio Ulloa announced its existence in the narrative of his voyage to Peru. *Greig.* In its ore have been found the metals palladium, rhodium, osmium, iridium, and ruthenium (*which see*). In 1859, M. H. Ste.-Claire Deville made known a new method of obtaining platinum from its ore, in great abundance and purity; and at the international exhibition of 1862 was shown a mass worth 3840*l.*, weighing 266½ lb., of a metal hitherto considered infusible, obtained by his process, employing the oxy-hydrogen flame; see *Philosophical Lamp.*

PLATONIC PHILOSOPHY, the most popular of all systems (see *Philosophy*). Plato's dialogues have been termed "Philosophy backed by example." He was a disciple of Socrates, 409 B.C., and died 347. The leading feature of his mind was comprehensiveness.

PLATONIC YEAR, the period of time which the equinoxes take to finish their revolution, at the end of which the stars and constellations have the same place with regard to the equinoxes that they had at first. Tycho Brahe says that this year or period requires 25,816 common years to complete it; Ricciolus computes it at 25,920; and Cassini at 24,800; at the end of which time some imagined that there would be a total and natural renovation of the whole creation.

PLATTSBURG. A British expedition against this place, a town of New York, on Lake Champlain, was designed under general sir George Prevost, but was abandoned after the naval force of England had suffered a defeat in an engagement with the Americans, 11 Sept. 1814, when the British squadron in Lake Champlain was captured; see *United States.*

PLAY-GROUNDS. In 1858 a society was established by the earl of Shaftesbury and other benevolent persons to provide play-grounds for the recreation of adults and the children of the humble classes. Ground was liberally offered by the government, and by the marquis of Westminster and others; and in 1859 an act of parliament was passed to facilitate grants of lands for this purpose, for which part of Smithfield was to be reserved. The scheme was not successful.

PLAYS, see *Drama* and *Theatres.*

PLEADINGS. Clothaire held a kind of moveable parliament called *placita* whence came the word pleas, A.D. 616. *Hénault.* In the early courts of judicature in England, pleadings were made in the Saxon language in 786; and in Norman-French from the period of the conquest in 1066 until 1362. Pleadings were ordered to be in English by 36 Edward III. 1362, and Cromwell extended the rule to all legal proceedings 1650. In English law the proceedings are the mutual statements of the plaintiff's cause of action, and the defendant's ground of defence.

PLEBEIANS, Plebes, the citizens of Rome, as distinguished from the Patricians; see *Rome,* 494-366 B.C.

PLEBISCITUM, a term given to a law passed by the *comitia tributa,* an assembly of the Roman people in their tribes, first established in 491 B.C. The term has been recently revived in France and Italy, and applied to *Universal Suffrage* (*which see*).

PLOTS, see *Conspiracies,* and *Rebellions.*

PLOUGH. "Thou shalt not plough with an ox and an ass together." *Deut.* xxii. 10 (1451 B.C.). The Roman plough is minutely described by Virgil, about 31 B.C. Engines to plough grounds, whether inland or upland, were patented by David Ramsay and Thomas Wildgoose, in 1618; and many improvements in ploughs have been patented since. The application of steam power to ploughing was patented by John Upton in 1837, and by others since, more especially by lord Willoughby D'Eresby, the marquis of Tweeddale, and the earl of Caithness; see *Steam-Plough.*

PLOUGH MONDAY, in January, the first Monday after the Epiphany. It received the appellation from its having been fixed upon by our forefathers as the day upon which they returned to the duties of agriculture after enjoying the festivities of Christmas. *Ashe.* On Plough Monday, too, the ploughmen of the north country used to draw a plough from door to door and beg plough money to drink. *Bailey.*

PLUM. We have two native plums; our finer kinds came from Italy and Flanders about 1522. The *Diospyros Lotus,* the date plum, was brought from Barbary, before 1596; the Pishamin plum, *Diospyros virginiana,* from America, before 1629. Formerly damsons, apricots, and peaches went by this name, as raisins do to this day.

PLUMBAGO, see *Graphite.*

PLURALITIES. Clergymen have been restrained from holding more than one benefice by several statutes; the first being 21 Henry VIII.

1529. In 1838 an act was passed prohibiting the holding of more than two benefices except they were at a distance less than ten miles; and the law on this subject was still further amended in 1850 and 1855, provisions being made for the amalgamation of neighbouring benefices.

PLURAL NUMBER, see *Wo.*

PLUS (+) AND MINUS (—). Professor De Morgan attributes these signs to either Christopher Rudolf, who published a book on algebra about 1522, or Michael Stifelius, about 1544.

PLYMOUTH, a fortified seaport in Devonshire, originally Sutton, was incorporated as Plymouth in 1439. It was in 1588 the rendezvous of the English fleet of 120 sail under Howard, Drake, &c., which pursued the Spanish armada. The fine hotel and assembly-rooms were burnt 6 Jan. 1863; loss about 50,000*l.*; see *Breakwater*, and *Dockyards*. The National Association for Social Science met here, Sept. 1872.

PLYMOUTH BRETHREN, a body of Christians calling themselves "the Brethren," first appeared at Plymouth about 1830. In 1851 they had 132 places of worship in England and Wales. They object to national churches as too latitudinarian, and to other dissenters as too sectarian. They receive into communion all who confess Christ, and own the Holy Ghost as his vicar. Their doctrines agree with those of most evangelical protestant churches, but they recognise no order of ministers. Mr. Darby, regarded as their founder, afterwards separated from them with some adherents.

PNEUMATIC DESPATCH COMPANY, to convey letters and parcels through tubes by means of atmospheric pressure and a vacuum. The company's act was passed 13 Aug. 1859, and tubes were laid down in Threadneedle-street on 12 Sept. 1860; and on 20 Aug. 1861, successful experiments were performed at Battersea. In 1862 tubes were laid down from the Euston railway station to the N. W. post-office in Camden-town, and on 21 Feb. 1863, the conveyance of the mail-bags began. In Oct. 1865, tubes had been laid down between Euston railway and Holborn; and on 7 Nov. several persons travelled in them. Engineer, Mr. Rammell. A pneumatic tube by Siemens, employed to transmit telegraphic messages, began about Jan. 1871.

PNEUMATIC LOOM, in which compressed air is the motive power, invented by Mr. Harrison, was exhibited in London in Dec. 1864. A company has been formed to bring it into general use.

PNEUMATICS, the science which treats of the mechanical properties of air and gases; see *Air*, and *Atmospheric Railways*.

PODESTÀ (from *potestas*, power), an Italian governor, afterwards a judge; one with supreme authority was appointed at Milan by the emperor Frederick I., when he took the city in 1158.

PODOLL (Bohemia), the site of a severe conflict between the Austrians and a part of the army of prince Frederick Charles of Prussia, 26 June, 1866. The Prussians had the advantage.

POET-LAUREAT. Selden could not trace the precise origin of this office.

Warton, in his *History of English Poetry*, states that in the reign of Henry III. there was a *Versificator Regis*, to whom an annual stipend was first paid of one hundred shillings.
Chaucer, on his return from abroad, assumed the title of poet-laureat; and in the twelfth year of Richard II., 1389, he obtained a grant of an annual allowance of wine.
In the reign of Edward IV., John Kay was laureat; Andrew Bernard was laureat, *temp.* Henry VII.; and John Skelton, *temp.* Henry VIII.
James I. in 1615, granted to his laureat a yearly pension of 100 marks; and in 1630, this stipend was augmented by letters patent of Charles I. to 100*l.* per annum, with an additional grant of one tierce of Canary Spanish wine to be taken out of the king's store of wine yearly. We believe that on Southey's appointment the tierce of Canary wine was commuted for 27*l.*
Laurence Eusden commenced a series of Birth-Day and New Year's Odes, which continued till the death of Pye, in 1813.
On the death of Warton its abolition was recommended by Gibbon, whose elegant compliment on the occasion still more forcibly applied on Wordsworth's death, in 1850—"This is the best time for not filling up the office, when the prince is a man of virtue, and the poet just departed was a man of genius."

POETRY. The song of Moses on the deliverance of the Israelites, and their passage through the Red Sea, 1491 B.C. (*Exodus* xv.), is the most ancient poetry extant. Orpheus of Thrace is deemed the inventor of poetry (at least in the western part of the world) about 1397 B.C.; see *Epics*, *Odes*, *Satire*, *Comedy*, *Tragedy*, *Sonnets*, *Ballads*, *Hymns*, and *Verse*.

POICTIERS (W. France), near which was fought the battle between Edward the Black Prince and John, king of France, in which the English arms triumphed, 19 Sept. 1356. The standard of France was overthrown, many of her nobility slain, and her king was taken prisoner, and brought to London; see *Tours*, and *Vouglé*.

POISONING. A number of Roman ladies formed a conspiracy and poisoned their husbands. A female slave denounced 170 of them to Fabius Maximus, who ordered them to be publicly executed, 331 B.C. It was said that this was the first public knowledge they had of poisoning at Rome. Poisoning was made petty treason in England, and was punished by boiling to death (of which there are some remarkable instances), 23 Henry VIII. 1531; see *Boiling to death*. The frequency of cases of poisoning by means of arsenic, in England, caused the British legislature to pass a law rendering the sale of arsenic difficult (14 Vict. c. 13, 6 June, 1851). The sale of poison is now regulated by the Pharmacy act of 1868. The

Poisoned Grain Prohibition Act was passed 28 July, 1863.

A deadly poison freely administered by Italians in the seventeenth century, was called *aqua tofana*, from the name of the woman Tofania, who made and sold it in small flat vials. She carried on this traffic for half a century, and eluded the police; but, on being taken, confessed that she had been a party in poisoning 600 people. Numerous persons were implicated by her, and many of them were publicly executed. All Italy was thrown into a ferment, and many fled, and some persons of distinction, on conviction, were strangled in prison. It appeared to have been chiefly used by married women who were tired of their husbands. Four or six drops were a fatal dose; but the effect was not sudden, and therefore not suspected. It was as clear as water, but the chemists have not agreed about its real composition. A proclamation of the pope described it as aquafortis distilled into arsenic, and others considered it as a solution of crystallised arsenic.

Between 1666 and 1676, the marchioness de Brinvilliers poisoned her father and two brothers and many others. She was executed, 16 July, 1676.

W. Palmer was executed in 1856, and Miss M. Smith tried in 1857, for poisoning; see *Trials*. Catherine Wilson, a noted poisoner, was executed on 20 Oct. 1862. Edward William Pritchard, M.D., was executed at Glasgow, 28 July, 1865, for the slow murder of his wife and her mother, by antimony.

Nov. 1858, 17 persons died at Bradford through eating sweetmeats in which arsenic had been mixed by mistake. Mr. Hodgson, a chemist, was tried for homicide, and acquitted.

Weltmann, a bookbinder at Posen, poisoned 4 wives and 2 children, about 1859.

Christiana Edmunds, of Brighton, was convicted of murdering a child by poisoned sweetmeats; other persons barely escaped (sentence remitted on the ground of insanity), 16 Jan. 1872.

Mary Ann Cotton, imprisoned Oct. 1872, suspected of poisoning 16 persons, principally children; convicted of poisoning her child, 7 March; executed at Durham, 24 March, 1873.

Attempted revolution in Austrian Poland,* 22-27 Feb. 1846

* On 22 Feb. 1846, an Austrian force under general Collin, which had entered Cracow on the approach of armed bands of peasantry, was attacked and driven out of the town. A provisional government was then proclaimed by the insurgents, and two days afterwards they crossed the Vistula, expecting to be joined by the peasantry of Gallicia, who were solicited by the nobles and clergy to strike a blow in the cause of liberty. The Austrian government, in order to prevent this junction, excited in the peasantry a suspicion of the motives of the nobles, and offered a reward for every noble, delivered up, alive or dead: a general massacre of the nobility and clergy in the circle of Tarnow followed: the insurgents from Cracow were defeated at Gdow, whence they retreated to Podgorze, a suburb of Cracow; here they were attacked by general Collin, and driven into Cracow on the 27th of February. The forces of the three powers then began to concentrate on Cracow; the people in the town opened negotiations with the Austrians about a surrender, and while these were going on a Russian corps entered the town without resistance, and soon afterwards the revolution was at an end.

POLE STAR or **POLAR STAR,** a star of the second magnitude, the last in the tail of the constellation called the *Little Bear*. As its nearness to the North Pole causes it never to set to those in the northern hemisphere, it is called the seaman's guide. Two stars in the constellation *Ursa Major*, or Great Bear, are called *pointers* to the Polar star. The discovery of the Pole star is ascribed by the Chinese to their emperor, Hong-ti, the grandson (they say) of Noah, who reigned and flourished 1970 B.C. *Univ. Hist.*

POLITICAL ECONOMY, the science which has for its object the improvement of the condition of mankind, and the promotion of civilisation, wealth, and happiness. Its history in this country may be dated from the publication of Dr. Adam Smith's "Wealth of Nations," 1776. The works of Mill and M'Culloch are justly celebrated.

A professorship of Political Economy was established at Oxford by Mr. Henry Drummond, M.P., 1825; and at Cambridge, first by Mr. G. Pryme, in 1828; but regularly established by the university in 1863, Henry Fawcett (blind) being the first professor.

Archbishop Whately endowed a professorship at Trinity College, Dublin; Isaac Butt first professor. 1832

The Political Economy Club, London, founded in 1821, kept the hundredth anniversary of the publication of Smith's "Wealth of Nations," 31 May, 1876

POLITICAL OFFICES PENSIONS ACT passed 9 Aug. 1869.

POLITICAL UNIONS were formed in England in 1831 to carry the Reform Bill; the most important was that of Birmingham.

POLITICIANS. A politician is described as a man well versed in policy, or the well regulating and governing of a state or kingdom; a wise and cunning man. A man of artifice; one of deep contrivance. *South.* The term was first used in France about 1569. A new faction appeared, known by the name of Politicians, headed by the duc d'Alençon and the Montmorencies, and strengthened by the accession of the Huguenots in 1574. The duke was arrested and the Montmorencies sent to the Bastile.

POLKA, a dance introduced into England about 1845.

POLL ACT passed in Ireland by the Junto of the Pale, putting a price upon the heads of certain Irish; the earl of Desmond being then deputy, 5 Edward IV. 1465. This act long endured, see *Ireland,* 1465.

POLLENTIA (Piedmont, N. Italy), the site of a great victory of Stilicho, the Imperial general, over Alaric the Goth, 29 March, 403.

POLL-TAX or **CAPITATION TAX,** existed among the ancient Romans. It was first levied in England in 1380; and occasioned the rebellion of Wat Tyler (see *Tyler*), 1381. It was again levied in 1513. By the 18th Charles II. every subject was assessed by the head, viz., a duke 100*l.*, a marquis 80*l.*, a baronet 30*l.*, a knight 20*l.*, an esquire 10*l.*, and every single private person 12*d.*, 1667. This grievous impost was abolished by William III. 1689.

POLLUTION OF RIVERS, see *Rivers.*

POLO, the game of ball termed hockey played on horseback, became popular in England in 1872, having been introduced into India a few years previously. Games were played by lancers and life-guards at Woolwich, 16, 19 July, 1872. A polo club was formed.

POLOTSK (Russia). The French under marshal Oudinot were here defeated by the Russians under general Wittgenstein, 30 and 31 July, 1812; the next day, the Russians were defeated. After several smaller actions with various results, Polotsk was stormed by the Russians, and retaken Oct. 1812.

POLTOWA, see *Pultowa.*

POLYGAMY, &c., was permitted among the early nations, and now by Mahometans. In Media, it was a reproach to a man to have less than seven wives. Among the Romans, Marc Antony is mentioned as the first who took two wives. The practice was forbidden by Arcadius, 393. The emperor Charles V. punished polygamy with death. In England, by stat. 1 James I. 1603, it was made felony, with benefit of clergy. It was formerly punished with transportation, but now by imprisonment or penal servitude; see *Marriages.* Polygamy exists among the Mormonites (*which see*).—**POLYANDRY** (where one woman has several husbands) is permitted in some eastern countries, the children having equal rights.

POLYGLOT, from two Greek words denoting "many languages," is chiefly applied to editions of the Bible in several languages.

Giustiniani published a polyglot psalter, 1576.

1. The Complutensian Polyglot, in six vols. folio, was printed at Alcala (Complutensis), in Spain, 1502-14; the first edition published in 1522, at the expense of the celebrated cardinal Ximenes, costing 250,000 ducats. Six hundred copies of it were printed; three on vellum. Count MacCarthy, of Toulouse, paid 483*l.* for one of these copies at the Pinelli sale.
2. The Polyglot, printed at Antwerp, by Montanus, 8 vols. folio, in 1559-69, at the expense of Philip II. of Spain.
3. Printed at Paris, by Le Jay, in 10 vols. folio, 1628-45.
4. Edited by Bryan Walton, in 6 vols. folio, 1654-7.

Copies of all four are in the library of the British and Foreign Bible Society.

5. Edited by Dr. Samuel Lee, published by S. Bagster, 1 vol. folio, 1831.
6. Hexaglot bible: begun by Henry Cohn; completed by the Rev. Edwd. R. De Levante and others, 6 vols. 4to., 1874.

POLYNESIA, a name recently given to the isles in the great Pacific Ocean.

POLYPES, also named Hydræ (*many-footed* animals), on account of their property of reproducing themselves when cut in pieces, every part soon becoming a perfect animal; first discovered by Leeuwenhoek, and described by him in the *Philosophical Trans.* 1703. The polypes are of the order Zoophytes, and partake of the animal and vegetable nature.

POLYTECHNIC INSTITUTION, ROYAL, Regent-street, London, was erected by Thompson in 1838, opened 6 Aug. 1839, and enlarged in 1848. It contains a hall of manufactures with machines worked by steam-power, lecture theatres, &c., diving-bell, electric machine, &c. *Timbs.* The institution did not prosper commercially, and its decline was hastened by the fall of a staircase on 3 Jan. 1859, when one person was killed and many injured. The institution was closed in May, 1859, but was re-opened by a new company on 12 Nov. 1860; see *Ecole Polytechnique.* Professor Pepper, the director for many years, resigned in 1872. The classes were formed into a college, which was inaugurated by the earl of Shaftesbury, 7 Oct. 1872.

POMEGRANATE TREE (*Punica Granatum*) was brought to England from Spain before 1584.

POMERANIA, a Prussian province, N. Germany, was held by the Poles, 980, and by Denmark, 1210; made an independent duchy, 1479; and divided between Sweden and Brandenburg, 1648. The Swedish part, awarded to Denmark in 1814, was given up to Prussia for Lauenburg, 1815; see *Denmark.*

POMFRET or **PONTEFRACT** (S. York). At the castle (built 1069), Richard II. was confined and murdered, 10 Feb. 1399. Henry IV., by whom he was deposed, wishing for his death, an assassin, attended by eight followers, rushed into the king's apartment. He wrested a pole-axe from

one of the murderers, and soon laid four of their number dead at his feet, but was at length overpowered and slain. Some writers assert that Richard escaped and died in Scotland. In this castle also, the earl Rivers, lord Grey, sir Thomas Vaughan, and sir Richard Haut or Hause, were put to death by order of the duke of Gloucester, then protector of England (afterwards Richard III.) about 26 June, 1483. The first parliamentary election by ballot took place here, 15 Aug. 1872, very quietly.

POMPEII (S. Italy), an ancient city of Campania, was partly demolished by an earthquake in A.D. 63. It was afterwards rebuilt, but was overwhelmed by an eruption of Vesuvius, accompanied by an earthquake, on the night of 24 Aug. 79. The principal citizens were then assembled at a theatre where public spectacles were exhibited. The ashes buried the whole city and covered the surrounding country. After a lapse of fifteen centuries, a countryman, as he was turning up the ground, found a bronze figure; and this discovery led to further search, which brought numerous other objects to light, and at length the city was uncovered. The part first cleared was supposed to be the main street, 1750. The kings of Naples have greatly aided in exploring Pompeii, and the present Italian government resumed the work in 1863.

POMPEY'S PILLAR stands about three-quarters of a mile from Alexandria, between the city and the lake Mareotis. The shaft is fluted, and the capital ornamented with palm-leaves; the whole, which is highly polished, composed of three pieces, and of the Corinthian order. The column measures, according to some, 94 feet; to others 141, and even 160 feet; but of its origin, name, use, and age, nothing is certain.

It is generally believed that the column has no reference to Pompey, to whom a mark of honour was, nevertheless, set up somewhere about this part. One supposes the edifice was dedicated to Vespasian, another to Severus; and Mr. Clarke, from a half-effaced inscription on the base, considered that Adrian is the person honoured; while many assert, from the same inscription, that it is dedicated "to Diocletian Augustus, most adorable emperor, tutelar deity of Alexandria."

PONDICHERRY (S.E. India), the capital of French India, and first settled by the French in 1674. It was taken from them by the Dutch in 1693, restored 1697; besieged by the English, 1748; taken by them, Jan. 1761; restored, 1763; again taken, Oct. 1778; restored in 1783; taken 23 Aug. 1793, and in 1803; restored, 1815.

PONT-À-CHIN, see *Espierres*.

PONT-À-NOYELLES. At this place, near Amiens, took place a fierce indecisive conflict, lasting from 11 A.M. to 6 P.M., between the Germans under Manteuffel and the French army of the north under Faidherbe, 23 Dec. 1870. Both sides claimed a victory; the French general asserted that he remained master of the field.

PONTEFRACT, see *Pomfret*.

PONTIFFS (Latin *Pontifices*), the highest Roman sacerdotal order, established by Numa. The college first consisted of 4 patricians, with a chief (Pontifex Maximus); to these 4 plebeians were added, by the Ogulnian law, 300 B.C. Sylla increased the number to 15 (8 *majores*, 7 *minores*), (81), and Julius Cæsar to 16. T. Coruncanius, a plebeian, obtained this office, 254 B.C.

PONTUS, in Asia Minor, seems to have been a portion of Cappadocia, and received its name from its vicinity to the *Pontus Euxinus*. Artabazus was made king of Pontus by Darius Hystaspes, B.C. 487. His successors were mere satraps of the kings of Persia.

POOR. The poor of England, till the time of Henry VIII., subsisted as the poor of Ireland until 1838, entirely upon private benevolence. By statute 23 Edw. III. 1349, it was enacted that none should give alms to a beggar able to work. By the common law, the poor were to be sustained by "par-

sons, rectors of the church, and parishioners, so that none should die for default of sustenance;" and by 15 Rich. II. impropriators were obliged to distribute a yearly sum to the poor; but no compulsory law was enacted till the 27th Hen. VIII. 1535. POPE JOAN. It is falsely asserted that, in the 9th century, a female named Joan, having conceived a passion for Felda, a young monk, in order to be admitted into his monastery assumed the male habit, and that on the death of her lover she entered upon the duties of professor, and, being very learned, was elected pope, when Leo IV. died, in 855. Other scandalous particulars follow ; "yet, until the reformation, the tale was repeated and believed without offence." *Gibbon.*

PORCELAIN, see *Pottery*.

PORPHYROGENITUS, "born in the purple," a term applied to emperors of the east, born while their fathers were reigning.

PORT EGMONT, a fine harbour on the N.W. coast of Falkland Islands. Commodore Byron was dispatched to found a colony here in 1765; see *Falkland Islands*.

PORTE, or **SUBLIME PORTE**, official name of the court of the sultan of Turkey. Mostasem, the last of the Abbasside caliphs (1243-58), fixed in the threshold of the principal entrance to his palace at Bagdad a piece of the black stone adored at Mecca, and thus this entrance became the "porte" by eminence, and the title of his court. The sultans, successors of the caliphs, assumed the title. —*Bouillet*.

PORTEOUS MOB. Capt. Porteous, at Edinburgh, on 15 April, 1736, commanded the guard at the execution of Wilson, a smuggler, who had saved the life of a fellow criminal, by springing upon the soldiers around them, and by main force keeping them back, while his companion fled. This excited great commiseration, and the spectators pelted the guard with stones. Fearing a rescue, Porteous ordered his men to fire upon the mob, and seventeen persons were killed or wounded. He was found guilty of murder, 22 June, 1736; but the queen granted him a reprieve (the king being then in Hanover). The people, at night, broke open the prison, took out Porteous, and hanged him on a dyer's sign-post, in the Grass-market, 7 Sept. 1736. None of the rioters was ever detected.

PORTER. Dr. Ashe says that this beverage obtained its appellation on account of its having been drunk by porters in the city of London, about 1730.* The number of licensed brewers in 1850, in England, was 2257; in Scotland, 154; and in Ireland, 96—total, 2507. On 17 Oct. 1814, at Meux's brewhouse two large vats of porter burst, destroying neighbouring houses. Several lives were lost; and the loss was between 8000 and 9000 barrels.

PORT JACKSON (New South Wales), thirteen miles north of Botany Bay, was so named by capt. Cook in 1770; see *Sydney*. Here the duke of Edinburgh was shot by O'Farrell, a Fenian, 12 March, 1868, but soon recovered. The assassin was hanged, 21 April.

PORTLAND ADMINISTRATIONS. The first was the "Coalition ministry," of which

* The malt liquors previously in use were ale, beer, and twopenny, and it was customary to call for a pint or tankard of half-and-half,—*i.e.*, half of ale, and half of beer. In the course of time it also became the practice to ask for a pint of three-thirds, meaning a third of ale, beer, and twopenny. To avoid trouble, Harwood, a brewer, made a liquor which partook of the united flavours of ale, beer, and twopenny, calling it entire, or entire butt beer, meaning that it was drawn entirely from one cask or butt. Being relished by porters and other working people, it obtained its name of porter, and was first retailed at the "Blue Last," Curtain-road. —*Leigh*.

William Henry Cavendish, duke of Portland,* as first lord of the treasury, was the head. It obtained the name of the "Coalition" ministry, and included lord North with Mr. Fox, formerly inveterate opponents. Formed 5 April, 1783; dissolved by Mr. Pitt's coming into power, Dec. same year.

PORTLAND ISLE (off Dorset), the English Gibraltar. Fortified before 1142. Portland castle was built by Henry VIII. about 1536. Off this peninsula a naval engagement commenced between the English and Dutch, 18 Feb. 1653, which continued for three days. The English destroyed eleven Dutch men-of-war and thirty merchantmen. Van Tromp was admiral of the Dutch, and Blake of the English.—Here is found the noted freestone used for building our finest edifices. The Portland lights were erected 1716 and in 1789. The pier, with nearly half a mile square of land, was washed into the sea in Feb. 1792. Prince Albert laid the first stone of the Portland breakwater, 25 July, 1849, and the last stone was laid by the prince of Wales, 10 Aug. 1872. Mr. James Rendel, the first chief engineer, was succeeded on his death in 1856 by Mr. (aft. sir) John Coode. The breakwater and other harbour works cost 1,033,600*l.* exclusive of convict labour. The Portland prison was established in 1848. A mutiny among the convicts here in Sept. 1858, was promptly suppressed.

PORTLAND or BARBERINI VASE. This beautiful specimen of Greek art (composed of a glass-like substance, with figures and devices raised on it on white enamel; height 10 inches; diameter in the broadest part, 7; with a handle on each side) was discovered about the middle of the 16th century, in a marble sarcophagus in a sepulchre at a place called Monte del Grano, about 2½ miles from Rome. The sepulchre was supposed to have been that of the Roman emperor, Alexander Severus (*222-235*), and his mother Mammæa, and the vase is supposed to have been the cinerary urn of one of these royal personages. It was placed in the palace of the Barberini family, at Rome, where it remained till 1770, when it was purchased by sir William Hamilton, from whose possession it passed to that of the duchess of Portland, 1787: at the sale of her effects, it is said to have been bought by the then duke of Portland, who, in 1810, deposited it (on loan) in the British Museum. On 7 Feb. 1845, this vase was smashed to pieces with a stone by a man named William Lloyd; it has been skilfully repaired, but is not now shown to the public. Josiah Wedgwood made a mould of it, and took a number of casts.

PORT MAHON, see *Minorca.*

PORTO BELLO (S. America), discovered by Columbus, 2 Nov. 1502, was taken by Morgan the Buccaneer in 1668; by the British under admiral Vernon, from the Spaniards, 21 Nov. 1739, and the fortifications destroyed. Before the abolition of the trade by the galleons, in 1748, it was the great mart for the rich commerce of Peru and Chili.

PORTO FERRAJO, capital of Elba (*which see*); built and fortified by Cosmo I. duke of Florence, in 1548. The fortifications were not finished till 1628, when Cosmo II. completed them with great magnificence; see *France.*

PORTO NOVO (S. India). Here sir Eyre Coote, with about 9500 men and 55 light field-pieces, skilfully defeated Hyder Ali, ruler of the Carnatic, with 80,000 men and some heavy cannon, 1 July, 1781. Hyder lost about 10,000, the British 587 killed and wounded.

PORT ROYAL (N. America), capital of the French colony, Acadie, founded in 1604; after having been taken and restored several times, it was finally acquired by the British in 1710, and named Annapolis.

PORT ROYAL (Jamaica), once a considerable town, was destroyed by earthquakes in 1602 and 1692; laid in ashes by fire in 1702: reduced to ruins by an inundation of the sea in 1722; and destroyed by a hurricane in 1774. After these calamities, the custom-house and public offices were removed to Kingston. Port Royal was again greatly damaged by fire in 1750; by another awful storm in 1784; and by a devastating fire in July, 1815; in 1850 it suffered by cholera.

PORT ROYAL DES CHAMPS (near Paris) was a French Cistercian convent, founded by Odo, bishop of Paris, at the wish of king Philip Augustus, 1204. Having fallen into decay, it was revived and reformed in 1608 by Angelica Arnauld. In 1625 the increased community removed to Paris. The Port Royal des Champs, in 1656, became the retreat of the Arnaulds, Tillemont, Pascal, Lancelot, and other eminent Jansenists, who devoted themselves to education, and produced the Port Royal grammars, logic, and other works. This institution was condemned by the pope in 1709, and the buildings were pulled down, and tombs desecrated, by the order of Louis XIV., in 1710. The Port Royal at Paris was suppressed, with other monasteries, in 1790.

PORTSMOUTH (Hampshire), the most considerable haven for men-of-war, and most strongly fortified place in England. The dock, arsenal, and storehouses were established in the reign of Henry VIII. Population in 1851, 72,096; in 1861, 94,799; in 1871, 112,954.

PORTUGAL, the ancient Lusitania. The present name is derived from Porto Callo, the original appellation of Oporto. After a nine years' struggle, under Viriathes, a brave able leader, the Lusitanians submitted to the Roman arms about 137 B.C. Portugal underwent the same changes as Spain on the fall of the Roman empire. There are in Portugal two universities, that of Coimbra, founded in 1308, and the smaller one of Evora, founded in 1533. Lisbon has also its royal academy, and the small town of Thomar has an academy of sciences; but, in general, literature is at a low ebb in Portugal. The poet Camoens, called the Virgil of his country, and author of the *Lusiad* (1569), translated into English by Mickle, was a native of Lisbon. Population of the kingdom and colonies, 31 Dec. 1863, 8,037,194; in 1872, kingdom on the continent, with Madeira and Azores, 4,390,589; colonies, 3,258,140. The constitution granted in 1826, was revised in 1852.

POSITIVE PHILOSOPHY set forth by Auguste Comte, an eminent mathematician, born about 1795; died at Paris, 1852. M. P. Emile Littré, the great French philologist, ardently embraced the system, and published "De la Philosophie Positive," in 1845.

It professes to base itself wholly on positive facts or observed phenomena, and rejects all metaphysical conceptions, which it considers negatives, having nothing real or true in them; and dispenses with the science of mind. It sets aside theology and metaphysics as two merely preliminary stages in life; and abandons all search after causes and essences of things, and restricts itself to the observation and classification of phenomena and the discovery of their laws. Comte asserted that Europe had now arrived at the third stage of its progress. He aimed at being the founder of a new religion as well as a new philosophy, "the religion of humanity."

POSTS, said to have originated in the regular couriers established by Cyrus, who erected post-houses throughout the kingdom of Persia, about 550 B.C. Augustus was the first who introduced this institution among the Romans, 31 B.C. This was imitated by Charlemagne about A.D. 800. *Ashe.* Louis XI. first established post-houses in France owing to his eagerness for news, and they were the first institution of this nature in Europe, 1470. *Hénault.* An international commission respecting postal arrangements met at Paris, 11 May, and broke up 9 June, 1863.

POST-OFFICE OF ENGLAND. In England, in the reign of Edward IV. 1481, riders on post-horses went stages of the distance of twenty miles from each other, in order to procure the king the earliest intelligence of the events that passed in the course of the war that had arisen with the Scots. *Gale.* Richard III. improved the system of couriers in 1483. In 1543 similar arrangements existed in England. *Sadler's Letters.* Post communications between London and most towns of England, Scotland, and Ireland, existed in 1635. *Strype.*

The alkalis and earths had been previously regarded as simple substances. Potassium ignites on contact with moisture.

POTATOES, natives of Chili and Peru, generally considered to have been brought to England from Santa Fé, in America, by sir John Hawkins, 1565. Others ascribe their introduction to sir Francis Drake, in 1586; their general introduction, 1592. Their first culture in Ireland is referred to sir Walter Raleigh, who had large estates in that country, about Youghal, in the county of Cork. It is said that potatoes were not known in Flanders until 1620. A fine kind of potato was first brought from America by Mr. Howard, who cultivated it at Cardington, near Bedford, 1765; and its culture became general soon after. The *failure of the potato crop* in Ireland, several years, especially in 1846, caused famine, to which succeeded pestilent disease of which multitudes died; among them many priests and physicians. Parliament voted ten millions sterling; and several countries of Europe, and the United States of America, forwarded provisions and other succours; see *Ireland*. In 1868 it was reported that in England and Wales 500,000 acres, and in Ireland 1,000,000 acres, were under cultivation for potatoes. Potato disease prevailed greatly in England, autumn of 1872. In consequence the value of potatoes imported in 1872 was 1,654,240*l.*; in 1871, only 225,732*l.* Alarm respecting the American potato beetle or bug, autumn, 1876.

POTTERY AND PORCELAIN. (ch. xviii.) Earthenware was made by the ancient Egyptians, Assyrians, Greeks, Etruscans, and Romans.

The act was repealed, together with the English Declaratory act of the 6th of Geo. I. and other obnoxious Irish statutes, April, 1782.

PRÆMONSTRATENSIAN ORDER, or **WHITE CANONS**, founded in 1120 by Norbert, a monk, at Pré Montré, near Laon. Its first house in England was founded by Peter de Gousla or Gousel, at Newsham, in Lincolnshire, 1143—*Tanner*; according to others in 1146. The order spread widely through England soon after. The house at Newsham was dedicated to St. Mary and St. Martial. *Lewis*.

PRÆMUNIRE, LAW OF. This law (which obtained its name from the first two words "*Præmoneri*," or "*Præmuniri facias*," "Cause to be forewarned," which is applied to any offence in the way of contempt of the sovereign or his government) derived its origin from the aggressive power of the pope in England. The offence introduced a foreign power into the land, and created an *imperium in imperio*. The first statute of Præmunire was enacted 35 Edward I. 1306. *Coke*. The pope bestowed most of the bishoprics, abbeys, &c., before they were void, upon favourites, on pretence of providing the church with better qualified successors before the vacancies occurred. To put a stop to these encroachments, Edward III. enacted a statute in 1353. The statute commonly referred to as the statute of Præmunire is the 16th of Richard II. 1392. Several similar enactments followed. The assertion that parliament is independent of the sovereign was declared a *præmunire*, 1661.

PRÆTORIAN GUARDS, instituted by the emperor Augustus (13 B.C.); their numbers enlarged by Tiberius, Vitellius, and their successors. At first supporters of the imperial tyrants, they eventually became their masters, actually putting up the diadem for sale (as in March, 193 A.D.), when it was bought by Didius Julianus). They committed many atrocities, and were finally disbanded by Constantine in 312.

PRÆTORS, Roman magistrates. In 365 B.C., one prætor was appointed; a second appointed in 252 B.C. The *prætor urbanus* administered justice to the citizens, and the *prætor peregrinus* acted in causes relating to foreigners. In 227 B.C. two more prætors were created to assist the consul in the government of Sicily and Sardinia, lately conquered; and two more when Spain was made a Roman province, 197 B.C. Sylla, the dictator, added two, and Julius Cæsar increased the number to 10, which afterwards became 16. After this, their number fluctuated, being sometimes 18, 16, or 12; till, in the decline of the empire, their dignity decreased, and their numbers were reduced to three.

PRAYER-BOOK, see *Common Prayer*.

PRAYERS. "Then began men to call upon the name of the Lord" (*Gen.* iv. 26), 3875 B.C. The mode of praying with the face to the east was instituted by pope Boniface II. A.D. 532. Prayers for the dead, first introduced into the Christian

church about 190, are now advocated by ministers of the English church, 1872. Prayers addressed to the Virgin Mary and to the saints are said to have been introduced by pope Gregory, 593. See *Liturgies.*

PREBENDARY, a clergyman attached to a cathedral or collegiate church, who receives an income termed *prebenda* for officiating at stated times. The office slightly differs from that of a canon.

PRECEDENCE was established in very early ages, and was amongst the laws of Justinian. In England the order of precedency was regulated chiefly by two statutes, 31 Hen. VIII. 1539, and 1 Geo. I. 1714.

PREDESTINATION (*Ephes.* i.). The doctrine concerning this is defined in the seventeenth article of the Church of England (*Ephes.* i. and *Romans* ix.). It was maintained by St. Augustin, and opposed by Pelagius, in the early part of the 5th century. In later times it has been maintained by the Augustinians, Jansenists, the church of Scotland, and many dissenters (termed Calvinistic), and opposed by the Dominicans, Jesuits, and dissenters (termed Arminian), especially by the Wesleyan methodists.

PREHISTORIC ARCHÆOLOGY began in Sweden, and first systematised by Mr. Nillson. Daniel Wilson's "Archæology and Pre-historic Annals of Scotland," published 1851. An international congress for treating prehistorical subjects met at Neuchâtel in 1866, and at Paris in 1867. At the third meeting at Norwich, Aug. 1868, it assumed the name of "International Congress for Prehistoric Archæology," and published its transactions in 1869. A meeting was held at Stockholm 7-14 Aug. 1874. See *Barrows*, and *Man.*

PRE-RAPHAELITE SCHOOL, a name given about 1850, to J. E. Millais, Wm. Holman Hunt, D. G. Rossetti, and other artists, who opposed the routine conventionality of academic teaching, and resolved to study nature as it appeared to them, and not as it appeared in the antique. For a short time they published "The Germ, or Art and Poetry," beginning in 1850. Their works have been much criticised, but their influence has been beneficial. Their principles are much advocated by the great art-critic, John Ruskin.

PREROGATIVE COURT, in which formerly all wills were proved, and all administrations taken, which belonged to the archbishop of Canterbury by his prerogative, a judge being appointed by him to decide disputes. Appeals from this court, previously to the pope, were commanded to be made to the king in chancery, 1533; to the privy council in 1830-2. This court was abolished, and the *Probate Court* established in 1857. Sir John Dodson, the last judge, died in 1858.

PREROGATIVE ROYAL. In England the sovereign is the supreme magistrate, and it is a maxim that he *can do no wrong.* He is the head of the established church, of the army and navy, and the fountain of office, honour, and privilege, but is subject to the laws, unless exempted by name. The royal prerogatives were greatly exceeded by several despotic sovereigns, such as Elizabeth, James I., and Charles I. Elizabeth used the phrase "We, of our Royal prerogative, which we will not have argued or brought in question" (1591). James I. told his parliament "that as it was blasphemy to question what the Almighty could do of His power, so it was sedition to inquire what a king could do by virtue of his prerogative." These extreme doctrines were nullified by the revolution of 1688, and the exercise of the prerogative is now virtually subject to parliament; see *Lords.*

PRESBURG, the ancient capital of Hungary, where the diets were held and the kings crowned. On 26 Dec. 1805, a treaty was signed between France and Austria, by which the ancient states of Venice were ceded to Italy; the principality of Eichstadt, part of the bishopric of Passau, the city of Augsburg, the Tyrol, all the possessions of Austria in Suabia, in Brisgau, and Ortenau, were transferred to the elector of Bavaria, and the duke of Würtemberg, who, as well as the duke of Baden, were then created kings by Napoleon. The independence of the Helvetic republic was also stipulated.

PRESBYTERIANS are so called from their maintaining that the government of the church appointed in the New Testament was by presbyteries, or association of ministers and ruling elders, equal in power, office, and in order. "The elders (Greek, *presbyterous*) I exhort, who am also an elder (*sympresbyteros*)." 1 Peter v. 1. Presbyterianism was accepted by parliament in place of episcopacy in England in 1648, but set aside at the restoration in 1660. It became the established form of church government in Scotland in 1696. Its tenets were embodied in the formulary of faith said to have been composed by John Knox, in 1560, which was approved by the parliament, and ratified, 1567, and finally settled by an act of the Scottish senate, 1696, afterwards secured by the treaty of union with England in 1707. The first Presbyterian meeting-house in England was established at Wandsworth, Surrey, 20 Nov. 1572.

On 17 Nov. 1838, the Canadian rebels were attacked by the British under major Young, and (on the 18th) by lieut.-colonel Dundas, who dispersed the insurgents, several of whom were killed, and many taken prisoners, and the remainder surrendered. The troops also suffered considerably.

PRESS, LIBERTY OF THE. The *imprimatur* "let it be printed" was much used on the title-pages of books printed in the sixteenth and seventeenth centuries. The liberty of the press was severely restrained, and the number of master-printers in London and Westminster limited by the Star Chamber, 13 Charles I., July 1, 1637.

"Disorders in printing" were repressed by the parliament in 1643 and 1649, and by Charles II. . 1662

PRESTON (Lancashire). Near here Cromwell totally defeated the royalists under sir Marmaduke Langdale, 17 Aug. 1648. Preston was taken in 1715 by the Scotch insurgents, under Forster, who proclaimed king *James VII.* They were defeated in a battle on 12, 13 Nov. by generals Willes and Carpenter, who with the royal army invested Preston on all sides. The Scots laid down their arms, and their nobles and leaders were secured; some were shot as deserters, and others sent to London pinioned and bound together, to intimidate their party.—The stoppage of the cotton manufacture in 1861 and 1862, through the civil war in America, occasioned great suffering in Preston.

"*The Preston guild festival*," said to have been instituted in Saxon times, and to have been kept once in 20 years regularly since 1562, was duly celebrated in . . . . . Sept. 1862

On 15 Oct. the masters, in consequence, closed forty-nine mills, and 20,000 persons were thrown out of employment, who were mostly maintained for a long time by subscriptions from their fellows. In the week ending 17 Dec. 14,972 were relieved, at the cost of 2820*l.* 8s. The committee of workmen addressed lord Palmerston, 15 Nov., who gave them his advice . . . . . 24 Dec. 1853

The OLD PRETENDER, James Francis Edward Stuart, Chevalier de St. George, born 10 June, 1688, was acknowledged by Louis XIV. as James III. of England, in 1701.

He continued wandering among the wilds of Scotland for nearly six months; and as 30,000*l.* were offered for taking him, he was constantly pursued by the British troops, often hemmed round by his enemies, but still rescued by some lucky accident, and at length escaped from the isle of Uist to Morlaix in Sept. He died . 31 Jan. 1788
His natural daughter assumed the title of duchess of Albany; died in 1789
His brother, the cardinal York, calling himself Henry IX. of England, born March, 1725; died at Rome in . . . . . Aug. 1807

PRIDE'S PURGE. On the 6th Dec. 1648, colonel Pride, with two regiments, surrounded the house of parliament, and seizing in the passage forty-one members of the Presbyterian party, sent them to a low room, then called *hell*. Above 160 other members were excluded, and none admitted but the most furious of the Independents. The privileged members were named the *Rump parliament*, which was dismissed by Cromwell, 20 April, 1653.

PRIENE, one of the twelve cities of the Ionian league in Asia Minor. The temple of Minerva Polias, founded here by Alexander the Great, and the work of Pythios, was excavated by Mr. R. P. Pullan, for the Dilettanti Society, in 1868-9.

PRIEST (derived from *presbyteros*, elder), in the English church the minister who presides over the public worship. In *Gen.* xiv. 18, Melchizedek king of Salem is termed "priest of the most high God." (1913 B.C.; see *Hebrews* vii.) The Greek *hiereus*, like the Jewish priest, had a sacrificial character, which idea of the priesthood is still maintained by the Romanists and those who favour their views. Among the Jews, the priests assumed their office at the age of thirty years. The dignity of high or chief priest was fixed in Aaron's family, 1491 B.C. After the captivity of Babylon, the civil government and the crown were superadded to the high priesthood; it was the peculiar privilege of the high priest, that he could be prosecuted in no court but that of the great Sanhedrim. The heathens had their arch-flamen or high priest, resembling the Christian archbishop.

PRIMER. A book so named from the Romish book of devotions, and formerly set forth or published by authority, as the first book children should publicly learn or read in schools, containing prayers and portions of the scripture. Primers were printed 1535, 1539. Henry VIII. issued a prayer-

book called a "primer" in 1546. The three were published by Dr. Burton in 1834.

PRIMITIVE CULTURE, see *Civilisation*.

PRIMOGENITURE, RIGHT OF. A usage brought down from the earliest times. The first-born in the patriarchal ages had a superiority over his brethren, and in the absence of his father was priest to the family. In some parts of England, by the ancient customs of gavel-kind and borough-English, primogeniture was superseded. It came in with the feudal law, 3 Will. I. 1068. The rights of primogeniture abolished in France, 1790.

PRINTING. Block printing invented by the Chinese about 593 A.D., moveable types made in the 10th century. The honour of first printing with single types in Europe has been appropriated to Mentz, Strasburg, Haarlem, Venice, Rome, Florence, Basle, and Augsburg; but the names of the three first only are entitled to attention; see *Press*.

Adrian Junius awards the honour of the invention to Laurenzes John Koster, of Haarlem, "who printed with blocks, a book of images and letters, *Speculum Humanæ Salvationis*, and compounded an ink more viscous and tenacious than common ink, which blotted . . . . about 1438"

[The leaves of this book, being printed on one side only, were afterwards pasted together.]

[In 1859, Mr. Samuel Leigh Sotheby issued an elaborate work compiled by his father and himself, entitled "*Principia Typographica*," containing fac-similes, &c., of the block-books of the 15th century; and Mr. J. Russell Smith published a fac-simile of the *Biblia Pauperum*, a very early block-book.]

PRINTING-MACHINES.—William Nicholson, editor of the *Philosophical Journal,* first projected (1790-1), but Mr. König first contrived and constructed a working printing machine, which began with producing the *Times* of 28 Nov. 1814, a memorable day in the annals of typography.

In 1818, Mr. E. Cowper patented improvements.*

König's machine printed 1800 an hour on one side; Cowper's improvements increased this number to 4200. This was raised to 15,000, by Mr. Applegath's machine, which printed the *Times.*

Hoe's American machine, introduced into London 1858, prints 20,000 an hour.

Marinoni's machine at Paris said to print 36,000 an hour; Dec. 1868.

Walter press, invented for the *Times* by J. C. Macdonald and Mr. Calverley, between 1862-9, prints about 17,000 an hour *perfected;* 1872.

American Campbell press said to print 50,000 sheets perfected in an hour, Feb. 1876.

PRINTING IN COLOURS was first commenced by the employment of several blocks, to imitate the initial letters in MSS. (for instance, the Mentz Psalter of Fust, 1455, which has a letter in three colours). Imitations of chiaroscuro soon followed ("Repose in Egypt," engraving on wood after Louis Cranach, in 1519, in Germany: others by Ugo da Carpi, in Italy, 1518).

J. B. Jackson (1720-54) attempted, without success, to imitate water-colour drawings, and to print paper-hangings.

About 1783, John Skippe, an amateur, printed some chiaroscuros.

In 1819-22, Mr. William Savage produced his remarkable work, "Hints on Colour Printing," illustrated by imitations of chiaroscuro, and of coloured drawings, giving details of the processes employed.

In 1836, Mr. George Baxter produced beautiful specimens of Picture-Printing, and took out a patent, which expired in 1855. In some of the illustrations to the "Pictorial Album" (1836), he employed twenty different blocks.

It has been applied to Lithography (hence Chromolithography).

In 1849, Mr. G. C. Leighton produced imitations of water-colour-drawings, by means of modifications and improvements of Savage's processes. In 1851 he commenced colour-printing by machinery, and has since availed himself of aqua-tinted plates, and also of electrotyped silver and copper surfaces to obtain purity of colour as well as durability.

The large coloured prints of *The Illustrated London News* were first issued in Dec. 1856.

PRIORIES, at first dependent on the great abbeys, are mentioned in 722 in England; see *Abbeys,* and *Monasteries. Alien priories* were seized by the king (Edward I.) in 1285, and in succeeding reigns on the breaking out of war with France; but were usually restored on the conclusion of peace. PRISONERS OF WAR, among the ancient nations, when spared, were usually enslaved. About the 13th century, civilized nations began to exchange their prisoners.

The Spanish, French, and American prisoners of war in England were 12,000 in number, 30 Sept. 1779

The number exchanged by cartel with France, from the commencement of the then war, was 44,000 June, 1781

PRIVATEER, a ship belonging to private individuals, sailing with a licence (termed a *Letter of Marque*), granted by a government in time of war, to seize and plunder the ships of the enemy. The practice, said to have been adopted by Edward I. against the Portuguese in 1295, was general during the war between Spain and the Netherlands in the 17th century, and during the last French war. Privateering was abolished by the great sovereigns of Europe by treaty, 30 March, 1856. The United States government refused to agree unless the right of blockade was also given up. The British government declined this, asserting "that the system of commercial blockade was essential to its naval supremacy." On 17 April, 1861, Jefferson Davis, president of the southern confederacy, announced his intention of issuing letters of marque, and on the 19th president Lincoln proclaimed that all southern privateers should be treated as pirates. This decree was not carried out; see *United States*. All the great powers forbade privateering during the American civil war (*which see*). By the treaty of Washington privateering was prohibited.

* John Howard was born 2 Sept. *1726*; made sheriff of Bedford, 1773; investigated into the state of English prisons, 1773-5; and gave evidence thereon before the house of commons, which led to amendments by law, 1774; he visited prisons all over the continent, and died at Kherson, 20 Jan. 1790.

PRIVILEGED PLACES, see *Asylums.*

PRIVY COUNCIL. A council was instituted by Alfred, 895. The number of the council was about twelve when it discharged the functions of state, now confined to the members of the cabinet; but it had become of unwieldy amount before 1679, in which year it was remodelled upon sir William Temple's plan, and reduced to thirty members: Anthony Ashley, earl of Shaftesbury, being president. The number is now unlimited. To attempt the life of a privy-councillor in the execution of his office was made capital, occasioned by Guiscard's stabbing Mr. Harley while the latter was examining him on a charge of high treason, 9 Anne, 1711.

JUDICIAL COMMITTEE OF THE PRIVY COUNCIL.—In lieu of the Court of Delegates, for appeals from the lord chancellors of Great Britain and of Ireland in cases of lunacy—from the Ecclesiastical and Admiralty Courts of England, and the Vice-Admiralty courts abroad—from the Warden of the Stannaries, the courts of the Isle of Man, and other islands, and the Colonial courts, &c.,—fixed by statute 3 & 4 Will. IV., *c.* 41, 1833; amended by other acts in 1844, 1851, 1852.

JUDGES.—The lord president, lord chancellor, master of the rolls, vice-chancellor, lords justices in appeal, lord chief justice of the queen's bench and common pleas, lord chief baron, judges of the courts of bankruptcy, probate, and admiralty, and others appointed by the queen. In consequence of the increase of business and consequent delay, the queen was empowered to appoint four new judicial members of the committee, by 34 & 35 Vict. *c.* 91 (21 Aug. 1871). The attorney-general, sir R. Collier, was made a judge of the Common Pleas, 7 Nov., and a member of the judicial committee 22 Nov. 1871.

These proceedings were considered contrary to the spirit of the act by several judges and the legal profession generally. A vote of censure on the Gladstone ministry was negatived in the house of lords (89-87), 15 Feb.; in the commons (268-241), 19 Feb. 1872.

PRIVY SEAL, THE LORD, the fifth great officer of state, has the custody of the privy seal, which he must not put to any grant, without good warrant under the king's signet. This seal is used by the king to all charters, grants, and pardons, signed by him before they come to the great seal. Richard Fox, bishop of Winchester, held this office in the reign of Henry VIII. previously to 1523, when Cuthbert Tunstall, bishop of London, was appointed. The privy seal has been on some occasions in commission. *Beatson.* See under *Liverpool, Canning, Wellington,* and succeeding *Administrations.*

PRIZE-FIGHTING, see *Boxing.*

PRIZE MONEY, arising from captures made from the enemy, was decreed by government to be divided into eight equal parts, and distributed by order of ranks, 17 April, 1793. The distribution of army prize-money is regulated by an act passed in 1832. Naval prize-money is now regulated by royal proclamation; the last, 19 May, 1866.

PROBABILITY, THEORY OF (termed by Butler, "The Guide of Life"; by Laplace, good sense reduced to calculation), was originated by Pascal, and taken up by Fermat, in their correspondence in 1654.

Its object is "the determination of the number of ways in which an event may happen or fail, in order that we may judge whether the chances of its happening or failing are greater." *Jevons.*

It has been treated upon by the most eminent mathematicians, viz., the Bernouillis, De Moivre, D'Alembert, Euler, Lagrange, Laplace, and Quetelet.

Isaac Todhunter's copious "History of Probability," published 1865.

PROBATE COURT, established in Aug. 1857 by 20 & 21 Vict. c. 77, which abolished all powers exercised by the ecclesiastical courts in the granting of probates of wills, &c.; see *Prerogative Court*. The first judge appointed, 5 Jan. 1858, was sir Cresswell Cresswell, who took his seat on 12 Jan. On his death, sir James P. Wilde was appointed judge, 28 Aug. 1863; see *Supreme Court*. *Probate* is the exhibiting and proving a will before the proper authority.

PROCLAMATIONS, ROYAL, "have only a binding force when grounded upon and to enforce the laws of the realm." *Coke*. Henry VIII., in 1539, declared that they were as valid as acts of parliament. This was annulled, 1547.

PROFILES. The first profile taken, as recorded, was that of Antigonus, who, having but one eye, his likeness was so taken, 330 B.C. *Ashe*. "Until the end of the 3rd century, I have not seen a Roman emperor with a full face; they were always painted or appeared in profile, which gives us the view of a head in a very majestic manner." *Addison*.

PROGRESISTAS, a political party in Spain, headed by Espartero, duke of Victory, and latterly by general Prim. Since 1865 they adopted a policy of inaction in public affairs; by uniting with the unionists and republicans in Sept. 1868, the government were overthrown, see *Spain*.

PROTECTIONISTS, that section of the conservative party which opposed the repeal of the corn laws, and which separated from sir Robert Peel in 1846. The name was derived from a "Society for the *Protection* of Agriculture," of which the duke of Richmond was chairman, and which had been established to counteract the efforts of the Anti-Corn Law League, 17 Feb. 1844. Lord George Bentinck was the head of the party from 1846 till his death, 21 Sept. 1848. PROTESTANTS. The emperor Charles V. called a diet at Spires in 1529, to request aid from the German princes against the Turks, and to devise means for allaying the religious disputes which then raged owing to Luther's opposition to the Roman catholic clergy. Against a decree of this diet, to support the doctrines of the church of Rome, six Lutheran princes, with the deputies of thirteen imperial towns, formally and solemnly *protested*, 19 April, 1529. Hence the term protestants was given to the followers of Luther; it afterwards included Calvinists, and other sects separated from the see of Rome. The six protesting princes were: John, elector of Saxony, George, margrave of Brandenburg; Ernest and Francis, the dukes of Lunenburg; the landgrave of Hesse; and the prince of Anhalt; these were joined by the citizens of Strasburg, Nuremberg, Ulm, Constance, Heilbron, and seven other cities; see *Lutheranism*, *Calvinism*, *Huguenots*, *Germany*, *Church of England*, &c.

PROXIES. Voting by proxy, an ancient privilege of the house of peers, was very frequently abused. In the reign of Charles II., when the duke of Buckingham sometimes brought 20 proxies in his pocket, it was ordered that no peer should bring more than two proxies. From 1830 to 1867, both inclusive, proxies were only called 73 times. In conformity with the recommendation of a committee, a new "standing order" was adopted, 31 March, 1868, by which it was ordered "That the practice of calling for proxies on a division shall be discontinued."

PRUSSIA. This country was anciently possessed by the Venedi, about 320 B.C. They were conquered by the Borussi, who inhabited the Riphæan mountains; and from these the country was called Borussia. Some historians derive the name from *Po*, signifying near, and *Russia*. The Porussi

PUBLIC SAFETY, COMMITTEE OF, was established at Paris during the French Revolution on 6 April, 1793, with absolute power, in consequence of the coalition against France. The severe government of this committee is termed the Reign of Terror, which ended with the execution of Robespierre and his associates, 28 July, 1794. A similar committee was established at Paris by the communists, March-May, 1871.

PULLEY, vice, and other mechanical instruments, are said to have been invented by Archytas of Tarentum, about 400 B.C., or by Archimedes, 287-212. In a single movable pulley the power gained is doubled: in a continued combination the power is equal to the number of pulleys, less one, doubled.

PULLMAN CARS, see under *Railways.*

PULTOWA (Russia), where Charles XII. of Sweden was entirely defeated by Peter the Great of Russia, 8 July, 1709. He fled to Bender, in Turkey.

PULTUSK (Russia), where a battle was fought between the Saxons, under their king Augustus, and the Swedes, under Charles XII., in which the former were signally defeated, 1 May, 1703. Here also the French under Napoleon fought the Russian and Prussian armies: both sides claimed the victory, but it inclined in favour of the French, 26 Dec. 1806.

PUMPS. Ctesibius of Alexandria is said to have invented pumps (with other hydraulic instruments), about 224 B.C., although the invention is ascribed to Danaus, at Lindus, 1485 B.C. Pumps were in general use in England, A.D. 1425. An inscription on the pump in front of the late Royal Exchange, London, stated that the well was sunk in 1282. The air-pump was invented by Otto Guericke in 1654, and improved by Boyle in 1657; see *Air* and *Wells.*

PUNCH, the puppet show, borrowed from the Italian Polichinello, is descended from a character well known in the theatres of ancient Rome. *Fosbroke.* The satirical weekly publication, *Punch, or the London Charivari,* was established by Henry Mayhew, Mark Lemon, Douglas Jerrold, Gilbert a Becket, and others: first published 17 July, 1841. Mark Lemon, the first editor, died 23 May, 1870. See *Caricatures.*

PUNCTUATION. The ancients do not appear to have had any system. The period (.) is the most ancient; the colon (:) was introduced about 1485; the comma (,) was first seen about 1521, and the semicolon (;) about 1570. In sir Philip Sidney's "Arcadia" (1587), they all appear, as well as the note of interrogation (?), asterisk (*), and parentheses ().

PUNJAB (N. W. Hindostan) was traversed by Alexander the Great, 327 B.C.; by Tamerlane, A.D. 1398; by Mahmoud of Ghizni, about 1000. It was an independent state under Runjeet Sing, 1791-1839. Our wars with the Sikhs began here, 14 Dec. 1845, and were closed on 29 March, 1849, when the Punjab was annexed; see *India.* The Punjab has since greatly flourished, and on 1 Jan. 1859, was made a distinct presidency (to include the Sutlej states and the Delhi territory); see *Durbar.*

PUPPETS (Italian, *puppi;* French, *marionnettes*), of which the eyes, arms, &c., were moved by strings, were used by the ancients, and are mentioned by Xenophon, Horace, and others. Skilful theatrical performances with puppets have been several times exhibited in London (at the Adelaide gallery, 1852). A performance with puppets as large as life, began at St. James's-hall, July, 1872. M. Ch. Magnin published a "*Histoire des Marionnettes,*" 1852.

PURCHASE SYSTEM in the army. The payment of a present or gratuity for a commission was prohibited by William III., 1693; but in 1702 purchase was legally re-organised. In 1711 the sale of commissions was forbidden without the royal permission; in 1719-20 regulations were issued, and a fixed scale of prices was adopted in consequence of a commission in 1765. Large over-regulation payments continued to be paid. Commissions of inquiry were held frequently since 1858; and in 1871 the system was abolished, with compensation, by royal warrant, 20 July, 1871, the bill for the purpose having been rejected by the house of lords for amounts paid, see *Army,* p. 45.

PURGATIVES of the mild species (aperients), particularly cassia, manna, and senna, are ascribed to Actuarius, a Greek physician, 1245.

PURGATORY, the middle place between heaven and hell, where, it is believed by the Roman catholics, the soul passes through the fire of purification before it enters the kingdom of God. The doctrine was known about 250; was introduced into the Roman church in the 5th century, and made a religious dogma by Gregory I., 590-604. It was first set forth by a council at Florence, 1439; enforced by the council of Trent, Dec. 1563; see *Indulgences.*

PURIFICATION, after childbirth, was ordained by the Jewish law, 1490 B.C. (*Lev.* xii.); see *Churching.* The feast of the purification was instituted, 542, in honour of the Virgin Mary's going to the temple. (*Luke* ii.) Pope Sergius I. ordered the procession with wax tapers, whence Candlemas-day.

PURITANS, the name, first given, it is said, about 1564, to persons who aimed at greater purity of doctrine, holiness of living, and stricter discipline than others. They withdrew from the established church, professing to follow the word of God alone, and maintaining that the church retained many human inventions and popish superstitions; see *Cathari*, *Nonconformists*, and *Presbyterianism*.

PURPLE, a mixed tinge of scarlet and blue, discovered at Tyre. It is said to have been found by a dog's having by chance eaten a shell fish, called *murex* or *purpura;* upon returning to his master, Hercules Tyrius, he observed his lips tinged, and made use of the discovery. Purple was anciently used by the princes and great men for their garments. It was restricted to the emperor by Justinian I. 532, and *porphyrogenitus* attached to the names of some emperors signifies "born to the purple."

PURVEYANCE, an ancient prerogative of the sovereigns of England of purchasing provisions, &c., without the consent of the owners, led to much oppression. It was regulated by Magna Charta, 1215, and other statutes, and was only surrendered by Charles II. in 1660, for a compensation.

PUSEYISM, a name attached to the views of certain clergymen and lay members of the church of England, who proposed to restore the practice of the church of England to what they believed to be required by the language of her Liturgy and Rubrics, but which were considered by their opponents to be of a Romish tendency. The term was derived from the name of the professor of Hebrew at Oxford, Dr. Pusey. The heads of houses of the university of Oxford passed resolutions censuring Dr. Pusey's attempts to renew practices which are now obsolete, 15 March, 1841; and his celebrated sermon was condemned by the same body, 30 May, 1843; see *Tractarians*, and *Ritualism*.

PYRAMIDS OF EGYPT. The three principal are situated on a rock, at the foot of some high mountains which bound the Nile. The first building commenced, it is supposed, about 1500 B.C. The greatest is said to have been erected by Cheops, 1082 B.C., but earlier dates are assigned. The largest, near Gizeh, is 461 feet in perpendicular height, with a platform on the top 32 feet square, and the length of the base is 746 feet. It occupies about twelve acres of ground, and is constructed of stupendous blocks of stone. There are many other smaller pyramids to the south of these. They have been visited and described by Belzoni, 1815; Vyse, 1836; C. Piazzi Smyth, and others.—The *battles of the Pyramids*, when Bonaparte defeated the Mamelukes, and thus subdued Lower Egypt, took place 13 and 21 July, 1798; see *Egypt*.

PYRENEES. After the battle of Vittoria (fought 21 June, 1813), Napoleon sent Soult to supersede Jourdan, with instructions to drive the allies across the Ebro; Soult retreated into France with a loss of more than 20,000 men, having been defeated by Wellington in a series of engagements from 25 July to 2 Aug. One at the Pyrenees on 28 July. A railway through the Pyrenees (from Bilbao to Miranda) was opened 21 Aug. 1862.—THE PEACE OF THE PYRENEES was concluded between France and Spain, by cardinal Mazarin, for the French king, and don Louis de Haro, on the part of Spain, in the island of Pheasants, on the Bidassoa. By this treaty Spain yielded Roussillon, Artois, and her right to Alsace; and France ceded her conquests in Catalonia, Italy, &c., and engaged not to assist Portugal, 7 Nov. 1659.

PYROLETER, a mechanical and chemical apparatus for extinguishing fires, especially in ships, invented by Dr. Paton; tried at Greenhithe, and reported successful, 1 June, 1875.

PYROMETER (fire-measurer), an apparatus employed to ascertain the temperature of furnaces, &c., where thermometers cannot be employed; Muschenbroek's pyrometer (a metallic bar) was described by him in 1731. Improvements were made by Ellicott and others. Wedgwood employed clay cylinders, 1782-6. In 1830 professor Daniell received the Rumford medal for an excellent pyrometer made in 1821. Mr. Ericsson's pyrometer appeared in the Great Exhibition of 1851. (*Eng. Cyc.*) Mr. C. W. Siemens employed electric resistance in his pyrometers, exhibited in 1871.

PYROPHONE (Greek, *pur*, fire; *phone*, voice), a musical instrument, invented by M. Frédéric Kastner, of Paris. It consists of glass tubes of various lengths; the tones being produced by what are termed "singing flames." It is based upon the "chemical harmonicon." Keys are attached for playing, as in the piano. The invention was reported to the French Academy of Sciences, 17 March, 1873; exhibited at Vienna, same year; and at the Society of Arts, 17 Feb. 1875.

PYROXYLIN, the chemical name of *Gun Cotton* (*which see*).

PYRRHONISM, see *Sceptics*.

PYTHAGOREAN PHILOSOPHY, Pythagoras, of Samos, head of the Italic sect, flourished about 555 B.C. He is said to have taught the doctrine of metempsychosis, or transmigration of the soul from one body to another, forbidden his disciples to eat flesh and beans, invented the multiplication table, improved geometry, and taught the present system of astronomy.

Also said to have been established by Agamemnon, or Diomedes, or Amphictyon, or lastly, by the council of the Amphictyons, 1263 B.C. They lasted till 394.

PYX, the casket in which Catholic priests keep the consecrated wafer. In the ancient chapel of the pyx, at Westminster abbey, are deposited the standard pieces of gold and silver, under the joint custody of the lords of the treasury and the comptroller-general. The "*trial of the pyx*" signifies the verification by a jury of goldsmiths of the coins deposited in the pyx or chest by the master of the mint; this took place on 17 July, 1861, at the exchequer office, Old Palace-yard, in the presence of twelve privy councillors, twelve goldsmiths, and others, and on 15 Feb. 1870. This trial is said to have been ordered in the reign of Henry II., 1154-89; King James was present at one in 1611. The first *annual* trial of the pyx, appointed by the Coinage act of 1870, took place 18 July, 1871.

Quack medicines were taxed in 1783 *et seq.* An inquest was held on the body of a young lady, Miss Cashin, whose physician, St. John Long, was afterwards tried for manslaughter, 21 Aug. 1830; he was found guilty, and sentenced to pay a fine of 250*l.*, 30 Oct. following. He was tried for manslaughter in the case of Mrs. Catherine Lloyd, and acquitted, 19 Feb. 1831. Dr. Vriès, "the black doctor," a professed cancer-curer, at Paris, was condemned to fifteen months' imprisonment as an impostor in Jan. 1860; see *Homœopathy* and *Hydropathy*.

The Arabian astronomers under the caliphs, in 995, had a quadrant of 21 feet 8 inches radius, and a sextant 57 feet 9 inches radius. Davis's quadrant for measuring angles was produced about 1600; Hadley's quadrant about 1731; see *Navigation*.

QUÆSTOR, in ancient Rome, had the management of the public treasure; appointed about 484 B.C. It was the first office any person could bear in the commonwealth, and gave a right to sit in the senate. At first there were two quæstors, afterwards eight. Two were added in 409 B.C. Sylla raised the number to twenty; Julius Cæsar to forty. Two were called *Peregrini*, two (for the city) *Urbani*.

QUAKERS or **SOCIETY OF FRIENDS,** originally called Seekers, from their seeking the truth, and afterwards Friends (3 *John* 14). Justice Bennet, of Derby, gave the society the name of Quakers in 1650, because George Fox (the founder) admonished him and those present to quake at the word of the Lord. This sect was commenced in England about 1646, by George Fox (then aged 22), who was joined by George Keith, William Penn, and Robert Barclay, of Ury, and others. Fox rejected all religious ordinances, explained away the commands relative to baptism, &c.; discarded the ordinary names of days and months, and used *thee* and *thou* for *you*, as more consonant with truth. He published a book of instructions for teachers and professors, and died 13 Jan. 1691. The first meeting-house in London was in White Hart-court, Gracechurch-street.

The Quakers early suffered grievous persecutions. At Boston, U.S., where the first Friends who arrived were females, they (even females) were cruelly scourged, and had their ears cut off; some put to death.

In 1659 they stated in parliament that 2000 Friends had endured sufferings and imprisonment in Newgate: and 164 Friends offered themselves at this time, by name, to government, to be imprisoned in lieu of an equal number in danger (from confinement) of death, 1659.

Fifty-five (out of 120 sentenced) were transported to America, by an order of council, 1664.

The masters of vessels refusing to carry them for some months, an embargo was laid on West India ships, when a mercenary wretch was at length found for the service. The Friends would not walk on board, nor would the sailors hoist them into the vessel, and soldiers from the Tower were employed. In 1665, the vessel sailed; but it was immediately captured by the Dutch, who liberated twenty-eight of the prisoners in Holland, the rest having died of the plague. Few reached America.

Various southern cities have now lazarettos; that of Venice is built in the water. In the times of plague, England and all other nations oblige

those that come from the infected places to perform quarantine with their ships, &c., a longer or shorter time, as may be judged most safe. Quarantine acts were passed in 1753 and in 1825. By order of council, 10 Nov. 1866, foreign cattle were made subject to quarantine.

QUARTER SESSIONS were established, 25 Edw. III. 1350-1. The days of sitting were appointed, 2 Hen. V. 1413. In 1830 it was enacted that quarter sessions of the peace should be held in the first week after 11 Oct., 28 Dec., 31 March, and 24 June. Further regulated, 1842, 1848, and 1858.

The British fought with remarkable intrepidity, notwithstanding their inferiority in number, and their fatigue through marching all the preceding night. The 42nd regiment (Royal Highlanders) suffered severely in pursuit of a French division by cuirassiers posted in ambush behind growing corn. The duke of Brunswick was killed.

QUEEN'S COLLEGES, see *Cambridge* and *Oxford*. Queen's colleges, Ireland, from their unsectarian character termed the "Godless Colleges," were instituted in 1845, to afford education of the highest order to all religious denominations. They were placed at Belfast, Cork, and Galway; the last

was opened on 30 Oct. 1849.—THE "QUEEN'S UNIVERSITY in Ireland," comprehending these colleges, was founded by patent, 15 Aug. 1850; the earl of Clarendon, lord lieutenant, the first chancellor. These were "condemned" by the Propaganda and the pope, and by a majority (a small one) of the Irish bishops in a synod held at Thurles, in Sept. 1850. A supplemental charter, granted in June, 1866, created much dissension when acted upon in October following, and was suffered to expire, 31 Jan. 1868; see *Colleges*.

In fulfilment of a vow made before the engagement, the king built the monastery, palace, &c., the Escurial, considered by the Spaniards the eighth wonder of the world; see *Escurial*. During the Franco-German war the army of the north, under Faidherbe, was defeated here by the Germans after seven hours' fighting, on 19 Jan. 1871; total loss about 15,000: the German loss about 3100.

QUERETARO (Mexico), was besieged and taken (through the treachery of Lopez) by the liberal general Escobedo, 15th May, 1867. The emperor Maximilian and his generals Miramon and Mejia, were taken prisoners, and, after trial were shot 19 June following.

QUESNOY (N. France), was taken by the Austrians, 11 Sept. 1793, but was recovered by the French, 16 Aug. 1794. It surrendered to prince Frederick of the Netherlands, 29 June, 1815, after the battle of Waterloo.—It was here that cannon were first used, and called bombards. *Hénault.*

QUIBERON BAY (W. France). A British force landed here, Sept. 1746, but was repulsed. In the bay admiral Hawke gained a complete victory over the French admiral Conflans, and thus defeated the projected invasion of Great Britain, 20 Nov. 1759. Quiberon was taken by some French regiments in the pay of England, 3 July, 1795; but on 21 July, through treachery, the French republicans, under Hoche, retook it by surprise, and many emigrants were executed. About 900 of the troops, and nearly 1500 royalist inhabitants who had joined the regiments in the pay of Great Britain, effected their embarkation on board the ships.

QUICKSILVER, in its liquid state, mercury. Its use in refining silver was discovered, 1540. There are mines of it in various parts, the chief of which are at Almeida, in Spain, and at Idria, in Illyria; the latter, discovered by accident in 1497, for several years yielded 1200 tons. A mine was discovered at Ceylon in 1797. Quicksilver was congealed in winter at St. Petersburg, in 1759. It was congealed in England by a chemical process, without snow or ice, by Mr. Walker, in 1787. Corrosive sublimate, a deadly poison, is a combination of mercury and chlorine; see *Calomel*.

QUICUNQUE VULT, see *Athanasian Creed*.

QUIETISM, the doctrine of Miguel Molinos, a Spaniard (1627-96), whose work, the "Spiritual Guide," published in 1675, was the foundation of a sect in France. He held that religion consisted in an internal silent meditation on the merits of Christ and the mercies of God. Madame de la Mothe-Guyon, a quietist, was imprisoned in the Bastile for her visions and prophecies, but released through the interest of Fénelon, archbishop of Cambray, between whom and Bossuet, bishop of Meaux, arose a controversy, 1697. Quietism was finally condemned by pope Innocent XII. in 1699.

QUININE or **QUINIA**, an alkaloid (much used in medicine), discovered in 1820 by Pelletier and Caventou. It is a probable constituent of all genuine cinchona barks, especially of the yellow bark; see *Jesuits' Bark*. Artificial quinine was prepared (synthetically) by Mr. W. L. Scott, in Oct. 1865.—QUINOIDINE, see *Fluorescence*.

QUINQUAGESIMA SUNDAY. The observation is said to have been appointed by Gregory the Great (pope, 590-604). The first Sunday in Lent having been termed *Quadragesima*, and the three weeks preceding having been appropriated to the gradual introduction of the Lent fast, the three Sundays of these weeks were called by names significant of their position in the calendar: and

reckoning by decades (tenths), the Sunday preceding Quadragesima received its present name, *Quinquagesima*, the second *Sexagesima*, and the third *Septuagesima*.

QUINTILIANS, heretics in the 2nd century, the disciples of Montanus, who took their name from Quintilia, a lady whom he had deceived by his pretended sanctity, and whom they regarded as a prophetess. They made the eucharist of bread and cheese, and allowed women to be priests and bishops. *Pardon.*

Papirius Cursor, general in the Roman army, first erected a sun-dial in the temple of Quirinus, from which time the days began to be divided into hours, 293 B.C. *Aspin.* The sun-dial was sometimes called the Quirinus, from the original place in which it was set up. *Ashe.* The Sabines who became Roman citizens were termed QUIRITES.
